The Mission of Brigham Young University

The mission of Brigham Young University—founded, supported, and guided by The Church of Jesus Christ of Latter-day Saints—is to assist individuals in their quest for perfection and eternal life. That assistance should provide a period of intensive learning in a stimulating setting where a commitment to excellence is expected and the full realization of human potential is pursued.

All instruction, programs, and services at BYU, including a wide variety of extracurricular experiences, should make their own contribution toward the balanced development of the total person. Such a broadly prepared individual will not only be capable of meeting personal challenge and change but will also bring strength to others in the tasks of home and family life, social relationships, civic duty, and service to mankind.

To succeed in this mission the university must provide an environment enlightened by living prophets and sustained by those moral virtues which characterize the life and teachings of the Son of God. In that environment these four major educational goals should prevail:

- All students at BYU should be taught the truths of the gospel of Jesus Christ. Any education is inadequate which does not emphasize that His is the only name given under heaven whereby mankind can be saved. Certainly all relationships within the BYU community should reflect devout love of God and a loving, genuine concern for the welfare of our neighbor.
- Because the gospel encourages the pursuit of all truth, students at BYU should receive a broad university education. The arts, letters, and sciences provide the core of such an education, which will help students think clearly, communicate effectively, understand important ideas in their own cultural tradition as well as that of others, and establish clear standards of intellectual integrity.
- In addition to a strong general education, students should also receive instruction in the special fields of their choice. The university cannot provide programs in all possible areas of professional or vocational work, but in those it does provide the preparation must be excellent. Students who graduate from BYU should be capable of competing with the best in their fields.
- Scholarly research and creative endeavor among both faculty and students, including those in selected graduate programs of real consequence, are essential and will be encouraged.

In meeting these objectives BYU's faculty, staff, students, and administrators should also be anxious to make their service and scholarship available to The Church of Jesus Christ of Latter-day Saints in furthering its work worldwide. In an era of limited enrollments, BYU can continue to expand its influence both by encouraging programs that are central to the Church's purposes and by making its resources available to the Church when called upon to do so.

We believe the earnest pursuit of this institutional mission can have a strong effect on the course of higher education and will greatly enlarge Brigham Young University's influence in a world we wish to improve.

—Approved by the BYU Board of Trustees
November 4, 1981

The Aims of a BYU Education

Education is the power to think clearly, the power to act well in the world's work, and the power to appreciate life.

— Brigham Young[1]

The mission of Brigham Young University is "to assist individuals in their quest for perfection and eternal life" ("The Mission Statement of Brigham Young University" [hereafter Mission Statement]). To this end, BYU seeks to develop students of faith, intellect, and character who have the skills and the desire to continue learning and to serve others throughout their lives. These are the common aims of all education at BYU. Both those who teach in the classroom and those who direct activities outside the classroom are responsible for contributing to this complete educational vision.

The statement that follows reaffirms and expands on the earlier and more general Mission Statement adopted in 1981. As the quotations under each heading suggest, this document also draws on the religious and educational teachings of the university's founding prophet, Brigham Young. Quotations within the text come from the scriptures and from the counsel of modern prophets, whose teachings about BYU lay the foundation of the university's mission.

The following four sections discuss the expected outcomes of the BYU experience. A BYU education should be (1) spiritually strengthening, (2) intellectually enlarging, and (3) character building, leading to (4) lifelong learning and service. Because BYU is a large university with a complex curriculum, the intellectual aims are presented here in somewhat greater detail than the other aims. Yet they are deliberately placed within a larger context. The sequence flows from a conscious intent to envelop BYU's intellectual aims within a more complete, even eternal, perspective that begins with spiritual knowledge and ends with knowledge applied to the practical tasks of living and serving.

Spiritually Strengthening

Brother Maeser, I want you to remember that you ought not to teach even the alphabet or the multiplication tables without the Spirit of God.

—Brigham Young[2]

The founding charge of BYU is to teach every subject with the Spirit. It is not intended "that all of the faculty should be categorically teaching religion constantly in their classes, but . . . that every . . . teacher in this institution would keep his subject matter bathed in the light and color of the restored gospel."[3]

This ideal arises from the common purpose of all education at BYU—to build testimonies of the restored gospel of Jesus Christ. A shared desire to "seek learning, even by study and also by faith" (D&C 88:118) knits BYU into a unique educational community. The students, faculty, and staff in this community possess a remarkable diversity of gifts, but they all think of themselves as brothers and sisters seeking together to master the academic disciplines while remaining mastered by the higher claims of discipleship to the Savior.

A spiritually strengthening education warms and enlightens students by the bright fire of their teachers' faith while enlarging their minds with knowledge. It also makes students responsible for developing their own testimonies by strenuous effort. Joseph Smith's words apply equally to faculty and students at BYU: "Thy mind, O man! if thou wilt lead a soul unto salvation, must stretch as high as the utmost heavens, and search into and contemplate the darkest abyss, and the broad expanse of eternity—thou must commune with God."[4] Students need not ignore difficult and important questions. Rather, they should frame their questions in prayerful, faithful ways, leading them to answers that equip them to give "a reason of the hope that is in" them (1 Peter 3:15) and to articulate honestly and thoughtfully their commitments to Christ and to his Church.

Intellectually Enlarging

Every accomplishment, every polished grace, every useful attainment in mathematics, music, and in all science and art belong to the Saints, and they should avail themselves as expeditiously as possible of the wealth of knowledge the sciences offer to every diligent and persevering scholar.

—Brigham Young[5]

The intellectual range of a BYU education is the result of an ambitious commitment to pursue truth. Members of the BYU community rigorously study academic subjects in the light of divine truth. An eternal perspective shapes not only *how* students are taught but *what* they are taught. In preparing for the bachelor's degree, students should enlarge their intellects by developing skills, breadth, and depth: (1) skills in the basic tools of learning, (2) an understanding of the broad areas of human knowledge, and (3) real competence in at least one area of concentration. Further graduate studies build on this foundation.

Undergraduate

1. Skills. BYU undergraduates should acquire the basic tools needed to learn. The essential academic learning skills are the abilities

to think soundly, to communicate effectively, and to reason proficiently in quantitative terms. To these ends, a BYU bachelor's degree should lead to:

- *Sound thinking*—reasoning abilities that prepare students to understand and solve a wide variety of problems, both theoretical and practical. Such skills include the ability to keep a proper perspective when comparing the things that matter most with things of lesser import. They also include the ability to engage successfully in logical reasoning, critical analysis, moral discrimination, creative imagination, and independent thought.
- *Effective communication*—language abilities that enable students to listen, speak, read, and write well; to communicate effectively with a wide range of audiences in one's area of expertise as well as on general subjects. For many students this includes communicating in a second language.
- *Quantitative reasoning*—numerical abilities that equip students with the capacity to understand and explain the world in quantitative terms; to interpret numerical data; and to evaluate arguments that rely on quantitative information and approaches.

2. Breadth. BYU undergraduates should also understand the most important developments in human thought as represented by the broad domains of knowledge. The gospel provides the chief source of such breadth because it encompasses the most comprehensive explanation of life and the cosmos, supplying the perspective from which all other knowledge is best understood and measured. The Lord has asked his children to "become acquainted with all good books, and with languages, tongues, and people" (D&C 90:15); to understand "things both in heaven and in the earth, and under the earth; things which have been, things which are, things which must shortly come to pass; things which are at home, things which are abroad; the wars and the perplexities of the nations . . . ; and a knowledge also of countries and of kingdoms" (D&C 88:79).

"Because the gospel encourages the pursuit of all truth, students at BYU should receive a broad university education [that will help them] understand important ideas in their own cultural tradition as well as that of others" (Mission Statement). Specifically, BYU undergraduate students should be educated in the following broad areas of human knowledge:

- *Religion*—the doctrines, the covenants, the ordinances, the standard works, and the history of the restored gospel, as well as an awareness of other religious traditions.
- *Historical perspective*—the development of human civilization, appreciation for the unique contributions of America to modern civilization, and a general historical perspective, including perspective on one's own discipline.
- *Science*—The basic concepts of the physical, biological, and social sciences, and a recognition of the power and limitations of the scientific method—preferably through laboratory or field experience.
- *Arts and letters*—lively appreciation of the artistic, literary, and intellectual achievements of human cultures—including Western culture and, ideally, non-Western as well.
- *Global awareness*—informed awareness of the peoples, cultures, languages, and nations of the world.

3. Depth. BYU undergraduates should develop competence in at least one area of concentration. Competence generally demands study in depth. Such in-depth study helps prepare students for their life's work; it also teaches them that genuine understanding of any subject requires exploring it fully. Students normally acquire such depth from their major and minor fields. BYU's religion requirement also asks all students to develop depth in scriptural studies and religion.

Depth does not result merely from taking many courses in a field. Indeed, excessive course coverage requirements may discourage rather than enhance depth. Depth comes when students realize "the effect of rigorous, coherent, and progressively more sophisticated study." Depth helps students distinguish between what is fundamental and what is only peripheral; it requires focus, provides intense concentration, and encourages a "lean and taut" degree that has a "meaningful core" and a purposefully designed structure (Memorandum to the Faculty No. 13). In addition to describing carefully structured academic majors, this description applies to well-designed BYU courses of all kinds.

The chief result of depth is competence. BYU's students should be "capable of competing with the best students in their field" (Mission Statement). Even so, undergraduate study should be targeted at entrance-level, not expert-level, abilities. The desire for depth should not lead to bachelor's degrees that try to teach students everything they will need to know after graduation. Students should be able to complete their degrees within about four years.

Undergraduate programs should prepare students to enter the world of work or to pursue further study. Often this requires educational activities that help upperclassmen culminate their studies by integrating them in a capstone project, honors thesis, senior seminar, or internship. By the time they graduate, students should grasp their discipline's essential knowledge and skills (such as mathematical reasoning, statistical analysis, computer literacy, foreign language fluency, laboratory techniques, library research, and teaching methods), and many should have participated in scholarly or creative activities that let them demonstrate their mastery.

Graduate

Building on the foundation of a strong bachelor's degree, graduate education at BYU asks for even greater competency. Graduate studies may be either academic or professional and at either the master's or doctoral level. In all cases, BYU graduate programs, like undergraduate programs, should be spiritually strengthening as well as intellectually enlarging.

Graduate programs should help students achieve excellence in the discipline by engaging its primary sources; mastering its literature, techniques, and methodologies; and undertaking advanced systematic study—all at a depth that clearly exceeds the undergraduate level. In addition, graduate programs should prepare students to contribute to their disciplines through their own original insights, designs, applications, expressions, and discoveries. Graduate study should thereby enable a variety of contributions—such as teaching complex knowledge and skills, conducting original research, producing creative work that applies advanced learning in the everyday world, and extending professional service to the discipline and to society.

These intellectual aims of a BYU education are intended to give students understanding, perspective, motivation, and interpersonal abilities—not just information and academic skills. BYU should furnish students with the practical advantage of an education that integrates academic skills with abstract theories, real-world applications, and gospel perspectives. Such an education prepares students who can make a difference in the world, who can draw on their academic preparation to participate more effectively in the arenas of daily life. They are parents, Church leaders, citizens, and compassionate human beings who are able to improve the moral, social, and ecological environment in which they and their families live. They are scientists and engineers who can work effectively in teams and whose work reflects intellectual and moral integrity; historians who write well and whose profound understanding of human nature and of divine influences informs their interpretation of human events; teachers whose love for their students as children of God is enriched by global awareness and foreign language skill; artists whose performances seek to be flawless in both technique and inspiration; business leaders whose economic judgments and management styles see financial reward not as an end but as a means to higher ends. BYU graduates thus draw on an educated intellect to enhance not only what they

know but also what they *do* and, ultimately, what they *are*.

Character Building

A firm, unchangeable course of righteousness through life is what secures to a person true intelligence.

—Brigham Young[6]

Because it seeks to educate students who are renowned for what they are as well as for what they know, Brigham Young University has always cared as much about strong moral character as about great mental capability. Consequently, a BYU education should reinforce such moral virtues as integrity, reverence, modesty, self-control, courage, compassion, and industry. Beyond this, BYU aims not merely to teach students a code of ethics but to help them become partakers of the divine nature. It aspires to develop in its students character traits that flow from the long-term application of gospel teachings to their lives. This process begins with understanding humankind's eternal nature and ends with the blessing of eternal life, when human character reflects in fully flowered form the attributes of godliness. Along the way, the fruits of a well-disciplined life are augmented and fulfilled by the fruits of the spirit of Jesus Christ—such as charity, a Christlike love for others, which God "hath bestowed upon all who are true followers of his Son, Jesus Christ" (Moroni 7:48). Students thus perfect their quest for character development by coming unto Christ through faith, repentance, and righteous living. Then their character begins to resemble his, not just because they think it should but because that is the way they are.

President David O. McKay taught that character is the highest aim of education: above knowledge is wisdom, and above wisdom is character. "True education," he explained, "seeks to make men and women not only good mathematicians, proficient linguists, profound scientists, or brilliant literary lights, but also honest men with virtue, temperance, and brotherly love."[7] Consequently, a BYU education should bring together the intellectual integrity of fine academic discipline with the spiritual integrity of personal righteousness. The result is competence that reflects the highest professional and academic standards—strengthened and ennobled by Christlike attributes.

Thus understood, the development of character is so important that BYU "has no justification for its existence unless it builds character, creates and develops faith, and makes men and women of strength and courage, fortitude, and service—men and women who will become stalwarts in the Kingdom and bear witness of the . . . divinity of the gospel of Jesus Christ. It is not justified on an academic basis only."[8] Rather, it fulfills its promise when "the morality of the graduates of this University provide[s] the music of hope for the inhabitants of this planet."[9]

Every part of the BYU experience should therefore strengthen character—academic integrity in taking a test or writing a research paper; sportsmanship on the playing field; the honest reporting of research findings in a laboratory; careful use of university funds derived from the tithes of Church members; treating all other people with dignity and fairness; and wholehearted acceptance of commitments made to bishops and parents. Character is constructed by small decisions. At this personal level of detail, BYU will realize its hope of teaching "those moral virtues which characterize the life and teachings of the Son of God" (Mission Statement).

Lifelong Learning and Service

We might ask, when shall we cease to learn? I will give you my opinion about it; never, never. . . . We shall never cease to learn, unless we apostatize from the religion of Jesus Christ.

—Brigham Young[10]

Our education should be such as to improve our minds and fit us for increased usefulness; to make us of greater service to the human family.

—Brigham Young[11]

Well-developed faith, intellect, and character prepare students for a lifetime of learning and service. By "entering to learn" and continuing to learn as they "go forth to serve," BYU students strengthen not only themselves—they "also bring strength to others in the tasks of home and family life, social relationships, civic duty, and service to mankind" (Mission Statement).

1. Continual Learning. BYU should inspire students to keep alive their curiosity and prepare them to continue learning throughout their lives. BYU should produce careful readers, prayerful thinkers, and active participants in solving family, professional, religious, and social problems. They will then be like Abraham of old, who had been "a follower of righteousness, desiring also to be one who possessed great knowledge, and to be a greater follower of righteousness, and to possess a greater knowledge, . . . desiring to receive instructions, and to keep the commandments of God." In this lifelong quest, they, like Abraham, will find "greater happiness and peace and rest" (Abraham 1:2). Thus a BYU diploma is a beginning, not an end, pointing the way to a habit of constant learning. In an era of rapid changes in technology and information, the knowledge and skills learned this year may require renewal the next. Therefore, a BYU degree should educate students in how to learn, teach them that there is much still to learn, and implant in them a love of learning "by study and also by faith" (D&C 88:118).

2. Service. Since a decreasing fraction of the Church membership can be admitted to study at BYU, it is ever more important that those who are admitted use their talents to build the kingdom of God on the earth. Hence, BYU should nurture in its students the desire to use their knowledge and skills not only to enrich their own lives but also to bless their families, their communities, the Church, and the larger society. Students should learn, then demonstrate, that their ultimate allegiance is to higher values, principles, and human commitments rather than to mere self-interest. By doing this, BYU graduates can counter the destructive and often materialistic self-centeredness and worldliness that afflict modern society. A service ethic should permeate every part of BYU's activities—from the admissions process through the curriculum and extracurricular experiences to the moment of graduation. This ethic should also permeate each student's heart, leading him or her to the ultimate wellspring of charity—the love for others that Christ bestows on his followers.

Conclusion

Education is a good thing, and blessed is the man who has it, and can use it for the dissemination of the Gospel without being puffed up with pride.

—Brigham Young[12]

These are the aims of a BYU education. Taken together, they should lead students toward wholeness: "the balanced development of the total person" (Mission Statement). These aims aspire to promote an education that helps students integrate all parts of their university experience into a fundamentally sacred way of life—their faith and reasoning, their knowledge and conduct, their public lives and private convictions. Ultimately, complete wholeness comes only through the Atonement of him who said, "I am come that they might have life, and that they might have it more abundantly" (John 10:10). Yet a university education, guided by eternal principles, can greatly "assist individuals in their quest for" that abundant "eternal life" (Mission Statement).

A commitment to this kind of education has inspired the prophets of the past to found Church schools, like BYU, on the principle that "to be learned is good if they hearken unto the counsels of God" (2 Nephi 9:29). These prophets have known the risks of such an enterprise, for "that happiness which is prepared for the saints" shall be hid forever from those "who are puffed up because of their learning, and their wisdom" (see 2 Nephi 9:42–43). Yet they have also known that education plays a vital role in realizing the promises of the Restoration; that a broad vision of education for self-reliance and personal growth is at the very heart of the gospel when the gospel is at the heart of education. To the degree that BYU achieves its aims, the lives of its students will confirm Brigham Young's confidence that education is indeed "a good thing," blessing all those who humbly and faithfully use it to bless others.

The Mission of BYU

The Aims of a BYU Education

A Unique Environment

Map of Campus

Nondiscrimination

Right to Change Courses

Accreditation

Brigham Young University: A Unique Environment

Religious Environment

The Church of Jesus Christ of Latter-day Saints sponsors BYU to provide a university education in an atmosphere that nurtures spiritual growth and a strong conviction of the divinity of Jesus Christ. Church programs are closely correlated at all levels with the activities of the university, and students will find many opportunities to grow spiritually.

Religion Classes

All students at BYU should include regular gospel study as a continuous part of their university experience. Full-time undergraduate students take one religion class each semester of enrollment until a total of 14 semester hours of religion credit has been earned. See The University Core section of this catalog for more information.

University Devotionals

University devotionals, held throughout the year on Tuesdays at 11:05 a.m., form an inspirational and integrative part of the university experience. These assemblies are occasions to celebrate the shared sense of values and community in the university. Participation in these gatherings will renew spiritual commitment and extend knowledge of significant religious, intellectual, and cultural matters. Devotional speakers, selected from the General Authorities and other leaders of the Church as well as university personnel, come to teach the gospel and affirm the spiritual dimension of the university experience for students, faculty, and staff.

Most campus offices and services are closed during university devotionals and forums so that members of the university community may participate.

BYU Stakes and Wards

To give students maximum opportunity to participate, the Church is organized into a number of BYU stakes composed of several wards of approximately 150 members each. All single students living away from home who are members of The Church of Jesus Christ of Latter-day Saints become members of a Young Single Adult (YSA) ward. Single LDS students living at home have the option of attending their home ward or a designated YSA ward. Married students not living in university housing may attend either the designated BYU ward or the residential ward in which they live.

Other Religious Denominations

Approximately twenty-five other religious denominations are represented in the BYU student body. These students are encouraged to attend a congregation of their faith in the surrounding area, if possible.

Academic Environment

The academic environment extends beyond the four walls of a university classroom. Serious students seek enrichment in the library, at university forums and lectures, and through research. Some students may choose to become involved in the Honors Program or live in one of the "quiet halls" on campus—and everyone benefits from drawing on the resources available at college advisement centers.

New Student Orientation

The purpose of New Student Orientation (NSO) is to 1) welcome new and transfer students into the BYU community of disciple-scholars, 2) help new students understand and appreciate the unique opportunities provided by a BYU education, 3) introduce key campus resources, and 4) offer new students a great chance to connect with other students, faculty members, and university staff.

NSO events and activities range from the academic through the informational to the out-and-out fun, but they are always friendly and focused on the needs of new students. NSO activities vary according to the term or semester. In addition to a welcome from the administration and a campus tour, each orientation may include a university devotional; library tour; meetings about colleges and majors, financial aid and scholarships, the Honors Program; and an introduction to several of the traditions at the Y.

Many of the activities are organized around Y Groups, small cohorts of students led by upperclassmen, which offer students personalized attention and support. Orientation at BYU balances the various needs of new students by combining appropriate resources, activities, and personnel. To become fully integrated into an institution as large and complex as BYU, active participation in NSO is vital.

New Student Orientation is held three times a year, immediately prior to winter semester, summer term, and fall semester. Please see http://fye.byu.edu/fye/about-nso for detailed information and registration.

University Forums

University forums are held on selected Tuesdays at 11:05 a.m. and are designed to enrich the general education experience.

Speakers are noted authorities in the arts and humanities, sciences, media, and government, chosen for their contributions to their field and their ability to inspire and communicate. Participation in these assemblies and the associated question-and-answer sessions prompts inquiry into significant intellectual, cultural, and social issues and helps lay the foundation for lifelong learning. A forum speaker may be nominated by any member of the university community (student, faculty, or staff). Please see the nomination form at http://ge.byu.edu/ge/forum-speaker-nomination.

Harold B. Lee Library

The Harold B. Lee Library (HBLL) collection numbers over eight million volumes, including books, e-books, periodicals, government documents, microfilm, and other nonprint items. The library's Web-based catalog contains numerous full-text databases and many electronic indexes to other sources. The library provides thousands of seats for research at tables, on soft chairs, and in group study rooms. Both wireless and Ethernet access are available along with printing, copying, and scan to e-mail services.

The library houses the L. Tom Perry Special Collections whose non-circulating collections include books and manuscripts related to Mormonism, western Americana, incunabula, Victorian and Edwardian literature, historical manuscripts and photographs, motion pictures, and many other preserved items for research and use. The Religion and Family History Library supports family history and genealogy through an extensive collection of microfilm, microfiche, and online resources.

The general collection is housed on five levels of the library. A learning commons is located on the ground floor (level 3), and professional librarians and support staff provide research assistance at seven additional help desks. Instruction in library and information literacy is available. The general library facilities are open to students, faculty, administrative and staff personnel, alumni, and other community patrons.

The Lee Library provides excellent teaching and research support for faculty and other university personnel. Library subject specialists and archival curators are available for instruction or lectures on library resources and to assist in designing class assignments that involve library research.

The library is open during fall and winter semesters from 7:00 a.m. to midnight Monday through Friday and from 8:00 a.m. to midnight Saturday.

Through cooperative agreements implemented through state and national library consoria, BYU students and faculty may also use the facilities of other college and university libraries in Utah as well as select libraries in other states. Libraries operated by The Church of Jesus Christ of Latter-day Saints are also available to BYU students and employees, including the library of the Church Historical Department located in Salt Lake City.

The Lee Library provides a faculty delivery service for pickup and delivery of books to and from faculty and administrative offices.

For books unavailable at the Harold B. Lee Library, an interlibrary loan service is available. Requests should be submitted through the ILLiad request system available on the library's web page (http://library.byu.edu).

Research and Creative Activities at BYU

One of the most exciting and valuable learning experiences available to both undergraduate and graduate students at BYU is the opportunity to participate in original research and creative activities. BYU has accomplished faculty members in all areas, many of whom enjoy international reputations for the quality of their creative endeavors. Many professors enlist the help of undergraduate students, who work side by side with faculty mentors and graduate students in a laboratory or studio setting.

A wide variety of research experiences are available in many departments across campus. For example, the student might be involved in the synthesis of a new medicinal drug in the chemistry laboratory or participate in the discovery of a new species of dinosaur on a Colorado mesa. Other examples of programs involving student participation include the study of robotics systems, computer architecture, battery technology, high-energy physics, international business methods, child psychology, educational methodology, molecular genetics, social implications of drug use, stability and satisfaction in marriage, Church history, and a host of other topics. Students who are interested in participating in research programs are encouraged to contact their major department chair or speak directly with individual professors.

The **Office of Research and Creative Activities (ORCA)** manages, on behalf of the administration, two programs whose purpose is to bring together students and faculty in mentored experiences. The first is the ORCA Mentoring Grants for Undergraduates Program. Requests for proposals go out to all undergraduate, full-time students. One-third of all proposals are usually funded at $1500 each. Awards are made early in the semester following application. The second is the Mentored Environments Grants Program. Faculty are encouraged to submit proposals to create or enhance a mentored environment for undergraduate and graduate students. Awards range from $2,000 to $20,000, and proposals are collected in late fall and awarded in midwinter. For more information, contact any department or college, or contact ORCA at A-285 ASB, (801) 422-3841, http://orca.byu.edu.

Internships

Internships and other applied learning experiences, such as clinical and field studies, integrate academic studies with professional or career-related work experience. They are required by some degree programs and recommended by others to strengthen or complement a student's major or minor field of study. In addition to experiences within the United States, opportunities in international settings are also available when approved by the David M. Kennedy Center for International Studies.

Students who want or need academic credit for internships and other formal applied, cooperative learning experiences must receive prior department and university approval and complete formal registration before commencing. Course offerings vary according to student and program needs. Registration in a department's 199R, 299R, 399R, 496R, 599R, or 688R course is required for internship credit. Individual departments specify course numbers for clinical, practicum, or other applied, cooperative learning courses. Credit varies, generally ranging from 0.5 to 12 credit hours. Grades are based on both academic and work-related accomplishments.

To learn more about the opportunities and benefits of applied, cooperative learning experiences, contact a college or department internship coordinator, visit or call the BYU Internship Office (5435 HBLL, 801-422-3337), or go to http://saas.byu.edu/intern.

Center for Service and Learning

2010 WSC and 2330 WSC
(801) 422-8686
yserve.byu.edu

The mission of the Center for Service and Learning is to "provide every student with a meaningful service opportunity...to instill in the heart and mind a desire to give lifelong service." In order to provide every student with a meaningful service opportunity, the Center administers over 63 community service programs. These programs, which are led and staffed by student volunteer program directors and service council members, serve individuals and organizations in the local community. As student volunteers learn to serve their community, their desire to be engaged in lifelong service becomes an integral part of their character.

Students choose to make service a part of their lives for academic, leadership, recognition, social, and spiritual reasons. Through the Center, students can enroll in Student Development 290: *Learning Through Service*, which links theories of service with actual service experiences. They can also develop their leadership skills by serving on the student service council or as a program director. By completing the requirements for any of the three recognition programs, they can receive an official documentation and certification of their service. They can socialize with other students as they serve, and can recognize the spiritual aspects of service as they participate in reflection activities.

More than 23,000 students are engaged in service each year through Center programs. These programs provide a variety of services, including programs for children and adults with cognitive or physical disabilities, mentoring at-risk youth, tutoring children in the public schools, tutoring other BYU students in their college classes, helping build houses for low-income families, or providing manual labor to clean up and maintain community areas. These programs are under the leadership of more than 220 student volunteers who are learning leadership skills as they administer their programs. In addition to these formal community service programs, Stop-n-Serve is available in 2330 WSC for students to drop in and perform service in the few minutes they may have between classes.

Student Development Course Work

The Counseling and Career Center offers courses under the title Student Development. These courses are designed to help with the personal challenges and tasks facing college students. Some of the relevant student-centered topics are college study skills, life planning, time management, decision making, and test taking strategies. Several courses are designed to help students decide on a college major and career and to make the transition from college to the world of work. Each class has material to help students identify their values, develop character, and make progress with their personal goals for life. The BYU Undergraduate Catalog and the current class schedule list these courses under Student Development. For further information contact the Counseling and Career Center, 2510 WSC, (801) 422-6291.

Academic Support Office

2500 WSC
(801) 422-2723
E-mail: academic_support@byu.edu
Web: http://aso.byu.edu/

All students admitted to the university have the potential to succeed academically; however, some students have difficulty achieving the level of success required to remain in good academic standing. The mission of the Academic Support Office (ASO) is to assist students in maintaining that level of academic success. The ASO, a department of Student Life, uses the combined resources of the university to help students who are on the academic standing of warning, probation, or continued academic probation (CAP) resolve most academic problems.

Students with academic problems often have difficulties in one or more of the following areas: (1) Personal concerns outside the academic realm such as adjustment problems, illness, or relationship problems that distract from academic goals. Such problems may be addressed by helping students refocus on their goals and giving referrals to appropriate on-campus resources. (2) Inadequate academic preparation to meet the rigors of a university experience. Study-skills training helps students identify strategies appropriate to the university experience. (3) Learning styles that worked in high school but are not productive at the university. Assessment and advisement may help students identify and use academic strengths more successfully.

Advisors and peer coaches are trained to assist students with time management, study skills, learning style, and other academic concerns. Students who experience academic difficulties and are on warning, probation, CAP, or are facing academic suspension or dismissal from the university are encouraged to contact the ASO. Students on good or previous academic standing who would like access to these kinds of resources should visit the Career and Academic Success Center (CASC) in 2590 WSC (801-422-2689).

Graduate Studies

105 FPH
Phone: (801) 422-4091

To the student seeking advanced study, Brigham Young University offers a variety of graduate degree opportunities. Excellent graduate programs can be found in each of the colleges and schools, and successful completion results in the awarding of a master's or doctoral degree.

The master's degree requires advanced course work, demonstrated mastery in vital aspects of a discipline, skill in research methodology and theory, and preparation for future creative work. In certain disciplines, graduate programs blend scholarly insight with technical knowledge and skill. Integrative examinations, a major culminating piece of written work or performance, and an accompanying oral defense of that work may be required.

The doctoral degree requires the student to demonstrate an impressive scholarly competence, which includes the ability to conduct and report research in a highly effective manner. Advanced systematic study in a discipline is also essential and is followed by comprehensive examinations that require students to integrate and understand the collective knowledge of their disciplines. A dissertation resulting from independent research is defended in a concluding oral examination.

Students who are interested in pursuing advanced degrees are encouraged to become involved in research and creative activities during their undergraduate experience.

For information about master's and doctoral degree programs, students should consult the BYU Graduate Catalog online at http://graduatestudies.byu.edu.

Application information is available online at http://graduatestudies.byu.edu, through Graduate Studies, and through individual departments. For information regarding admission to the J. Reuben Clark Law School, see the Law School section of this catalog.

Cultural Environment

Students can immerse themselves in culture at BYU. Dance, theatre, music, art exhibits, museums—all nourish the soul seeking after "anything virtuous, lovely, or of good report or praiseworthy."

As part of their educational experience, students, both individually and in groups, present concerts, exhibitions, films, plays, recitals, and productions which are available to the community. Classical, contemporary, and original works are offered throughout the year. Each of the performance areas also have ensembles that perform on and off campus.

The BYU Performing Arts Series presents some of the most celebrated artists in the world. Concerts and productions are scheduled

throughout each year in the Harris Fine Arts Center and other venues.

In recent years the Performing Arts Series has included:

Utah Symphony
Guarneri String Quartet
Frederica von Stade
Shangri-la Chinese Acrobats
Zagreb Saxophone Quartet
Brian Stokes Mitchell
Lea Salonga
Theater Mitu
The Cashore Marionettes
Parsons Dance
The Martha Graham Dance Company
Chanticleer
The King's Singers

For further information on student, faculty, and Performing Arts Series productions, contact the Fine Arts Ticket Office at (801) 422-HFAC (4322), or visit our website at http://www.byuarts.com/.

Museum of Art

The Museum of Art was completed and opened during fall 1993. Funded by private donors, the 100,000-square-foot museum is located directly north of the Harris Fine Arts Center. A sculpture garden separates the two buildings, and together they form striking visual and performing arts centers. The museum houses the university's superb collection of paintings, sculpture, decorative arts, and works on paper.

Major bodies of work the university owns are by eminent artists such as Mahonri Y. Young, J. Alden Weir, Maynard Dixon, C. C. A. Christensen, and Minerva Teichert. Besides its rich array of American art, the collection includes 20th century and contemporary landscape, 20th century and contemporary landscape, documentary and street photography and a growing collection of important religious works and rare prints by Rembrandt, Dürer, and Daumier. The museum is also committed to exhibiting and exploring the art of our time, acquiring work by significant living artists such as Dan Steinhilber, Harrell Fletcher, Georges Rousse, and Lewis Baltz.

Major traveling exhibitions and exhibitions from the museum's permanent collections are scheduled on a rotating basis. Previous exhibitions include works by Rodin, Carl Bloch, and Islamic artifacts in the exhibition entitled *Beauty and Belief*.

Students play an important role in the Museum of Art. Not only are they employed in service capacities in each of the museum's departments but the museum also offers a rigorous internship program that affords selected students opportunities to be mentored on significant projects in museum education, curation, registration, administration, and even fabrication. Many students also serve as volunteer docents.

The museum offers a variety of educational programs for campus and community audiences as well. Included in the museum are a print study room, a lecture room, and an orientation theater. The museum also features a café, bookstore, and auditorium.

M. L. Bean Life Science Museum

Larry L. St. Clair, Director
Leigh Johnson, Associate Director
Marta Adair, Assistant Director
290 MLBM

Note: Due to the construction of a 30,000 square foot addition to the Life Science Museum, it will be closed to the public until March 2014.

The Monte L. Bean Life Science Museum is accredited by the American Alliance of Museums. Its vast teaching and research collections include more than two million arthropods, fish, amphibians, reptiles, mammals, birds, and prepared shells, and more than 600,000 plants, lichens, and bryophytes. Specimens for these collections, which represent creative work by university faculty and students, have been gathered from around the world, making the museum one of the major repositories of scientific-quality, biological collections in the western United States.

The museum and its collections are utilized by university classes in biology, plant and wildlife sciences, education, art, and other disciplines. The Monte L. Bean Life Science Museum also maintains and manages the Lytle Ranch Preserve. Located in the northernmost extension of the Mojave Desert southwest of St. George, Utah, this 600-acre desert classroom is situated in a part of Utah that is unique not only for its plant and animal communities but also for its setting at the crossroads of three major bioregions.

Public programs include temporary and permanent exhibits of natural communities that illustrate complex relationships between plants, animals, and their physical environment. Educational programs which serve more than 100,000 annual visitors and provide classes and programs for BYU students as well as public and private schools and many other organizations. Museum hours are Monday through Friday from 10:00 a.m. to 9:00 p.m. and Saturday from 10:00 a.m. to 5:00 p.m. The museum is closed on Sunday. Admission is free.

The Western North American Naturalist, a nationally recognized peer-reviewed natural history journal, is housed in the museum. Other museum publications include professional and popular works such as *A Utah Flora, Bark and Ambrosia Beetles of South America, Snakes of Utah,* and *Common Rocky Mountain Lichens*.

Museum of Peoples and Cultures

Paul R. Stavast, Director
Kari Nelson, Curator of Education
105 ALLN

The Museum of Peoples and Cultures (MPC) houses, cares for, and performs research on archaeological and ethnographic collections from around the world. The strengths of the museum's holdings are in prehistoric Utah, the American Southwest, Mesoamerica, Andean cultures, and Polynesia. An approved state and federal archaeological repository, the museum also holds a noncirculating library and a photographic archive documenting BYU archaeological research and artifactual materials.

Institutional objectives are to interpret and help elucidate the history and culture of the peoples of the world and to convey that knowledge to the scholarly community as well as to the general public. The museum's strongest commitment lies in serving the teaching and research functions of the university. In this, BYU's "teaching museum," not only do students perform office and collections duties, but they also curate all exhibitions as part of the formal curricula taught by museum staff adjunct to the

Department of Anthropology. Students plan and execute public programs and design promotional strategy as part of their course work as well. These curricula are available in the department's Certificate in Museum Practices program. Students concurrently enrolled in a cognate master's program are eligible to apply to this graduate program. Three of the certificate courses (Anthr 511, 522, and 525) have no prerequisite and are available for undergraduate enrollment.

The museum's student exhibitions are staged in Allen Hall and change with each certificate class. The museum also produces occasional satellite exhibits at other university locations, such as the Museum of Art and the Joseph Smith Building. Tours of the Allen Hall galleries can be arranged by calling (801) 422-0020. Because scheduling is based on student employee availability, it is advisable to book tours from one to three weeks in advance. Visitors may also choose to guide themselves through the galleries, but groups larger than fifteen people should contact the museum in advance for logistical instructions.

The MPC offers many community educational opportunites. Available for loan to classrooms and inbound populations are anthropology teaching kits that explore the native cultures of various geographical areas. The kits include replica artifacts, handicrafts, and educational books and videos. Students and civic volunteers are invited to help with educational programming, public relations, archaeological research, and public presentations. The MPC hosts an activity patch program for Scouts of all ages and other interested parties. Museum patches can be earned by visiting the museum and completing the patch requirements. For information about any of these programs, call (801) 422-0020.

Located at 700 North 100 East in Provo (one block south of the Brick Oven restaurant), the museum is open from 9:00 a.m. to 5:00 p.m. Monday through Friday. Admission is free, and guided tours can be arranged for a nominal charge. The MPC is closed on holidays.

Recreational Environment

Students can enjoy the small-town friendliness of Provo or drive 45 miles to the north for the cosmopolitan diversity that Salt Lake City offers. Whereas Salt Lake City is home to Ballet West, the Mormon Tabernacle Choir, and the Utah Symphony, the Provo area prides itself on its own Utah Valley Symphony and several fine community music, dance, and theatre groups.

Intercollegiate Competition

BYU sponsors 21 NCAA intercollegiate sports for men and women. The men compete in 10 sports: baseball, basketball, cross country, football, golf, swimming and diving, tennis, indoor track and field, outdoor track and field, and volleyball. The women compete in 11 sports: basketball, cross country, golf, gymnastics, soccer, softball, swimming and diving, tennis, indoor track and field, outdoor track and field, and volleyball.

The Cougars are independent in football and compete in the West Coast Conference in the majority of the other sports. On September 1, 2010, BYU announced an eight-year deal with ESPN to televise Cougar football on its sports networks. BYUtv also partners with athletics to broadcast more than 135 live athletic events each year in sports such as football, basketball, volleyball, soccer, baseball, softball, and gymnastics.

Consistently ranked among the nation's top 30 athletic programs, BYU has won NCAA championships in football, men's track and field, men's golf, women's cross country, and men's volleyball. The Cougars have also won two NIT titles in men's basketball.

Extramural Competition

The extramural sports program at BYU provides opportunities for students to participate on an intercollegiate level throughout the United States and Canada in team sports not designated NCAA.

One of the best organized and most respected programs in the country, BYU's extramural sports program offers five sports for men (ice hockey, lacrosse, racquetball, rugby, and soccer) and one sport for women (racquetball). Many of the teams have been nationally ranked during the last several years.

Athletic Facilities

BYU's athletic facilities are among the best in the nation. Major sports complexes include the Marriott Center (basketball), LaVell Edwards Stadium (football), Smith Fieldhouse (volleyball/gymnastics), Miller Park (baseball/softball), Clarence Robison Track, South Field (soccer), Richards Building (swimming/diving), and the Tennis Complex.

In 2003-04 the Athletic Department opened two new buildings, the Indoor Practice Facility (IPF) and the Student Athlete Building (SAB). The IPF is 422 by 222 feet with a height of 86 feet at the center. It is one of the largest indoor practice facilities in college athletics. It features two artificial turf fields and four batting cages.

The 126,300 square-foot SAB is home to the student-athlete academic center, athletic administration offices, strength/conditioning complex, training facilities, football offices and locker room, Legends Grille, and Legacy Hall—a three-story museum/hall of fame celebrating more than 100 years of BYU Athletics.

Intramural Activities

The campus intramural program, consisting of more than thirty events involving thousands of participants in both men's and women's activities, is one of the largest and most comprehensive in the United States. Students may participate in team activities and individual events. The intramural program offers divisions for different skill levels in each activity and provides awards for the winners in each division. Numerous employment opportunities are available as game supervisors and officials.

A Great Outdoors

The Wasatch Mountains overlook BYU on the east, and to the west lies Utah Lake. Within an hour's drive are several canyons and ski resorts; six national parks are only a half day away. Outdoor gear can be rented on campus for everything from skiing to windsurfing.

Accreditation

Statement of Nondiscrimination

Admission to Brigham Young University is nondiscriminatory. The university admits persons regardless of race, color, national origin, religion, age, gender, veteran status, genetic information, or disability who meet university and department academic requirements and agree to abide by the university's standards of conduct and behavior. The university does exercise the "religious" exemption in admissions as granted in Title IX of the Education Amendments, 20 U.S.C. 1681(a)(3), and in hiring employees as granted in 41 CFR 60-1.5(a)(5).

Inquiries regarding this statment and/or its appliction may be directed to the Equal Opportunity Office at (801) 422-5895 during office hours (8 a.m. - 5 p.m. weekdays). Individuals may also contact the university's 24-hour hotline at 1-888-238-1062 or visit http://www.ethicspoint.com.

Accreditation

Reservation of Right to Change Courses

The university makes every reasonable effort to provide accurate information in the contents of this catalog but reserves the right to make changes at any time without prior notice. The university reserves the right to change or discontinue graduation requirements, department majors, individual courses, instructors, and all other aspects of university operations. In the event the university determines to make changes in curriculum, it will post these changes as soon as practical within this online catalog. It is recommended that students regularly check this catalog for possible changes.

If colleges or majors are discontinued, or if substantial changes in requirements for degrees are made, the university will endeavor to allow students disadvantaged by the change to continue under existing programs and requirements. As a general rule, these types of substantial changes will only be made effective each fall semester.

The university may place a hold on a student's registration privileges if the student neglects academic work or makes unsatisfactory progress toward graduation.

Accreditation

Accreditation

Brigham Young University is accredited by the Northwest Commission on Colleges and Universities.

Accreditation of an institution of higher education by the Northwest Commission on Colleges and Universities indicates that it meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Northwest Commission on Colleges and Universities is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding an institution's accredited status by the Northwest Commission on Colleges and Universities should be directed to the administrative staff of the institution. Individuals may also contact:

Northwest Commission on Colleges and Universities
8060 165th Avenue N.E., Suite 100
Redmond, WA 98052
(425) 558-4224
www.nwccu.org

The following organizations have given accreditation to programs or units at the university:

- Academy of Nutrition and Dietetics, Accreditation Council for Education in Nutrition and Dietetics
- Accreditation Board for Engineering and Technology, Inc.
- Accrediting Council for Education in Journalism and Mass Communications
- American Alliance of Museums
- American Association for Marriage and Family Therapy, Commission on Accreditation for Marriage and Family Therapy Education
- American Bar Association, Council on the Section of Legal Education and Admissions to the Bar
- American Psychological Association, Commission on Accreditation
- American Speech-Language-Hearing Association, Council on Academic Accreditation in Audiology and Speech-Language Pathology
- Association to Advance Collegiate Schools of Business
- Commission on Accreditation of Athletic Training Education
- Commission on Collegiate Nursing Education
- Council on Accreditation of Parks, Recreation, Tourism and Related Professions
- Council on Education for Public Health
- Council on Social Work Education
- National Accrediting Agency for Clinical Laboratory Sciences
- National Association of Schools of Art and Design, Commission on Accreditation
- National Association of Schools of Dance, Commission on Accreditation
- National Association of Schools of Music, Commission on Accreditation
- National Association of Schools of Public Affairs and Administration
- National Association of Schools of Theatre, Commission on Accreditation

Financial Aid & Scholarships

Tuition and Fees

Financial Aid and Scholarships

Financial Aid Office
C-144 ASB
(801) 422-4104

Over the past decade the cost of obtaining an excellent university education has increased considerably. As a result, many students and their families have found it difficult to obtain the funds to pursue an education. The university is sensitive to this situation and to those students who are hard-pressed to finance their studies. Major changes have been made by the university to improve the delivery system through which students can receive financial aid. There is a firm commitment to assist those who truly need the resources to further their studies.

Financial aid at BYU comes from various federal, state, and university programs in the form of grants, scholarships, and loans. The Financial Aid Office coordinates these financial aid programs and assists students in identifying the financial resources for which they might qualify. Because the number of students applying for financial assistance usually exceeds the funds available through university programs, the distribution of financial aid at BYU is based on an assessment of the student's and family's financial need. There are some exceptions to need-based awarding, e.g., BYU academic scholarships, performance, talent and athletic awards, and BYU short-term loans.

The process of determining a student's eligibility for financial aid is called *need analysis.* In a need analysis, income and asset information from both students and parents is examined to determine the family's ability to contribute toward educational costs. This figure, called the *expected family contribution*, is subtracted from what it will cost the student to attend BYU for a specific length of time (typically, one academic year). If the cost of education is more than the family can contribute, the student has demonstrated *financial need*.

BYU uses the government need analysis form, the Free Application for Federal Student Aid (FAFSA), in determining how much the student and family should be able to contribute. All students applying for federal financial aid must complete this form. The application process is not complete until the results of the FAFSA have been received by the Financial Aid Office.

Even though a standard formula is used to analyze a student's financial situation, the Financial Aid Office is willing to consider unusual circumstances regarding a student's/parent's financial situation.

Applying for financial aid can be complicated and time consuming. Considerable delays and frustrations can arise from filling out forms incorrectly or failing to submit the proper documents in a timely manner. Students and their parents are encouraged to read instructions carefully and to complete all forms and documents correctly. Professional counselors are available and eager to assist in answering questions and helping with the application process.

Eligibility Requirements

Applicants for federal financial aid (Federal Pell Grants, Federal Direct Stafford Loans, and Federal Direct PLUS Loans) must be U.S. citizens or permanent residents. In addition, students must maintain satisfactory academic progress to have federal financial aid disbursed to them. Any student enrolled in a degree-seeking program, and meeting these requirements, may apply for financial aid.

Students who have a baccalaureate degree and are returning to receive a teaching certificate may also apply for Federal Direct Stafford Loans if they have a cumulative 2.0 GPA and are admitted to the teacher licensure program. In addition, post-baccalaureate students may be eligible for Federal Direct Stafford loans if they are enrolled in prerequisite courses for admission to a graduate program.

Rules and regulations governing the disbursement of federal financial aid are subject to change. Contact the Financial Aid Office if you have additional questions regarding your eligibility for financial assistance.

Scholarships

Brigham Young University offers scholarships to select students who have demonstrated a serious and diligent commitment to spiritual preparation and academic excellence as an investment in their education. Scholarship funds are provided through the tithes of the LDS Church and the offerings of generous individuals. They are given to encourage continued commitment to spiritual and intellectual growth. The gift of a scholarship assumes an obligation on the part of the recipient to use that investment to prepare for expanded and purposeful service in the Lord's kingdom. The principle of replenishment is endorsed, and all are invited to make a similar investment in someone else's future by contributing to the university's scholarship programs when in a financial position to do so.

Although the contributions of the Church and others have been generous, funds are still insufficient to invest in all students. Consequently, policies and procedures have been established to better ensure fairness in awarding available scholarship funds consistent with the university's aims and donors' wishes. For additional information about our policies and procedures, please contact the Financial Aid Office, C-144 ASB, Provo, UT 84602-1009, telephone (801) 422-4104; e-mail: scholarships@byu.edu; Web: http://scholarships.byu.edu.

Academic

The majority of BYU scholarships are awarded to students based on academic merit. After the scholarship application deadline, students are ranked by their academic preparation and performance. Beginning at the top of the ranked order, scholarships are awarded until funds are exhausted.

BYU scholarships are not renewable, and most are awarded for two semesters only. Unless students receive a four-year award, *they must reapply every year by the appropriate deadline to be considered*. Applicants must also officially declare a major by the end of their sophomore year.

Heritage Scholarships are eight-semester, full LDS tuition awards to incoming freshman students. These scholarships honor the intellectual, spiritual, and cultural heritage of the Church and the university.

National Merit Scholarships are eight-semester, full LDS tuition awards sponsored by BYU for a number of the incoming freshman students who qualify as finalists in this competition. To be considered, finalists must inform National Merit Corporation that BYU is their first-choice university. National Merit Corporation will then forward necessary materials to BYU. *Because funds are limited, finalists are not guaranteed a BYU-sponsored National Merit Scholarship*.

Brigham Young Scholarships are generally two-semester awards that cover either half or full LDS tuition. Students must reapply each year by the appropriate deadline to be considered for future scholarships.

New Freshman Students

New freshman academic scholarships are based on a candidate's unweighted high school GPA and composite ACT/SAT score, as calculated and certified by BYU Admissions Services.

Former Students

Academic scholarships are based on overall academic performance. Primary considerations are based on the student's cumulative BYU grade point average. Candidates will be considered in the same applicant pool as continuing students.

Continuing Students

Academic scholarships are based on overall scholastic performance. Primary considerations are based on the student's cumulative BYU grade point average.

- Fall/Winter
  The Scholarship Committee will consider the cumulative GPA earned at BYU through fall semester. To qualify for an academic scholarship, the BYU cumulative GPA must be within the awarding range.
- Spring/Summer
  The committee will consider academic performance through fall semester.

Alumni Association

Generations of BYU students have benefited from the generous support of the Church and private individuals. With that support they have received a first-rate education that has helped them "go forth to serve." Part of that service includes providing for the education of future generations.

Applicants for the Alumni Replenishment Grant are considered based on need and other criteria along with a moral commitment to repay the amount of the grant, so that future students can receive and continue such financial assistance.

Alumni Association Replenishment

The Alumni Association Replenishment Grant is available to junior, senior, and graduate students whose total cost of education may not be met through other financial aid programs. Scholarships are awarded annually in amounts equal to half or full LDS tuition. The scholarship recipients will be eligible for membership in the Society of Alumni Scholars and will be asked to replenish the fund once they are in a financial position to do so.

To be considered, both the cumulative and BYU GPA must be at least 3.0 by the end of fall semester. Applicants must also demonstrate financial need and be willing to replenish the scholarship fund at a later date. To apply, complete the online comprehensive scholarship application available through myBYU, including the Alumni Replenishment Grants section.

Alumni Association Regional Replenishment

Several regional chapters of the BYU Alumni Association offer scholarships to students whose permanent residence lies within their boundaries.

To apply, complete the online comprehensive scholarship application available through myBYU, including the Alumni Regional Replenishment Grants section.

Athletic

The university awards grants-in-aid to outstanding athletes who qualify under the rules and regulations of the West Coast Conference and the National Collegiate Athletics Association (NCAA).

For program applications, deadlines, and additional information, apply directly to the coach of the sport in which you wish to participate or contact Intercollegiate Athletics, 331 SAB, Provo, UT 84602, (801) 422-2046, e-mail: athletics@byu.edu.

College and Departmental

In addition to the scholarship programs described in this bulletin, other private scholarships are available through the colleges and some departments. Students can check with their college or department for additional information and applications.

International

International students are eligible to apply for academic scholarships after completing one full enrollment (12 credits) at BYU. The deadline to submit the continuing student scholarship application is March 1. Scholarships are awarded annually.

The university offers a limited number of grants each year to international undergraduate students who demonstrate unusual financial need. Eligible candidates must have an F-1 visa, have earned 24 credit hours at BYU, and be in good academic standing.

Generous friends of the university have established a few additional scholarships to assist international students with their studies. To apply, complete the online scholarship application through myBYU.

International Study Programs

The International Study Programs Office offers scholarships and grants to assist undergraduate students participating in its programs.

Study Abroad

- The *Mae Covey Gardner Scholarship* is available to students attending Study Abroad in European countries.
- The *Howard B. and Mary D. Nelson Scholarship* is available to students studying French, Italian, or Spanish and attending Study Abroad in France, Italy, or Spain. This scholarship is not available to returned missionaries who served in the destination country.
- The *Study Abroad Scholarship* is available to students participating in programs centered outside Europe.
- The *International Study Program Scholarship* is awarded to qualified students receiving university credit for field research or internships in an overseas setting.
- The *Service and Learning Scholarship* is available to students who enroll in an ISP program that has a strong service component.

All applicants must have a minimum 3.0 GPA. The Nelson scholarships are merit-based, but for all other scholarships applicants must show financial need by having a current *Free Application for Federal Student Aid (FAFSA)* on file at the Financial Aid Office, C-144 ASB, telephone (801) 422-4104. The Internet URL is www.fafsa.ed.gov. Students must complete the scholarship essay page of the ISP application and submit it with the rest of the application by the appropriate application deadline. For program applications, deadlines, and additional information, contact International Study Programs, 204 HRCB, Provo, UT 84602-4540; telephone (801) 422-3686; or visit their Web site at http://kennedy.byu.edu/isp/.

Jerusalem Center

The Jerusalem Center for Near Eastern Studies offers financial aid to undergraduate and graduate students participating in the various Jerusalem Center study programs. This financial aid is administered under the following categories:

Grants are awarded primarily on the basis of financial need. These grants will vary according to the length of the program, the applicant's financial need, and the funds available. Individual FAFSA information must be on file at BYU for students to be considered.

Scholarships are awarded primarily on the basis of academic performance and will vary as stated above. A minimum GPA of 3.60 is required to be considered.

For program applications, deadlines, and additional information, contact the Jerusalem Center Office, 301 HCEB, Provo, UT 84602-1524, telephone (801) 422-6017, e-mail: jerusalem@byu.edu.

Need-Based

While the majority of its scholarships are merit-based, BYU budgets a limited number of need-based awards for U.S. citizens and permanent residents. Each applicant's circumstances and resources are reviewed and evaluated; unfortunately, there is always more need than available funding. Interested students must complete the financial section of the scholarship application available through myBYU by the appropriate deadline.

Other Private

Generous friends of the university have contributed a number of private scholarships. Many of these scholarships carry specific stipulations and restrictions. To be considered for these scholarships, complete the online scholarship application available through myBYU, including the Other Scholarships section if applicable.

Research

The following scholarships promote and reward research:

The Undergraduate Scholarship Awards are given to a select number of students in good academic standing—generally juniors and seniors—to fund research projects. To obtain the application instructions and guidelines, deadlines, and additional information, contact the Office of Research and Creative Activities, A-285 ASB, Provo, UT 84602-1231, telephone (801) 422-3841.

Students should also contact their department and college to learn about other research opportunities and awards.

ROTC

Both the Army ROTC and the Air Force ROTC offer competitive scholarships to qualified students enrolling in their programs. ROTC scholarship recipients may receive full tuition, fees, books, and associated costs. In addition, both scholarship and nonscholarship students enrolled in courses numbered in the 300- and 400-series may apply for a $100 monthly subsistence allowance. For further information and application requirements, contact the Military Science Department (Army ROTC), 320 Wells ROTC Building, Provo, UT 84602-8301, telephone (801) 422-3601, e-mail: armyrotc@byu.edu; or the Aerospace Studies Department (Air Force ROTC), 380 Wells ROTC Building, Provo, UT 84602-8301, telephone (801) 422-2671, e-mail: afrotc@byu.edu.

Students with Disabilities

Generous donors have established a few private scholarships to assist students with disabilities. Because funds are limited, the Undergraduate Scholarship Committee will consider the nature of the applicant's disability and its impact on his or her ability to function in class and earn a living. Academic performance and financial need will also be considered. Interested students must complete the appropriate section (under "Other Scholarships") of the scholarship application available through myBYU and submit appropriate current documentation of the disabling condition from a licensed professional to the University Accessibility Center, 2170 WSC, Provo, UT 84602, (801) 422-2767 v/tty.

Talent Awards

BYU offers talent awards in the areas of communications, dance, music, theatre and media arts, and visual arts. For these awards, demonstrated talent is a more important criterion than scholastic achievement. Awards range in value from $100 to full tuition for one year. For further information and application materials, contact the appropriate department directly:

Communications: Department of Communications, 360 BRMB, Provo, UT 84602-6403, (801) 422-2997, e-mail: comms_secretary@byu.edu.

Dance: Department of Dance, 294 RB, Provo, UT 84602-2005, (801) 422-5086, e-mail: dance@byu.edu.

Music: School of Music, C-550 HFAC, Provo, UT 84602-6410, (801) 422-4784, e-mail: music@byu.edu.

Theatre and Media Arts: Department of Theatre and Media Arts, D-581 HFAC, Provo, UT 84602-6405, (801) 422-6645, e-mail: tmasec@byu.edu.

Visual Arts: Department of Visual Arts, E-509 HFAC, Provo, UT 84602-2500, (801) 422-8773, e-mail: sonya_schiffman@byu.edu.

General University Scholarship Policies

Students granted university scholarships must do the following to remain eligible for their award:

1. Abide by the Honor Code and adhere to the Dress and Grooming Standards of BYU.
2. Scholarships may be applied to approved International Study Programs and Travel Study Programs but may not be used for Independent Study or Continuing Education courses or for BYU–Idaho or BYU–Hawaii courses.
3. Register as a full-time student and complete a minimum of 14 credit hours per semester(s) or 6 credit hours per term(s).

   Credit must be earned within the classroom. Credit earned through special examination, Independent Study, or audited classes may not be used to meet the requirement.

Additional provision:

Students who have received scholarships for a total of eight semesters, excluding spring and summer terms, are ineligible for future fall/winter scholarships, but may be considered for spring/summer scholarships.

Discontinuance

A student claims a scholarship by registering for classes and using the scholarship to pay tuition. If the student then does not attend school or, once enrolled, discontinues for nonemergency reasons, the scholarship will be cancelled and the student will be billed for the appropriate tuition and discontinuance fees. Students who need to discontinue because of illness, injury, or extenuating circumstances should contact the Financial Aid Office as well as the Discontinuance Office for appropriate action.

Note: Exceptions to these policies may sometimes be granted according to individual needs and circumstances. Students wanting an exception must submit a formal written petition to the Financial Aid Office prior to the necessary change. Petitions may be submitted to D-155 ASB, Provo, UT 84602 or emailed to sch-petitions@byu.edu.

BYU Short-Term Loan

A short-term loan is available to full- or part-time day students or full-time evening students admitted to day school. A student may borrow up to the cost of tuition only, and because the loan is "short-term" the loan must be repaid during the same semester or term in which the money is borrowed. The loan is not available for Independent Study, job interviewing, or debt payments. Students can apply for a short-term loan by logging onto myBYU and, under campus links, clicking the *School* tab, clicking on *My Financial Center*, clicking *Account Summary* and then applying for the short term loan.

Federal Programs

Federal Pell Grant

A Federal Pell Grant is awarded by the U.S. Department of Education based on financial need. A Pell Grant is not a loan and does not have to be repaid. Only undergraduate students who have not already earned a bachelor's degree are eligible for a Pell Grant. (Students who pay graduate tuition are not eligible.) In addition, students must meet other eligibility requirements (see preceding Eligibility Requirements). Federal Pell Grants are based on an eligibility index determined by a federal formula. Pell Grant payments are disbursed to BYU students one semester at a time and vary with the number of hours for which a student is enrolled per semester (spring and summer terms combined are considered one semester).

- 12.0 or more semester hours equal a full-time payment.
- 9.0–11.5 semester hours equal a three-quarter-time payment.
- 6.0–8.5 semester hours equal a half-time payment.
- Fewer than 6.0 semester hours equal a less-than-half-time payment.

In determining hours for Federal Pell Grant payments, please note that:

1. Audit hours, hours through Special Courses and Conferences, and hours obtained by challenging classes may not be used.
2. Continuing Education, Salt Lake Center, Study Abroad, and Jerusalem Center classes, etc., may be used only during the term or semester for which the student is admitted to BYU day school.

William D. Ford Direct Loan Program

Direct Loans are available to undergraduate and graduate students. Students must meet the eligibility requirements described previously. Undergraduate students must be enrolled in at least 6.0 credit hours per semester or term; graduate students, at least 4.5 credit hours per semester or term. Audit hours, hours through Special Courses and Conferences, and hours obtained by challenging classes may not be used in determining hours. Repayment begins six months after a student graduates, drops below half-time enrollment, or discontinues from the university.

The Direct Loam Program offers the following types of loans:

- Subsidized—based on financial need as determined by information provided on the FAFSA and the resulting Expected Family Contribution (EFC). The government pays the interest on the loan while the student is enrolled in school at least half-time, during the grace period, or during deferment periods.

- Unsubsidized—not based on financial need and interest begins to accrue once the loan is disbursed. Students who receive subsidized loans may also receive unsubsidized loans. Although students do not go into repayment until after graduation, they may make interest payments.
- Parent PLUS—for parents of dependent students, and, like the unsubsidized loan, interest begins to accrue once the loan is disbursed. Parents go into repayment 60 days following the second disbursement unless a deferment is approved. Parents may borrow up to the student's Cost of Attendance minus any financial aid received by the student. A credit check is done and the loan is generally approved unless there is an adverse credit history. For students whose parents are denied a PLUS loan, an additional unsubsidized loan may be approved.
- GradPLUS—for graduate and professional students. Like the Parent PLUS, interest begins to accrue once the loan is disbursed. Students go into repayment 60 days following the second disbursement, but loan deferment is an option. Students may borrow up to the Cost of Attendance minus any other aid they receive. A credit check is made, and if there is no adverse credit history, the loan is generally approved.

To avoid the burden of excessive debt, students should consider other forms of financial aid such as grants, scholarships, part-time employment, savings, and family assistance. Students should also contact their state educational agency to apply for state grants and other state aid that may be available. High school counselors and employers may also provide information regarding other sources of financial aid.

Satisfactory Academic Progress (SAP)

Federal regulations require schools to establish, publish, and apply reasonable standards for determining whether a student receiving federal financial aid is maintaining satisfactory academic progress in his or her course of study. Satisfactory Academic Progress is measured using qualitative and quantitative standards as follows:

Undergraduate Students

- Qualitative Standard
  - Maintain a cumulative GPA of 2.0 or higher
- Quantitative Standards
  - Attempted Credit Hours. Federal regulations require that federal aid be terminated once a student has attempted 150% of the number of credit hours required for graduation. Most BYU undergraduate degrees can be completed with 120 credit hours. Therefore, the maximum number of attempted hours is 180. Attempted hours include all earned hours, i.e., transfer credit, AP and IB credit, foreign language exam credit, and other testing credit, and all non-progress hours, i.e., repeated courses and courses receiving the following grades: W, E, I, IE, NS, T, W and WE.
  - Rate of Progress. Students must successfully complete 66.67% of all credits attempted.
  - Non-progress Hours. Students may not accumulate more the 60 non-progress credit hours. Non-progress hours include classes receiving grades of W, E, I, IE, NS, and WE.

Graduate Students

Qualitative standard based on assessment by Graduate Studies Office.

- Graduate programs evaluate students' progress as "satisfactory," "marginal," or "unsatisfactory." Only students with a "satisfactory" or "marginal" designation meet SAP.
- Students must maintain a cumulative GPA of 2.0 or higher.

Qualitative standard of maximum time frame defined by program of study.

- Master's candidates must be done within five years of their first enrollment.
- Doctoral candidates must be done within eight years of their first enrollment.

Annual Review of SAP

SAP is evaluated once a year at the end of winter semester. After all winter grades post, there will be a review of all student's SAP eligibility.

- Students who "pass" this reviw meet SAP and will be eligible for federal financial aid for spring and summer terms of the current academic year and fall and winter semesters of the following academic year.
- Students who "fail" this review do not meet SAP and will not be eligible for federal financial aid for spring and summer terms of the current academic year and fall and winter semesters of the following academic year. Students will be notified of their failed SAP status by the Financial Aid Office via the Message Center.

Petition for Override of SAP

If students have extenuating reasons why they have failed to meet the SAP policy, they may petition the Financial Aid Committee for a SAP override. Go to http://financialaid.byu.edu and scroll to *Important Links*. Click on *Forms*, and then under *Petition Forms* click on *Request to Override Satisfactory Academic Progress*. Follow the instructions as outlined on the form.

Important Tax Information

Under the Tax Reform Act of 1986, only scholarship, fellowship, benefit, and grant amounts used for tuition, fees, books, supplies, and equipment required for courses of instruction are excluded from the recipient's gross income. Any of these funds used for other expenses, such as room and board, must be included in income. If funds are received from any of these sources, a detailed record should be kept of all expenditures for tuition, fees, books, and required equipment and supplies. For more detailed information, consult a personal tax advisor.

Exception to University Financial Aid Policy

Students desiring an exception to University Financial Aid Policy must petition the Financial Aid Committee, stating the reason for the requested exception. The committee meets on a regular basis to review petitions. For information on how to petition go to http://financialaid.byu.edu and scroll to Important Links, then click on Petitions.

Additional Information Regarding Financial Aid

Students with questions regarding financial aid at Brigham Young University are invited to visit the web site: http://financialaid.byu.edu.

Estimated College Expenses

On entering the university, students are responsible for making arrangements to cover enrollment expenses and should have sufficient funds on hand for at least the first semester.

For estimated costs, please see the Financial Aid Web site: http://financialaid.byu.edu.

Tuition and Fees

Student Services
D-155 ASB
(801) 422-4104

Tuition Rates

Tuition and general fees for all academic programs are established annually by Brigham Young University. BYU is a non-profit corporation affiliated with the Church of Jesus Christ of Latter-day Saints, and significant portions of university operating costs are paid with the tithes of Church members. In recognition of this support, Church members are assessed lower tuition fees than those who are not members. This practice is similar in principle to that of state universities charging higher tuition to nonresidents. Students are considered members of the Church if they have been baptized at any time during the semester or term.

Tuition rates for the 2013–2014 academic year are as follows:

2013-2014 Tuition

Undergraduate Students

Semester Charges			Term Charges **		
Credit Hours	**LDS**	**Non-LDS**	**Credit Hours**	**LDS**	**Non-LDS**
12.0 +	$2,425	$4,850	**6.0 +**	$1,213	$2,425
9.0 – 11.5	$2,305	$4,610	**4.5 – 5.5**	$1,153	$2,305
0.5 – 8.5	$257/credit	$514/credit	**0.5 – 4.0**	$257/credit	$514/credit

Graduate Students *

Semester Charges			Term Charges **		
Credit Hours	**LDS**	**Non-LDS**	**Credit Hours**	**LDS**	**Non-LDS**
8.5 +	$3,065	$6,130	**4.5 +**	$1,533	$3,065
0.5 – 8.0	$340/credit	$680/credit	**0.5 – 4.0**	$340/credit	$680/credit

Graduate School of Management and Law School Students*

Semester Charges			Term Charges **		
Credit Hours	**LDS**	**Non-LDS**	**Credit Hours**	**LDS**	**Non-LDS**
8.5 +	$5,640	$11,280	**4.5 +**	$2,820	$5,640
0.5 – 8.0	$626/credit	$1,252/credit	**0.5 – 4.0**	$626/credit	$1,252/credit

The university reserves the right to change tuition and fees without notice.

* Graduate Students include all students who have previously received a Bachelor's degree—even if enrolled in undergraduate courses.

** Tuition for spring-summer length classes will be calculated as if 1/2 of the credit hours were allocated towards spring term and 1/2 towards summer term. However, the full amount calculated for spring-summer length classes will be billed along with spring term and will be subject to the normal spring term deadlines.

** The Law School offers no courses during spring and summer; therefore, Law School students should refer to the graduate tuition rate to determine tuition charges during spring and summer terms.

Noncredit and Audited Course Fees

Tuition for noncredit courses or for courses being audited is charged at the same rate as for credit courses. Noncredit and audit hours will be included when calculating tuition charges.

Payment of Tuition and Fees

Tuition and fees are considered due and payable seven calendar days prior to the first day of class. Failure to pay by this date will result in holds being placed on the student's account, restricting the ability to add additional classes, unless the student has pending financial aid. Class registrations will be dropped if payment of tuition and fees is not received by midnight on the add deadline. Classes will generally not be dropped if adequate financial aid is pending. However, it is the student's responsibility to ensure that financial aid or other forms of payment are available to satisfy tuition and fees prior to the deadline.

Short-Term Loans

The university makes short-term loans available to assist students to meet the tuition payment deadline. These loans are intended to be used for short-duration financing needs. Short-term loans are due as follows:

Registration Period	Due Date
Fall 2013	November 1, 2013
Winter 2014	March 1, 2014
Spring/Summer 2014	
Spring 2014	June 1, 2014
Summer 2014	August 1, 2014

A $20 processing fee will be charged for each short-term loan. No interest is charged on those loans if they are paid by the due date. Short-term loans outstanding after the due date bear interest at the rate of 12 percent per annum. Holds on registration for future semesters or spring-summer(s) are placed on all student accounts the day the short-term loan is disbursed and are not released until the loan is paid in full. This may affect the ability of some students to take advantage of priority registration.

Pro-Rata Charges for Dropped Classes

Students may drop classes without penalty through the add deadline. After the add deadline, tuition will be recalculated based on the student's current enrollment status. A pro-rata tuition charge will be applied after the add deadline for dropped classes that result in reduction in the original tuition charge. The pro-rata charge applies to tuition and most class fees. Certain class fees relate to the delivery of required supplies or services and are not refundable. The pro-rata charges are as follows:

If class is dropped beginning:	The pro-rata charge will be:
Fall Semester	
September 11, 2013	15%
September 23, 2013	25%
October 28, 2013	50%
November 12, 2013	100%
Winter Semester	
January 14, 2014	15%
January 27, 2014	25%
March 3, 2014	50%
March 19, 2014	100%
Spring-Summer (including semester-length offerings)	
Spring Term	
May 7, 2014	15%
May 12, 2014	25%
May 27, 2014	50%
June 4, 2014	100%
Summer Term	
July 1, 2014	15%
July 7, 2014	25%
July 21, 2014	50%
July 30, 2014	100%

The recalculation of tuition and fee charges may result in a refund. The amount of the refund a student will receive is based on the date the classes are dropped, or in the case of an official discontinuance, the date that the student reports such discontinuance to the Discontinuance Office (B-150 ASB).

Any refund due the student will be paid by check through the mail approximately ten days after the classes are dropped. If the student has elected direct deposit for student account refunds, the refund will be deposited into the student's bank. Payments originally paid by credit card will be returned to the credit card. Unpaid university charges may be deducted from the refund amount.

Refunds will not be paid to students whose tuition has been paid by a loan, scholarship, or benefit.

If a student with federal financial aid drops below half-time enrollment (for tuition assessment purposes: undergraduate, 6 hours per semester or 3 hours per term; graduate, 4.5 hours per semester or 2.5 hours per term), the federal program or lender may require that a portion of the refund be returned.

A petition for exception to the refund schedule will be considered for students forced to discontinue because of circumstances that are beyond their control, such as death in the immediate family, life-threatening situations, medical incapacitation, a university error, or military leave. Students should not submit petitions based on ignorance of university policies and procedures. These will be denied. Petition forms are available in D-155 ASB.

Collection of Unpaid Tuition and Fees

BYU retains all legal remedies to collect unpaid tuition, fees, and other amounts due to the university for housing, traffic fines, etc. BYU uses a variety of methods to keep students informed of amounts due the university, including financial Web sites, statements, and various forms of correspondence. It is the student's responsibility to remain aware of obligations to the university and to make payment on a timely basis.

If BYU is unable to collect amounts due the university within a reasonable time, the debt may be referred to an outside collection agency and/or attorney for collection. All collection costs, including collection agency fees, attorney fees, and court costs will be

charged to the student's account.

Failure to pay all amounts due BYU, including collection fees, may also result in various actions, including but not limited to withholding services and restricting the student's ability to register for class, participate in graduation, receive a transcript or diploma, or be considered for readmission to the university. The university also reserves the right to report both positive and negative payment histories to credit-reporting agencies.

Payments for Tuition and Fees

Tuition and fees include charges such as tuition, class fees, tuition reassessments, tuition late fees, Study Abroad fees, and health plan charges. Students are responsible to pay the correct amount of tuition, fees, and past due balances in **U.S. dollars** (checks must be drawn on a U.S. bank). Tuition and fees cannot be paid using the BYU Signature Card. The following options are available for making tuition and fee payments. For more information on making payments to BYU, please visit http://finserve.byu.edu/content/payment-options-byu-provo-campus-only.

Pay Tuition Online

BYU encourages you to take advantage of the fast, easy, and secure way to pay online. Payments may be made online by logging into myBYU and selecting the My Financial Center link under the School heading.

1. **eCheck** (BYU's preferred payment method)

   eCheck is a *free* electronic check option that uses a secure Web transmission to electronically withdraw funds directly from a payer's checking or savings account. The payer must provide his/her bank routing and account number to make an eCheck payment. Payments from mutual fund, money market, line of credit, or brokerage accounts cannot be accepted.

2. **Credit Card with a Service Fee**

   BYU accepts Visa, Mastercard, Discover and American Express for all charges including tuition payments. However, the payer will be charged a **nonrefundable** credit card fee equal to 2.00 percent of the tuition when making a payment on tuition and fee charges.

   Debit cards are considered credit cards for tuition and loan payment purposes and would therefore be subject to the same credit card restrictions and service charges. **Note:** Because eChecks and debit cards both deduct payments directly from a checking or savings account, students can avoid the service charge by choosing the eCheck option.

   Note the Credit Card Refund Policy: Existing credit card regulations prohibit BYU from making a refund to you in cash or check when you make a payment by credit card and there is an adjustment made to the charges paid. When you pay by credit card and there is a reduction in the amount of your charges, we are required to refund the amount back to the credit card you used to make the payment.

Pay Tuition by Mail

Check or money order payments may be mailed to Student Financial Services, A-153 ASB, Provo, UT 84602. Please make checks payable to Brigham Young University or BYU. **Do not mail cash.** Include with your check the student's BYU ID number and the amount to apply to each category.

Pay Tuition in Person

Payments may be made throughout the year in person at D-155 ASB. Tuition may be paid using check, money order, or cash. **Credit cards and the Signature Card cannot be used to pay tuition or fees at BYU cashiering locations** (see Pay Tuition Online above for acceptable use of credit cards). Check or money order payments may also be left in the drop boxes in the D wing on the main floor of the ASB.

Pay Tuition Through Western Union

International payments can be made via Western Union in most countries. Using cash rather than credit card as the payment method will greatly reduce the amount of Western Union fees.

Follow these instructions to make a tuition payment using Western Union Quick Collect:

1. Go to a Western Union agent location. To find a location call toll-free 1-800-325-6000, press 2, 1; or go to the Web site at http://www.westernunion.com.
2. Complete the blue Quick Collect form. You will need the following information to complete the form:
   - Pay to: Brigham Young University
   - Code city: BrighamYoung (case sensitive and no spaces)
   - State: UT
   - Account Number: (nine-digit BYU student ID)
3. Provide payment to Western Union
   - Payment amount includes amount owed to BYU plus Quick Collect fee (between $15 and $25 U.S.)
   - $5,000 U.S. limit for each cash transaction
4. Receive the receipt with the ten-digit money transfer control number (MTCN). This number can be used to track your Quick Collect payment. Notification of cash payment is sent within a few minutes.
5. Please send an email to wires@byu.edu. Include your student ID and how you would like your payment applied to your account.

Pay Tuition by Wire Transfer

To pay tuition using an international or domestic wire transfer, please contact us for wire transfer instructions via phone (801) 422-4104 or via email at wires@byu.edu.

Student Teaching/Practicum Fees

Fingerprint Fee

Students in teacher education must be fingerprinted and pass a background check prior to starting practicum experiences with K–12 students. Fees for fingerprinting and background checks are set by the Utah State Office of Education and are listed on the Education Advisement Center Web site: http://education.byu.edu/ess/fingerprint.html.

Licensure Fee

Students who meet all program requirements qualify for a Level 1 teaching license in Utah. Fees for licensure are due with the student teaching application. Licensure fees are set by the Utah State Office of Education and are listed on the Office of Field Services Web site: http://education.byu.edu/ess.

Miscellaneous Fees and Fines

Admission evaluation fee (nonrefundable)	$35
Bicycle registration (Provo City license)	1
Change of registration fee—per class (after add deadline)	10
Dishonored check charge	20
Examination, special equivalency	20

NDFS-dietetics insurance and ADA dues	50
Graduation (undergraduate) fee (nonrefundable)	15

Incomplete grade contract fee per class (to a maximum of $30)	10
National League of Nursing Diagnostic Exam	40
Physical education locker	5
Traffic violation fines, variable according to violation	5–300
Transcript fee: Electronic Paper	5 6

Health Insurance Requirement

BYU requires all students with 9.0 or more credits in a semester or 4.5 or more credits in a term to carry adequate medical insurance. This applies the entire time a student has continuing status, including students taking a semester or term off. All participants in groups on tour, Study Abroad, or internships are required to carry adequate medical insurance.

To satisfy the health coverage requirement, you have several options:

1. Enroll in the Student Health Plan
2. Enroll in a group medical plan provided by your parents', your own, or your spouse's employer
3. Purchase an individual plan that meets the following guidelines:
    - 80% coverage for all major medical expenses, including physician, hospital, and ancillary services in Utah
    - An individual annual deductible of no more than $1,000; and
    - An annual plan limit of no less than $100,000.

Students with 9.0 or more credits in a semester or 4.5 or more credits in a term must enroll in the BYU Student Health Plan or provide verification of other adequate insurance coverage when first enrolling at BYU and **prior to the beginning of fall semester each year thereafter**. Students who do not return a properly completed waiver form via the Web to the BYU Student Health Plan Office prior to the last day to add/drop will be automatically enrolled in and assessed the appropriate premium (single or married student rate) for the BYU Student Health Plan. The web site is located at http://health.byu.edu/index2.php?page=shc/ped.php.

The BYU Student Health Plan is an annual plan but is billed and must be paid each semester/terms within Spring-Summer. The health plan fee is due on the add deadline of each semester or term within Spring-Summer. Following fall semester, students who will not be attending BYU for one or more semesters or terms within Spring-Summer (except as described above) are eligible to remain on the BYU Student Health Plan but must continue to pay the health plan fee on a timely basis. Following fall semester, students who will no longer be attending BYU may also opt out of participation in the health plan. If you choose to not remain on the student health plan, you must submit in writing such decision to the BYU Student Health Plan Office by the due date of the plan fee.

For the latest BYU Student Health Plan fees, check the Web site at http://health.byu.edu/index2.php?page=shc/health.php.

Appeals

Students with unusual circumstances may appeal for special consideration of any item in this section to the Student Services Office. Appeal forms may be obtained at the Student Services windows at D-155 ASB.

Academic Honesty Policy

The first injunction of the Honor Code is the call to "be honest." Students come to the university not only to improve their minds, gain knowledge, and develop skills that will assist them in their life's work, but also to build character. "President David O. McKay taught that character is the highest aim of education" (The Aims of a BYU Education, p. 6). It is the purpose of the BYU Academic Honesty Policy to assist in fulfilling that aim.

BYU students should seek to be totally honest in their dealings with others. They should complete their own work and be evaluated based upon that work. They should avoid academic dishonesty and misconduct in all its forms, including but not limited to plagiarism, fabrication or falsification, cheating, and other academic misconduct:

Plagiarism

Intentional plagiarism is a form of intellectual theft that violates widely recognized principles of academic integrity as well as the Honor Code. Such plagiarism may subject the student to appropriate disciplinary action administered through the university Honor Code Office, in addition to academic sanctions that may be applied by an instructor. Inadvertent plagiarism, whereas not in violation of the Honor Code, is nevertheless a form of intellectual carelessness that is unacceptable in the academic community. Plagiarism of any kind is completely contrary to the established practices of higher education, where all members of the university are expected to acknowledge the original intellectual work of others that is included in one's own work. In some cases, plagiarism may also involve violations of copyright law.

Intentional Plagiarism—Intentional plagiarism is the deliberate act of representing the words, ideas, or data of another as one's own without providing proper attribution to the author through quotation, reference, or footnote.

Inadvertent Plagiarism—Inadvertent plagiarism involves the inappropriate, but nondeliberate, use of another's words, ideas, or data without proper attribution. Inadvertent plagiarism usually results from an ignorant failure to follow established rules for documenting sources or from simply being insufficiently careful in research and writing. Although not a violation of the Honor Code, inadvertent plagiarism is a form of academic misconduct for which an instructor can impose appropriate academic sanctions. Students who are in doubt as to whether they are providing proper attribution have the responsibility to consult with their instructor and obtain guidance.

Examples of plagiarism include:

Direct Plagiarism—The verbatim copying of an original source without acknowledging the source.

Paraphrased Plagiarism—The paraphrasing, without acknowledgment, of ideas from another that the reader might mistake for your own.

Plagiarism Mosaic—The borrowing of words, ideas, or data from an original source and blending this original material with one's own without acknowledging the source.

Insufficient Acknowledgment—The partial or incomplete attribution of words, ideas, or data from an original source.

Plagiarism may occur with respect to unpublished as well as published material. Acts of copying another student's work and submitting it as one's own individual work without proper attribution is a serious form of plagiarism.

Fabrication or Falsification

Fabrication or falsification is a form of dishonesty where a student invents or distorts the origin or content of information used as authority. Examples include:

1. Citing a source that does not exist.
2. Attributing to a source ideas and information that are not included in the source.
3. Citing a source for a proposition that it does not support.
4. Citing a source in a bibliography when the source was neither consulted nor cited in the body of the paper.
5. Intentionally distorting the meaning or applicability of data.
6. Inventing data or statistical results to support conclusions.

Cheating

Cheating is a form of dishonesty where a student attempts to give the appearance of a level of knowledge or skill that the student has not obtained. Examples include:

1. Copying from another person's work during an examination or while completing an assignment.
2. Allowing someone to copy from you during an examination or while completing an assignment.
3. Using unauthorized materials during an examination or while completing an assignment.
4. Collaborating on an examination or assignment without authorization.
5. Taking an examination or completing an assignment for another or permitting another to take an examination or to complete an assignment for you.

Other Academic Misconduct

Academic misconduct includes other academically dishonest, deceitful, or inappropriate acts that are intentionally committed. Examples of such acts include but are not limited to:

1. Inappropriately providing or receiving information or academic work so as to gain unfair advantage over others.
2. Planning with another to commit any act of academic dishonesty.
3. Attempting to gain an unfair academic advantage for oneself or another by bribery or by any act of offering, giving, receiving, or soliciting anything of value to another for such purpose.
4. Changing or altering grades or other official educational records.
5. Obtaining or providing to another an unadministered test or answers to an unadministered test.
6. Breaking and entering into a building or office for the purpose of obtaining an unauthorized test.
7. Continuing work on an examination or assignment after the allocated time has elapsed.
8. Submitting the same work for more than one class without disclosure and approval.

Procedures for Handling Incidents of Academic Dishonesty or Other Academic Misconduct

Faculty are responsible to establish and communicate to students their expectations of behavior with respect to academic honesty and the student's conduct in the course. Responsible instructors will investigate these incidents, determine the facts, and take appropriate action. Finally, the instructor must notify the Honor Code Office of the final disposition of the incident as a means of encouraging behavior change and discouraging repeat violations. If the incident of academic dishonesty involves the violation of a public law, e.g., breaking and entering into an office or stealing an examination, the act should also be reported to University Police. If an affected student disagrees with the determination or action and is unable to resolve the matter to the mutual satisfaction of the student and the instructor, the student may have the matter reviewed through the university's grievance process (Student Academic Grievance Procedure).

Applicable Actions

A wide range of possible actions exists for cases of academic dishonesty. Instructors should take actions that are fair and equitable under the circumstances and should attempt to reach an understanding with the affected student on the imposition of an appropriate action. In some cases, the department, the college, or the university may also take actions independent of the instructor. Examples of possible actions include but are not limited to the following:

For instructors, programs, departments, and colleges:

Reprimanding the student orally or in writing.

Requiring work affected by the academic dishonesty to be redone.

Administering a lower or failing grade on the affected assignment or test.

Administering a lower or failing grade for the course (even if the student withdraws from the course).

Removing the student from the course.

Dismissing the student from the program, department, or college.

Recommending probation, suspension, or dismissal.

For the university:

The university may elect to place an affected student on probation or to suspend or dismiss the student and to place a temporary or permanent notation on the student's permanent academic transcript that he or she was suspended or dismissed due to academic misconduct.

The university may report an incident of academic misconduct to appropriate law enforcement officials and may prosecute an affected student if the act in question involves the commission of a crime (e.g., breaking into an office or building, stealing an examination, etc.).

Honor Code Office Involvement

The Honor Code Office will maintain a record of all violations of the Academic Honesty Policy reported to it by the faculty. If the occurrence is sufficiently egregious or if a pattern of dishonesty or misconduct is discovered, the Honor Code Office may take additional action on behalf of the university based upon the nature of the infraction(s). The Honor Code Office, in consultation with the involved academic personnel, including the associate academic vice president in charge of undergraduate studies as needed, may determine to place a student on probation or to recommend that a student be suspended or dismissed for academic dishonesty and other forms of academic misconduct.

Shared Responsibility Policy Statement

Students are responsible not only to adhere to the Honor Code requirement to be honest but also to assist other students in fulfilling their commitment to be honest.

Faculty Academic Integrity

The substantive standards of academic honesty stated in this policy apply *a fortiori* to faculty. Indeed, all members of the BYU community are expected to act according to the highest principles of academic integrity.

Sources

A large number of publications and policies of colleges and universities were reviewed in creating BYU's Academic Honesty Policy. Some of the content and structure of this policy were adapted from the following sources:

1. “Academic Honesty,” a brochure produced by the Office of Judicial Affairs, University of Florida.
2. “Academic Honesty and Dishonesty,” a brochure produced by the Office of the Dean of Students, University of Delaware.
3. “Academic Honesty and Dishonesty,” a brochure produced by the Dean of Students Office, Louisiana State University.
4. “A Statement on Plagiarism,” a committee report from the October 1994 Conference on the Center for Academic Integrity, Tom Langhorne, Binghamton University (chair).
5. “Definition of Plagiarism,” by Harold C. Martin, taken from *The Logic and Rhetoric of Exposition*, by Harold C. Martin, Richard M. Ohmann,

and James H. Wheatly, 3rd ed. (New York: Holt, Rinehart and Winston, 1969).
6. *Legal Aspects of Plagiarism*, by Ralph D. Mawdsley (Topeka, Kansas: National Organization on Legal Problems of Education, 1985).
7. "Plagiarism—The Do's and Don'ts," a brochure produced by the Office of Student Judicial Affairs of the University of California—Davis.

General Admission Policies

Brigham Young University, Brigham Young University—Idaho, Brigham Young University—Hawaii, and LDS Business College exist to provide an education consistent with the religious and family values taught by The Church of Jesus Christ of Latter-day Saints. We prefer to admit members of the Church in good standing but will not unlawfully discriminate against applicants based upon gender, race, creed, religion, national origin, age, or disability who meet the requirements, who agree to abide by the Honor Code and Dress and Grooming Standards, and who are otherwise qualified based upon available space.

Students must be in good Honor Code standing to be admitted to BYU and must continue to abide by the Honor Code and Dress and Grooming Standards while attending BYU, whether on or off campus. An applicant who is currently excommunicated or disfellowshipped from, on probation with, or voluntarily disaffiliated from The Church of Jesus Christ of Latter-day Saints is inadmissible until reinstated to full fellowship.

"The mission of Brigham Young University—founded, supported, and guided by The Church of Jesus Christ of Latter-day Saints—is to assist individuals in their quest for perfection and eternal life. That assistance should provide a period of intensive learning in a stimulating setting where a commitment to excellence is expected and the full realization of human potential is pursued."

To this end, the university seeks qualified students of various talents and backgrounds, including geographic, educational, cultural, ethnic, and racial, who relate together in such a manner that they are "no more strangers and foreigners, but fellow citizens with the saints, and of the household of God" (Ephesians 2:19). It is the university's judgment that providing educational opportunities for a mix of students who share values based on the gospel of Jesus Christ and come from a variety of backgrounds and experiences is an important educational asset to BYU.

Social Security Number: The Admissions Office no longer requires students to submit a Social Security number when applying for admission. All students will be assigned an appropriate identification number. If students are applying for any kind of financial aid, however, the government will require the Admissions Office to collect their Social Security number. Numbers may be obtained at the nearest Social Security office or the local post office.

Full Disclosure: Failure to disclose and submit all documents required for admission, including transcripts from each institution in which the applicant has or is currently enrolled, or any falsification of information required for admission consideration may result in immediate suspension and loss of all credit earned at BYU.

Admission Status and Academic Standing: Admission status (admit or deny) and academic standing (good, warning, or probation) will be determined by the admissions committee. This review is for all applicants, including former BYU students.

Official Notice of Admissions Committee Action: Applicants will receive electronic notice of the official action taken by the admissions committee (oral communication does not constitute a valid offer of admission). Admission can be granted only by the Admissions Office and not by any other BYU department. An official offer of admission is valid only for the semester or term indicated. Students who wish to change the entry date specified in their notice of acceptance must request permission to do so from the admissions committee before the designated deadline for the entry date they desire.

Admission Deadlines: All materials must be postmarked on or before the deadline date of the semester or term for which the student is applying.

Fall Semester

New freshman priority deadline: December 1*
New freshman applicants: February 1
Transfer or former applicants: February 1

**This deadline does not apply to international new freshmen.*

Winter Semester

All applicants: October 1

Spring-Summer

Spring Term

All applicants: February 1

Summer Term

New freshman priority deadline: December 1*
New freshman applicants: February 1
Transfer or former applicants: February 1

**This deadline does not apply to international new freshmen.*

Please note: The university president and the admissions committee reserve the right to make exceptions to admission policy and guidelines as deemed appropriate.

US Applicants

New Freshmen

New freshmen are high school or home school graduates with no college credit or with college credit completed prior to high school graduation. Students who are high school age and will not be completing high school are also considered new freshmen.

High School Graduation Alternatives: Those who complete their secondary education through the General Education Development (GED) test, home study, home school, or other programs will be reviewed individually by the admissions committee to determine admissibility. Additional information (achievement tests, personal interview, etc.) may be required as part of the application process.

High School Preparation: Students are encouraged to complete high school courses from the following list of college-preparation courses. Of particular importance are English and mathematics. Writing and math skills are basic for critical thinking. Students who perform well in these classes enhance their possibility of admission. In addition, those who complete Advanced Placement (AP) or International Baccalaureate (IB) courses will receive additional consideration in admission decisions.

Four years of English: composition, grammar, and courses that encourage "writing to learn."

Four years of mathematics (two or three years beyond algebra 1): geometry, intermediate algebra, precalculus, trigonometry, calculus.

Two to three years of laboratory science: chemistry, physics, biology, physiology, anatomy, genetics, botany, zoology.

Two years of history or government: US history, US Constitution, US government, Civil War, world history, medieval history, ancient history.

Two or more years of foreign language (advanced skill in one language is preferred).

Courses in computer science and the arts (music, drama, painting, etc.) can also be worthwhile. Students should be careful to take classes with substantial content that challenges them. Typing and computer skills are valuable assets in today's world, and should be learned either independently or through high school courses.

LDS Seminary: Students are encouraged to participate in LDS seminary during each year of high school. Brigham Young University is committed to the concept that thoughtful and consistent study of the scriptures is vital to the preparation of those desiring to enter BYU. The number of years of LDS seminary completed (released-time, early morning, or home study) will influence additional consideration in admission decisions.

American College Test (ACT) or Scholastic Aptitude Test (SAT): All new freshman applicants, or students whose high school graduating class has yet to graduate, and transfer students who have completed fewer than 24 semester (36 quarter) hours of college credit at the time of application are required to take the ACT or SAT. The ACT is administered nationally six times each year (September, October, December, February, April, and June). The SAT is offered seven times a year in October, November, December, January, March (or April, alternating each year), May, and June. Students are encouraged to take the test during the last semester of their junior year in high school and again in the first semester of their senior year in high school. Because test results take approximately four weeks after the test date to arrive at the Admissions Office, students should plan to take the test at least a month before the deadline for the semester in which they intend to enroll. Registration information and materials can be obtained from most high school or college counseling offices or from the American College Testing Program, 500 ACT Drive, P.O. Box 168, Iowa City, IA 52243-0168, (319) 337-1270 (www.act.org) or from College Board SAT Program, P.O. Box 025505, Miami, FL 33102, (866) 756-7346 (www.collegeboard.com).

Application: Those applying as new freshman students must complete the following requirements:

- Complete parts 1, 2, 3, 4, 5, 6, and 7 of the online application at besmart.com
- Pay the non-refundable, one-time $35 application fee
- Submit transcripts* from all high schools attended (including transcripts for grade 9)
- Submit official transcripts from all colleges/universities attended (if applicable)
- Submit ACT/SAT scores

**Any college or high school work that is completed internationally will need to be evaluated by a third party. Our preferred evaluation agency is IERF (www.ierf.org).*

The application deadlines for new freshmen are as follows:

- December 1: Priority deadline for summer term and fall semester*
- February 1: Final deadline for spring/summer terms and fall semester
- October 1: Deadline for winter semester

**This deadline does not apply to international new freshmen.*

Admission Criteria: Those who complete their application by the December 1 priority deadline will be given extra consideration in the admission process and will be notified of their admission decision no later than February 28. All new freshman applications go through a holistic review process which is comprised of the following elements: ecclesiastical endorsement, unweighted high school GPA, ACT or SAT score, seminary attendance, service, leadership, individual talents, creativity, AP/IB courses taken, unique or special circumstances, and other factors showing a student's ability to strengthen the BYU community.

Note that students who are denied as new freshmen will not be reconsidered for admission until they have completed 24 hours of college credit, with at least one college course having been completed after high school graduation.

Housing: The admission application is also the application for on-campus housing. Students who complete the admission and housing application by the December 1 priority deadline will receive extra consideration in the admission process and priority in on-campus housing selection. Please note that while it is anticipated that all freshman applicants who meet the December 1 priority deadline will have the opportunity to live in on-campus housing facilities, those who apply early in the process will have an advantage in their housing selection.

Early Admission

High school students who would like to be considered for full-time admission to Brigham Young University before high school graduation have the same requirements as new freshman applicants.

Homeschooled Applicants

Applicants who have been homeschooled in lieu of attending a traditional high school environment must receive a composite ACT score of 27 or higher to be competitive for admission consideration. These individuals must also complete all other application requirements for freshman applicants. Applicants should contact Admissions Services (801-422-5000) for more details on the application process for homeschooled students.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

Transfer Students

Transfer with Fewer than 24 College Credits

This student type refers to students who have completed fewer than 24 semester hours (36 quarter hours) of graded college credit after high school graduation. This does not include AP, IB, or CLEP credit; or institute of religion credit. College credits must be completed by the application deadline. These students will be evaluated for admission based on both their high school and college work.

Students who have completed college work and apply for admission prior to graduating from high school will be evaluated as new freshmen *regardless of the number of college hours completed*. Once a student has graduated from high school and has taken at least one course at another college or university, this applicant will be considered a transfer student and college credits taken during high school will count toward the 24 credit hour threshold.

Note that students who are denied as new freshmen will not be reconsidered for admission until they have completed 24 hours of college credit, with at least one college course having been completed after high school graduation.

Application: Those applying as transfer students with fewer than 24 credits must complete the following requirements:

- Complete parts 1, 2, 3, 4, 5, 6, and 7 of the online application at besmart.com
- Pay the non-refundable, one-time $35 application fee
- Submit transcripts* from all high schools attended (including transcripts for grade 9)
- Submit official transcripts* from all colleges/universities attended
- Submit ACT/SAT scores

**Any college or high school work that is completed internationally will need to be evaluated by a third party. Our preferred evaluation agency is IERF (www.ierf.org).*

The application deadlines for transfer students are as follows:

- February 1: Deadline for spring/summer terms and fall semester
- October 1: Deadline for winter semester

Admission Criteria: All applications of transfer students with fewer than 24 credits go through a holistic review process which is comprised of the following elements: ecclesiastical endorsement, unweighted high school GPA, ACT or SAT score, seminary attendance, service, leadership, individual talents, creativity, AP/IB courses taken, unique or special circumstances, and other factors showing a student's ability to strengthen the BYU community. Transfer applicants will receive their admission decisions no later than February 28.

BYU does not accept vocational transfer credit (college courses leading to an applied associate degree or certification) from any institution. This type of credit includes subjects such as auto-mechanics, cosmetology, dental hygiene, and other technical fields. Once admitted, each incoming transcript will be checked for vocational credit, and those vocational credits will be marked as non-transferrable credit. If vocational credit is earned as part of an associate of arts or science degree, it will still be marked as non-transferrable. However, the associate degree will still be recognized as long as at least 35% of the credit within the degree is considered to be academic credit.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

Transfer with 24 or More College Credits

This student type refers to students who have completed 24 or more semester hours (36 quarter hours) of graded college credit after high school graduation. This does not include AP, IB, CLEP or institute of religion credit. College credits must be completed by the application deadline.

Students who have completed college work and apply for admission prior to graduating from high school will be evaluated as new freshmen *regardless of the number of college hours completed*. Once a student has graduated from high school and taken at least one course at another college or university, this applicant will be considered a transfer student and college credits taken during high school will count toward the 24 credit hour threshold.

Application: Those applying as transfer students with 24 or more credits must complete the following requirements:

- Complete parts 1, 2, 3, 4, 6, and 7 of the online application at besmart.com
- Pay the non-refundable, one-time $35 application fee
- Submit official transcripts* from all institutions attended

**Any college or high school work that is completed internationally will need to be evaluated by a third party. Our preferred evaluation agency is IERF (www.ierf.org).*

The application deadlines for transfer students are as follows:

- February 1: Deadline for spring/summer terms and fall semester
- October 1: Deadline for winter semester

Admission Criteria: All transfer applications go through a holistic review process which is comprised of the following elements: ecclesiastical endorsement, leadership experience, GPA, course selection, quality of coursework, Institute of Religion involvement, academic goals, and other similar factors. Transfer students with more than 90 graded semester credit hours are unlikely to be admitted. Transfer applicants will receive their admission decisions no later than 4 weeks after the final admission deadline.

BYU does not accept vocational transfer credit (college courses leading to an applied associate degree or certification) from any institution. This type of credit includes subjects such as auto-mechanics, cosmetology, dental hygiene, and other technical fields. Once admitted, each incoming transcript will be checked for vocational credit, and those vocational credits will be marked as non-transferrable credit. If vocational credit is earned as part of an associate of arts or science degree, it will still be marked as non-transferrable. However, the associate degree will still be recognized as long as at least 35% of the credit within the degree is considered to be academic credit.

Evaluation of Transfer College Credit: All college transcripts will be evaluated to determine admissibility of an applicant even if all or any of that credit is not accepted for transfer. The BYU Transfer Evaluation Office will determine the transferability of undergraduate credit to BYU.

Factors which can affect the transfer of credit include:

The transfer institution is accredited by one of the following regional associations or is an institution sponsored by The Church of Jesus Christ of Latter-day Saints:

Middle States Association of Colleges and Schools
New England Association of Schools and Colleges
North Central Association of Colleges and Schools
Northwest Commission on Colleges and Universities
Southern Association of Colleges and Schools
Western Association of Schools and Colleges

In addition to accreditation, the following criteria are also considered when determining the transferability of credit and equivalencies: comparable credit hours, course level, seat time, and course descriptions. Vocational and technical credit is not accepted, even if earned at an accredited institution.

Additional factors that can affect the transfer of credit:

1. Military courses are evaluated using the ACE recommendations in the upper-division baccalaureate category from the Guide to the Evaluation of Educational Experiences in the Armed Services.
2. Advanced Placement scores of 3, 4, and 5 and IB scores of 5, 6, or 7 may be awarded credit.
3. An associate of art or science degree from any one of the main feeder institutions (BYU-Idaho, College of Eastern Utah, Dixie State College, Mesa Community College, LDS Business College, Salt Lake Community College, Snow College, and Utah Valley University) will fill most BYU university core requirements with the exception of Advanced Written and Oral Communication, Languages of Learning, and the religion hours at BYU. Advanced Written and Oral Communication and the Languages of Learning requirements may be filled by completing specific courses at other colleges. Students who have questions about the completion of university core courses are invited to contact the BYU Transfer Evaluation Office, (801) 422-8522, for further information.
4. Most associate of arts or science degrees from other approved transfer institutions not listed above will fill most BYU university core requirements with the exception of American Heritage, Advanced Written and Oral Communication, Languages of Learning, and the religion hours at BYU. American Heritage, Advanced Written and Oral Communication, and the Languages of Learning requirements may be filled by completing specific courses at other colleges. NOTE: Associate of arts or science degrees must include at least 35% solid, academic classes (i.e., general education) in order to fulfill BYU's university core requirements as stated above. Associate of arts or science degrees that include more than 65% vocational or technical courses will be evaluated on a course-by-course basis. Students who have questions about the completion of university core courses are invited to contact the BYU Transfer Evaluation Office, (801) 422-8522, for further information.
5. Credit is evaluated on a course-by-course basis for students who do not complete an associate of arts or science degree. Transfer guides have been established for some of BYU's main feeder institutions. A list of these transfer guides can be found at http://transfer.byu.edu.
6. Credit earned more than eight years before admission or readmission (including transfer credit) may, at the discretion of the university, be accepted to meet general education and university graduation requirements as well as major requirements.
7. Credit earned from an LDS institute of religion must receive a Pass (P) grade and be posted to an official CES transcript.

Note: Any exceptions to this policy must be approved by the academic vice president.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

Former Students

Former students are students who were admitted to the university as fully-matriculated students, completed coursework at BYU, but have been absent from the university for more than one major semester. Students who have attended only BYU's Visiting Student Program, Evening Classes, Salt Lake Center, or other Continuing Education programs are not considered fully-matriculated students and will not be classified as former students.

Application: Those applying as former students must complete the following requirements:

- Complete parts 1, 2, and 3 of the online application at besmart.com
- Submit official college transcripts* from any schools attended since last attending BYU

Any college or high school work that is completed internationally will need to be evaluated by a third party. Our preferred evaluation agency is IERF (www.ierf.org).

The application deadlines for former students are as follows:

- February 1: Deadline for spring/summer terms and fall semester
- October 1: Deadline for winter semester

Admission Criteria: Former student status is not a guarantee of admission. Former students with additional transfer credit must have earned at least a 3.2 GPA or higher on additional work.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

Visiting Student Program

The Spring/Summer Visiting Student Program is available to students who are not currently admitted to BYU; the program is for those who will be pursuing a degree at another university or who would like to receive some credit from BYU. Admission to the Visiting Student Program does not imply continued enrollment at BYU beyond spring-summer.

Application: Applicants interested in the Visiting Student Program must complete the following requirements:

- Complete parts 1, 2, and 3 of the online application at besmart.com
- Pay the non-refundable, one-time $35 application fee
- Submit official college transcripts* from all institutions attended
- If fewer than 24 semester/36 quarter hours of college credit have been completed, also submit
  - High school transcript*
  - ACT/SAT scores

Any college or high school work that is completed internationally will need to be evaluated by a third party. Our preferred evaluation agency is IERF (www.ierf.org).

Admission Criteria: The application deadline for the Visiting Student Program is the week before classes begin. Admission to the Spring/Summer Visiting Student Program is determined on a first-come, first-serve basis. Students must have a 2.5 college GPA or a 2.5 high school GPA and an 18 or higher on the ACT.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admissions policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

BYU Concurrent Enrollment

Local high school students who wish to be considered for admission as part-time students while enrolled in high school will apply as concurrent enrollment students.

Application: Applicants desiring to attend BYU as concurrent enrollment students must meet the following criteria:

- Complete parts 1, 2, and 3 of the online application at besmart.com
- Pay the non-refundable, one-time $35 application fee
- Complete junior year of high school and be at least 16 years old
- Have an unweighted cumulative GPA of 3.70 or higher
- Indicate unconditional support from the high school counselor and parent
- Agree to enroll in no more than 11.5 credit hours during fall and winter semesters and no more than 5.5 hours during spring and summer terms
- Fill out the concurrent enrollment voucher available at http://admissionsforms.byu.edu

Note that a new concurrent enrollment voucher must be submitted for each semester of enrollment at the university.

Please refer to the Evaluation of Transfer College Credit section of the catalog for specific information on the transferability of college credit.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admissions policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

Postbaccalaureate Studies (PBS)

Students who have already received a baccalaureate degree or higher from any institution, including BYU, are not eligible for admissions consideration to pursue another baccalaureate degree or major. However, these students may use university resources during spring-summer through Evening Classes or through BYU Independent Study. Fall and winter admission resources are reserved for undergraduate students and students who have been officially admitted into a graduate program.

Application: Postbaccalaureate applicants must complete the following requirements:

- Have a baccalaureate degree
- Have a cumulative GPA of 3.0 or higher
- Complete parts 1, 2, and 3 of the online application at besmart.com
- Pay the non-refundable, one-time $35 application fee
- Submit official transcripts* from each institution awarding a degree
- Submit a letter of explanation explaining the reason and length of attendance, along with a course outline

**Any college or high school work that is completed internationally will need to be evaluated by a third party. Our preferred evaluation agency is IERF (www.ierf.org).*

The application deadline for the postbaccalaureate Studies program is the first day of classes. International students are not normally eligible for this program.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

Evening Classes

Evening classes are available to non-degree seeking students who are 21 years of age or older and have not been admitted to the university, or to those who have already earned a baccalaureate degree. Evening class students may take up to 8.5 credit hours per semester or spring-summer. Any student formally admitted to BYU may also enroll in courses offered through the Evening Classes Office. **For further details, please visit the Evening Classes website (eveningclasses.byu.edu) or contact the Evening Classes Office:**

Phone: 801-422-2872
E-mail: evening_classes@byu.edu
Mail: 211 HCEB, Provo, UT 84602

Salt Lake Center

Anyone can register for classes at the BYU Salt Lake Center, provided they earned a high school diploma or GED, received an ecclesiastical endorsement, agreed to abide by the Honor Code and BYU Dress and Grooming Standards, and successfully completed the Clearance to Register form. Taking classes at the Salt Lake Center does not constitute admission to BYU. Any student formally admitted to BYU may also enroll in courses offered through the BYU Salt Lake Center. **For further details, please visit the Salt Lake Center website (http://slc.byu.edu) or contact the Salt Lake Center:**

Phone: 801-933-9400
E-mail: slc@byu.edu
Address: 345 West North Temple Street, 3 Triad Suite 300, Salt Lake City, UT 84180

Deferments

Continuing Student Leave of Absence

BYU daytime eligible students may take a leave of absence for one major semester (fall or winter) per academic year without prior notification to the university. An academic year begins with fall semester and continues through the next spring-summer.

Note: International students must obtain clearance from International Services before taking a leave of absence.

Consider the following prior to taking a leave of absence:

- **Ecclesiastical Endorsement:** You must have a current ecclesiastical endorsement to register for subsequent semesters. To complete this requirement, ask your bishop to submit the Continuing Student Ecclesiastical Endorsement Form found online at https://honorcode.byu.edu.
- **Scholarship:** The continuing student scholarship application deadline for fall, winter, and spring-summer scholarships is March 1, regardless of BYU attendance.
- **Federal Loan Repayment:** Student loans have a grace period of six months beginning on the date that the borrower drops below at least half-time enrollment. If your leave of absence extends beyond six months, you will have to start repaying your loans.
- **Reapplication for Admission:** If you fail to enroll in classes before the add/drop deadline of the major semester (fall/winter) immediately following your leave of absence, you will lose your continuing student status and will have to reapply for admission as a former student. Re-admission is NOT guaranteed. Note: If you attend another school during your leave of absence, remember to send an updated transcript to BYU so your credits can be applied to your BYU record. If you do not attend another school, your academic status will remain the same as it was when you took your leave of absence.
- Suspended and dismissed students should consult with the Academic Support Office (see http://ccc.byu.edu/aso/academic-suspension).
- New freshman, transfer, and former students must attend the semester or term to which they have been admitted.
- A leave of absence may be taken **directly prior** to a missionary deferment (consecutive semesters). Following your mission, you **must** enroll at Brigham Young University within a given time period, as noted in the *Missionary Deferment* section below.
- Be sure to resolve any university holds as they may prohibit your ability to register and/or receive other university

services.

Missionary Deferment

BYU students who want to defer their enrollment for an LDS mission must complete a Missionary Deferment form, available at http://admissionsforms.byu.edu. The deferment form should be submitted **after** receiving a mission call, but **before** entering the MTC. The following conditions must also be met:

- Do not attend any college or university between leaving and returning
- Complete a full mission and receive an ecclesiastical endorsement from the mission president
- Return for the semester or term indicated on the Missionary Deferment form

Return from Mission	Enroll No Later Than
October-April	Fall Semester
May-September	Winter Semester

If a student wishes to discontinue after classes begin, he/she must work with the Discontinuance Office.

International Applicants

To be considered for admission as an international applicant, students will need to demonstrate strong academic qualifications, evidence of competencies in English, and a willingness to adhere to the Honor Code and Dress and Grooming Standards.

Once admitted to the university, all international students must make a deposit of $4,000 USD before they will be able to register for classes. The deposit will be held in an escrow account with the intent to be released to the student during his final semester before graduation. Students who experience unforeseen financial hardship while studying at BYU may petition to use up to $3,000 of their deposit before their final semester. International students who have already accessed the $3,000 USD from their deposit and who find they are unable to cover the costs associated with continued education at BYU will receive the final $1,000 in the form of a plane ticket to return to their home country.

In addition to the deposit, international students requiring an I-20 must provide proof of finances for the first year of study. The I-20 will not be issued and a registration hold will be placed on the student's file until the proof of finances has been provided. Once the financial support requirement has been cleared, the I-20 will be processed and sent to the student, and the registration hold will then be released.

International New Freshmen

New freshmen are secondary or home school graduates with no college credit or with college credit completed prior to secondary school graduation. Students who are secondary school age but will not be completing secondary school are also considered new freshmen.

Secondary School Graduation Alternatives: Applicants who complete their secondary education through the General Education Development (GED) test, home study, home school, or other alternative secondary education programs will be reviewed individually by the admissions committee to determine admissibility. Additional information (achievement tests, personal interview, etc.) may be required as part of the application process.

LDS Seminary: Students are encouraged to participate in LDS seminary during secondary school. Brigham Young University is committed to the concept that thoughtful and consistent study of the scriptures is vital to the preparation of those desiring to enter BYU. The number of years of LDS seminary completed (released-time, early morning, or home study) will influence additional consideration in admission decisions.

American College Test (ACT) or Scholastic Aptitude Test (SAT): All new freshman applicants (or students whose secondary school graduating class has yet to graduate) and transfer students who have completed fewer than 24 semester (36 quarter) hours of college credit at the time of application are required to take the ACT or SAT. The ACT is administered throughout the year; consult their website (www.act.org) for more specific dates. The SAT is also administered throughout the year; consult their website (www.collegeboard.com) for specific test dates. Because test results take approximately four weeks after the test date to arrive at the Admissions Office, students should plan to take the test at least a month before the deadline for the semester in which they intend to enroll. Registration information can be obtained from each of the aforementioned websites.

Application: Those applying as international new freshman students must complete the following requirements:

- Complete parts 1, 2, 3, 4, 5*, 6, 7, and 8 of the online application at besmart.com.
- Pay the non-refundable, one-time $35 application fee
- Submit ACT/SAT scores
- Submit TOEFL/IELTS scores
- All international students will need to have their secondary school and college (if applicable) transcripts sent to an international transcript evaluation agency. ** BYU's preferred transcript evaluation agency is the International Education Research Foundation (IERF) www.ierf.org/byu-ces/. Completed evaluations will be submitted electronically to the Admissions Office by the agency. Information on fees, requirements, and how to submit your official transcripts can be found on the organization's website.

  **Part 5 will only need to be submitted if the applicant attended a US-accredited school.*

  ***If the secondary school/college is located in the United States or is a US-accredited school, the transcripts will not need to be evaluated by a third party.*

The application deadlines for international new freshmen are as follows:

- February 1: Final deadline for spring/summer terms and fall semester
- October 1: Deadline for winter semester

Admission Criteria: All new freshman applicants will be notified of their admission decision no later than February 28. All new freshman applications go through a holistic review process which is comprised of the following elements: ecclesiastical endorsement, secondary school GPA, ACT or SAT score, seminary attendance, service, leadership, individual talents, creativity, unique or special circumstances, and other factors showing a student's ability to strengthen the BYU community. It

is recommended that new freshmen have a 3.4 GPA (US equivalent) and an ACT score in the mid 20's to be competitive for admission.

Note that students who are denied as new freshmen will not be reconsidered for admission until they have completed 24 hours of college credit.

English: All nonnative English-speaking applicants must send official results of the TOEFL or IELTS exam to BYU. Applicants need to have a total Internet-based test (iBT) TOEFL score of 80 or higher, with no section score below 20. Those who take the Academic IELTS should earn a score of 6.5 overall, with a subscore no lower than a 6.5 in speaking, and a subscore no lower than 6.0 in reading, writing, and listening. Tests must be on official international test dates. Institutional tests are not acceptable.

Homeschooled International Applicants

These individuals must complete all application requirements for international new freshman applicants. Their academic qualifications will be reviewed on a case-by-case basis. International homeschooled applicants should contact the International Admissions Office (801-422-7535 or intladm@byu.edu) for more details.

Housing: The admission application is also the application for on-campus housing. Housing Services will contact the students with further information once admitted.

Registration and Completion Requirements: All undergraduate international students in attendance must register for and complete at least 12 hours of daytime credit per semester or spring-summer.

Official University Visa Policy: Students should not attempt to enter the United States to attend BYU as a full-time student without presenting an I-20 form from BYU (certificate of eligibility), a valid passport, and a valid F-1 visa, or other appropriate immigration documents. Maintaining visa status is the responsibility of the student.

Note: All international students must report to International Services, 1351 WSC, (801) 422-2695, within one week of arrival on campus.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

International Transfer Applicants

International Transfer Applicants with Fewer than 24 College Credits

This student type applies to applicants who have completed fewer than 24 semester hours (36 quarter hours) of graded college credit after secondary school graduation. This does not include AP, IB, CLEP, or LDS institute of religion credit. College credits must be completed by the application deadline in order to count toward the 24 credit hour threshold. These students will be evaluated for admission based on both their secondary school and college work.

Students who have completed college work and apply for admission prior to graduating from secondary school will be evaluated as new freshmen, *regardless of the number of college hours completed*. Once a student has graduated from secondary school and taken at least one course at another college or university, this applicant will be considered a transfer student and any college credits taken during secondary school will count toward the 24 credit hour threshold.

Note that students who are denied as new freshmen will not be reconsidered for admission until they have completed at least 24 hours of college credit, with at least one college course having been completed after secondary school graduation.

Application: Those applying as international transfer students with fewer than 24 credits must complete the following requirements:

- Complete parts 1, 2, 3, 4, 5*, 6, 7, and 8 of the online application at besmart.com
- Pay the non-refundable, one-time $35 application fee
- Submit ACT/SAT scores
- Submit TOEFL/IELTS scores
- All international students will need to have their secondary school and college (if applicable) transcripts sent to an international transcript evaluation agency.** BYU's preferred transcript evaluation agency is the International Education Research Foundation (IERF) www.ierf.org/byu-ces/. Completed evaluations will be submitted electronically to the Admissions Office by the agency. Information on fees, requirements, and how to submit your official transcripts can be found on the organization's website.

  **Part 5 will only need to be submitted if the applicant attended a US-accredited school.*

  ***If the secondary school/college is located in the United States or is a US-accredited school, the transcripts will not need to be evaluated by a third party.*

The application deadlines for international transfer students are as follows:

- February 1: Deadline for spring/summer terms and fall semester
- October 1: Deadline for winter semester

Admission Criteria: All applications of transfer students with fewer than 24 credits go through a holistic review process which is comprised of the following elements: ecclesiastical endorsement, secondary school GPA, college GPA, ACT or SAT score, seminary attendance, service, leadership, individual talents, creativity, unique or special circumstances, and other factors showing a student's ability to strengthen the BYU community. It is recommended that students have a 3.4 GPA and an ACT score in the mid 20's to be competitive for admission. Transfer applications will receive their admission decisions no later than February 28.

BYU does not accept vocational transfer credit (college courses leading to an applied associate degree or certification) from any institution. This type of credit includes subjects such as auto-mechanics, cosmetology, dental hygiene, and other technical fields. Once admitted, each incoming transcript will be checked for vocational credit, and those vocational credits will be marked as non-transferrable credit. If vocational credit is earned as part of an associate of arts or science degree, it will still be marked as non-transferrable. However, the associate degree will still be recognized as long as at least 35% of the credit within the degree is considered to be academic credit.

English: All nonnative English-speaking applicants must send official results of the TOEFL or IELTS exam to BYU. Applicants need to have a total Internet-based test (iBT) TOEFL score of 80 or higher, with no section score below 20. Those who take the Academic IELTS should earn a score of 6.5 overall, with a subscore no lower than 6.5 in speaking, and a subscore no

lower than 6.0 in reading, writing, and listening. Tests must be on official international test dates. Institutional tests are not acceptable.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

International Transfer Applicants with 24 or More College Credits

This student type applies to students who have completed 24 or more semester hours (36 quarter hours) of graded college credit after secondary school graduation. This does not include AP, IB, CLEP, or LDS institute of religion credit. College credits must be completed by the application deadline in order to count toward the 24 credit hour threshold.

Students who have completed college work and apply for admission prior to graduating from secondary school will be evaluated as new freshmen, *regardless of the number of credit hours completed*. Once a student has graduated from secondary school and taken at least once course at another college or university, this applicant will be considered a transfer student and any college credits taken during secondary school will count toward the 24 credit hour threshold.

Application: Those applying as international transfer students with 24 or more credits must complete the following requirements:

- Complete parts 1, 2, 3, 4, 6, 7, and 8 of the online application at besmart.com
- Pay the non-refundable, one-time $35 application fee
- Submit TOEFL/IELTS scores
- All international students will need to have their secondary school and college (if applicable) transcripts sent to an international transcript evaluation agency.* BYU's preferred transcript evaluation agency is the International Education Research Foundation (IERF) www.ierf.org/byu-ces/. Completed evaluations will be submitted electronically to the Admissions Office by the agency. Information on fees, requirements, and how to submit your official transcripts can be found on the organization's website.

  **If the secondary school/college is located in the United States or is a US-accredited school, the transcripts will not need to be evaluated by a third party.*

The application deadlines for international transfer students are as follows:

- February 1: Deadline for spring/summer terms and fall semester
- October 1: Deadline for winter semester

Admission Criteria: All transfer applications go through a holistic review process which is comprised of the following elements: ecclesiastical endorsement, leadership experience, GPA, course selection, quality of coursework, institute of religion involvement, academic goals, and other similar factors. It is recommended that transfer students have a 3.4 GPA (US equivalent) to be competitive for admission. International transfer applicants with three or more years of work at another college or university are unlikely to be admitted. International transfer applicants will receive their admission decisions no later than 4 weeks after the final admission deadline.

Evaluation of Transfer College Credit: All college transcripts will be evaluated to determine admissibility of an applicant even if all or any of that credit is not accepted for transfer. The BYU Transfer Evaluation Office will determine the transferability of undergraduate credit to BYU.

Factors which can affect the transfer of credit include:

The transfer institution is accredited by one of the following regional associations or is an institution sponsored by The Church of Jesus Christ of Latter-day Saints:

Middle States Association of Colleges and Schools
New England Association of Schools and Colleges
North Central Association of Colleges and Schools
Northwest Commission on Colleges and Universities
Southern Association of Colleges and Schools
Western Association of Schools and Colleges

In addition to accreditation, the following criteria are also considered when determining the transferability of credit and equivalencies: comparable credit hours, course level, seat time, and course descriptions. Vocational and technical credit is not accepted, even if earned at an accredited institution.

Additional factors that can affect the transfer of credit:

1. Advanced Placement scores of 3, 4, and 5 and IB scores of 5, 6, or 7 may be awarded credit.

2. An associate of art or science degree from any one of the main feeder institutions (BYU-Idaho, College of Eastern Utah, Dixie State College, Mesa Community College, LDS Business College, Salt Lake Community College, Snow College, and Utah Valley University) will fill most BYU university core requirements with the exception of Advanced Written and Oral Communication, Languages of Learning, and the religion hours at BYU. Advanced Written and Oral Communication and the Languages of Learning requirements may be filled by completing specific courses at other colleges. Students who have questions about the completion of university core courses are invited to contact the BYU Transfer Evaluation Office, (801) 422-8522, for further information.

3. Most associate of arts or science degrees from other approved transfer institutions not listed above will fill most BYU university core requirements with the exception of American Heritage, Advanced Written and Oral Communication, Languages of Learning, and the religion hours at BYU. American Heritage, Advanced Written and Oral Communication, and the Languages of Learning requirements may be filled by completing specific courses at other colleges. NOTE: Associate of arts or science degrees must include at least 35% solid, academic classes (i.e., general education) in order to fulfill BYU's university core requirements as stated above. Associate of arts or science degrees that include more than 65% vocational or technical courses will be evaluated on a course-by-course basis. Students who have questions about the completion of university core courses are invited to contact the BYU Transfer Evaluation Office, (801) 422-8522, for further information.

4. Credit is evaluated on a course-by-course basis for students who do not complete an associate of arts or science degree. Transfer guides have been established for some of BYU's main feeder institutions. A list of these transfer

guides can be found at http://transfer.byu.edu.

5. Credit earned more than eight years before admission or readmission (including transfer credit) may, at the discretion of the university, be accepted to meet general education and university graduation requirements as well as major requirements.
6. Credit earned from an LDS institute of religion must receive a Pass (P) grade and be posted to an official CES transcript.

Note: Any exceptions to this policy must be approved by the academic vice president.

Registration and Completion Requirements: All undergraduate international students in attendance must register for and complete at least 12 hours of daytime credit per semester or spring-summer.

Official University Visa Policy: Students should not attempt to enter the United States to attend BYU as a full-time student without presenting an I-20 form from BYU (Certificate of Eligibility), a valid passport, a valid F-1 visa, or other appropriate immigration documents. Maintaining visa status is the responsibility of the student.

Note: All international students must report to International Services, 1351 WSC, (801) 422-2695, within one week after arrival on campus.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

International Former Students

Former students are students who were admitted to the university as fully-matriculated students, completed coursework at BYU, but have been absent from the university for more than one major semester. Students who have attended only BYU's Visiting Student Program, evening classes, Salt Lake Center, or other continuing education programs are not considered fully-matriculated students and will not be classified as former students.

Application: International applicants who are applying as former students must complete the following requirements:

- Complete parts 1, 2, 3, and 8 of the online application at besmart.com
- Submit official college transcripts from any schools attended since last attending BYU

The application deadlines for international former students are as follows:

- February 1: Deadline for spring/summer terms and fall semester
- October 1: Deadline for winter semester

Admission Criteria: Former student status is not a guarantee of admission. Former students with additional transfer credit must have earned at least a 3.2 GPA or higher on additional work.

Print material is subject to change. Please refer to our websites for the most accurate information.

Regardless of printed admission policies and procedures, the university reserves the right to refuse or rescind admission to any applicant.

Visiting Students

International students are not normally eligible for this program.

Post-Baccalaureate Studies (PBS)

International students are not normally eligible for this program.

Deferments

Continuing Student Leave of Absence

BYU day-time eligible students may take a leave of absence for one major semester (fall or winter) per academic year. An academic year begins with fall semester and continues through the next spring-summer. *International students must obtain clearance from the International Services Office before taking a leave of absence. International students will be required to return to their home country for the duration of the leave of absence.*

Consider the following prior to taking a leave of absence:

- **Ecclesiastical Endorsement:** You must have a current ecclesiastical endorsement to register for subsequent semesters. To complete this requirement, submit the Continuing Student Ecclesiastical Endorsement Form found online at https://honorcode.byu.edu.
- **Scholarship:** The scholarship application deadline for fall, winter, and spring-summer scholarships is March 1, regardless of BYU attendance.
- **Re-application for Admission:** If you fail to enroll in classes before the add/drop deadline of the major semester (fall/winter) immediately following your leave of absence, you will have to reapply for admission as a former student. Re-admission is NOT guaranteed. Note: If you attend another school during your leave of absence, remember to send an updated transcript to BYU so your credits can be applied to your BYU record. If you do not attend another school,

your academic status will remain the same as it was when you took your leave of absence.
- Suspended and dismissed students should consult with the Academic Support Office (see http://aso.byu.edu/suspension-and-dismissal).
- New freshman, transfer, and former students must attend the semester or term to which they have been admitted.
- A leave of absence may be taken **directly prior** to a missionary deferment (consecutive semesters). Following your mission, you **must** enroll at Brigham Young University within a given time period, as noted in the *Missionary Deferment* section below.
- Be sure to resolve any university holds as they may prohibit your ability to register and/or receive other university services.

Missionary Deferment

International students who want to defer their enrollment for an LDS mission must complete a Missionary Deferment form, available at http://admissionsforms.byu.edu. This form needs to be completed by the student, and signed by a representative from International Services. The deferment form should be submitted **after** receiving a mission call, but **before** entering the MTC. The following conditions must also be met:

- Do not attend any college or university between leaving and returning
- Complete a full mission and receive an ecclesiastical endorsement from the mission president
- Return for the semester or spring-summer indicated on the Missionary Deferment form

Return from Mission	Enroll No Later Than
October-April	Fall Semester
May-September	Winter Semester

If a student wishes to discontinue after classes begin, he/she must work with the Discontinuance Office.

BYU Independent Study

BYU Independent Study is a distance education program that offers online and paper/pencil courses for anyone, anytime, anywhere. They offer almost 600 university, high school, middle school, and personal enrichment courses that can help students make up credit, graduate on time, enhance their curriculum, or earn university credit. **For further details, please visit the Independent Study website (ce.byu.edu/is) or contact the Independent Study Office:**

Phone: 801-422-2868 (Utah County) or 1-800-914-8931 (toll-free)
E-mail: indstudy@byu.edu
Mail: 120 Morris Center, Provo, UT 84602-0300

Graduate Studies

BYU offers over 100 different masters and doctoral degrees in a variety of subjects from law to food science. **For information on available programs and their admission requirements, please visit the Graduate Studies website (gradstudies.byu.edu) or contact the Graduate Studies department:**

phone: 801-422-4091
E-mail: gradstudies@byu.edu
Mail: 105 FPH, Provo, UT 84602

Advanced Placement (AP) Credit

BYU may award credit for AP exam scores of 3, 4, or 5 in most subject areas. AP credit posted to another institution's transcript is reevaluated based on BYU's standard. To see what credit will be earned, see http://saas.byu.edu/tools/b4byu/sites/b4/?new-freshman/apib-guides/.

International Baccalaureate (IB) Credit

Students who complete the International Baccalaureate examinations may receive college credit. An IB course at the standard level will normally be given 3 hours of general credit. An IB course completed at the higher level may receive 6 hours of general credit and possibly fill a general education requirement.

College Level Examination Program (CLEP) Credit

BYU discontinued giving credit for general exams in 2000. Additionally, BYU does not give credit for subject exams.

University Calendar

The annual calendar at BYU includes fall, winter, and spring-summer. Fall semester 2013 begins the first Tuesday in September and ends before the Christmas holidays. Winter semester is from early January to late April. Spring-summer begins April 29. Registering for spring-summer allows students to accelerate their progress in many degree programs.

Discontinuance

Discontinuance Office
D-148 ASB
(801) 422-7705
http://discontinuance.byu.edu

Discontinuance is defined as withdrawing from ALL classes for the current semester or term. A student who discontinues is no longer considered to be currently enrolled. **Note:** Newly admitted students (new freshman, transfer, and former students) who are discontinuing from the semester or term they were admitted will lose their admission status and will need to reapply to attend a future semester. Students should contact a Discontinuance Counselor in D-148 ASB about being readmitted.

Continuing students who discontinue from a non-consecutive major semester (fall or winter) will have that semester counted as a leave of absence. (For more information, see the Leave of Absence section of this catalog). Discontinuance may also have an impact on other areas of campus where students are required to be enrolled in a certain number of credit hours, such as:

- housing
- financial aid
- scholarships
- Student Health Center
- employment
- counseling services
- computer lab
- exercise facilities

The Discontinuance Counselors in D-148 ASB are available to consult with students or parents regarding these issues.

The discontinuance process includes the following:

1. **Before the add deadline**, students may discontinue by dropping all their classes online through MyMAP in MyBYU.
2. **After the add deadline**, students must discontinue by submitting the Request for Discontinuance form available from the Discontinuance Office at D-148 ASB or the discontinuance website (http://discontinuance.byu.edu).
3. If discontinuing **after the withdraw deadline**, students will need to obtain signatures from their instructors indicating *withdraw passing* (W) or *withdraw failing* (WE).
4. Once the Request for Discontinuance form is completed and submitted to the Discontinuance Office (D-148 ASB), the student will be withdrawn from classes.
5. **After the discontinuance deadline**, if non-academic circumstances arise, students may work with their instructors to get an incomplete contract. (See information about incompletes in the Grading section of this catalog.) If a student desires to discontinue after the deadline, it will be necessary to file a petition (see http://petitions.byu.edu).

Please Note

- Discontinuance on or after the first day of class will result in a withdraw date being posted on the student's transcript.
- International or multicultural students must obtain clearance from International Services and/or Multicultural Student Services (respectively) before discontinuing.
- Students admitted only for evening classes or as a BGS student must discontinue through the Office of Evening Classes (120 HCEB, 801-422-2872).
- Students admitted to the Salt Lake Center should discontinue through the Salt Lake Center office (801-933-9400, 345 W. North Temple, 3 Triad Center, Suite 300, Salt Lake City, UT 84180).
- Law School students must initiate their discontinuance through the office of the Law School dean, 348-A JRCB.
- Students who leave the university under emergency conditions and subsequently do not return are still responsible to discontinue before the discontinuance deadline. They should contact the Discontinuance Office (D-148 ASB) as soon as possible.

Grading and Records

Grading

Grade point averages are computed by assigning numeric values to the letter grades:

Letter Grade Values

A	4.0
A–	3.7
B+	3.4
B	3.0
B–	2.7
C+	2.4
C	2.0
C–	1.7
D+	1.4
D	1.0
D–	0.7
E, I, IE, WE	0.0

The grade given in a course is the teacher's evaluation of the student's performance, achievement, and understanding in that subject as covered in the class. The following adjectives indicate the meaning of the letter grades:

A Excellent
B Good
C Satisfactory
D Minimum passing
E Failure

Hence, the grade **A** means that the student's performance, achievement, and understanding were excellent in the portion of the subject covered in the class.

There are prerequisites that qualify students to be admitted to the more advanced classes offered by a department. A senior has added experience, understanding, and preparation and, consequently, progresses in courses that would have been impossible when the student was a freshman. The level of performance, achievement, and understanding required to qualify for each grade that carries credit (any grade other than E, I, IE, or WE) is higher in a more advanced class than in those classes that precede it, and the student is prepared to work at this higher level.

Additional grade designations are as follows:

1. If a student withdraws officially from a class during the first six class days of a semester term, the permanent record will not show a registration for that class. If the student properly withdraws from a class between the seventh and fiftieth class days of a semester or between the seventh and twenty-fifth class days of a term, the record will be marked **W** (official withdrawal).

2. A **WE** grade will be given if a student petitions to withdraw from a class after the deadline and he or she is failing the class at that time.

3. A grade of **P** indicates a passing grade. It has no effect on the GPA.

4. The letter grade **I** (Incomplete) is given on a contractual basis with the instructor to students who are unable to complete the work in the prescribed period of time. An incomplete grade may be given for nonacademic extenuating circumstances (serious illness, personal injury, death in the immediate family, etc.) that may arise *after* the discontinuance deadline (the twelfth week of a semester or the sixth week of a term). To be eligible for an incomplete, the student must have attended up until the discontinuance deadline and be passing the class. If extenuating circumstances arise before the twelfth week of a semester or the sixth week of a term, the student should discontinue or petition through the Registrar's Office to be officially withdrawn from the class(es). The Incomplete Grade Contract must be completed and signed by the instructor and the $10 fee paid before submission of the official grade roll at the end of the semester. A copy of the Incomplete Grade Contract must be submitted to the Records Office by the grade submission deadline. A grade of E will be posted until a valid Incomplete Grade Contract is submitted to the Records Office.

   Class attendance in a subsequent semester or reregistration is not permitted to make up the incomplete. In some special instances, such as a lab class, attendance may be required for the portion of the class or lab section missed. Once the work has been completed, the instructor should complete the portion of the Incomplete Grade Contract, showing the grade earned, and submit the form to the Records Office (B-150 ASB).

   The instructor may designate the specific length of time the student has to complete the course requirements (not to exceed one year). If the work is not completed and the new grade submitted by the instructor within the agreed upon deadline, the I grade will be changed to an IE (the IE grade is considered and calculated as a failing grade). (To extend the contract date within the one-year deadline contact the Records Office, B-150 ASB.)

5. A grade of **T** indicates course work in progress and is only used in certain approved courses in which work may extend beyond the semester. The T grade may be changed to A, B, C, D, E, or P, depending on the grade rule for the course, when the work is completed.

6. The grade **NS** is placed on the student record when a grade roll has not been submitted to the Records Office by the grade submission deadline. After the deadline, individual Grade Change Authorization forms must be used to submit a new grade to change the NS grade. The NS will not be considered in calculating the grade point average.

Grade Changes

After the final grade submission deadline, grades may be changed only for the following reasons:

- making a calculating error in computing the grade
- posting the wrong grade to the grade roll
- changing a T grade after the course work is completed
- posting a grade if no grade was submitted
- reevaluation of the previous grade with no additional work submitted

When such corrections need to be made, an official Grade Change Authorization Form must be completed and sent directly to the Records Office.

If a student completes any additional work beyond the end of the semester or term (original T grades excluded), grade changes should not be made. Instead, the student should request to have an Incomplete Grade Contract.

A previous grade cannot be changed to a W (Official Withdrawal). If the student had a nonacademic emergency, he or she should file a petition for withdrawal with the Registrar's Office.

Numeric Grade Values (Law School)

In fall semester 1987 the Law School was granted permission to grade their courses on the numeric grading system. In fall semester 1994 the Law School was granted permission to change the numeric grading system to a new numeric scale. All current Law School students with previously earned numeric grades had their grades converted to the new numeric scale:

1987–1994	Description	Fall 1994
80–90	Superior	3.7–4.0
75–79	Excellent	3.3–3.6
71–74	High pass	3.0–3.2
66–70	Pass	2.7–2.9
59–65	Low pass	2.2–2.6
50–58	Fail	1.6–2.1

Student Academic Grievance Policy

There may be occasions when a student believes her/his academic work or conduct has been unfairly or inadequately evaluated[1] by the faculty.[2] Usually such differences of opinion can be amicably resolved informally between the student and teacher. If not, the following procedures are intended to encourage satisfactory resolution of academic grievances with a minimum of formal procedure.

1. The grievance must be initiated by the student no later than four months (120 days) from the last day of the examination period of the semester in which the alleged unfair or inadequate evaluation occurred. A grievance related to restrictions limiting participation in university academic programs must be initiated within 30 days of the decision in question.

2. The student should initially address the grievance in writing to the faculty member or administrator responsible, requesting review and resolution. If the faculty member or administrator is unavailable or the student has a valid reason to believe the matter will not be dealt with fairly or that retribution may result, the student may submit the grievance directly to the applicable department chair. (The faculty member, administrator, or department chair shall have the right to consult others regarding the matter as reasonably necessary and with due regard to the student's right to privacy under the Family Educational Rights and Privacy Act.)

3. If the grievance is addressed to the faculty member, and it is not resolved satisfactorily, the student may submit a written request for further review to the department chair within 30 days of the faculty member's decision.

4. The department chair's decision shall be given in writing to both the student and the faculty member within 30 days after receiving the student's request and all supporting material for review.

5. If the matter is still unresolved, the student may submit a written request for formal review to the dean or director of the applicable college or school within 30 days of the department chair's written decision.

6. If formal review is requested, the applicable dean or director shall be assisted in reviewing the grievance by a committee, as described in the following paragraphs.

   6.1 The dean or director will appoint several individuals associated with the university to serve as an ad hoc review panel. At least two of these individuals must be faculty with continuing faculty status from outside the area of study in which the grievance arose. One of these faculty members will be appointed to chair and conduct the proceedings, which should take place within 30 days after receiving the student's written request and all supporting materials. Faculty appointed to a panel reviewing a graduate student's grievance must have graduate faculty status.

   6.2 In reviewing the grievance, the review panel, the affected student, and the affected faculty member are responsible to identify or provide relevant sources of information. The review is intended to be collegial and not adversarial. Accordingly, legal counsel is not allowed to attend nor advocate in the review process. Presentation of the issues should be concise and relevant. The chair of the review panel shall be responsible to conduct the review and establish applicable procedures if such are not available from the dean or director. Any formal presentation should be limited to pertinent issues and panel members allowed sufficient time for questions. Following presentation and discussion of the grievance, the review panel will deliberate in closed session and submit its written recommendation to the dean or director.

   6.3 The dean or director will determine the resolution of the grievance and give the decision in writing to the student and faculty member within 10 days of receipt of the review panel's recommendation. This decision is final and not subject to further appeal, unless it involves termination of a graduate program or termination from the university.

6.4 If the matter involves termination of a graduate program and is not resolved to the graduate student's satisfaction, the student may submit a written request for review to the Dean of Graduate Studies. The written request for review should contain an outline of the grievance and its disposition and set forth facts supporting the student's request for review. The request for review must be made within 30 days of the date of the written decision by the college dean. The Dean of Graduate Studies will convene a formal administrative review of relevant matters that have not been resolved at the department or college level. Following the review, the Dean of Graduate Studies will make the final determination.

6.5 If the matter involves termination of an undergraduate student from the university for academic reasons or revocation of a degree, the student may submit a written request for review to the Academic Vice President. The written request for review must contain an outline of the grievance, its prior disposition, and set forth facts supporting the student's request for review. The request for review must be made within 30 days of the date of the written decision by the dean or director. The Academic Vice President may either make a decision on the matter or delegate the review to an associate AVP who will convene an ad hoc review panel to study the issues and prepare a written recommendation for the Academic Vice President. A written decision by the Academic Vice President will be sent to the student within 30 days of receipt of the written recommendation of the panel, unless an extension is necessary and all parties are notified of the extension in writing.

Notes

1. Academic evaluations which are subject to this policy include grading, restrictions limiting participation in university academic programs, dismissal from the university or a university program for academic reasons, actions arising from incidents of academic dishonesty, the withholding, and/or revocation of a diploma for academic reasons, and the withholding of or special notation on transcripts for academic reasons. Evaluations relating to admissions to the university, ecclesiastical endorsements, discipline administered by the Honor Code Office, or petitions are not covered by this policy. Persons who believe they have been unlawfully discriminated against or sexually harassed should contact the Equal Opportunity Office.
2. For purposes of this policy, "faculty" means any teacher or other individual authorized by the university to academically evaluate students, or who has a legitimate need to know regarding the processing and disposition of an academic grievance.

Scholastic Recognition Each Semester

The dean of each academic college at the close of each semester will post a list of names of undergraduate students who are ranked in the top 5 percent of their college for the given semester, who have earned a minimum of 14 credit hours, and who have earned a minimum grade point average of at least 3.5 for the semester.

Grades

After the semester has ended and all grades have been submitted by the faculty, students may access their grades through AIM in MyBYU.

Records

Records Office
B-150 ASB
(801) 422-2631

The Records Office is the official guardian of all permanent records of all academic work done at the university. The office is also responsible for issuing official transcripts of credit. Official transcripts include only credit completed through BYU.

Classification of Students

Students are classified as follows:

Credit Hours Earned	Classification
0.5–29.9	Freshman
30–59.9	Sophomore
60–89.9	Junior
90 and over	Senior

Access to Education Records—FERPA

Student education records at BYU are generally accessible to eligible students according to the provisions of the Family Educational Rights and Privacy Act (FERPA). BYU has adopted Access to Student Records Procedures that explain in detail student rights relating to their education records. A copy of this is available at the Office of the Registrar, B-150 ASB, Provo, UT 84602-1114.

The following is notice of student rights to their education records, a summary of the procedures for exercising those rights, and a description of student directory information that may be disclosed to the public without the student's consent as required by law:

Eligible students, admitted and enrolled at BYU, generally have the right to:

1. Inspect and review their education records within a reasonable period of time upon submitting to the appropriate department managing their education records a written request, with proof of identification, specifying the records to be inspected. The department will notify the student of the time and place the records may be inspected.
2. Petition BYU to amend or correct any part of the education record believed to be inaccurate, misleading, or in violation of their privacy rights. Students may submit a written request to the department holding the record, clearly identifying the part of the record they want changed, and specify why it is inaccurate or misleading. If the department decides not to amend the record as requested, the department will notify the student of the decision and advise them of their right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures as outlined in university policy will be provided to the student when notified of the right to a hearing.
3. Consent to disclosure of personally identifiable information contained in the student's education record, except as otherwise authorized by law. Examples of exceptions to consent of disclosure include:

a. To school officials and to specified agents of the university who have a legitimate educational interest in the records.
   - A school official or specified agent of the university is:
     - the Board of Trustees or it's agents
     - a person employed by the university in an administrative, supervisory, academic, research, or support staff position, (including law enforcement unit personnel and health staff); or
     - a person or company, with whom the university has contracted as its agent to provide a service instead of using university employees or officials (such as Student Clearinghouse, an attorney, auditor, or collection agent); (the contracted party is subject to the same conditions of use and redisclosure of education records that govern other school officials); or
     - a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks; or
     - a person employed by, under contract to, or designated by the university to perform a specific task.
   - A school official or specified agent has a legitimate educational interest if the official is:
     - performing a task that is specified in his or her position description or by contract agreement;
     - performing a task related to a student's education;
     - performing a task related to student discipline; or
     - performing a service or benefit relating to the student or the student's family, such as health care, counseling, job placement, or financial aid.
   - To officials of another school, upon request, in which a student is enrolled, or seeks or intends to enroll.
   - To the Secretary of the U.S. Department of Education, the Attorney General of the United States, the Comptroller General of the United States, and state and local educational authorities, in connection with certain state- or federally-supported education programs.
   - In situations where a student has sued the university, or the university has taken legal action against a student, as necessary for the university to proceed with legal action as a plaintiff or to defend itself.
   - In connection with a student's request for or receipt of financial aid, as necessary to determine the eligibility, amount, or conditions of the financial aid, or to enforce the terms and conditions of the aid.
   - As required by state law disclosure that was adopted before November 19, 1974.
   - To organizations conducting certain studies for or on behalf of the university on condition that the organizations conducting the studies not permit the personal identification of students by anyone other than the organizations' representatives. Additionally, all information provided must be destroyed by the requesting organizations when no longer needed for the study's purpose.
   - To accrediting organizations to carry out their functions.
   - To either parent of an eligible student if the student is claimed as a dependent for income tax purposes regardless of which parent claims the student as a dependent. Parents requesting information from a student's file shall be responsible to demonstrate that the student in question is a dependent pursuant to Section 152 of the Internal Revenue Code. In addition, BYU may disclose to parents of an eligible student information regarding violations of local, state, or federal law or of the Church Educational System Honor Code regarding the use or possession of controlled substances for student violators under the age of 21.
   - To comply with a judicial order or a lawfully issued subpoena in which case the order or subpoena shall be directed to the Office of the General Counsel for review prior to dissemination of the education record. The university will make a reasonable attempt to notify the student in advance of disclosure when non-directory information is released in response to subpoenas or court orders.
   - To appropriate parties, including parents or guardians, in a health or safety emergency.

     BYU may (without the consent of the perpetrating student) disclose to the victim of a crime of violence or non-forcible sex-offense, (as defined in the Clery Act) the results of any disciplinary proceeding conducted by BYU against the alleged student perpetrator regardless of the outcome of the proceeding.

4. File a complaint with the U.S. Department of Education concerning failures by BYU to comply with the requirements of FERPA. The name and address of the office that administers FERPA is Family Policy and Compliance Office, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202-4605, www.ed.gov/offices/om/fpco/.

BYU has designated the following student information as directory information that it may disclose to the public without the consent of the student:

Name
Addresses and telephone numbers
E-mail address
Month/Day/Place of birth
Names of parents or spouse
Major and minor fields of study
Participation in officially recognized activities and sports
Weight and height of members of athletic teams
Pictures
Dates of attendance (current and past)
Number of months/semesters enrolled
Class standing (freshman, sophomore, etc.)
Enrollment status (full-time, part-time, less than half-time)
Degrees and awards received
Previous educational institutions attended
Dates of employment and job titles for student employment positions
Anticipated future enrollments
Course registrations prior to the beginning of a semester or term
Expected date of graduation
Deferred registration eligibility

Students have the right to restrict disclosure of the above directory information. To request restriction of disclosure, students must file a written request in the Registrars' Office. To avoid being listed on some directories, this must be done on or before the tenth day of a semester or the sixth day of a term. Forms for this request are available in the Office of the Registrar.

Transcript Record Holds

A hold will be placed on a student's record for failure to meet university obligations (fees outstanding, university standards violations, etc.). Until the obligation is fulfilled, no copy of the academic record or diploma or information about the record will be released, and graduation may be delayed or denied.

Earning Credits

Students earn approved university credit in the following ways:

Regular Course Work

Complete work in regular courses offered at BYU. Complete college-level courses through Independent Study, Evening Classes, or other Continuing Education programs.

Transfer Work

Transfer credit for college-level courses completed at an accredited college or university and transferred to Brigham Young University. (See the Admissions section of this catalog for further explanation on transfer college credit.)

Advanced Placement (AP) Exam

Complete an AP exam with a score of 3, 4, or 5. College credit may be awarded based on the subject and score.

Military Credit

Serve in the armed forces. Students who have been on active duty for more than one year may receive additional credit for college-level training and experience in the service. To receive credit, bring the military service DD-214 form to Transfer Evaluation, B-150 ASB.

International Baccalaureate (IB)

Students who complete the International Baccalaureate (IB) examinations with a score of 5, 6, or 7 may receive college credit. An IB course at the subsidiary level will normally be given 3 hours of general credit. An IB course completed at the higher level may receive 6 hours of general credit and possibly fill a general education requirement.

Challenge Examination

Students may receive credit by challenging some courses at the university through a separate examination procedure. Departments reserve the right to decide which courses may be challenged by examination. Religion courses, internship courses, exercise sciences and dance activity courses, and other activity participative courses, such as music, youth leadership, and ROTC, may not be challenged.

The challenge examination is not meant to certify that a student has attended the class and completed all course requirements. The challenge examination credit merely shows that the student's skill and knowledge is sufficient to pass a challenge examination for the course.

Only students who have completed at least one course at BYU through day or evening school or the Salt Lake Center are eligible for the challenge examination option. Students currently enrolled are eligible to take the exam, but the credit will not be posted to the transcript until the other BYU credit and grades are posted. Students who are suspended or dismissed from the university are not eligible to challenge courses. Students who are suspended or dismissed may not have challenge examination credit posted to their record even if the examination was taken prior to the suspension or dismissal.

Once students have graduated, they are not eligible for challenging any additional credit at BYU unless it is specific to the graduate program to which the students have been admitted. (See current BYU Graduate Catalog for information on how to challenge graduate courses.)

Some challenge exams for credit are offered in the Testing Center, and others are arranged through the department offering the course. A fee payable to Student Services in D-155 ASB is required. The student should check with the department to see if the exam is offered in the department or through the Testing Center. To earn academic credit and a grade for the course, the student must sign a Challenge Examination Form and have the Testing Center or the department submit it to the Records Office in B-150 ASB. The time limit for a student to choose course credit is determined by the individual academic department, not to exceed one year. No additional fees are charged to post the credits to the transcript. The student's transcript and cumulative grade point average reflect the grade earned on the exam. The procedure to take exams and request academic credit follows.

Procedure for Challenge Exams Given at the Testing Center

1. Contact the appropriate department for the exam procedure and content before going to the Testing Center.
2. Go to the Testing Center (265 HGB). (For testing dates on GE challenge exams, see table in University Core: General Education section of the current class schedule.)
3. Pay the $20 required fee at the Testing Center.
4. After the exam is graded and the choice is made to receive graded credit, obtain a Challenge Examination Form at the Testing Center and have it validated there. To accept the grade and receive credit for the course, sign the Challenge Examination Form and have the Testing Center submit it to the Records Office (B-150 ASB). After taking the exam there is a limited time to request that the grade be submitted to receive course credit. The time limit to choose course credit is determined by the department, not to exceed one year. Graded credit will be added to the student's official university transcript, and the progress report will show any GE requirement as fulfilled. (Students taking the Physical Science examination may take the grade or an exemption if their score is 75 percent or above. If their score is between 60 and 74 percent, they may receive graded credit.)
5. Students enrolled in the course when they pass its challenge exam **must** also drop the course. Students who drop the class after the *add deadline* (six class days after a semester or term starts) will receive a W on their transcript for dropping the course. If the course is not *officially* dropped before the withdraw deadline, the grade given by the instructor based on class performance will appear on the transcript.

Procedure for Challenge Exams Not Given at the Testing Center

1. Whether or not students are enrolled in the course they are challenging:
    a. Complete the Challenge Examination Form available from the department.
    b. Arrange with the department to take the exam.
    c. Pay the $20 required fee at Student Services in D-155 ASB and have the form validated there ($20 fee per course except for the language exams).

d. Present the validated form to the department examiner.

e. Have the grade and credit recorded on the form by the examiner and obtain the necessary departmental signatures.

f. After seeing the grade, students may choose to have the credit posted to their academic record by signing the Challenge Examination Form and having the department send the completed form to the Records Office (B-150 ASB). After taking the exam there is a limited time to request that the grade be submitted to receive course credit. The time limit to choose course credit is determined by the department, not to exceed one year.

2. Students enrolled in the course when they pass its challenge exam **must** also drop the course. Students who drop the class after the *add deadline* (six class days after a semester or term starts) will receive a W on their transcript for dropping the course. If the course is not *officially* dropped before the withdraw deadline, the grade given by the instructor based on class performance will appear on the transcript.

Exemption Examinations for GE Requirements

Some general education requirements can be accomplished by successfully completing an examination. Exemption examinations for selected GE courses are offered at the Testing Center. (See table in University Core: General Education section of the current class schedule for dates of exemption examinations.)

Procedure for Exemption Exams

1. Contact the appropriate academic department for exam procedure and content before going to the Testing Center.
2. Go to the Testing Center (265 HGB) on one of the examination days. (See table in University Core: General Education section of the current class schedule.)
3. Pay the $20 required fee per class at the Testing Center.

Students enrolled in the course when they pass its exemption examination **must** also drop the course. Students who drop the course after the *add deadline* (six days after a semester or term starts) will be officially withdrawn. (This shows as a W on the transcript.) If the course is not *officially* dropped before the drop deadline, the grade given by the instructor based on class performance will appear on the transcript.

Note: The progress report of students who pass an exemption exam at the Testing Center will be updated automatically at the end of the semester or term. Students should retain their score report for their records.

Earning BYU Credit While on Academic Suspension

Students who have been academically suspended from Brigham Young University are not eligible to enroll in courses through day school, evening school, or any of the Continuing Education programs offered by the university except those courses offered through Independent Study. Students should consult their advisement center to determine which Independent Study courses to take.

Repeating Classes

Students may repeat any course taken at BYU if the course is still being taught or an equivalent course exists.

- Beginning Fall semester 2011: **all** grades will be calculated into the grade point average (GPA) and **all** credit will be counted in the total hours.
- Previous to Fall semester 2011: only the last enrollment of a repeated class (R-suffix courses excluded) counted in the grade point average (GPA) and total credit hours.

Graduation Information

Adherence to University Standards / Honor Code

Students must be in good Honor Code standing to graduate from BYU.

The term "good Honor Code standing" means that a student's conduct is consistent with the Honor Code and the ideals and principles of The Church of Jesus Christ of Latter-day Saints. Excommunication, disfellowshipment, or disaffiliation from The Church of Jesus Christ of Latter-day Saints automatically results in the withdrawal of the student's ecclesiastical endorsement and the loss of good Honor Code standing. Further, a student is not in good Honor Code standing if his or her ecclesiastical endorsement has either lapsed or has been withdrawn, or if the Honor Code Office has placed a "hold" on the student's records.

Students who are not in good Honor Code standing are ineligible for graduation, even if they have otherwise completed all necessary coursework. In unusual circumstances, a student may petition the Dean of Students Office to allow an exception to the ecclesiastical endorsement requirement [under the process set forth in the Church Educational System Honor Code section.]

Application for Graduation

All students desiring to graduate must apply for graduation. Students applying for the bachelor degree should do so by the appropriate deadlines for graduation. The deadlines for each graduation are listed below:

September 15 for December graduation (no graduation exercises)
November 15 for April graduation (graduation exercises)
February 15 for June graduation (no graduation exercises)
April 15 for August graduation (graduation exercises)

In order to apply for graduation, students must have an active ecclesiastical endorsement covering the graduation for which they plan to apply. Students access the online graduation application through the "Apply for Graduation" link in the "School Menu" on MyBYU. After submitting the online graduation application, the student account will be charged a one-time $15.00 fee for graduation and the student will be instructed to contact their individual college advisement center (if applicable) to finish the graduation application process. Students will be notified of the status of their graduation application via email.

Students who apply after the deadline dates will need to contact their college advisement center to be considered for graduation. Graduation Services (B-150 ASB) will notify students of graduation deadlines and procedures via email.

Attendance at Commencement

All candidates for graduation are encouraged to attend the commencement and convocation exercises. Diplomas will be mailed to students after all grades are posted to their official record and all graduation requirements are certified complete. Commencement exercises are held in April and August only. December graduates are invited to the April commencement following their graduation, and June graduates are invited to August commencement following their graduation. Students must have applied for graduation and been submitted by their individual college advisement center by the deadline for the commencement program in order to be listed in the university commencement program. The names of students who have been approved to "walk" at a commencement ceremony and graduate in a future graduation will not be listed in the commencement program. Names will be listed in the commencement program of the graduation for which the student has applied and been submitted.

Deadlines for Transfer, Correspondence, and Incomplete Credit

All incomplete grades must be removed from the student's record, special examinations must be passed and recorded, and all transfer credit for required classes must be on file in the Records/Registration Office at least four weeks before graduation. Any BYU Independent Study coursework (including finals) needed for graduation must be completed at least three weeks before graduation.

Earning Lower Degree After Receiving Higher Degree

A person having already earned a baccalaureate degree or higher from any institution, including BYU, is ineligible to earn a baccalaureate degree at BYU unless exception has been granted by the Undergraduate Steering Committee (USC). Petitions for exception can be directed to the Admissions Office, which will forward the petition to the USC. If a student is able to finish the degree without being readmitted to BYU (through transfer work and independent study), any request for exception to this policy must be directed to Graduation Services in the Registrar's Office.

Adding a Program to a Completed Degree

A person who has a completed undergraduate degree is ineligible to add a second major or a minor to their official record.

Independent Study Credit

A maximum of 36 semester hours of Independent Study credit may be applied toward the 120-semester-hour requirement for a baccalaureate degree.

Note: See the Bachelor of General Studies Program section of this catalog for BGS requirements.

Scholastic Recognition

University Honors

This section provides a brief overview of the requirements to graduate with University Honors. The staff in the Honors Advisement Center, 350D MSRB, (801) 422-5497, is available on a walk-in basis to answer questions about the program. To graduate with University Honors, a student must:

1. Complete an honors enrollment form.
2. Complete the honors commitment interview.
3. Complete the honors curriculum requirement.
4. Complete the honors Great Works requirement.
5. Complete the honors Advanced Languages requirement.
6. Complete the honors service requirement.
7. Complete the senior graduation review.
8. Complete the honors thesis requirement.
9. Submit a graduation portfolio that summarizes the student's academic experiences.
10. Graduate with a cumulative grade point average of at least 3.5.

The requirements for graduation with University Honors complement both major and university core education. The honors curriculum, great works, and advanced languages requirements enhance the university core components; the honors thesis requirement enhances the major education component.

A more detailed explanation of the Honors Program is available in the Honors Program section of this catalog.

Latin Scholastic Distinctions

Latin Scholastic Distinctions at graduation are determined by GPA for the top 10 percent of the graduating seniors based on cumulative total and BYU grade point averages. This includes all coursework earned in integrated bachelor and master programs.

Summa Cum Laude is awarded on the basis of grade point average to the top 1.0 percent of the baccalaureate candidates who have earned a minimum 45 semester residency hours of credit at BYU.

Magna Cum Laude is awarded on the basis of grade point average to the top 1.1 to 5.0 percent of the baccalaureate candidates who have earned a minimum 45 semester residency hours of credit at BYU.

Cum Laude is awarded on the basis of grade point average to the top 5.1 to 10.0 percent of the baccalaureate candidates who have earned a minimum 45 semester residency hours of credit at BYU.

Graduation Requirements

Baccalaureate Degree Requirements

The baccalaureate degree is awarded for completion of a specified program of university study. It recognizes important changes in outlook, understanding, and proficiency that result from university experience. At BYU this program of study includes the University Core, the discipline of a specific major, and each student's choice of electives. In addition, a minimum of 30 semester credit hours in residence on the BYU campus in Provo, a minimum total of 120 credit hours, and a cumulative GPA of at least 2.0 are required.

University Core Requirements for the Baccalaureate Degree

See the University Core section of this catalog for complete information.

Major Requirements for the Baccalaureate Degree

See specific major requirements in the Academic Departments/Schools/Areas, Degrees, and Courses section of this catalog.

Minimum University Requirements

Residency Requirement

At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student to qualify for a baccalaureate degree. Residency credit does not include any hours earned through Independent Study coursework or credit by examination.

Total Credit-Hour Requirement

A candidate for a baccalaureate degree must complete a minimum of 120 credit hours.

Grade Point Average Requirement

To graduate from BYU students must earn a minimum 2.0 cumulative BYU grade point average and a minimum 2.0 total cumulative grade point average. Students must also meet any stipulated minimum grade point average requirements in their major.

Honor Code Requirement

Students must be in good standing with the Honor Code Office and have a current ecclesiastical endorsement.

D Credit

Students may use a course in which they receive a D- ("minimum passing") to complete major, minor, religion, or general education requirements. Those receiving a D- in a course will not be required to retake the course unless a higher minimum grade is stipulated in a degree program or course sequence description in the undergraduate or graduate catalog.

Courses taken at other colleges or universities with D grades will count toward the total hour requirement for graduation, but will not fill BYU university core requirements and in most instances will not fill major requirements.

Major Requirements

The curricular requirements of a specific major must be satisfactorily completed, including any additional departmental requirements related to the major. A minimum of 20 credit hours in the major must be completed in residence as an admitted day student, 10 of these on the BYU campus in Provo.

Students must select and declare a major by the time they have 60 earned BYU credit hours (excluding language exam credits). Once a student has 75 earned BYU credit hours (excluding language exam credits), they will not be allowed to change their major, unless special permission is granted.

In order to encourage timely progress towards graduation, advisement centers may require mandatory advisement before students are allowed to register for classes. Deans, in consultation with advisement centers, may also place registration holds and mandate specific course completion in order to facilitate a timely graduation.

Double Major

Second majors (exclusive of some language second majors) are rare and *must be approved* by the college advisement center supervisors involved and the dean of the college responsible for the primary major. The second major *proposal and approval process* requires an evaluation of all University Core and major requirements and a time-to-graduation analysis. Petitions for a double major must be submitted prior to earning 75 BYU hours (excluding language exam credits). College advisement centers are prepared to assist interested students in this process. Courses used to satisfy the requirements of a student's major can also be used to satisfy the requirements of an approved second major, unless not permitted by the requirements of the proposed second major. Students who graduate with a second major only receive one degree (the one associated with the primary major) and one diploma. Only the primary major will be listed in the university commencement program and on the diploma.

Changes of Requirements

University graduation requirements are occasionally modified or changed. The university informs students of such modifications through the online catalog, online class schedules, and all advisement centers on campus. Students who leave the university for an extended period of time may be informed of such changes through these sources.

Policy on "Old" Graduation Requirements and Credit

Brigham Young University is committed to providing its students with an excellent university education consisting of a broad general education that includes religious education and a strong major education. Programs of the university change and develop in the continuing effort to make learning and experience as valuable as possible. Development, growth, and improvement are expected parts both of our lives and our institutions. It is because of the commitment to a superb education that the university's programs develop and improve and that students are expected to meet the current standards of the university when they graduate, even though they may have begun their studies long ago under quite different expectations.

Students who complete a baccalaureate degree within eight academic years of enrollment at BYU qualify for graduation by meeting those religion, university, and general education requirements in effect when they initially enrolled, even though there may have been changes in general education and religion requirements since that time.

In addition, students who complete a baccalaureate degree within eight academic years of enrollment at BYU qualify for graduation by meeting those major education requirements in effect when they officially declared the major with which they plan to graduate even though such declaration was made at some point following their original enrollment. (A student officially declares a major one of two ways: [1] by indicating the choice of major on part 2 of the CES Admission and Scholarship Application or [2] by submitting a Change of Major Form to a college advisement center at a subsequent time.)

Students have eight years from the time of their initial enrollment in which to complete all requirements for graduation. Students who have not graduated within eight years of their initial enrollment at BYU will be required to meet with an academic advisor in the area of their primary major to determine major and university core graduation requirements and the use of credit previously earned. Where University Core or major requirements have changed or where credit previously earned was in an area of substantial change, students may be required to do additional work to meet graduation requirements.

After discussion with an academic advisor, students may petition the Dean of Undergraduate Education to accept old general education courses to fulfill current general education requirements. This means that credit earned more than eight years before admission or readmission (including transfer credit) may be accepted to meet general education or major graduation requirements at the discretion of the university.

All students who receive undergraduate degrees from BYU are required to complete the University Core requirements unless 1) a student is on the previous GE program and within eight years of initial enrollment; or 2) a student is granted an exception by the Dean of Undergraduate Education.

Bachelor of General Studies

See the Bachelor of General Studies Program in the Division of Continuing Education section of this catalog.

Advisement

An important corollary of the university's commitment to provide its students with an excellent university education is its commitment to help students find their way through their programs effectively and efficiently. Students whose educational experience has extended beyond eight years from the time of initial enrollment and who find that changes in programs will require additional work and preparation should consult with department advisors for help in planning their schedules in the best and most encouraging way possible.

The university's requirement that a student graduate under current or very recent standards is meant to benefit the student and is in no way established to deter a determined person from returning to the university after years away. Good advisement can be of great help in working out a program of study at the university, taking into account individual needs, concerns, and experience.

MyMAP

BYU offers students a helpful academic planning system (MyMAP) that enables them to plan their academic progress towards graduation. MyMAP is an online tool students may use to plan specific courses to fill University Core, major, minor, and elective requirements, and organize those courses into semesters/terms. In addition, students may register for these courses using the Register tab. Easy access to course descriptions can be found on any MyMAP tab by simply clicking on the course title. As a student fully utilizes MyMAP, they will find that they have important information at their fingertips. Students may access MyMAP under the School section of MyBYU. To learn more about MyMAP go to http://mymap.byu.edu.

Church Educational System Honor Code

Brigham Young University, Brigham Young University—Hawaii, Brigham Young University—Idaho, and LDS Business College exist to provide an education in an atmosphere consistent with the ideals and principles of The Church of Jesus Christ of Latter-day Saints. That atmosphere is created and preserved through commitment to conduct that reflects those ideals and principles. Members of the faculty, administration, staff, and student body at BYU, BYU—Hawaii, BYU—Idaho, and LDSBC are selected and retained from among those who voluntarily live the principles of the gospel of Jesus Christ. Observance of such is a specific condition of employment and admission. Those individuals who are not members of The Church of Jesus Christ of Latter-day Saints are also expected to maintain the same standards of conduct, except church attendance. All who represent BYU, BYU—Hawaii, BYU—Idaho, and LDSBC are to maintain the highest standards of honor, integrity, morality, and consideration of others in personal behavior. By accepting appointment on the faculty, continuing in employment, or continuing class enrollment, individuals evidence their commitment to observe the Honor Code standards approved by the Board of Trustees "at all times and . . . in all places" (Mosiah 18:9).

Honor Code Statement

We believe in being honest, true, chaste, benevolent, virtuous, and in doing good to all men. . . . If there is anything virtuous, lovely, or of good report or praiseworthy, we seek after these things (Thirteenth Article of Faith).

As a matter of personal commitment, faculty, administration, staff, and students of Brigham Young University, Brigham Young University—Hawaii, Brigham Young University—Idaho, and LDS Business College seek to demonstrate in daily living on and off campus those moral virtues encompassed in the gospel of Jesus Christ, and will

Be honest
Live a chaste and virtuous life
Obey the law and all campus policies
Use clean language
Respect others
Abstain from alcoholic beverages, tobacco, tea, coffee, and substance abuse
Participate regularly in church services
Observe the Dress and Grooming Standards
Encourage others in their commitment to comply with the Honor Code

Specific policies embodied in the Honor Code include (1) the Academic Honesty Policy, (2) the Dress and Grooming Standards, (3) the Residential Living Standards, and (4) the Continuing Student Ecclesiastical Endorsement. (Refer to institutional policies for more detailed information.)

Good Honor Code Standing

Students must be in good Honor Code standing to be admitted to, continue enrollment at, and graduate from BYU. The term "good Honor Code standing" means that a student's conduct is consistent with the Honor Code and the ideals and principles of The Church of Jesus Christ of Latter-day Saints. Excommunication, disfellowshipment, or disaffiliation from The Church of Jesus Christ of Latter-day Saints automatically results in the loss of good Honor Code standing. Further, a student is not in good Honor Code standing if his or her ecclesiastical endorsement has either lapsed or has been withdrawn, or if the Honor Code Office has placed a "hold" on the student's records.

All students, upon admission to BYU, are required to observe the standards of the Honor Code at all times, whether on or off campus. When the Honor Code Office receives reports of misconduct prior to a prospective student's admission or readmission, those reports are referred to the Admissions Office for appropriate action. When the Honor Code Office receives reports of student misconduct after admission or readmission, but before registration for classes, the Honor Code Office typically notifies the student, indicating that a "hold" will be placed on the student's registration if the matter is not resolved to the satisfaction of the Honor Code Office by a specified date. The Honor Code Office also reserves the right to place a "hold" on the record of any student based on reports of student misconduct prior to notifying the student.

Conduct

All students are required to conduct themselves in a manner consistent with the Honor Code. In addition, students may not influence or seek to influence others to engage in behavior inconsistent with the Honor Code.

Students must abstain from the use of alcohol, tobacco, and illegal substances and from the intentional misuse or abuse of any substance. Sexual misconduct; obscene or indecent conduct or expressions; disorderly or disruptive conduct; participation in gambling activities; involvement with pornographic, erotic, indecent, or offensive material; and any other conduct or action inconsistent with the principles of The Church of Jesus Christ of Latter-day Saints and the Honor Code is not permitted.

Violations of the Honor Code may result in actions up to and including separation from the university.

Homosexual Behavior

Brigham Young University will respond to homosexual behavior rather than to feelings or attraction and welcomes as full members of

the university community all whose behavior meets university standards. Members of the university community can remain in good Honor Code standing if they conduct their lives in a manner consistent with gospel principles and the Honor Code.

One's stated same-gender attraction is not an Honor Code issue. However, the Honor Code requires all members of the university community to manifest a strict commitment to the law of chastity. Homosexual behavior is inappropriate and violates the Honor Code. Homosexual behavior includes not only sexual relations between members of the same sex, but all forms of physical intimacy that give expression to homosexual feelings.

Dress and Grooming Standards

The dress and grooming of both men and women should always be modest, neat, and clean, consistent with the dignity adherent to representing The Church of Jesus Christ of Latter-day Saints and any of its institutions of higher education.

Modesty and cleanliness are important values that reflect personal dignity and integrity, through which students, staff, and faculty represent the principles and standards of the Church. Members of the BYU community commit themselves to observe the following standards, which reflect the direction of the Board of Trustees and the Church publication *For the Strength of Youth*. The Dress and Grooming Standards are as follows:

Men

A clean and well-cared-for appearance should be maintained. Clothing is inappropriate when it is sleeveless, revealing, or form fitting. Shorts must be knee-length or longer. Hairstyles should be clean and neat, avoiding extreme styles or colors, and trimmed above the collar, leaving the ear uncovered. Sideburns should not extend below the earlobe or onto the cheek. If worn, moustaches should be neatly trimmed and may not extend beyond or below the corners of the mouth. Men are expected to be clean-shaven; beards are not acceptable. Earrings and other body piercing are not acceptable. Shoes should be worn in all public campus areas.

Women

A clean and well-cared-for appearance should be maintained. Clothing is inappropriate when it is sleeveless, strapless, backless, or revealing; has slits above the knee; or is form fitting. Dresses, skirts, and shorts must be knee-length or longer. Hairstyles should be clean and neat, avoiding extremes in styles or colors. Excessive ear piercing (more than one per ear) and all other body piercing are not acceptable. Shoes should be worn in all public campus areas.

Residential Living Standards

As stated in the Honor Code, Brigham Young University is committed to providing a learning atmosphere consistent with the principles of the Church. The university is likewise committed to creating such an atmosphere for students residing on and off campus and between semesters. To achieve this, BYU has established living standards to help students learn some of the high ideals and principles of behavior expected at Brigham Young University. Therefore, the university requires students to adhere to the following applicable standards:

Housing

All single BYU undergraduate students who are not residing with their parents must live in university on-campus or university-contracted, sex-segregated housing unless specifically excused in writing by the Off-Campus Housing Office.
(Updated April 17, 2014)

Visiting Hours

Helaman Halls

Visitors of the opposite sex are permitted in the lobbies but not in the bedroom area, except during an established open house, at which times room doors must remain open. Lobby visiting hours begin after 8:00 a.m. and extend until 12:00 midnight, Saturday through Thursday. On Friday night, lobby visiting hours extend until 1:30 a.m.

Heritage Halls

Visitors of the opposite sex are permitted in the lobbies and apartment kitchens but not in bedrooms or bathrooms. Lobby visiting hours are from 8:00 a.m. to 12:00 midnight daily, Saturday through Thursday, and extend until 1:30 a.m. on Fridays. Apartment visiting hours are from 10:00 a.m. to 11:00 p.m. Sunday through Thursday and extend until 12:00 midnight on Friday and Saturday.

Off-Campus Visiting Hours, Wyview Park, and Foreign Language Student Residence

Visitors of the opposite sex are permitted in living rooms and kitchens but not in the bedrooms in off-campus living units, Wyview Park, and the Foreign Language Student Residence. The use of the bathroom areas by members of the opposite sex is not appropriate unless emergency or civility dictates otherwise, and then only if the safety, privacy, and sensitivity of other residents are not jeopardized. Visiting hours may begin after 9:00 a.m. and extend until 12:00 midnight. Friday night visiting hours may extend until 1:30 a.m. Off-campus landlords may establish a shorter visiting period if proper notice is given to students.

Guests

All guests of students must comply with the Residential Living Standards while on the premises of university-contracted housing. Students are expected to help their guests and other residents understand and fulfill their responsibility under the Residential Living Standards and the Honor Code. Approval forms must be submitted for all guest requests, and are available from hall advisors and area offices. Approved guests may stay a maximum of three nights.

Maintaining the Standards

Violations of these standards may be reported to the Honor Code Office, 4440 WSC, (801) 422-2847, or the Off-Campus Housing

Office, (801) 422-1513.

Continuing Student Ecclesiastical Endorsement

Students are required to be in good Honor Code standing to be admitted to, continue enrollment at, and graduate from BYU. In conjunction with this requirement, all enrolled continuing undergraduate, graduate, intern, and Study Abroad students are required to obtain a Continuing Student Ecclesiastical Endorsement for each new academic year. Students begin the Continuing Student Ecclesiastical Endorsement process online at http://www.endorse.byu.edu. For questions regarding the online process, please visit http://honorcode.byu.edu. Students should have their endorsements completed by March 15 to avoid registration delays for fall semester or any semester thereafter. Those applying to BYU should use the online new-student Admissions Application Part 3 found at http://beSmart.com.

LDS students may be endorsed only by the bishop of the ward (1) in which they live and (2) that holds their current Church membership record.

Non-LDS students are to be endorsed by (1) the local ecclesiastical leader if the student is an active member of the congregation, (2) the bishop of the LDS ward in which they currently reside, or (3) the nondenominational BYU chaplain.

Former LDS students are not eligible to receive an ecclesiastical endorsement (See Withdrawn Ecclesiastical Endorsement below).

Requirements

Whether on or off campus or between semesters, all students are expected to abide by the Honor Code, which includes (1) the Academic Honesty Policy, (2) the Dress and Grooming Standards, and (3) the applicable Residential Living Standards. Students are required to be in good Honor Code standing to graduate.

LDS students must fulfill their duty in The Church of Jesus Christ of Latter-day Saints, attend Church meetings, and abide by the rules and standards of the Church on and off campus.

Students who are not members of The Church of Jesus Christ of Latter-day Saints are also expected to maintain the same standards of conduct. They are encouraged to participate in services of their preferred religion. All students must be in good Honor Code standing to graduate, to receive a diploma, and to have the degree posted.

Withdrawn Ecclesiastical Endorsement

A student's endorsement may be withdrawn at any time if the ecclesiastical leader determines that the student is no longer eligible for the endorsement. If an endorsement is withdrawn, no confessional information is exchanged without authorization from the student. Students without a current endorsement are not in good Honor Code standing and must discontinue enrollment. Students who are not in good Honor Code standing are not eligible for graduation, even if they have otherwise completed all necessary coursework. Excommunication, disfellowshipment, or disaffiliation from The Church of Jesus Christ of Latter-day Saints automatically results in the withdrawal of the student's ecclesiastical endorsement and the loss of good Honor Code standing. Disaffiliation is defined for purposes of this policy as removal of an individual's name from the official records of the Church.

The decision to withdraw an ecclesiastical endorsement may be appealed through appropriate ecclesiastical leaders only. As a matter of practice, BYU does not intervene in ecclesiastical matters or endorsements. In unusual circumstances, however, a student may petition the Dean of Students Office to allow an exception to the ecclesiastical endorsement requirement. As part of the petition, a student must (i) complete an Application for Exception to Policy (this form may be obtained from the Dean of Students Office); (ii) sign a release allowing appropriate university officials to freely communicate with the student's ecclesiastical leaders; (iii) prepare a written statement outlining the reasons why, in light of the student's extenuating circumstances, the university should allow an exception; and (iv) submit the completed application, release, and relevant statements to the Dean of Students Office, 3500 WSC, Brigham Young University, Provo, Utah, 84602 for consideration.

When considering the petition, the Dean of Students will focus *not* on the merits of the ecclesiastical leader's decision to withdraw the endorsement but instead on whether the student has demonstrated sufficiently compelling grounds to warrant an exception to the university's ecclesiastical endorsement requirement. In addition to speaking with the student's present and former ecclesiastical leaders, the Dean of Students may also choose to personally interview the student, who may further explain the circumstances which might justify an exception to the ecclesiastical endorsement requirement. The student bears the burden of persuasion that he or she should be considered to be in good Honor Code standing, notwithstanding the lack of an ecclesiastical endorsement. The Dean of Student's decision regarding the petition will be reviewed by the Vice President of Student Life if requested by the student. The decision by the Vice President of Student Life is final.

Housing

Campus Accommodations Office
100 SASB
Phone: (801) 422-2611
Toll-free: (877) 403-0040
Fax: (801) 422-0837
E-mail: housing@byu.edu
Internet: http://www.byu.edu/oncampushousing/

Quality residential living is an important, indeed an integral, part of the total educational experience at BYU, and students should carefully consider the accommodations available in view of the type of living experience they desire, the time they have available for activities within their housing situation, and their economic needs. Housing is available on campus and in the surrounding communities, and programs have been established within campus residence halls and with off-campus landlords to integrate living experiences with the total university educational program.

On-Campus Housing

On-campus housing includes room-and-board residence halls and apartment-style living for men and women—each directed by a competent hall advisor—and family apartments. Assisting the hall advisor in room-and-board areas and the apartment-style living are several resident assistants—mature, advanced students who reside with the student group. Students are known personally by the staff and have someone available to assist with normal student problems.

The residence hall program is designed to provide experiences in self-government, sharing relationships, and other responsibilities that encourage maturity and independence.

All residents have access to the BYU Computer Network which provides them with Internet access as well as printing capabilities with Open Access printing. Using the Internet, residents may access many campus resources including ScholarSearch (BYU Library), Blackboard (course specific web sites), and many other resources.

Residence Halls for Men and Women

Board and room in **Helaman Halls** is provided for both men and women. Each hall contains student lounges; study rooms; common shower and restroom areas; and laundry and storage facilities. The central building features a spacious dining facility (Cannon Commons), a reception area, offices, and mail service for the entire residence area. Recreational facilities include sports courts and large lawn areas.

Apartment Living for Men and Women

Heritage Halls and **Wyview Park** provide apartment-style housing for both men and women. Apartments are furnished, except for bedding and kitchen items.

Most Heritage Halls apartments have a combination kitchen-dining-study room, three bedrooms (designed for two people each), and a bathroom. Each building has a large lobby/living area, recreation room, laundry, and storage facilities. The Heritage Halls Central Building includes a resource center with equipment available for check out by residents.

Wyview Park apartments have a kitchen and dining room, living room, two or three bedrooms, and a bathroom. Two-bedroom apartments have one private bedroom and one shared bedroom. Three-bedroom apartments have two private bedrooms and one shared bedroom.

Residences for Families

Accommodations for student families are provided at **Wymount Terrace**. Each apartment is furnished with an electric or gas range, refrigerator, garbage disposal, and blinds. A limited assortment of furniture can be rented from the Student Family Housing Office. Residents have access to sports courts, children's playgrounds, and large lawn areas.

These apartments do not have washer/dryer hookups, but the areas have self-service laundry facilities. There is also a computer lab available inside the Wymount Terrace office area.

Wymount Terrace has 898 one-, two-, or three-bedroom apartments and is located on the northeast side of campus.

Foreign Language Student Residence

The College of Humanities sponsors the Foreign Language Student Residence, located near the Missionary Training Center. Students pledge to speak only the foreign language in their apartment while they live and study together under the supervision of a faculty advisor and a native speaker.

All rooms in the complex are shared; single rooms are not available. Male and female residents in each target language eat five meals a week together, with the cost of some meals included in the fees. For details contact the Foreign Language Student Residence program office at 3086 JFSB or (801) 422-3765.

Applications/Agreements for On-Campus Housing

Students who wish to live on campus are not required to complete a separate housing application. The admission application is available online at http://BeSmart.com. The final admission deadline is February 1, 2012. Students will be given a room selection date based upon the completion date of their admission application.

Single Student On-Campus Housing

A $100 security deposit and $50 processing fee are due at the time of room selection. The *security deposit* is refundable (1) if the student is not admitted to the university or on-campus housing, (2) if cancellation is received before the deadline shown on the agreement, or (3) at the end of the agreement if there is no debt owed to the university.

Students should be prepared to live by the terms of the agreement once they have acquainted themselves with its terms and submitted it; this will avoid any possible misunderstanding or financial loss. Agreements are made for the academic school year.

Student Family On-Campus Housing

Family housing apartment availability is updated online at 4:00 p.m. Monday-Friday (excluding holidays) at www.byu.edu/familyhousing. For student family housing, the completed agreement must be submitted with a $100 security deposit and a nonrefundable $50 processing fee. Parts 1 and 2 must both be completed for the agreement to be valid.

Off-Campus Housing

C-141 ASB
(801) 422-1513
Internet: och.byu.edu

Brigham Young University is committed to creating an atmosphere conducive to intellectual and spiritual development for all of its students, including those who live off campus. The BYU Off-Campus Housing Office was established to assist in this task by:

1. Aiding students in locating off-campus housing.
2. Encouraging landlords to maintain and improve rental facilities.
3. Advising and giving counsel to students and landlords in their relationships with one another.
4. Attempting to ensure that BYU living standards are maintained off campus.

To help achieve these ends, single undergraduate BYU students are required to live in university-contracted housing (see below). At present, more than 23,000 rental spaces have been contracted by the university for single undergraduate students living off campus. For further information concerning off-campus rentals and BYU regulations, contact the Off-Campus Housing Office at 801-422-1513 between 8:00 a.m. and 5:00 p.m. Monday through Friday or visit the OCH web site at och.byu.edu.

BYU Housing Referral Service

The BYU Off-Campus Housing Office maintains a complete referral service for all university-contracted rental facilities. Thousands of rental units of all types are available, including large- and medium-sized apartment complexes, condominiums, duplexes, and houses. *Some* housing for families and graduate students is also listed, although student family housing and graduate student housing is not subject to university contracting.

Listings are available at och.byu.edu. A guide with housing tips and essential rental data on apartment complexes may be found on the OCH web site. Officials are also available to help students who have problems finding suitable off-campus housing.

Student Address Verification

All BYU students are required to provide the residential address where they reside (not a post office box) as part of the registration process. Unless specifically excused by the Off-Campus Housing Office, all single undergraduate BYU students are required to live in university-contracted housing either on or off campus. The requirement may be waived by the Off-Campus Housing Office for the following students:

1. Single parents with children.
2. Single students living with parents.
3. Single students who are taking classes away from Provo.
4. Under certain conditions, as determined by the Off-Campus Housing Office, the university housing requirement may be waived for other students who have a special circumstance or hardship.

Hotels, motels, and studio apartments are not contracted housing for single students. A studio apartment is a living unit that does not provide a separate bedroom but combines the living and sleeping area.

Students who do not provide their residential address or who live in housing not contracted by the university and who are not excused by the BYU Off-Campus Housing Office are subject to the following sanctions:

1. Non-compliance fees up to $175.00 will be incurred, and future registration may be stopped, until the student verifies that he or she is living in or will be living in university-contracted housing.
2. Students falsifying their addresses will be subject to the above consequences as well as disciplinary action by the university for Honor Code violations.

When a student signs an agreement to live in a facility not contracted by the university and has not been excused from the university housing requirement, these sanctions will be applied even though the student's tenancy extends beyond the current fall, winter, or spring-summer in which the student is enrolled. A student in this situation will have to either move from the uncontracted housing unit, regardless of the consequences, or forego registration and other privileges at the university until complying with this policy.

The university contracts off-campus living units whose owners have agreed to:

1. Adequately separate single men and women.
2. Exercise reasonable efforts to maintain the BYU Residential Living Standards.
3. Maintain the facilities in good repair.
4. Not abuse basic tenant rights.

The university cannot guarantee that owners and managers are employing their best efforts to maintain the standards, that all residents are complying with BYU standards, or that contracted living units always meet the physical criteria. Thus, students are individually responsible to carefully choose an acceptable apartment and compatible roommates. Students should first inform their area management if they suspect that the standards and the physical criteria are not being maintained. Students may also contact the BYU Off-Campus Housing Office and/or the BYU Honor Code Office with concerns.

Because a student's living environment has a profound influence on academic performance and spiritual growth, BYU promotes an environment in contracted off-campus housing facilities that is consistent with its mission and with the moral virtues taught by The Church of Jesus Christ of Latter-day Saints. Specifically, the BYU off-campus housing program *sets guidelines* for landlords and students, which, if followed, will cultivate that desired moral climate. BYU off-campus housing personnel attempt to rectify any deviations from these standards and policy guidelines.

Petition Services

Students who encounter non-academic emergencies or circumstances affecting the academic record may submit a request to make a change to the record through the Petition Services Office. If a student feels there is justification, a petition may be filed asking for an exception to university policy. Possible requests may include adding or withdrawing from a class after the deadline or adding incomplete or challenge exam credit.

Situations that may **not** be petitioned through the Registrar's Office are:

- Reinstatement after being deleted for nonpayment of tuition
- Removal of transfer credit from a transcript
- Verification that a student is full time if they are not.

Any petitions for exceptions to academic records policies must be submitted to the Registrar's Office within one year from the semester or term in question.

Petition forms and additional information concerning petitions may be obtained at the Registrar's Office (B-150 ASB) or at http://registrar.byu.edu/registrar/petitions/.

Registration

Registration Office
B-130 ASB
(801) 422-2631

Who May Register?

Students are eligible to register if they are either continuing BYU students or new students who have received a letter of acceptance from the Admissions Office for the semester they wish to attend.

Continuing student status ends if a student does not complete day school classes during two consecutive full semesters (fall and winter) or if a student has graduated from BYU. Students who have lost continuing student status must be readmitted by the Admissions Office (D-155 ASB) before registration may begin.

Students must be in good Honor Code standing to register and to continue enrollment at BYU. The term "good Honor Code standing" means that a student's conduct is consistent with the Honor Code and the ideals and principles of The Church of Jesus Christ of Latter-day Saints. Excommunication, disfellowshipment, or disaffiliation from The Church of Jesus Christ of Latter-day Saints automatically results in the withdrawal of the student's ecclesiastical endorsement and the loss of good Honor Code standing. Further, a student is not in good Honor Code standing if his or her ecclesiastical endorsement has either lapsed or has been withdrawn, or if the Honor Code Office has placed a "hold" on the student's records.

The Registration Process

Complete registration instructions and deadlines are listed in the current class schedule for each semester or term or on the web site http://registrar.byu.edu/registrar/.

Registration is based on a priority system (fall and winter semesters only) that allows students to begin registration according to the number of hours completed. Priority begins with graduate students and seniors, then juniors, sophomores, and freshmen. Post-baccalaureate non-degree-seeking graduates will be given access after continuing freshmen. Newly admitted freshmen will register together in a separate priority (fall semester only). However, for fall semester, early registration for mentored courses may be completed through the Freshman Mentoring website.

Students can determine their priority registration for fall and winter semesters by logging onto the AIM system, typing MyMAP in the Quick URL box, clicking on the "Register" tab, then clicking on the "+" near the appropriate semester tab. These dates will be posted 2-3 weeks before registration begins. Students may begin registering for fall semester in April and for winter semester in October by following the instructions in the current class schedule or on the web site.

Summer semester registration is not based on a priority system. Schedules become available sometime in December, and eligible students can register for summer beginning in February. Students have continuous access to the online registration system; however, once school begins some classes must be added with a permission-to-add code.

Adding and Dropping Classes

Students may use the web registration system to add and drop classes until the add deadline. Each academic department determines how classes are added. The add method of each class is noted in the current class schedule with an **O** (web registration system is open through add deadline), **S** (department or faculty permission-to-add code required always), or **F** (web registration system until classes start for a semester—instructor permission-to-add code thereafter).

To add a class that requires a permission-to-add code:

1. Contact the instructor/department and obtain a permission-to-add code.
2. Log into MyBYU and select the Registration tab under MyMap.
3. Select the year-term, teaching area, and class number of the class you want to add.
4. In the left column select the "P" for the class you want to add.
5. A pop-up box will appear. Enter the permission-to-add code (they are not case sensitive).
6. Hit "enter."
7. Select "OK" to verify the transaction.

To drop a class once school begins:

Use the AIM registration system during the add period (first **six** class days of a semester or term).

Dropping all classes after the first day of class will result in a withdraw date on the transcript.

Note: A student can be registered for more than one section of an R-suffix course and therefore must drop each unwanted section.

To withdraw from a class after the add/drop dealine, see "Withdrawal from Classes" below.

Full-, Three-Quarter-, or Part-Time Status

For fall, winter, or spring-summer enrollment purposes, a student who registers for 12 or more credit hours is full-time. Registration for 9 to 11.5 credit hours per semester is deemed three-quarter-time. Registration for 0.5 to 8.5 credit hours gives the student part-time status. International students and students receiving financial assistance may be required to register for more hours to be considered full-time. (Tuition is assessed differently. Please check the tuition tables.)

Verification of Full-Time Status for Graduate Students

Graduate students (master's and doctoral students) who are enrolled for at least 2 credit hours per semester and who can be certified by their department as being engaged full-time in pursuit of their degrees can petition for graduate full-time status. Requests for such an exception should be directed to the Office of Graduate Studies (105 FPH or call [801] 422-4091).

Withdrawal from Classes

Students who choose to withdraw from a class must do so officially. Students who do not officially withdraw before the published deadline will receive a failing grade. Refer to the current class schedule for the appropriate procedure and deadlines and fees.

To withdraw from a class:

1. During the withdraw period (seventh through fiftieth day of a semester or seventh through twenty-fifth day of a term) students may use the AIM registration system to withdraw from classes. A $10 fee per class will be charged to the student's account and a W will be posted on the student's transcript (a "W" does not affect GPA).
2. To withdraw from classes for extenuating circumstances after the withdraw deadline, students may petition for an exception to university policy through the Petitions Office (B-150 ASB) and pay a $10 fee per class.

The university reserves the right to assign a failing grade for academic dishonesty reasons even if the student is able to withdraw him/herself from the class before the failing grade has been assigned.

Class Attendance Policy

Students are expected to attend classes for which they are registered. Each class instructor may determine the relationship of class attendance to the final grade for the course. Faculty should tell students what relationship attendance has to the final grade for the course, but students must take responsibility for their actions. Notification to teachers of emergency absences (death in the family, serious illness, etc.) is the student's responsibility.

Auditing Classes

Students who wish to audit a class (take a course without receiving any credit for it) must add the class with a permission-to-audit code within the first six class days of a semester or term. Audited classes do not appear on transcripts for completed semesters and do not count for verification purposes. *Students must be officially enrolled either for credit or audit to be eligible to attend class.*

Class Preparation Time

The expectation for undergraduate courses is three hours of work per week per credit hour for the average student who is appropriately prepared; much more time may be required to achieve excellence. These three hours may include one hour of lecture plus two hours of work outside class, three hours in a laboratory with little outside work, or any other combination appropriate to a particular course.

Maximum Hours per Semester

An undergraduate student in good standing may register for as many as 18 credit hours in any one semester by following the regular registration procedure. College advisement centers may authorize a student who has demonstrated superior academic ability to register for a maximum of 21 hours per semester. This authorization is given by the advisor flagging approval on a student's record. The student will not be able to register for the additional hours until the first day of the semester/term. Registering for classes through Continuing Education or auditing classes constitutes a part of the total registration. Through a petition process after the first day of school, exceptions to these rules may be granted by the university registrar (B-150 ASB).

Final Examinations

The university schedules exam preparation and examination periods. An examination period occurs at the end of each semester and term. The examination period is preceded by exam preparation days, which give time for conscientious review, study, and synthesis of the semester's work. The exam preparation and the examination periods are firmly scheduled parts of the semester; students

must not make plans that interfere with these important academic activities. Students may not take final examinations early. If illness or other uncontrollable circumstances prevent a student from taking an examination at the scheduled time, that student is responsible to inform the class instructor as soon as possible.

The instructor may give the grade *Incomplete* for nonacademic extenuating circumstances occurring **after** the discontinuance deadline. The incomplete cannot be given unless the student and instructor together prepare a contractual agreement (see Grading and Records for further information.) In cases where a student has conflicting examinations or three or more examinations in one day, individual arrangement for alternative test times may be made by the instructor.

Registration Holds

The university may place a hold on a student's records that will block registration privileges. The hold will be indicated on the registration system. It is the student's responsibility to contact the appropriate office to clear any holds before attempting to register for classes.

Bachelor of General Studies Program (BGS)

Division of Continuing Education

391 HCEB
(801) 422-4149

Dean: Wayne J. Lott
Associate Dean: Lee J. Glines
Associate Dean: Darin R. Oviatt
Assistant to the Dean—Financial Services: Jonathan S. Spackman
Assistant to the Dean—Assessment: Jeff E. Hoyt
Assistant to the Dean—Compliance: R. Neil Carlile

The Division of Continuing Education provides educational programs and university services for part-time and off-campus students. These educational opportunities also assist regular daytime students. The same university standards required of regular day students apply to those enrolled through the Division of Continuing Education while they are on campus.

Organization. Continuing Education programs represent BYU. Continuing Education departments, including the BYU Salt Lake Center, will be distinguished in the material that follows.

Requirements for Enrollment in Continuing Education Classes

Noncredit classes are open to anyone who abides the standards and has the desire and necessary ability.

Credit classes are open to ecclesiastically endorsed:

1. Matriculated students.
2. Individuals who are twenty-one years of age or older.*
3. Individuals desiring to audit courses.
4. High school students who meet current university requirements for concurrent enrollment.

Students who have been suspended from Brigham Young University or any other institution of higher learning for any reason are not eligible to register in Continuing Education credit classes until such suspension is cleared.

Enrollment Limitations. Persons enrolling in credit courses offered by the Division of Continuing Education who are officially admitted to the university can take any courses offered to a maximum of 18 credit hours per semester (9 hours per term). All others, twenty-one years of age and older, who have not been formally admitted to the university are limited to a maximum of 8.5 credit hours per semester (4 hours during spring or summer term).* Contact the Division of Continuing Education for any additional conditions of enrollment.

Student Responsibility. Acceptance in a Continuing Education course *does not* constitute admission to BYU or any other university on a degree-seeking basis. It is the student's responsibility to gain admission to the university of his or her choice as a degree-seeking student through the institution's normal procedures. At BYU students may accomplish this through the Office of Admissions.

Note: Non-matriculated students enrolled through the Division of Continuing Education are not eligible for university employment, housing, or financial aid except for assistance that is available to part-time students through the Division of Continuing Education.

*Some exceptions exist at the BYU Salt Lake Center.

Conferences and Workshops

Robert A. Holcombe, Director
113 HCEB
(801) 422-3559

The Department of Conferences and Workshops assists the university's colleges, schools, and departments in developing and offering outreach programs. The department can help with both credit and noncredit programs, including conferences, workshops, symposia, continuing professional education courses, seminars, association meetings, test-prep courses, and youth camps. Programs can use either campus or off-campus facilities to extend university offerings to alumni, youth, the campus community, and other adults.

In addition to the many programs previously offered, Conferences and Workshops now includes BYU Campus Education Week, two Scout PowWow programs, and campus-based Adult Religion classes.

For a comprehensive listing of courses or for information on how we can help you plan a conference, visit our Web site at conferences.byu.edu.

BYU Conference Center

Spencer E. Hansen, Manager
2255 CONF
(801) 422-7700

The BYU Conference Center is located east of the Marriott Center and adjacent to the Harman Continuing Education Building. The primary host facility for conference guests on campus, it is especially equipped to provide a favorable learning environment for guests participating in conferences, workshops, training seminars, and other educational programs. University units may sponsor or cosponsor conference center events. When certain qualifications are met, off-campus professional, government, corporate, civic, religious, family, or community organizations may also schedule events. The center is not available to promote a product or service or for other entrepreneurial efforts.

Those interested in scheduling the center are invited to contact the BYU Conference Center.

BYU Salt Lake Center

Scott L. Howell, Director
345 West North Temple Street
3 Triad Center, Suite 300
Salt Lake City, UT 84180
Telephone: (801) 933-9400
Internet: http://slc.byu.edu

The BYU Salt Lake Center, a department within the Division of Continuing Education, extends the Provo campus into the Salt Lake Valley and surrounding areas in offering 150 undergraduate university courses each semester. Most courses are conveniently held during the afternoon and evening hours to accommodate the schedules of 1,200 full- and part-time students who attend each semester. Students register for BYU Salt Lake Center classes using the university's online registration system.

Students not admitted to Brigham Young University are welcome to take classes at the BYU Salt Lake Center if they have earned a high school diploma (or passed the GED), are willing to abide by the Church Educational System Honor Code and the BYU Dress and Grooming Standards, receive an ecclesiastical endorsement, and are cleared for enrollment at the center.

Students formally admitted to BYU's Bachelor of General Studies (BGS) program may complete university core (religion and general education) and required emphasis courses at the Salt Lake Center without further clearance. For admission and program details see the Bachelor of General Studies section in this catalog.

The EMPA (Executive Master of Public Administration), EMBA (Executive Master of Business Administration), and EdLF (Educational Leadership and Foundations) programs are also offered at the center, enabling students to pursue graduate degrees by continuing to work during the day. For admission and program details see the Graduate Catalog.

Class schedules for each semester or term are listed in the BYU class schedule, at http://slc.byu.edu, and in the university's online registration system.

Especially for Youth Programs

J. D. Hucks, Director
206 HCEB
(801) 422-3817

Especially for Youth programs are offered by this department, both on the BYU campus and at a number of locations nationwide. Each year we serve more than 35,000 participants who come from virtually every state and province in the United States and Canada and from several foreign countries.

We also offer nearly 200 Adult Religion Classes, which feature an LDS Institute curriculum for approximately 15,000 adult participants throughout the United States and Canada.

Evening Classes

Susan V. Overstreet, Director
211 HCEB
(801) 422-2872

The Department of Evening Classes supports academic departments and colleges by offering courses into the evening hours for university students. As a nondegree-seeking, part-time university program it also enrolls students from the community who are 21 years of age or older. Tuition rates for courses in Evening Classes are the same as during the day.

All courses taught through Evening Classes are listed online in the university's official class schedule at http://saas.byu.edu/classSchedule/ or at eveningclasses.byu.edu.

Independent Study

John Taylor, Director
128 MORC
(801) 422-2868
http://is.byu.edu

Independent Study is an outreach program of BYU intended to serve students anytime, anywhere. Through Independent Study, BYU offers more than 225 university-level credit online courses, providing a practical and flexible solution for students with scheduling constraints. Our flexible solution assists working students, armed forces personnel, teachers, and others who may not be able to take their classes in residence. Students may now choose between two types of university courses: "Online" and "Instructor-Guided." The courses are available online and require Internet access. Students have the option to purchase a printed course readings packet.

Up to 36 semester hours of work completed through BYU Independent Study can be applied toward a bachelor's degree from BYU. Many students wanting to complete a degree they started at BYU can take Independent Study courses to fulfill the course/credit requirements of the Bachelors of General Studies (BGS) program, which can be found at http://bgs.byu.edu.

BYU Independent Study also offers more than 190 high school-level courses, more than 20 middle school courses, and 50 free courses for personal development and enrichment.

Students may register for an Independent Study course at any time during the year and have up to one year to complete a course, although most do so in less time. The online catalog is accessible at http://is.byu.edu. A printed version of the catalog is also available without charge from the Department of Independent Study (120 MORC). A complete list of available courses, the current tuition and fees, and enrollment policies and procedures are found in both versions of the catalog.

Bachelor of General Studies Program (BGS)

Steven W. Taggart, Director
315 HCEB
(801) 422-4351, toll-free 888-298-3137

Brigham Young University's Bachelor of General Studies (BGS) Program offers former BYU students who are no longer able to attend BYU and have been away from the university for two or more years an opportunity to complete their bachelor's degree from home. Applicants must have already completed 30 credit hours (exam credit excluded) at the BYU campus in Provo as an admitted day student and must abide by the Church Educational System Honor Code and receive an annual ecclesiastical endorsement. This program is not available to current BYU students.

Admission to Degree Program

Applicants complete the admission procedure through the Bachelor of General Studies Office and pay a fee of $35. The BGS program is open to former students who meet all of the following criteria:

- Have completed a minimum of 30 semester hours of BYU on-campus credit in Provo as an admitted day student (exam credit excluded).
- Have not completed any courses as a BYU day continuing student in the last two years or have already completed a minimum of 90 BYU credits (exam credits excluded).
- Have never completed a bachelor's or higher degree.
- Are in good standing (academic, financial, etc.) at all universities attended.
- Have a 2.0 or higher BYU and cumulative GPA. (If any academic disciplinary action—warning, probation, or suspension—has been taken against you, contact the BGS Office before proceeding with the application process.)
- Will abide by the Church Educational System Honor Code and receive an annual ecclesiastical endorsement.
- Have been approved by the BGS admissions committee.
- Have successfully completed the StDev 100 course (1-credit-hour Independent Study course taken **after provisional acceptance into program)**.

The Discipline

The bachelor of general studies degree is designed to help former BYU students utilize their previously earned credit as much as possible. The BGS uses the same BYU curriculum offered on campus and requires the same general education, religious education, and campus residency as on-campus degrees. Up to 90 of the required 120 credit hours may be earned through Independent Study. The major is general studies, with an emphasis in one of six areas of study. The emphasis adds a measure of specialization and can be completed in one of the following areas: American studies, English, family life, history, management, or psychology. The History emphasis offers both History and Family History tracks.

Students may earn only one emphasis and do not have the option of creating custom-made areas of study. However, within the number of general electives available, students can utilize credit previously earned in a former major or choose to take courses in a particular concentration.

The BGS is a fully accredited bachelor's degree from Brigham Young University. Students pursue this program for a variety of reasons. Some desire a sense of accomplishment—to complete a degree they began years ago. Others are looking for career advancement or to eventually pursue a postgraduate degree.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

Major

BGS in General Studies

Emphases

American Studies

Spiritually Strengthening
Describe how your education helped you build individual testimony and integrate the gospel of Jesus Christ in your professional and personal life

Character Building
Illustrate how your education helped you develop characteristics of strong moral character

Intellectually Enlarging--breadth
Reflect how a broad general education is of value to you

Intellectually Enlarging--skills
Demonstrate skills of critical thinking, effective communication, and quantitative reasoning

Lifelong learning and service
Discuss how your education strengthens personal commitment to lifelong learning, service, and the improvement of society

American Culture
Demonstrate an understanding of the multifaceted nature of American culture and identity

American History
Demonstrate an understanding of the major events in American history such as its social, political, economic, or literary aspects

American Politics
Recognize the interdependence of culture and politics in American life and history

English

Spiritually Strengthening
Describe how your education helped you build individual testimony and integrate the gospel of Jesus Christ in your professional and personal life

Character Building
Illustrate how your education helped you develop characteristics of strong moral character

Intellectually Enlarging--breadth
Reflect how a broad general education is of value to you

Intellectually Enlarging--skills
Demonstrate skills of critical thinking, effective communication, and quantitative reasoning

Lifelong Learning and Service
Discuss how your education strengthens personal commitment to lifelong learning, service, and the improvement of society

Literary History
Demonstrate knowledge of major periods and movements in English or American literature

Genres
Demonstrate knowledge of representative genres such as poetry, fiction, and drama

Authors
Demonstrate knowledge of representative authors from various periods

Critique and Interpretation
Effectively critique and interpret the writings of major authors and their unique contributions to literature

Family Life

Marriage, Family, and Human Development
Demonstrate knowledge of current information about marriage and family living, human development, and related disciplines

Family Processes and Character Development
Demonstrate understanding of family processes by which individual character is formed, built, and passed on in a familial context

Individual, Marriage, and Family Interventions
Demonstrate an understanding of how to intervene to strengthen marriages, families, and individuals

Effective Writing and Critical Thinking
Demonstrate mastery in writing mechanics, content mastery in the discipline, and critical thinking

History

American and World History
Gain a historical consciousness by demonstrating knowledge of major developments in American and world history and understand key historical terms and theories

Historical Research Methods
Demonstrate basic proficiency in using the historical method of research

Effective Writing
Write effectively about historical topics.

Management

Spiritually Strengthening
Describe how your education helped you build individual testimony and integrate the gospel of Jesus Christ in your professional and personal life

Character Building
Illustrate how your education helped you develop characteristics of strong moral character

Intellectually Enlarging--breadth
Reflect how a broad general education is of value to you

Intellectually Enlarging--skills

Demonstrate skills of critical thinking, effective communication, and quantitative reasoning

Lifelong Learning and Service
Discuss how your education strengthens personal commitment to lifelong learning, service, and the improvement of society

Management Skills
Demonstrate knowledge of basic management skills, including accounting, finance, marketing, organizational behavior, and human resource management

Business Strategies
Be able to develop business strategies to maintain viability of a business or organization

Business Ethics and Decision Making
Demonstrate an understanding of principles of ethics and be able to make moral and ethical business decisions

Psychology

Psychology Theory
Demonstrate an understanding of the major theoretical approaches in psychology and how they apply to human behavior

Human Development
Demonstrate an understanding of the stages of human development and factors that influence it

Psychological Science and the Gospel of Jesus Christ
Demonstrate an understanding of possible connections between psychological science and the principles and values of the restored gospel of Jesus Christ

Students should see the BGS office for help or information concerning the undergraduate programs.

General Information

To earn a bachelor of general studies degree, students must complete the following requirements:

1. A minimum of 120 semester hours of earned credit, which breaks down as follows:

StDev 100 Independent Study course	(1 hour)
University core	(30-70 hours)
Religious Education	(14 hours)
Emphasis requirements	(30 hours)
StDev 490 Independent Study course	(2 hours)
General electives	(3–43 hours)

2. 30 hours of BYU campus residency
3. 40 credit hours of 300- or 400-level courses, including 15 hours in the emphasis.

The following policies also apply:

1. A minimum of 10 hours in the area of emphasis must be enrolled in and completed through BYU **after** formal admission to the BGS program.
2. Students must earn a minimum 2.0 BYU, cumulative, and emphasis grade point average (management emphasis requires 2.25).
3. All courses taken after admission to BGS must be BYU courses.
4. The program must be completed in eight years (or fewer).

BGS course and credit requirements can be filled in the following ways:

Prior Courses and Credits Transferred into the Program

1. Credits earned previously through BYU.
2. Credits earned previously at accredited colleges and universities. All transfer credits must be completed at the time the application is submitted.

Courses and Credits Earned After Admission to the Program

Once admitted to the BGS program, it is expected that any remaining course work will be completed through BYU. This can be done in the following ways:

1. Courses completed through BYU Independent Study.
2. Courses completed at the BYU Salt Lake Center.
3. Courses completed through BYU Evening Classes.
4. Courses completed at BYU during spring and summer terms.

- Revise intelligently, edit carefully, and share one's work with others in the class.

ENGL 317R : Writing Creative Nonfiction. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: ENGL 218R; or instructor's consent.
DESCRIPTION: Creations of style and technique in prose nonfiction; discipline and practice of the writer.

Course Outcomes
- Demonstrate effort and discipline in crafting creative nonfiction and display a knowledge of its conventions.
- Read creative nonfiction models analytically, with an eye to authorial intention and technique and be able to articulate the same.
- Use correct grammar, punctuation, and an appropriate style in creative nonfiction.
- Write a variety of essays using literary models and following explicit instructions from the teacher.
- Revise intelligently, edit carefully, and share one's work with others in the class.

ENGL 319R : Writing Poetry. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Contact Department.
PREREQUISITE: ENGL 218R; or instructor's consent.
DESCRIPTION: Creation of style and technique in poetry; discipline and practice of the poet.

Course Outcomes
- Demonstrate effort and discipline in crafting poetry and display a knowledge of its conventions.
- Read poetry models analytically, with an eye to authorial intention and technique and be able to articulate the same.
- Use correct grammar, punctuation, and an appropriate style in poetry.
- Write a variety of poems using literary models and following explicit instructions from the teacher.
- Revise intelligently, edit carefully, and share one's work with others in the class.

ENGL 320R : Writing for Children and Adolescents. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ENGL 218R

DESCRIPTION: Theory and practice of writing prose and verse for youth readership. Specific attention to requirements of picture books, middle-grade novels, and young adult stories.

Course Outcomes

- Demonstrate effort and discipline in crafting prose and verse for a young readership and display a knowledge of relevant conventions.
- Read models for picture books, middle-grade novels, and young adult stories analytically, with an eye to authorial intention and technique and be able to articulate the same.
- Use correct grammar, punctuation, and an appropriate style in genres for younger readers.
- Write a variety of pieces for younger readers using literary models and following explicit instructions from the teacher.
- Revise intelligently, edit carefully, and share one's work with others in the class.

ENGL 336 : The American Novel. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ENGL 293 & ENGL 295; or ENGL 294 & ENGL 295; Engl 291. (Engl 292 may also be a prerequisite option.)

DESCRIPTION: Representative novels of the American tradition from the late eighteenth century to the present.

Course Outcomes

- Analyze selected American novels in order to create a foundation for the further study of literature.
- Explain the general formal and historical development of the American novel and define a coherent approach to the study of American novels.
- Form a research strategy appropriate to the study of American novels, independently locate relevant digital and print sources, and draw upon these sources to develop a focused and effective written argument about an American novel(s).
- Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

ENGL 350 : The Bible as Literature. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Literary artistry, human values, and cultural significance of the Bible.

Course Outcomes

- Read critically and analyze Biblical texts using methods of analysis typically used in the study of literature.
- Form an appropriate research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.
- Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

ENGL 361 : American Literature 1800 - 1865. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295

DESCRIPTION: Major and selected minor writers and literary trends from 1800 to 1865.

Course Outcomes

There are no course outcomes available

ENGL 362 : American Literature 1865 - 1914. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295

DESCRIPTION: Major and selected minor writers and literary trends from 1865 to 1914.

Course Outcomes

- Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument.
- Read critically and analyze major and selected minor texts and literary trends from the period of 1865 to 1914.
- Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

ENGL 363 : American Literature 1914 - 1960. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295

DESCRIPTION: Major and selected minor writers and literary trends from 1914 to 1960.

Course Outcomes

- Read critically and analyze major and selected minor texts and literary trends from the period of 1914 to 1960.

- Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument.
- Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

ENGL 366 : Studies in Poetry. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Contact Department.
PREREQUISITE: ENGL 251 & ENGL 295
DESCRIPTION: Topics vary.

Course Outcomes
There are no course outcomes available

ENGL 374 : British Literature 1789 - 1832: The Romantic Period. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter
PREREQUISITE: ENGL 251 & ENGL 292 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
DESCRIPTION: Poetry, prose, and drama from Britain's Romantic period.

Course Outcomes
There are no course outcomes available

ENGL 382 : Shakespeare. (3:3:0)

OFFERED: Independent Study also.

Program Requirements | View MAP

1. Complete the following prerequisite course:

STDEV 100 : Essential College Skills. (1:1:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Developing essential college skills. Aims of BYU, values and goals, sound thinking skills. Learning styles and adjustment to college courses. College requirements and planning.

Course Outcomes

- 1. Articulate their educational values and goals and how they align with the purposes of a BYU education.
- 2. Analyze the effectiveness of their own planning/scheduling system and be able to demonstrate that they understand sound time management and goal setting principles.
- 3. Add new study and test preparation (study) skills to their existing repertoire.

2. Complete the following core courses:

SFL 100 : Strengthening Marriage and Family: Proclamation Principles and Scholarship. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Understanding, applying, and sharing principles of successful marriage and family life from the LDS proclamation on the family, using sacred and scholarly perspectives.

Course Outcomes

- Critically understand your testimony of the principles of the Restored Gospel pertaining to marriage, home and family.Synthesize and be able to apply principles from revealed truth and supportive scholarship to strengthen marriage, home, and family life.Be able to confidently share and defend principles of successful marriage, home and family life using support from sacred and scholarly sources.
- Demonstrate improvement in writing skills, speaking, and critical thinking skills to be more effective advocates for marriage, home, and family in a variety of settings.

SFL 160 : Introduction to Family Processes. (3:3:0)

OFFERED: Honors also; Independent Study also.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Ways of strengthening family life by understanding such family processes as generations, emotions, communication, and rituals.

Course Outcomes

- Critically examine the main theoretical frameworks used in the family sciences.Demonstrate understanding of basic terms, concepts, and ideas used to describe family systems.Apply family systems ideas and concepts to your own family (past and future) in order to learn how they might improve your own family well-being.
- Identify and discuss how researchers uniquely study families and family systems.

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

3. Complete 15 hours from the following:

SFL 331 : Infant Development in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Conception, prenatal development, pregnancy. Physical, cognitive, and social development of the first twenty-four months. Implications for guidance and care in the family.

Course Outcomes

There are no course outcomes available

SFL 333 : (SFL-Soc 318) Adolescent Development in the Family and Other Social Contexts. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Examining the developmental and social contexts of adolescents with emphasis on the importance of the family. Other contexts include peers, religion, community, schools, and cross-cultural issues.

Course Outcomes

- Critically examine and discuss selected topics in adolescent development, as well as being able to apply the information and skills learned in this class to your own life.Identify and discuss the major theories of adolescent development, as well as the various research methods used in the study of adolescent development.Understand the important developmental changes that young people experience during this period and during their transition to adulthood.Discuss why at-risk issues are so pronounced during this period and understand prevention and intervention measures that can be taken by families to help them cope with this transition.
- Synthesize (both in thought and writing) information on adolescent development, and apply this information to “real” adolescents with whom you come into contact.

SFL 334 : Adult Development and Aging in the Family. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 160

DESCRIPTION: Adjustments to physical, emotional, social, and economic changes. Needs arising from changes in family relationships, living arrangements, and employment; retirement planning.

Course Outcomes

- Interact with older adults (parents, grandparents, neighbors, ward members, research participants, clients, etc.) in an informed (accurate knowledge of relevant issues) and sensitive (aware of “life course” perspective) manner.Apply complex interactions of gerontology concepts to real-life situations, including current issues in local, national, and world communities.Understand and articulate basic age-related biological, psychological, and sociological processes and learn how to access and evaluate information about those age-related experiences.Synthesize course concepts through observing, serving, and interacting with older adults in the community.

SFL 335 : Family Adaptation and Resiliency. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.

DESCRIPTION: Understanding family resiliency and building family strengths in normative transitions (birth, death, job) and nonnormative transitions (divorce, disability, remarriage, poverty, violence). Developing familial, social, religious, and instrumental resources to adapt positively to these transitions.

Course Outcomes

- Articulate the main conceptual frameworks which help us understand how families cope with stress.Demonstrate how a wide range of life events influence families both positively and negatively.Demonstrate what factors contribute to whether families respond positively or negatively to life events and transitions.Understand and apply how gospel principles regarding the family, charity, faith and trials interconnect with scholarly research on family stress.
- Demonstrate improvement in course content writing skills.

SFL 351 : Socialization Across Childhood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Processes and sequences of social development across childhood.

Course Outcomes

There are no course outcomes available

SFL 354 : Cross-Cultural Family and Human Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SFL 101 & SFL 290; SFL 160 or SFL 210 or concurrent enrollment.

DESCRIPTION: Comparative study of familial, social, and other factors in development.

Course Outcomes

- Critically evaluate the importance of considering gender as an important contextual factor for

understanding human development and relationships.Develop awareness of one's own cultural and gender-based values and beliefs.Recognize and explicate biases inherent in the perspective of the dominant U.S. culture.Engage in class (and out-of-class) discussions about class topicsBe better positioned as a citizen of the world, in terms of valuing diversity and being able to analyze world cultures for how they might benefit (or cost) individual and family development.

SFL 355 : Language Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Philosophical, social, intellectual, and emotional contexts of language acquisition and usage.

Course Outcomes

There are no course outcomes available

BYU 300- or 400-level campus courses in the School of Family Life (including Salt Lake Center classes) may also be used to fill this requirement.

4. Complete six hours from the following elective courses:

SFL 110 : Food Preparation in the Home. (2:1:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Principles of cooking and skill development in food preparation techniques. Lab required.

NOTE: Fee.

Course Outcomes

- Understand food preparation principles and techniques and apply them while mixing, cooking, and baking food products for home use.Identify and prevent food borne illness and safety hazards with appropriate food handling and preparation techniques.Understand and apply knowledge of nutrition to food preparation.Develop confidence in selecting and following recipes.Demonstrate proper use of equipment for baking and cooking.

SFL 223 : Preparation for Marriage. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Factors related to quality relationships, mate selection, and the transition into marriage.

Course Outcomes

- Understand the Lord's "divine design" (Proc. ¶ 7) for marriage relationships (e.g., the nature of the marriage covenant, equal partnership, stewardships of husbands & wives, etc).Increase awareness of marriage as a social institution.Become sensitized to the modern threats to marriage.Increase understanding of the LDS doctrines of marriage, including prophetic counsel on dating, courtship, intimacy, weddings, finances, divorce, and other aspects of the marital stewardship.Increase awareness of the factors that social science research has shown to contribute to the formation and maintenance of healthy and stable marriages.Enhance spiritual awareness and academic skills in order to help them weigh scholarly and contemporary ideas about marriage relationships and use both faith and scholarship.Critically explicate your awareness of marriage as a social institution.Identify and be sensitive to modern cultural threats to marriage.Be able to grasp and understand the LDS doctrines of marriage, including prophetic counsel on dating, courtship, intimacy, weddings, finances, divorce, and other aspects of the marital stewardship.Increase your awareness of the factors that social science research has shown to contribute to the formation and maintenance of healthy and stable marriages.Enhance your spiritual awareness and academic skills in order to help you critically weigh scholarly and contemporary ideas about marriage relationships and use both faith and scholarship to "hold fast to that which is good" (1Thess. 5:21).

SFL 224 : Marriage Enhancement. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Enhancing marital communication skills, conflict resolution styles, intimacy, stress management, and developing a shared relationship vision using social science theories and research findings.

NOTE: Married, engaged, and couples seriously dating are encouraged to enroll together.

Course Outcomes

- Set and achieve marital goals in line with one's marital visionBuild virtues of commitment, love, friendship, respect, fairness, generosity, and positivity in their marriageUnderstand themselves, their partner, and their relationship more completelyExpress themselves more clearly and listen more carefully to their partnerDeal more effectively with conflict, disagreements, and relationship issuesUnderstand how family-of-origin dynamics influence their marital behaviorIdentify how children potentially can influence marriage across the marital life cycleRelate sexually in a more fulfilling wayStrengthen marriage as the years pass

SFL 240 : Parenting and Child Guidance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Theories and skills related to quality parent-child relationships.

Course Outcomes

- Critically examine theories of overall parenting styles and the impact of these styles upon optimal parenting.Critically examine parenting practices within the overall parenting styles and the impact of these practices upon optimal parenting.Identify effective parenting practices in the context of various life stages.Understand parenting principles that may heighten professional and/or parental potential.
- Synthesize in writing an analysis of parenting styles and practices of your family of origin and how you may modify those styles and practices with the principles obtained in this class.Examine and write in depth a specific area of interest related to parenting styles and practices.

SFL 260 : Family Finance. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Introduction to time value of money, budgeting, saving, credit, taxes, housing, insurance, and investing emphasizing practical application in the home.

Course Outcomes

- Identify areas of financial risk in your personal lives.Differentiate between a good financial decision and a poor financial decision.Use financial calculators or financial equations for time value of money to classify various financial products to determine the most appropriate product for their family given their current financial situation.Generate a family budget and evaluate home and automobile purchasing and financing options.Analyze and plan for present and future needs by understanding investing option available.

Any courses not used in requirement 3 above.

5. Complete the following capstone course:

STDEV 490 : Bachelor of General Studies Capstone. (2:2:0)

OFFERED: Independent Study only.

PREREQUISITE: STDEV 100; completion of all other BGS program requirements.

DESCRIPTION: Culminating course required for bachelor of general studies degree: analyze and evaluate BGS experience in light of the "Aims of a BYU Education" and summarize this experience in a reflective paper, integrate material learned in emphasis by completing a scholarly essay, and demonstrate accomplishment of learning outcomes.

Program Requirements | View MAP

1. Complete the following prerequisite course:

STDEV 100 : Essential College Skills. (1:1:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Developing essential college skills. Aims of BYU, values and goals, sound thinking skills. Learning styles and adjustment to college courses. College requirements and planning.

Course Outcomes

- 1. Articulate their educational values and goals and how they align with the purposes of a BYU education.
- 2. Analyze the effectiveness of their own planning/scheduling system and be able to demonstrate that they understand sound time management and goal setting principles.
- 3. Add new study and test preparation (study) skills to their existing repertoire.

2. Complete the following core courses:

HIST 201 : World Civilization to 1500. (3:3:0)

OFFERED: Honors also. Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

Course Outcomes

- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development
- Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles
- Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

HIST 202 : World Civilization from 1500. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.
- Be able to identify major societies of the post-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles.
- Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples—including, how they understood the natural world, what it meant to be human, and their relationship with the divine.
- Be able to analyze historical questions and issues clearly, assess historical information accurately, and

distinguish between questionable and valid historical assertions.
- Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).
- Improve the clarity and grace of analytical writing.
- Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

: Honors World Civilization from 1500.

Course Outcomes

HIST 220 : The United States Through 1877. (3:3:0)

OFFERED: Independent study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Course Outcomes
There are no course outcomes available

HIST 221 : The United States Since 1877. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Industrialization, immigration, urbanization, political and social movements, and foreign policy.

Course Outcomes
There are no course outcomes available

3. Complete one of the following tracks:
   a. History:
      Complete 18 hours from the following:

HIST 252 : Modern Latin America. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: National period (1810 to present): independence, institutional development, culture, and inter-American relations.

Course Outcomes
- Students will be exposed to the major economic, political, and cultural shifts that shaped the "modern" Latin American state in the nineteenth and twentieth century, as well as its variants, notably the cult of caudillo rule and its twentieth century offshoots
- Students will become conversant with major theoretical arguments and approaches to Latin American history in the contemporary era.
- Students will gain oral proficiency in discussing historiographical and thematic issues in modern Latin America during weekly discussion.
- Students will either broaden their understanding of literature on one topic in Latin American history by way of an intensive literature survey or deepen their knowledge on a particular topic in Latin American history by way of an original research paper.
- Students will make connections between cultural and polotico-economic issues by way of a wide variety of course readings that expose students to literature, as well as traditional historical themes.

HIST 302 : The Italian Renaissance. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.
DESCRIPTION: Major political, social, and cultural events in Italy from 1200 to 1530, emphasizing concept of the Renaissance in modern historiography.

Course Outcomes
- Students will understand and be able to analyze the major political, economic, social, and religious developments in Italian Renaissance history
- Students will be able to trace the historiographical evolution of the Italian Renaissance and analyze historical questions within this historiographical context
- Students will refine and improve historical research, writing and analytical skills

HIST 304 : The Expansion of Europe, 1400-1800. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.
DESCRIPTION: Early voyages of discovery and the actions of Europeans in the wider world from about 1400 to 1800.

Course Outcomes
There are no course outcomes available

HIST 317 : The Family and the Law in American History. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: HIST 217

DESCRIPTION: The interaction of families with law and government as illustrated in original American sources; individual family histories reconstructed in the broader perspective of history.

Course Outcomes
There are no course outcomes available

HIST 319 : The Family in Europe. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: Nature and development of marriage and family life and structure from the ancient to modern era.

NOTE: Independent Study also.

Course Outcomes
- Students will be able to understand and explain major trends in European family life, relationships, and law between 1100 and the present
- Students will be able to analyze and synthesize historiography of family history
- Students will read, analyze, and write about primary and secondary sources and explain their connections to one another.
- Students will interpret important shifts or trends in the experience of family functions and relationships and their connections with the law. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends.
- Working in tandem with each other students will have opportunities to question, investigate, and interrogate historical experiences and historiographic interpretations

HIST 340 : Traditional China. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: From a loose federation of Neolithic societies, Chinese civilization emerges as East Asia's dominant political and cultural force; developments to ca. 1500.

Course Outcomes
- Students will be able to explain and analyze the major social, political, economic, intellectual and cultural developments in the history of Early China (ca. 5000 BC–220 AD
- Students will demonstrate a basic geographical knowledge of China, including significant geological features and major historical cities Moreover, they will be able to discuss how geographical and environmental realities have impacted historical development.
- Students will be able to analyze and interpret primary source documents, both in writing and in class discussions
- Students ability to identify arguments (assertions, claims, theses) and analyze supporting evidence in secondary scholarship should improve.

HIST 341 : China Since 1200. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Economic and political foundations of modernity during high Imperial China; challenge of new order from the West; rise of Chinese nationalism, revolution, and development to the present.

Course Outcomes
There are no course outcomes available

HIST 378 : American Family History. (3:3:0)

DESCRIPTION: History of American families from colonial period to the present.

Course Outcomes
- Students will be able to explain and analyze the major intellectual, economic, religious, social, cultural, and political developments affecting changes in American families of various races, classes, and regions from 1607 to the present.
- Students will be able to analyze an important historical question in the history of American families
- Students will be able to research, analyze, and integrate primary and secondary sources into a coherent and well-written argument.
- Students will be able to isolate the theses and supporting arguments of secondary sources on the history of American families.

b. Family History:
   i. Complete 6 hours from the following:

HIST 252 : Modern Latin America. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: National period (1810 to present): independence, institutional development, culture, and inter-American relations.

Course Outcomes
- Students will be exposed to the major economic, political, and cultural shifts that shaped the "modern" Latin American state in the nineteenth and twentieth century, as well as its variants, notably the cult of caudillo rule and its twentieth century offshoots
- Students will become conversant with major theoretical arguments and approaches to Latin American history in the contemporary era.

There are no course outcomes available

HIST 378 : American Family History. (3:3:0)

DESCRIPTION: History of American families from colonial period to the present.

Course Outcomes
- Students will be able to explain and analyze the major intellectual, economic, religious, social, cultural, and political developments affecting changes in American families of various races, classes, and regions from 1607 to the present.
- Students will be able to analyze an important historical question in the history of American families
- Students will be able to research, analyze, and integrate primary and secondary sources into a coherent and well-written argument.
- Students will be able to isolate the theses and supporting arguments of secondary sources on the history of American families.

ii. Complete 12 hours from the following:

HIST 282 : Colonial US Family, Local and Social History Research. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in colonial American studies.

Course Outcomes
There are no course outcomes available

HIST 317 : The Family and the Law in American History. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: HIST 217

DESCRIPTION: The interaction of families with law and government as illustrated in original American sources; individual family histories reconstructed in the broader perspective of history.

Course Outcomes
There are no course outcomes available

HIST 350 : British Family, Local and Social History Research. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methods for reconstruction of individual families and development of demographic and family history studies in England, Scotland, and Wales.

Course Outcomes
- Students will be able to explain and use fundamental genealogical (and some historical) resources and methodologies for English and Welsh research since 1700
- Students will evaluate, analyze, and corroborate genealogical information from both original and compiled sources. Students will know and use established citation standards.
- Students will explain how various pieces of information are combined in order to trace the same individual over various records and across the lifespan
- Students demonstrate how evidence is used to prove the links between generations

HIST 351 : Germanic Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Germanic areas of Europe.

Course Outcomes
There are no course outcomes available

HIST 353 : Southern European and Latin American Family, Local, and Social History Research. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: HIST 217

DESCRIPTION: Records, geo-historical background, paleography, and methods for reconstruction of individual families; development of demographic and family history studies which may include Portugal, Spain, France, and Italy and their colonies in the Americas.

Course Outcomes
There are no course outcomes available

HIST 421 : English Language Handwriting and Documents. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: Interpretation of handwriting within historical contexts in vernacular scripts in the British Isles, sixteenth through eighteenth centuries, in sources useful in family, local, and social history research.

Course Outcomes
- Students will learn the most common scripts (hands) and documents in use in Britain and its colonies between 1500 and 1850.
- Students will read, transcribe, and where necessary, translate documents
- Students will demonstrate transcription techniques and methodologies
- Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

HIST 481R : Directed Research in Family History. (.5-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Student research directed by faculty member on family history topic of mutual interest.

Course Outcomes
- Students will identify and clearly articulate a substantive family history research problem.
- Students will produce a written report, project or portfolio demonstrating knowledge of the studied material.

HIST 482 : Capstone Seminar: Writing and Professional Paths in Family History. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: HIST 439

DESCRIPTION: Research seminar; evidentiary analysis and writing skills in preparing a compiled lineage and exploring professional alternatives in family history, including professional accreditation or certification.

Course Outcomes
There are no course outcomes available

4. Complete the following capstone course:

STDEV 490 : Bachelor of General Studies Capstone. (2:2:0)

OFFERED: Independent Study only.

PREREQUISITE: STDEV 100; completion of all other BGS program requirements.

DESCRIPTION: Culminating course required for bachelor of general studies degree: analyze and evaluate BGS experience in light of the "Aims of a BYU Education" and summarize this experience in a reflective paper, integrate material learned in emphasis by completing a scholarly essay, and demonstrate accomplishment of learning outcomes.

Course Outcomes
There are no course outcomes available

Note 1: Other BYU undergraduate courses (including Salt Lake Center classes) in history may also be used to fill emphasis electives in either track.

Note 2: In the Family History track, Hist 317 can be used to meet *either* requirement "i" or "ii"; it cannot be double-counted.

*Hours include courses that may fulfill university core requirements.

Program Requirements | View MAP

1. Complete the following prerequisite course:

STDEV 100 : Essential College Skills. (1:1:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Developing essential college skills. Aims of BYU, values and goals, sound thinking skills. Learning styles and adjustment to college courses. College requirements and planning.

Course Outcomes

- 1. Articulate their educational values and goals and how they align with the purposes of a BYU education.
- 2. Analyze the effectiveness of their own planning/scheduling system and be able to demonstrate that they understand sound time management and goal setting principles.
- 3. Add new study and test preparation (study) skills to their existing repertoire.

2. Complete the following pre-core courses:

IS 100 : Computer Spreadsheet Skills. (.5:0:1)

WHEN TAUGHT: Spring; Summer

DESCRIPTION: Basic computer skills, focusing on spreadsheet and database programs. No technical background necessary.

Course Outcomes

- Students will be able to construct an Excel Spreadsheet with appropriate formulas, functions, labels, charts, media inserts, hyperlinks, and data base functions – and output the report.

IS 102 : Business Analysis Using Spreadsheets. (.5:1:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: IS 100.

DESCRIPTION: Basic computer skills focusing on features in MS Excel such as Scenario Manager, Solver, Pivot Tables, and Macros to solve complex business problems.

Course Outcomes

- Build robust spreadsheet models of business problems to make rational, data-driven managerial recommendations effectively solving those problems.
- Manipulate spreadsheet models of business problems to examine the robustness of proposed solutions to those problems.
- Implement macro programming techniques for automating spreadsheets to create flexible and powerful spreadsheet models of business problems.

3. Then complete the following core 1 courses:

ACC 200 : Principles of Accounting. (3:3:0)

OFFERED: Independent Study also.

DESCRIPTION: Financial and managerial accounting principles. Basic accounting statements, processes, and management applications. Open to all students.

Course Outcomes

- Construct and use internal accounting tools such as cost-volume-profit analysis, budgets, product cost reports, and nonroutine decision analyses to understand how to make better business management decisions.
- Construct and interpret a balance sheet and income statement understanding its usefulness in business and investment decision making.
- Comfortably use accounting terms and concepts in business-related discussions.
- Intelligently converse about the following areas:a. The role of accounting in international businessb. The role of information systems in financial reportingc. Fraud and how to prevent fraudd. The theory and practice of income taxese. Investing in stocksf. Career planning and spiritual decision makingg. Managerial accounting as a competitive toolh. Personal budgeting and financial planning

- Write a brief, focused memo demonstrating basic understanding of background business reading material.
- Use computer-aided learning tools and online learning resources.
- Manage workload in a self-paced learning environment.

ECON 110 : Economic Principles and Problems. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Economic Principles and Problems.

Course Outcomes

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: MATH 110 or equivalent.
DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes
- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

4. Next complete the following core 2 courses:

BUS M 241 : Marketing Management. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Marketing's role in society and the firm, marketing opportunities, the consumer market, and management of marketing mix.

Course Outcomes
- Understand the fundamental components and tools of marketing and how each relates to creating and sustaining value for customers.
- Describe how specific firms (1) select target markets, (2) specify their marketing mix, and (3) attempt to attract and retain the right customers.
- Design a marketing plan for a new venture by applying the appropriate tools and approaches studied

BUS M 390 : Ethics for Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Premanagement and Management 1 cores and full acceptance into the Marriott School upper-division major.
DESCRIPTION: Analyzing ethical dilemmas and understanding ethical theories as they apply to decision making in management.

Course Outcomes
- Identify and address common ethical issues that arise for individuals, managers, and organizations.
- Use contemporary and classic frameworks to analyze and suggest resolutions to ethical dilemmas.
- Recognize how individual differences and cognitive barriers can influence ethical judgment.
- Identify key organizational tools, policies, systems, and laws that apply to managing ethical conduct.
- Identify and prioritize personal values and apply those to making ethical decisions.

FIN 201 : Principles of Finance. (3:3:1.5)

WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: Acc 200.
DESCRIPTION: Financial management from the viewpoint of the business manager emphasizing profitability, liquidity, and long-range financial planning.

Course Outcomes
There are no course outcomes available

M COM 320 : Communication in Organizational Settings. (3:3:1)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: GE First-Year Writing requirement. To be taken before senior year. Not for freshmen.
DESCRIPTION: Developing written and oral communications for professional organizations, including composing and designing employment communications. Incorporates oral presentations.
NOTE: Fulfills GE Advanced Written and Oral Communication requirement.

Course Outcomes
- Compose various commonly occurring business texts, achieving effectiveness in design, organization, content, and style.
- Demonstrate knowledge of generally accepted grammar standards (from Writing & Speaking for Business).
- Give effective oral presentations with appropriate visual support, achieving effectiveness in message, media, and messenger.
- Create effective business graphics and implement effective visual-design principles.

: Honors Communication in Organizational Settings.

Course Outcomes

ORG B 320 : Organizational Effectiveness. (3:Arr:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Theories and concepts for creating effective organizations, e.g., individual, group, and organizational processes and human resource functions, including selection, compensation, and performance management.
NOTE: Taught online.

Course Outcomes
There are no course outcomes available

5. Then complete two courses from the following:

ACC 310 : Principles of Accounting 2. (3:3:0)

OFFERED: Available on BYU campus only.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: ACC 200
DESCRIPTION: Additional issues in financial and managerial accounting. Review of issues related to balance sheet accounts, performance evaluation and capital budgeting.

Course Outcomes
- Construct and interpret both a balance sheet and income statement that include elements more advanced than the basic items introduced in Acc 200.
- Construct and interpret a statement of cash flows.
- Apply the financial accounting rules that exist in the following areas:a. Revenue recognition (including SAB 101)b. Inventoryc. Long-term assets (including impairment)d. Bondse. Leases (including the financial ratio impact of operating leases)f. Stockholders' equity (including accumulated other comprehensive income)g. Investment securities (including use of the market adjustment account)
- Employ the time value of money in a financial accounting context.
- Apply managerial accounting concepts in the following areas:a. Use the concepts of financial leverage and operating leverage to assess a company's riskiness.b. Perform cost-volume-profit analysis using regresssion to identify the fixed and variable components of a mixed cost and in multiple-product settings.c. Track product costs through a manufacturing process (including use of process costing).d. identify problems through the use of cost variance analysis.
- Construct and use simple Excel spreadsheets in a variety of business settings.
- Independently manage time and workload for a variety of tasks.

BUS M 430 : Introduction to International Business. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer
DESCRIPTION: Complexities confronting U.S. firms and their management in international environments. Emphasizes functional and planning areas, including organization, market research, financial analysis.

Course Outcomes
- Gain an overview of current international business patterns, with an emphasis on what makes international business different from domestic business.
- Understand the social systems within countries as they affect the conduct of business from one country to another.
- Learn to develop your critical thinking as a student of international business, create power point presentations and present the content to the class.
- Analyze cases, apply business principles to international settings, and articulate findings within the classroom.

FIN 453 : Money, Banking, and Business. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Major status.

DESCRIPTION: Economic analysis of effects of money, banking, and financial institutions on business decisions and aggregate economic activity.

Course Outcomes
There are no course outcomes available

MANEC 300 : Economics of Market Systems. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECON 110; Major status.

DESCRIPTION: Decision making, price formation, and economic organization of the firm in market environments.

Course Outcomes
There are no course outcomes available

ORG B 327 : Human Resource Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Functions of human resource management: employee selection, wage and salary administration, training and development, employee relations, and human resource planning.

Course Outcomes
- Discuss the purpose, roles, frameworks, and activities of HRM within various types of organizations.
- Explain important strategies and methods of effective recruitment, selection, and retention.
- Discuss the primary purposes, criteria, approaches, advantages and disadvantages, issues, and evaluation of performance management.

ORG B 347 : Managerial Leadership Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Principles and practices needed to serve as effective leaders in families, church, community, and work settings -- planning, decision making, self-awareness, effective human influence, and community building.

Course Outcomes
There are no course outcomes available

6. Complete the following capstone course:

STDEV 490 : Bachelor of General Studies Capstone. (2:2:0)

OFFERED: Independent Study only.

PREREQUISITE: STDEV 100; completion of all other BGS program requirements.

DESCRIPTION: Culminating course required for bachelor of general studies degree: analyze and evaluate BGS experience in light of the "Aims of a BYU Education" and summarize this experience in a reflective paper, integrate material learned in emphasis by completing a scholarly essay, and demonstrate accomplishment of learning outcomes.

Course Outcomes
There are no course outcomes available

Note: Emphasis requirements must be filled with credit less than 15 years old.

*Hours include courses that may fulfill university core requirements.

Program Requirements | View MAP

1. Complete the following prerequisite course:

STDEV 100 : Essential College Skills. (1:1:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Developing essential college skills. Aims of BYU, values and goals, sound thinking skills. Learning styles and adjustment to college courses. College requirements and planning.

Course Outcomes
- 1. Articulate their educational values and goals and how they align with the purposes of a BYU education.
- 2. Analyze the effectiveness of their own planning/scheduling system and be able to demonstrate that they understand sound time management and goal setting principles.
- 3. Add new study and test preparation (study) skills to their existing repertoire.

2. Complete the following core courses:

PSYCH 111 : Introduction to Psychological Science. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Basic course in modern scientific psychology.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Objective: Apply psychological principles to personal and social issues and problems.Measurement:Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper.
- Objective: Demonstrate a broad knowledge of the basic theoretical perspectives that guide psychological inquiry.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Pyychology 111 sections.
- Objective: Understand the basic research methods used in psychology, including classical and current experiments.Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper, participation as a subject in actual psychological research.

PSYCH 210 : A History of Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 111
RECOMMENDED: May be taken concurrently with Psych 301.
DESCRIPTION: Overview of psychological thinking from Ancient Greece to the present. Emphasizes a critical stance toward the assumptions and implications of major psychological theories.
NOTE: This course contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes
There are no course outcomes available

PSYCH 308 : Psychological Statistics. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 210 & MATH 110
DESCRIPTION: Descriptive and inferential statistical analysis and hypothesis testing applied to psychological research data.
NOTE: Psych 307 must be taken prior to or concurrently with Psych 308. Stat 121 will not substitute for this course. Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will be able to recognize and understand basic statistical notation, formulae, and concepts.Measurement: Multiple choice and short answer exams
- Students will be able to accurately speak and write about statistical formulae, concepts, analyses, and results.Measurement: Short essays.

- Students will be able to correctly select and use basic statistical formulae and appropriately interpret the results.Measurement: Multiple choice tests, short essays.

PSYCH 350 : (Psych-Soc) Introduction to Social Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Conformity and obedience; socialization, norms, roles; attitudes, leadership, group processes.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will be able toidentify the unique contribution of social psychology to social science, situating the discipline within the larger domain of psychology and contrasting it with related disciplines, such as sociology.Measurement: Multiple choice tests, short essays.
- Students will be able to understand the use of surveys, laboratory and field experiments in conducting social psychological research, and understand the ethical principles of informed consent, deception and debriefing when conducting research with human participants.Measurement: Multiple choice tests, short essays.
- Students will be able to identify substantive areas of social psychological inquiry, including the self, person perception, attitudes and persuasion, group processes, stereotyping and prejudice, interpersonal attraction, helping behavior and aggression.Measurement: Multiple choice tests, short essays.
- Students will be able to identify and explain the contributions of major thinkers and contributors of classic and contemporary theory and research in social psychology, such as Leon Festinger and Stanley Milgram.Measurement: Multiple choice tests, short essays.
- Students will be able to identify how social psychological theory and research have been applied to domains outside the discipline, such as in health settings and the law.Measurement: Multiple choice tests, short essays.

PSYCH 381 : Behavioral Neurobiology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent. (Neuro 205 will substitute for Psych 310.)
DESCRIPTION: Basic physiological, anatomical, and chemical foundations of psychology.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will develop their understanding of how the brain influences one's experience of the world and one's behavior in it.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.
- Students will identify scientific methods, especially those of cognitive neuroscience, that are valuable in behavioral neurobiology.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.
- Students will extend concepts and research findings to diseases, trauma, drug usage, hormones, and genes.Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.

And complete one course from the following:

PSYCH 320 : Developmental Psychology: Childhood. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
DESCRIPTION: Physical, mental, emotional, and social development of the child.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will describe current theories and research in human development from pre-natal development through late childhood, demonstrating an understanding of developmental processes that lead to normative development, including perceptual, cognitive, biological, genetic, and social domains, as well as factors that lead to psychopathology and mental illness.Measurement:Multiple choice tests, quizzes.
- Students will assess and critique a key issue in a group format presented to the class.Measurement:Assessment of presentation.
- Students will assess critical issues in early childhood development, integrating current research studies on topics in developmental psychology.Measurement:APA style paper.

PSYCH 342 : Abnormal Psychology. (3:3:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Dynamics of maladjustment; major psychological disorders and therapeutic procedures. Fieldwork required.
NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and describe the major forms of psychological disorders and the major theories regarding the classification, etiology, and treatment of psychological disorders,and current data relevant to such theories.Measurement: Multiple choice, short answer and essay exams; short writing assignments.
- Students will engage in service learning by serving persons diagnosed with psychological disorders.Measurement: Participation assessment/field work report
- Students will critically examine key concepts and theories in abnormal psychology.Measurement: Essay exams, short writing assignments, in-class debates

- Students will examine and critique a topic in abnormal psychology using the current research literature.Measurement: APA style paper

3. Complete 11 hours from the following (including any courses not used for core above):

ANTHR 101 : Social/Cultural Anthropology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Aspects of society and culture: kinship, beliefs, economy, and political order among peoples worldwide. Methods and perspectives used in social/cultural anthropology.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Come to understand culture as a way of interpreting experience, and realize that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.Acquire an informed awareness of other cultural worlds—an appreciation of other ways of being human—of believing, behaving, and belonging, including their kinship organization and ritual, economic, and political practices.— Learn to see personal beliefs, values, attitudes, and conduct—including kinship organization and ritual, economic and political practices—from the perspective of people with different ideas about the way the world works.Develop an increased ability to write effectively.

PSYCH 306 : Psychology of Gender. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Biological and social contributions to sex role development, sexual self-concept, and complementarity of sex roles.

NOTE: Contains content featured in the Graduate Record Examination (GRE) Subject Test.

Course Outcomes

There are no course outcomes available

PSYCH 330 : Organizational Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Personal, interactional, and structural aspects of organizations; motivation, decision making, problem-solving communication, leadership, organizational structure, change.

NOTE: Org B 321 will not substitute for this course.

Course Outcomes

- Students will demonstrate a basic understanding of the major areas of organizational and industrial psychology, including human resources; leadership development; employee training, motivation, and satisfaction; group dynamics, organizational climate; and team-building.Measurement:Multiple choice tests, short essays.
- Students will learn to apply organizational theory to specific organizational situations.Measurement:Writing assignment.
- Students will acquire skill in collaborative teamwork, time management, self-motivation, and project planning.Measurement:Evaluation of cooperative class assignments.

PSYCH 338 : Sport Psychology. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Application of psychological principles to sporting activities.

Course Outcomes

- Students will demonstrate a basic understanding of the current status of the discipline of sport psychology and of the psychological theories that inform it, including behavioral principles and applications, social psychology, personality psychology, assessment, special athletic populations, coaching, and exercise psychology.Measurement: In-class exams on assigned textbook reading.
- Students will demonstrate familiarity with selected sport- psychology journals.Measurement: Author a paper that combines a literature review with application to a sport-performance environment.
- Students will identify and discuss current events related to sport psychology.Measurement: In-class reports and discussion of video clips or other media reports relevant to sport psychology.

PSYCH 341 : Personality. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Individual patterns of behavior, thought, and emotion; personality theories and their associated strategies of research, assessments, and personality change.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes

- Students will identify and distinguish the major personality theories of psychology.Measurement:Multiple choice/Short essay.
- Students will identify and give examples of contemporary research or applications of these theories.Measurement:Multiple choice/Short essay.
- Students will identify the theoretical assumptions that underlie these personality

theories.Measurement:Multiple choice.
- Students will articulate some of the practical and religious implications of these theories.Measurement:Essay assignments.

PSYCH 358 : Leadership Development. (3:2:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Principles and practices of successful leadership: decision making, communications, planning, team building, motivation, and interpersonal skills.

Course Outcomes
There are no course outcomes available

PSYCH 361 : Principles of Learning. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Principles of learning; representative experiments.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will develop their understanding of and facility with the concepts by which behavior analysis makes sense of selected learning phenomena.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will connect the concepts to the behavior of a virtual laboratory rat.Measurement: Individual- and team-based written reports and in-class presentations of the results of virtual experiments. Team-based manuscripts in multiple drafts both peer- and instructor- reviewed.
- Students will apply the concepts to human behavior, including one's own.Measurement: Out-of-class team-based application activities summarized in written reports. Essay exams that emphasize applications to real-life phenomena.

PSYCH 365 : Motivation. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.

DESCRIPTION: Determinants of motivation, relationship of motives to emotion, cognition, personality, and action. Implications for understanding self and others.

NOTE: Contains content featured in the Graduate Record Examination (GRE).

Course Outcomes
- Students will compare and contrast a wide range of theories and research findings within the subdiscipline of the psychology of motivation.Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.
- Students will categorize and apply theories and concepts to specific fictional characters and settings in film.Measurement: Out-of-class application activities that focus on four films shown in class and that require application of specific concepts to the characters, plots, and themes of the films.
- Students will analyze connections between the subject matter and one's own experience of motivation.Measurement: Individual essays and essay exams that focus on the personal application of concepts to one's experience.

BYU undergraduate campus courses (including Salt Lake Center classes) in psychology may be used to fill emphasis electives.

4. Complete the following capstone course:

STDEV 490 : Bachelor of General Studies Capstone. (2:2:0)

OFFERED: Independent Study only.

PREREQUISITE: STDEV 100; completion of all other BGS program requirements.

DESCRIPTION: Culminating course required for bachelor of general studies degree: analyze and evaluate BGS experience in light of the "Aims of a BYU Education" and summarize this experience in a reflective paper, integrate material learned in emphasis by completing a scholarly essay, and demonstrate accomplishment of learning outcomes.

Asian and Near Eastern Languages	J. Scott Miller
Biology	Keith Crandall
Business Management	Dennis K. Shiozawa
Chemical Engineering	Randy S. Lewis
Chemistry and Biochemistry	Gregory F. Burton

Church History and Doctrine	Brent L. Top
Civil and Environmental Engineering	Rollin H. Hotchkiss
Communication Disorders	Christopher Dromey
Communications	Edward E. Adams
Computer Science	Parris Egbert
Counseling and Career Center	Steven A. Smith
Counseling Psychology and Special Education	Timothy B. Smith
Dance	Marilyn Berrett
Economics	Eric R. Eide
Educational Leadership and Foundations	Sterling C. Hilton
Electrical and Computer Engineering	Brent E. Nelson
English	Phillip A. Snyder
Exercise Sciences	Gary W. Mack
Family Life	Dean M. Busby
Finance	Andrew L. Holmes
French and Italian	Corry L. Cropper
Geography	Ryan R. Jensen
Geological Sciences	Scott M. Ritter
Germanic and Slavic Languages	Michelle S. James
Health Science	Michael D. Barnes
History	Donald J. Harreld
Humanities, Classics, and Comparative Literature	George B. Handley
Information Systems	Marshall B. Romney
Instructional Psychology and Technology	Andrew S. Gibbons
International and Area Studies	
Ancient Near Eastern Studies	Dana M. Pike
Asian Studies	Eric Hyer
Canadian Studies	Earl H. Fry
European Studies	Stan Benfell
International Relations	Ken Stiles
Latin American Studies	Christopher Lund
Middle Eastern Studies	Donna Lee Bowen
Scandinavian Studies	Steven P. Sondrup
Linguistics and English Language	William G. Eggington
English Language Center	Neil Anderson
Mathematics	Robin O. Roundy
Mathematics Education	Steven R. Williams
Mechanical Engineering	Timothy W. McLain
Microbiology and Molecular Biology	Laura Bridgewater
Military Science	LTC Marc E. Boberg
Music	Kory L. Katseanes
Nutrition, Dietetics, and Food Science	Michael L. Dunn
Organizational Leadership and Strategy	Jeffrey H. Dyer
Philosophy	Travis T. Anderson
Physics and Astronomy	Ross L. Spencer
Physiology and Developmental Biology	Dixon J. Woodbury
Plant and Wildlife Sciences	Eric N. Jellen
Political Science	Darren G. Hawkins
Psychology	Dawson W. Hedges
Recreation Management	Patti Freeman
Social Work	Gordon E. Limb
Sociology	John P. Hoffmann
Spanish and Portuguese	David P. Laraway
Statistics	H. Dennis Tolley
Teacher Education	Nancy Wentworth
Technology	Richard E. Fry
Theatre and Media Arts	Amy Petersen Jensen
Visual Arts	Linda S. Reynolds

Chairs or Directors of Professional Institutes and Programs

George W. Romney Institute of Public Management	David W. Hart
Master of Business Administration	Craig Merrill
Peery Institute of Financial Services	Kim Smith

Coordinators or Directors of Academic Areas

Bachelor of General Studies Director	Steven W. Taggart
Center for Language Studies	Ray T. Clifford
Jerusalem Center for Near Eastern Studies Director	James R. Kearl
BYU—Salt Lake Center for Continuing Education Director	Scott L. Howell
CES Adult Programs Director	R. Neil Carlile
CES Youth Programs Director	Gregory M. Tanner
BYU Conference Center	Spencer E. Hansen
Conferences and Workshops Director	Robert A. Holcombe
Evening Classes Director	Susan V. Overstreet
Independent Study Director	John E. Taylor

Advisement Center Personnel

Engineering and Technology	Pam Williamson
Family, Home, and Social Sciences	Lori L. Seely
Fine Arts and Communications	Julee Braithwaite
Humanities	Paula Landon
International and Area Studies	Anna Peterson
Life Sciences	Shauna Anderson Young
Marriott School of Management	Brent Wilson
McKay School of Education	C. Jay Oliver
Nursing	Mark E. White
Physical and Mathematical Sciences	Shane Jorgenson
University	Karen Evans

Research Centers and Institutes

Advanced Combustion Engineering Research Center	Thomas H. Fletcher
Monte L. Bean Life Science Museum	
Director	Larry St. Clair
Associate Director	Jack Sites
Assistant Director	Marta Jean Adair
Cancer Research Center	Daniel L. Simmons
Center for Christian Values in Literature	Jesse S. Crisler
Associate Director	Daniel Muhlestein
Center for Economic Self-Reliance	Todd Manwaring
Center for the Improvement of Teacher Education and Schooling	Steven Baugh
Center for Service and Learning	
Director	Casey Peterson
Center for Statistical Research	Dennis L. Eggett
Center for Teaching and Learning	Russell T. Osguthorpe
Communications Research Center	Mark Callister

Comprehensive Clinic	Dean Barley
Computer-Aided Engineering, Design, and Manufacturing Center	J. Brent Smith
Family Studies Center	Randal Day
Human Performance Research Center	Allen Parcell
Humanities Technology and Research Support Center	Jerry W. Larson
International Center for Law and Religion Studies	W. Cole Durham, Jr.
National Middle East Language Resource Center	R. Kirk Belnap
Neal A. Maxwell Institute for Religious Scholarship	M. Gerald Bradford
Museum of Art	Mark A. Magleby
Museum of Paleontology	Rodney Scheetz
Museum of Peoples and Cultures	Paul R. Stavast
Charles Redd Center for Western Studies	Brian Q. Cannon
Religious Studies Center	Terry B. Ball
Rollins Center for Entrepreneurship and Technology	Stephen W. Liddle
Kay and Yvonne Whitmore Global Management Center	Lee Radebaugh
Wheatley Institution	Richard N. Williams

Other Areas of Service

Academic Support — Interim Director	Julie E. Preece
Benefits	Douglas J. Lee
Bookstore	Roger L. Reynolds
Counseling and Career Center	Steven A. Smith
Dining Services	Dean A. Wright
Employee Relations	R. Scott Elkins
Employment Services — Staff and Administrative	John P. Young
Faculty Center	David A. Whetten
Faculty Relations	Ryan R. Beuhring
Honor Code Office	Larry Neal
ID Center	
Intercollegiate Athletics	Thomas A. Holmoe
International Student Services	Samuel D. Brown
Multicultural Student Services	Ann Marie Lambert
Payroll Manager	Shannon J. Reid
Planning and Architecture	
Publications and Graphics	Norman A. Darais
Residence Life	Julie L. Franklin
Services for Students with Disabilities	Mark Beecher
Student Activities	
Student Health Services	Rulon J. Barlow
University Police	Larry A. Stott
Women's Services and Resources	LaNae Valentine

Aanderud, Zachary Thomas
- **COLLEGE:** Life Sciences
- **DEPARTMENT:** Plant and Wildlife Sciences
- **RANK:** Assistant Professor
- **DEGREES:** BS, Brigham Young University, 1997
  MS, University of California—Davis, 2003
  PhD, University of California—Davis, 2006

Abbott, Kelly
- **COLLEGE:** Student Life
- **DEPARTMENT:** Counseling and Career Center
- **RANK:** Assistant Clinical Professor
- **DEGREES:** BS, Brigham Young University, 2006
  PsyD, University of La Verne, 2011

Abraham, Heidi L.
- **COLLEGE:** David O. McKay School of Education
- **DEPARTMENT:** Counseling Psychology and Special Education
- **RANK:** Associate Clinical Professor
- **DEGREES:** BS, Brigham Young University, 2000
  MS, Brigham Young University, 2004

Adair, Marta Jean
- **COLLEGE:** Life Sciences
- **DEPARTMENT:** Biology
- **RANK:** Associate Teaching Professor
- **DEGREES:** BS, Brigham Young University, 1981
  MS, Brigham Young University, 1990

Adams, Byron
- **COLLEGE:** Life Sciences
- **DEPARTMENT:** Biology
- **RANK:** Associate Professor
- **DEGREES:** BS, Brigham Young University, 1993
  PhD, University of Nebraska, 1998

Adams, Edward Eugene
- **COLLEGE:** Fine Arts and Communications
- **DEPARTMENT:** Communications
- **RANK:** Professor
- **DEGREES:** AAS, Ricks College, 1982
  BS, University of Phoenix, 1986
  MA, Brigham Young University, 1991
  PhD, Ohio University, Athens, 1993

Adams, Michael
- **COLLEGE:** Student Life
- **DEPARTMENT:** Counseling and Career Center
- **RANK:** Associate Clinical Professor
- **DEGREES:** BA, Brigham Young University, 1998
  MS, Indiana State University, 2001
  PhD, Indiana State University, 2005

Adams, Paul S.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Associate Professor
DEGREES: BFA, Brigham Young University, 1992
MFA, Utah State University, 1996

Adams, R. Brent
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BUS, University of Utah, 1982
MFA, University of Utah, 1992

Agle, Brad
COLLEGE: Marriott School of Management
DEPARTMENT: Romney Institute of Public Management
RANK: Professor
DEGREES: BA, Brigham Young University, 1986
PhD, University of Washington, 1993

Alba, Orlando
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Professor
DEGREES: BA, Católica Madre y Maestra, 1972
MA, University of Puerto Rico, 1978
PhD, Univ. Nacional de Educación a Distancia, Madrid, Spain, 1988

Albrecht, Conan C.
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Professor
DEGREES: BS, Brigham Young University, 1997
MAcc, Brigham Young University, 1997
PhD, University of Arizona, 2000

Albrecht, W. Steve
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1971
MBA, University of Wisconsin, Madison, 1973
PhD, University of Wisconsin, Madison, 1975

Alford, Kenneth L.
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1979
MA, University of Southern California, 1982
MA, University of Illinois Urbana-Champaign, 1988
PhD, George Mason University, 2000

Allen, Gove N.
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MAcc, Brigham Young University, 1994
PhD, University of Minnesota, 2001

Allen, Phil S.
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1983
MS, Brigham Young University, 1985
PhD, University of Minnesota, 1990

Allred, David D.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Professor

DEGREES: BS, Brigham Young University, 1971
MS, Princeton University, 1973
PhD, Princeton University, 1977

Alvord, Scott M.
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Associate Professor
DEGREES: BA, Weber State University, 1998
MA, University of Minnesota, 2003
PhD, University of Minnesota, 2006

Ames, Daniel P.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Utah State University, 1996
MS, Utah State University, 1998
PhD, Utah State University, 2002

Ancell, Matthew
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1998
MA, University of California, Irvine, 2001
PhD, University of California, Irvine, 2007

Andersen, Bethanne P.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Professor
DEGREES: BFA, Brigham Young University, 1976
MFA, Brigham Young University, 1979

Andersen, Darlene
COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Research Associate
DEGREES: BA, Brigham Young University, 1965
MS, University of Utah, 1992
PhD, Utah State University, 2002

Anderson, Bonnie Brinton
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1995
MAcc, Brigham Young University, 1995
MPhil, Carnegie Mellon University, 2001
PhD, Carnegie Mellon University, 2001

Anderson, Gregory S.
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Assistant Professor
DEGREES: BS, Weber State College, 1989
MBA, University of Colorado-Colorado Springs, 2002
PhD, Indiana State University, 2010

Anderson, Joshua L.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2001
DEGREES: PhD, University of Utah, 2006

Anderson, Neil J.
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Professor
DEGREES: BA, Brigham Young University, 1979
MA, Brigham Young University, 1981
PhD, University of Texas, Austin, 1989

Anderson, Peggy Hammond

COLLEGE: Nursing
RANK: Associate Teaching Professor
DEGREES: AS, Brigham Young University, 1983
BS, Brigham Young University, 1999
MS, Brigham Young University, 2001

Anderson, Richard Paul

COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BA, Arizona State University, 1968
MM, Northwestern University, 1970
DMA, University of Colorado, Boulder, 1986

Anderson, Travis T.

COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1985
BFA, Brigham Young University, 1985
MA, Loyola University of Chicago, 1989
PhD, Loyola University of Chicago, 1992

Anderson, Val Jo

COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Professor
DEGREES: AS, Snow College, 1980
BS, Utah State University, 1982
MS, Utah State University, 1985
PhD, Texas A&M University, 1988

Anderson, Vickie Lane

COLLEGE: Nursing
RANK: Associate Teaching Professor
DEGREES: AS, Brigham Young University, 1973
BS, Brigham Young University, 1975
MS, Brigham Young University, 1983

Andrus, Merritt Brooks

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BS, Brigham Young University, 1986
PhD, University of Utah, 1991

Archibald, James K.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
MS, University of Washington, 1983
PhD, University of Washington, 1987

Argyle, Morris D.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1990
PhD, University of California, Berkeley, 2003

Arroyo, Juan Alberto

COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Assistant Professor
DEGREES: BS, University of Puerto Rico, 1991
PhD, Southern Illinois University School of Medicine, 2003

Asay, Devin N.

COLLEGE: Humanities
DEPARTMENT: Humanities Research Center
RANK: Associate Research Fellow
DEGREES: BA, Brigham Young University, 1980

MA, Ohio State University, Columbus, 1987

Ashbaker, Betty Y.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Associate Professor
DEGREES: BS, Utah State University, 1972
MS, Utah State University, 1974
PhD, Brigham Young University, 1982

Ashworth, Julia D.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Assistant Teaching Professor
DEGREES: BA, Brigham Young University, 1996
MA, New York University, 2002

Asplund, Christian T.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, Brigham Young University, 1988
MA, Mills College, 1993
DMA, University of Washington, 1998

Asplund, Matthew Chas
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1992
PhD, University of California, Berkeley, 1998

Austin, Daniel E.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1998
PhD, California Institute of Technology, 2003

Austin, Edwin G.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1978
MA, Brigham Young University, 1980

Babidge, Darrell
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Assistant Professor
DEGREES: BA, Royal Northern College of Music, 1997
Professional Studies Degree, Manhattan School of Music, 2001

Bahr, Damon L.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1979
MEd, Utah State University, 1982
EdD, Brigham Young University, 1988

Bahr, Howard M.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Professor
DEGREES: BA, Brigham Young University, 1962
MS, University of Texas, Austin, 1964
PhD, University of Texas, Austin, 1965

Bahr, Stephen J.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Professor
DEGREES: BS, Brigham Young University, 1968

MS, Brigham Young University, 1969
PhD, Washington State University, 1972

Bailey, Bruce
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
MS, Brigham Young University, 2001
PhD, University of Kansas, 2005

Baker, Roger C.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, Birkbeck College, London, 1968
PhD, Birkbeck College, London, 1971

Baker, Sherry Pack
COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Professor
DEGREES: BA, University of Utah, 1984
MS, University of Utah, 1988
PhD, University of Utah, 1994

Bakker, Lennard Frank
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Associate Professor
DEGREES: BS, University of Victoria, Canada, 1991
MS, University of Victoria, Canada, 1993
PhD, Queens University, Canada, 1997

Baldwin, Scott
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 2001
MS, University of Memphis, 2003
PhD, University of Memphis, 2006

Ball, Nicholas
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Assistant Professor
DEGREES: BS, Idaho State University, 1999
MBA, Idaho State University, 2000
PhD, University of Minnesota, 2005

Ball, Terry Briggs
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BS, Brigham Young University, 1979
MA, Brigham Young University, 1990
PhD, Brigham Young University, 1992

Balling, Richard Jack
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BA, University of Utah, 1978
BS, University of Utah, 1978
MS, University of California, Berkeley, 1979
PhD, University of California, Berkeley, 1982

Balser, Nathan
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1998
MFA, University of Utah, 2000

Bangerter, Neal K.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Associate Professor
DEGREES: BS, University of California, Berkeley, 1995
MS, Stanford University, 2001
PhD, Stanford University, 2004

Barber, Brad
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Assistant Teaching Professor
DEGREES: BA, Brigham Young University, 2001
MFA, University of Southern California, 2005

Barker, Joseph Cory
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Teaching Professor
DEGREES: BS, Brigham Young University, 1982
PhD, Brigham Young University, 1994

Barnes, Michael D.
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Professor
DEGREES: AS, Ricks College, 1986
BS, Brigham Young University, 1989
MS, Brigham Young University, 1990
PhD, Southern Illinois University, Carbondale, 1993

Barney, Daniel Theron
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Assistant Professor
DEGREES: BFA, Brigham Young University, 1994
MA, Brigham Young University, 2004
PhD, University of Columbia, 2009

Barney, David C.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Professor
DEGREES: BS, Weber State University, 1989
MEd, Utah State University, 1995
EdD, Florida State University, 2002

Barney, Keith
COLLEGE: Marriott School of Management
DEPARTMENT: Recreation Management
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1984
MSW, Portland State University, 1988
PhD, University of Utah, 2010

Barrett, Robert T.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Professor
DEGREES: BFA, University of Utah, 1973
MA, University of Iowa, 1975
MFA, University of Iowa, 1976

Barrett, Wayne Walton
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, University of Utah, 1968
MS, New York University, 1975
PhD, New York University, 1975

Barrett, William A.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor

DEGREES: BA, University of Utah, 1974
PhD, University of Utah, 1978

Barrick, John
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1991
MAcc, Brigham Young University, 1991
PhD, University of Nebraska, Lincoln, 1998

Barrow, Jeffery Richard
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1990
PhD, University of Utah, 1999

Barson, Brent
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Associate Professor
DEGREES: BFA, Brigham Young University, 1997
MFA, Art Center College of Design, 2003

Barton, Garold C.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Professor
DEGREES: BFA, Brigham Young University, 1989
MFA, Ohio State University, 1994

Bateman, Blair Earl
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1991
MA, Brigham Young University, 1995
PhD, University of Minnesota, 2002

Bates, Emily Anne
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Assistant Professor
DEGREES: BS, University of Utah, 1997
DEGREES: PhD, Harvard University, 2005

Baugh, Alexander L.
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BS, Utah State University, 1981
MA, Brigham Young University, 1986
PhD, Brigham Young University, 1996

Baugh, Dawna
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1980
MS, Utah State University, 1985
EdD, Brigham Young University, 1997

Baugh, Steven Clare
COLLEGE: David O. McKay School of Education
DEPARTMENT: Educational Leadership and Foundations
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1969
MEd, Brigham Young University, 1970
EdD, Brigham Young University, 1978

Baxter, Larry Lin
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor

DEGREES: BS, Brigham Young University, 1983
PhD, Brigham Young University, 1989

Bay, Stephen M.
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1993
BA, University of Utah, 1997
MA, University of Illinois, Urbana-Champaign, 2000
PhD, University of Illinois, Urbana-Champaign, 2004

Bean, Roy A.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MS, Brigham Young University, 1995
PhD, Brigham Young University, 1997

Beard, Randal W.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, University of Utah, 1991
MS, Rensselaer Polytechnic Institute, 1993
MS, Rensselaer Polytechnic Institute, 1994
PhD, Rensselaer Polytechnic Institute, 1995

Bearss, David James
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
PhD, University of Texas Health Science Center, 1999

Beckstrand, Renea L.
COLLEGE: Nursing
RANK: Professor
DEGREES: AS, Ricks College, 1979
AS, Brigham Young University, 1981
BS, Brigham Young University, 1983
MS, Brigham Young University, 1987
PhD, University of Utah, 2001

Beecher, Mark
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1993
MSW, University of Utah, 1995
PhD, Brigham Young University, 1998

Bekker, Matthew F.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Geography
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MS, Pennsylvania State University, 1996
PhD, University of Iowa, 2002

Belk, Mark C.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: AS, Ricks College, 1983
BS, Brigham Young University, 1985
MS, Brigham Young University, 1987
PhD, University of Georgia, 1992

Belknap, Monte L.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor

DEGREES: BM, University of Cincinnati Conservatory of Music, 1991
MM, University of Cincinnati Conservatory of Music, 1994

Bell, John David
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1982
PhD, University of California, San Diego, 1987

Belnap, Daniel Lee
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1996
MA, Brigham Young University, 1999
MA, University of Chicago, 2002
PhD, University of Chicago, 2007

Belnap, Robert Kirk
COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Professor
DEGREES: BA, Brigham Young University, 1983
MA, Brigham Young University, 1986
PhD, University of Pennsylvania, 1991

Benfell, V. Stanley
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Professor
DEGREES: BA, Brigham Young University, 1987
MA, New York University, 1990
PhD, New York University, 1994

Bennett, Richard Edmond
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BA, Brigham Young University, 1972
MA, Brigham Young University, 1975
PhD, Wayne State University, 1984

Bennion, John Serge
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Utah State University, 1977
MA, Brigham Young University, 1981
PhD, University of Houston, 1989

Bennion, Lynne
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1981
MS, Purdue University, 1983
PhD, Purdue University, 1986

Berg, Ian CPT
COLLEGE: Marriott School of Management
DEPARTMENT: Military Science
RANK: Assistant Professor
DEGREES: BA, Southern Utah University, 2002

Berges, Bradford K.
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1999
PhD, University of Pennsylvania, 2005

Bergeson, Scott D.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy

RANK: Professor
DEGREES: BS, Brigham Young University, 1990
PhD, University of Wisconsin, Madison, 1995

Berrett, Candace
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2005
MS, The Ohio State University, 2007
PhD, The Ohio State University, 2010

Berrett, Marilyn
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Professor
DEGREES: BA, University of Utah, 1979
MA, Brigham Young University, 1984

Berrondo, Manuel
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Professor
DEGREES: BS, University of Mexico, 1966
PhD, University of Uppsala, Sweden, 1969

Beutler, Ivan Felix
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BS, Utah State University, 1969
MS, Purdue University, Lafayette, 1972
PhD, Purdue University, Lafayette, 1974

Bickmore, Barry R.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1994
PhD, Virginia Polytechnic Institute, 1999

Bigelow, Anny Claudine
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, Brigham Young University, 1991
MM, Brigham Young University, 1994
DMA, University of Maryland, 2002

Bigler, Erin David
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Professor
DEGREES: BS, Brigham Young University, 1971
PhD, Brigham Young University, 1975

Bikman, Benjamin Thomas
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2003
MS, Brigham Young University, 2005
PhD, East Carolina University, 2008

Billeter, Darron
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1996
MS, Northwestern University, 1998
MS, Carnegie Mellon University, 2004
PhD, Carnegie Mellon University, 2004

Bingham, John B.
COLLEGE: Marriott School of Management

DEPARTMENT: Organizational Leadership and Strategy
RANK: Associate Professor
DEGREES: BA, University of Utah, 1998
MS, University of Utah, 2000
PhD, Texas A&M University, 2005

Bird, C Penny
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Teaching Professor
DEGREES: BA, Brigham Young University, 1970
MA, Brigham Young University, 1993

Black, Ervin L.
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BA, Brigham Young University, 1981
MBA, Brigham Young University, 1984
PhD, University of Washington, 1995

Black, Susan E
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BA, Brigham Young University, 1966
MA, California State College, San Bernardino, 1975
EdD, Brigham Young University, 1978

Blad, Kent Dean
COLLEGE: Nursing
RANK: Teaching Professor
DEGREES: AA, Snow College, 1983
BS, University of Utah, 1987
MS, Brigham Young University, 1999
DNP, University of Utah, 2010

Blades, Natalie Jean
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Assistant Professor
DEGREES: AB, Wellesley College, 1997
MSE, Johns Hopkins University, 2002
PhD, Johns Hopkins University, 2003

Blair, Nancy
COLLEGE: David O. McKay School of Education
DEPARTMENT: Communication Disorders
RANK: Associate Clinical Professor
DEGREES: BS, Brigham Young University, 1993
MS, Brigham Young University, 1995
AuD, University of Florida, 2005

Blotter, Jonathan D.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Professor
DEGREES: BS, Utah State University, 1991
MS, Utah State University, 1993
PhD, Virginia Polytechnic Institute and State University, 1996

Blumell, Lincoln H.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Assistant Professor
DEGREES: BA, University of Calgary, 2001
MA, University of Calgary, 2003
MSt, University of Oxford, 2004
PhD, University of Toronto, 2009

Boardman, Alan J.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Assistant Professor

DEGREES: BS, Brigham Young University, 1996
MS, Brigham Young University, 1997
PhD, University of Utah, 2011

Boberg, Marc "Dewey", LTC
COLLEGE: Marriott School of Management
DEPARTMENT: Military Science
RANK: Professor
DEGREES: BS, U.S. Military Academy, West Point, 1992
MS, Troy University, 2004

Boch, Rachael
COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Assistant Professor
DEGREES: BS, Utah State University, 1997
MA, University of Arizona, 2002
PhD, University of Arizona, 2004

Boerio-Goates, Juliana
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BA, Seton Hill College, 1975
MS, University of Michigan, Ann Arbor, 1977
PhD, University of Michigan, Ann Arbor, 1979

Bond, Michael Gregg
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Assistant Teaching Professor
DEGREES: BS, Brigham Young University, 1998
MBA, Indiana University, 2003

Boone, David Flake
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1978
MA, Brigham Young University, 1981
EdD, Brigham Young University, 1992

Booth, Gary M.
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Professor
DEGREES: AS, College of Eastern Utah, 1961
BS, Utah State University, 1963
MS, Utah State University, 1966
PhD, University of California, Riverside, 1969

Boothe, Randall Wayne
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BA, Brigham Young University—Hawaii, 1975
MM, Brigham Young University, 1979

Borup, Michael Brett
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Humboldt State University, 1980
MS, Utah State University, 1983
PhD, Clemson University, 1985

Boswell, Grant Maurice
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1976
MA, University of Southern California, 1982
PhD, University of Southern California, 1986

Bott, Shayla

COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Assistant Professor
DEGREES: BFA, University of Utah, 2004
MFA, University of Utah, 2006

Bourgerie, Dana Scott
COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Professor
DEGREES: BA, University of Minnesota, Minneapolis, 1982
MA, Ohio State University, Columbus, 1987
PhD, Ohio State University, Columbus, 1990

Bowden, Anton
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Associate Professor
DEGREES: BS, Utah State University, 1996
PhD, University of Utah, 2003

Bowen, Donna Lee
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Professor
DEGREES: BA, University of Utah, 1968
MA, University of Chicago, 1972
PhD, University of Chicago, 1981

Bowman, W. Jerry
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1978
MSE, University of Central Florida, 1982
PHD, Air Force Institute of Technology, 1987

Bown, Jennifer Marks
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1991
MA, Ohio State University, 1993
MEd, Ohio State University, 1999
PhD, Ohio State University, 2004

Boyer, Brian H.
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1996
PhD, University of Michigan, 2004

Bradford, Angela
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2003
MS, Auburn University, 2005
PhD, Auburn University, 2012

Bradford, Scott C.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1987
MPA, Princeton University, 1991
PhD, Harvard University, 1998

Brau, James C.
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Professor
DEGREES: BS, United States Military Academy, West Point, 1991

PhD, Florida State University, 1999

Breakwell, Donald P.
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1986
MS, Purdue University, 1988
PhD, Purdue University, 1992

Breinholt, Stephanie Ann Foster
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1994
MFA, Brigham Young University, 1999

Brewer, Cindy Patey
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1990
MA, Brigham Young University, 1991
PhD, University of Utah, 1998

Bridgewater, Laura Clarke
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1989
PhD, George Washington University, 1995

Brinkerhoff, Val W.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1980
MFA, Utah State University, 1987

Brinton, Bonnie
COLLEGE: David O. McKay School of Education
DEPARTMENT: Communication Disorders
RANK: Professor
DEGREES: BA, University of Utah, 1975
MA, San Jose State University, 1977
PhD, University of Utah, 1981

Britt, Brooks Bradley
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1982
MS, Brigham Young University, 1987
PhD, University of Calgary, 1993

Bronson, Robert Todd
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1996
PhD, Brigham Young University, 2003

Brooks, Kent Richmond
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1979
MEd, Brigham Young University, 1981
PhD, Brigham Young University, 1988

Broomhead, G Paul
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BM, Brigham Young University, 1987

MM, Brigham Young University, 1990
PhD, University of Washington, 1999

Brough, Ronald Paul
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BM, North Texas State University, 1981
MM, North Texas State University, 1983
DA, University of Northern Colorado, 1997

Brown, Bruce Leonard
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Professor
DEGREES: BS, Brigham Young University, 1965
MS, Brigham Young University, 1968
PhD, McGill University, 1969

Brown, Adam R.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2004
MA, University of California, San Diego, 2006
PhD, University of California, San Diego, 2008

Brown, David C.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, Indiana University, Bloomington, 1975
MM, University of Toledo, 1997

Brown, Kendall W.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Professor
DEGREES: BA, Brigham Young University, 1973
MA, Duke University, 1975
PhD, Duke University, 1979

Brown, Lora Beth
COLLEGE: Life Sciences
DEPARTMENT: Nutrition, Dietetics and Food Science
RANK: Professor
DEGREES: BS, Iowa State University, 1965
MS, Cornell University, 1967
EdD, Brigham Young University, 1982

Brown, Michael D.
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1993
MS, Colorado State University, 1998
PhD, Colorado State University, 1999

Brown, N. Anthony
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Associate Professor
DEGREES: BA, Southern Methodist University, 1998
MA, Bryn Mawr College, 2002
PhD, Bryn Mawr College, 2004

Brown, Philip Ross
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1982
PhD, Brigham Young University, 1986

Brown, Ralph B.
COLLEGE: Family, Home, and Social Sciences

DEPARTMENT: Sociology
RANK: Professor
DEGREES: BA, Utah State University, 1986
MS, Utah State University, 1988
PhD, University of Missouri, Columbia, 1992

Bryce, David J.
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1991
MAcc, Brigham Young University, 1991
MBA, Brigham Young University, 1991
PhD, University of Pennsylvania, 2003

Buckley, Jay Harry
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1994
MA, Brigham Young University, 1996
PhD, University of Nebraska, 2001

Budd, Cassy
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1990
MA, Utah State University, 2002

Buehler, Fidalis
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Assistant Professor
DEGREES: BFA, University of Hawaii, Manoa, 2004
MFA, Brigham Young University, 2007

Bullough, Robert V.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Professor
DEGREES: BS, University of Utah, 1971
MEd, University of Utah, 1973
PhD, Ohio State University, 1976

Bundy, Bradley C.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2004
MS, Stanford University, 2006
PhD, Stanford University, 2009

Burlingame, Gary Michael
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Professor
DEGREES: BS, Andrews University, 1978
MS, University of Utah, 1981
PhD, University of Utah, 1983

Burnett, Sandra H.
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Associate Professor
DEGREES: BA, Utah State University, 1992
MS, Utah State University, 1993
PhD, University of Kentucky, 2000

Burr, Kevin Lester
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Professor
DEGREES: AS, Brigham Young University, 1982

BS, University of Nevada, Las Vegas, 1988
MEd, University of Nevada, Las Vegas, 1990
EdD, Oklahoma State University, 1997

Burt, Scott R.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Assistant Teaching Professor
DEGREES: BS, Brigham Young University, 2004
PhD, University of California at Berkeley, 2008

Burton, F. Greg
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BA, Utah State University, 1984
MAcc, Utah State University, 1987
PhD, University of South Carolina, Columbia, 1994

Burton, Gideon Omer
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1989
MA, University of Southern California, 1991
PhD, University of Southern California, 1994
MPW, University of Southern California, 1995

Burton, Gregory F.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BS, University of Utah, 1975
MS, Brigham Young University, 1982
PhD, Medical College of Virginia, 1989

Burton, Robert Preece
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BA, University of Utah, 1969
PhD, University of Utah, 1973

Busath, David Don
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Professor
DEGREES: BA, University of Utah, 1974
MD, University of Utah, 1978

Busby, Dean
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BA, University of Utah, 1986
MS, Brigham Young University, 1988
PhD, Brigham Young University, 1990

Bush, Charles D.
COLLEGE: Humanities
DEPARTMENT: Humanities Research Center
RANK: Senior Research Fellow
DEGREES: BA, Brigham Young University, 1973
MA, Brigham Young University, 1974

Bush, Douglas E.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BA, Brigham Young University, 1972
MM, Brigham Young University, 1974
PhD, University of Texas, Austin, 1982

Bush, Michael Douglas
COLLEGE: Humanities

DEPARTMENT: Instructional Psychology and Technology
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1972
MBA, University of Missouri, 1976
PhD, Ohio State University, 1983

Buskirk, Allen Rowdon
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
PhD, Harvard University, 2004

Butler, Mark H.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BA, Brigham Young University, 1986
MS, Brigham Young University, 1990
PhD, Texas Tech University, 1996

Butler, Richard John
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Professor
DEGREES: BS, University of Utah, 1972
PhD, University of Chicago, 1979

Buxton, Michael
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Associate Clinical Professor
DEGREES: BS, Brigham Young University, 1985
MS, University of Georgia, 1989
PhD, University of Georgia, 1993

Bybee, Seth M.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2004
PhD, University of Florida, 2008

Call, Michael Josiah
COLLEGE: Humanities

PhD, Massachusetts Institute of Technology, 1982

Christensen, Ray

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1984
JD, Harvard University, 1987
MA, Harvard University, 1990
PhD, Harvard University, 1992

Christensen, Ryan G.

COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2002
MA, Stanford University, 2006
PhD, Stanford University, 2008

Christensen, Theodore (Ted) E.

COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, San Jose State University, 1989
MS, Brigham Young University, 1991
PhD, University of Georgia, 1995

Christensen, William F.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1995
PhD, Iowa State University, 1999

Christenson, Allen J.

COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
DDS, University of California, Los Angeles, 1984
MA, University of Texas, Austin, 1996
PhD, University of Texas, Austin, 1998

Christiansen, Eric H.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1977
ScM, Brown University, 1981
PhD, Arizona State University, 1981

Christiansen, Nancy Lee

COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1978
MA, Brigham Young University, 1983
PhD, University of California, Los Angeles, 1994

Christiansen, Richard W.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Rutgers University, New Brunswick, 1961
MS, University of New Mexico, 1966
PhD, University of Utah, 1976

Christianson, Frank Quinn

COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1994
MA, Brigham Young University, 1996
PhD, Brown University, 2005

Christofferson, Jay P.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MS, Brigham Young University, 1992
PhD, Colorado State University, 1996

Clark, Gregory
COLLEGE: Humanities
DEPARTMENT: English
RANK: Professor
DEGREES: BA, Brigham Young University, 1972
MA, Brigham Young University, 1977
PhD, Rensselaer Polytechnic Institute, 1985

Clark, John Edward
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Anthropology
RANK: Professor
DEGREES: BS, Brigham Young University, 1976
MA, Brigham Young University, 1979
PhD, University of Michigan, 1994

Clark, Shawn
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Research Associate Professor
DEGREES: BS, Brigham Young University, 1979
MS, Brigham Young University, 1982
DEGREES: PhD, Ohio State, 1987

Clay, Michael J.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Geography
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
MCRP, Iowa State University, 2001
PhD, University of California, Davis, 2005

Clayton, April Diane
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BM, University of Cincinnati, 1995
MM, University of Cincinnati, 1996
DMA, The Juilliard School, 2001

Clement, Christian Rolf
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Assistant Professor
DEGREES: BA, Hamburg College of Music and Dance, 1998
BA, University of Hamburg, 1999
MA, University of Hamburg, 2001
PhD, University of Utah, 2005

Clement, Mark Joel
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1985
MS, Brigham Young University, 1989
PhD, Oregon State University, 1994

Clifford, Ray T.
COLLEGE: Humanities

DEPARTMENT: Center for Language Studies
RANK: Professor
DEGREES: BA, Brigham Young University, 1968
MA, Brigham Young University, 1970
PhD, University of Minnesota, 1977

Cole, Eugene Charles
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Professor
DEGREES: BA, Adelphi University, 1968
MSPH, University of North Carolina, 1979
DRPH, University of North Carolina, 1983

Coleman, Craig Eliot
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1985
MS, Brigham Young University, 1987
PhD, Pennsylvania State University, 1992

Collings, Bruce Jay
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Professor
DEGREES: BS, Brigham Young University, 1973
MS, Brigham Young University, 1975
MS, Brigham Young University, 1977
MS, University of North Carolina, Chapel Hill, 1980
PhD, University of North Carolina, Chapel Hill, 1981

Colson, Robert
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Assistant Professor
DEGREES: BA, University of Utah, 2003
MA, University of California, Irvine, 2004
PhD, University of California, Irvine, 2010

Colton, John S
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MS, University of California, Berkeley, 1997
PhD, University of California, Berkeley, 2000

Colton, Mark Bryan
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Associate Professor
DEGREES: BS, University of Utah, 1997
MS, University of Utah, 2001
PhD, University of Utah, 2006

Comer, David John
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, San Jose State University, 1961
MS, University of California, Berkeley, 1962
PhD, Washington State University, 1966

Condie, Scott
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2002
PhD, Cornell University, 2007

Conklin, Hoku
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center

RANK: Assistant Clinical Professor
DEGREES: BA, BYU-Hawaii, 2005
PhD, Brigham Young University, 2011

Conner, Gregory
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BA, Humboldt State University, 1987
MS, University of Utah, 1989
PhD, University of Utah, 1992

Coombs, Dawan Lynn
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2004
Masters of Education, University of Utah, 2008
PhD, University of Georgia, 2012

Cook, Alonzo D.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1989
MS, Brigham Young University, 1991
PhD, Massachusetts Institute of Technology, 1996

Cook, R Don
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, Brigham Young University, 1980
MM, Brigham Young University, 1982
DMA, University of Kansas, 1987

Cooper, Glen M.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1988
MA, Columbia University, 1995
MPhil, Columbia University, 1997
PhD, Columbia University, 1999

Cooper, Scott
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MA, Duke University, 1996
PhD, Duke University, 1999

Cope, Rachel
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2001
MA, Brigham Young University, 2003
PhD, Syracuse University, 2009

Corbett, Cheryl
COLLEGE: Nursing, College of
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1989
MS, Brigham Young University, 1996

Corey, Douglas L.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics Education
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1999
MA, Brigham Young University, 2001
MA, University of Michigan, 2004

PhD, University of Michigan, 2007

Cottrell, David M.

COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1984
BS, Brigham Young University, 1985
MHA, Brigham Young University, 1985
PhD, Ohio State University, 1992

Cowan, Richard O.

COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BA, Occidental College, 1958
MA, Stanford University, 1959
PhD, Stanford University, 1961

Cox, Jon

COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Assistant Clinical Professor
DEGREES: BS, Brigham Young University, 2001
PhD, Brigham Young University, 2008

Cox, Shirley E Nissen

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Social Work
RANK: Professor
DEGREES: BA, Brigham Young University, 1962
MSW, Howard University, 1967
DSW, University of Utah, 1986

Coyne, Sarah Marie

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Associate Professor
DEGREES: BSc, Utah State University, 2001
PhD, University of Central Lancashire, 2004

Crandall, David P.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Anthropology
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1986
MPhil, Oxford University, England, 1989
DPhil, Oxford University, England, 1993

Crane, D Russell

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: AA, Chabot College, 1973
BA, California State University at Hayward, 1975
MS, Brigham Young University, 1978
PhD, Brigham Young University, 1979

Cressman, Dale L.

COLLEGE: Fine Arts and Communications

MS, Brigham Young University, 1983
PhD, North Carolina State University, 1987

Eggington, William Gregory

COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Professor
DEGREES: BA, Brigham Young University—Hawaii, 1975
MA, University of Southern California, 1981
PhD, University of Southern California, 1985

Eide, Eric Raymond

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Professor
DEGREES: BS, Brigham Young University, 1988
MS, Brigham Young University, 1989
PhD, University of California, Santa Barbara, 1993

Ekstrom, Joseph Jones

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1974
MS, Brigham Young University, 1976
PhD, Brigham Young University, 1991

Elder, Ryan S.

COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Assistant Professor
DEGREES: BS, University of Utah, 2004
PhD, University of Michigan, 2011

Eliason, Eric Alden

COLLEGE: Humanities
DEPARTMENT: English
RANK: Professor
DEGREES: BA, Brigham Young University, 1992
MA, University of Texas, Austin, 1994
PhD, University of Texas, Austin, 1998

Elzinga, Dirk Allen

COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Associate Professor

DEGREES: BA, University of Utah, 1992
MA, University of Utah, 1993
PhD, University of Arizona, 1999

Embley, David W.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BA, University of Utah, 1970
MS, University of Utah, 1972
PhD, University of Illinois, 1976

Emmett, Chad F.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Geography
RANK: Associate Professor
DEGREES: BA, Utah State University, 1979
MA, Brigham Young University, 1983
PhD, University of Chicago, 1991

Engler, David
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1997
MS, Brigham Young University, 2002
AM, Harvard University, 2006
PhD, Harvard University, 2007

Erickson, David L.
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Associate Professor
DEGREES: BS, University of Lethridge, 1999
PhD, University of Calgary, 2003

Erickson, Lance D.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
MS, Brigham Young University, 2001
PhD, University of North Carolina, Chapel Hill, 2005

Erickson, Lynnette B.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1978
MA, Brigham Young University, 1987
PhD, Arizona State University, 1996

Erickson, Robert G.
COLLEGE: Humanities
DEPARTMENT: Center for Language Studies
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1971
MA, Middlebury College, 1975
PhD, Brigham Young University, 2000

Erickson, Robert Gammell
COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1971
MA, Middlebury College, 1975
PhD, Brigham Young University, 2000

Esplin, Scott Clair
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Associate Professor
DEGREES: BS, Southern Utah University, 1997
MEd, Brigham Young University, 2001

PhD, Brigham Young University, 2006

Ess, Daniel H.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2000
DEGREES: PhD, University of California, Los Angeles, 2007

Evans, Norman W.
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1979
MA, Brigham Young University, 1981
EdD, University of Southern California, 2001

Evans, Richard Paul
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Assistant Professor
DEGREES: PhD, Medical College of Virginia, 1983
BS, Brigham Young University, 1995

Evans, Richard W.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1998
MA, Brigham Young University, 2001
MS, The University of Texas, Austin, 2005
PhD, The University of Texas, Austin, 2008

Everett, Daniel
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Assistant Professor
DEGREES: BFA, Brigham Young University, 2006
MFA, School of the Art Institute of Chicago, 2009

Everett, Peter H.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Associate Professor
DEGREES: BFA, Brigham Young University, 1996
MFA, Pratt Institute, 2000

Facer, Rex L.
COLLEGE: Marriott School of Management
DEPARTMENT: Romney Institute of Public Management
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1991
MPA, Brigham Young University, 1993
PhD, University of Georgia, 2002

Fails, Willis Clark
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1975
MA, Brigham Young University, 1977
PhD, University of Texas, Austin, 1984

Farahnakian, Mary
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Professor
DEGREES: BA, University of Tehran, Iran, 1971
PhD, Brigham Young University, 1977

Farnsworth, Brad W.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Instructor

DEGREES: BS, Brigham Young University, 1979
MAcc, Brigham Young University, 1979

Farnsworth, Clifton B.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1999
MS, Brigham Young University, 2000
PhD, University of Utah, 2008

Farnsworth, Paul B.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BS, Brigham Young University, 1977
PhD, University of Wisconsin, Madison, 1981

Faulconer, James E.
COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Professor
DEGREES: BA, Brigham Young University, 1972
MA, Pennsylvania State University, 1975
PhD, Pennsylvania State University, 1977

Fearnley, Lawrence
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, University of London, 1953
PhD, University of Utah, 1959

Feinauer, Erika
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Professor
DEGREES: MEd, Harvard Graduate School of Education, 1999
EdD, Harvard Graduate School of Education, 2006

Feland, Jeffrey Brent
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1993
MSPT, Texas Woman's University, 1995
PhD, Brigham Young University, 1999

Felin, Teppo
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1997
MBA, Brigham Young University, 1999
PhD, University of Utah, 2005

Fellingham, Gilbert W.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Professor
DEGREES: BA, Occidental College, 1971
MS, Brigham Young University, 1977
MS, Brigham Young University, 1978
MS, University of Washington, 1988
PhD, University of Washington, 1990

Ferrin, Scott Ellis
COLLEGE: David O. McKay School of Education
DEPARTMENT: Educational Leadership and Foundations
RANK: Professor
DEGREES: BA, Brigham Young University, 1980
JD, Brigham Young University, 1984
MEd, Harvard Graduate School of Education, 1989
EdD, Harvard Graduate School of Education, 1996

Finlayson, Cynthia S.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Anthropology
RANK: Associate Professor
DEGREES: BA, George Washington University, 1974
MA, George Washington University, 1984
PhD, University of Iowa, 1998

Fischer, Lane

COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1979
MA, Brigham Yound University, 1982
PhD, University of Minnesota, 1991

Fisher, Todd

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1998
MS, Brigham Young University, 1999
PhD, Northwestern University, 2004

Fitzgibbon, Vanessa Clare

COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Assistant Professor
DEGREES: MA, Brigham Young University, 1995
PhD, University of Wisconsin, Madison, 2006

Fletcher, Thomas Harvey

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1979
MS, Brigham Young University, 1980
PhD, Brigham Young University, 1983

Flom, Ross

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, University of Minnesota, Minneapolis, 1992
MEd, Idaho State University, 1993
PhD, University of Minnesota, Minneapolis, 1999

Fluhman, John Spencer

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1998
MA, University of Wisconsin, Madison, 2000
PhD, University of Wisconsin, Madison, 2006

Fonseca, Fernando S.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1987
MS, Brigham Young University, 1988
PhD, University of Illinois, Urbana, 1997

Forcade, Rodney W.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, University of Chicago, 1961
MS, University of Chicago, 1963
PhD, University of Washington, 1971

Forste, Renata

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology

RANK: Professor
DEGREES: BS, Brigham Young University, 1984
MS, Brigham Young University, 1986
PhD, University of Chicago, 1992

Forsyth, Donald W.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Anthropology
RANK: Professor
DEGREES: BA, Brigham Young University, 1971
MA, Brigham Young University, 1972
PhD, University of Pennsylvania, 1979

Foster, Jr., S. Thomas
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Professor
DEGREES: BS, Brigham Young University, 1984
MBA, University of Missouri, 1989
PhD, University of Missouri, Columbia, 1993

Frandsen, Brigham R.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2004
PhD, Massachusetts Institute of Technology, 2010

Franke, Kevin William
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Assistant Professor
DEGREES: BS, Utah State University, 2004
MBA, University of Washington, 2005
PhD, Brigham Young University, 2011

Franklin, Joseph Clark
COLLEGE: Humanities

DEGREES: BS, Brigham Young University, 1989
MS, Brigham Young University, 1994
PhD, University of Tennessee, Knoxville, 1999

Hamblin, William James
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Professor

DEGREES: BA, Brigham Young University, 1978
MA, University of Michigan, Ann Arbor, 1984
PhD, University of Michigan, Ann Arbor, 1985

Hancock, Chad
COLLEGE: Life Sciences
DEPARTMENT: Nutrition, Dietetics, and Food Science
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1998
PhD, University of Missouri, Columbia, 2005

Hancock, Ralph C.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Professor
DEGREES: BA, Brigham Young University, 1977
MA, Harvard University, 1980
PhD, Harvard University, 1983

Handley, George Browning
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Professor
DEGREES: BA, Stanford University, 1989
MA, University of California, Berkeley, 1991
PhD, University of California, Berkeley, 1995

Hansen, Blake
COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Assistant Professor
DEGREES: BA, University of Utah, 2004
MS, University of Utah, 2007
PhD, University of Kansas, 2010

Hansen, Derek L.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1998
PhD, University of Michigan, 2007

Hansen, Gary W.
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1967
MS, Brigham Young University, 1968
PhD, Indiana University, Bloomington, 1974

Hansen, H Eric
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BA, Peabody Conservatory of Music, 1988
MA, Peabody Conservatory of Music, 1989

Hansen, Jaron C.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Professor
DEGREES: BS, Utah State University, 1997
PhD, Purdue University, 2002

Hansen, Kristina
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Assistant Clinical Professor
DEGREES: BS, Brigham Young University, 2001
PhD, Brigham Young University, 2012

Hansen, Kristine
COLLEGE: Humanities
DEPARTMENT: English
RANK: Professor

DEGREES: BA, Brigham Young University, 1973
MA, Brigham Young University, 1981
PhD, University of Texas, Austin, 1987

Hansen, Marc DH
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1997
PhD, Stanford, 2002

Hansen, Mark H.
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1990
MBA, Brigham Young University, 1990
PhD, Texas A&M University, 1996

Hanson, Carl Lee
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1990
MS, Brigham Young University, 1991
PhD, Southern Illinois University, Carbondale, 1994

Hariguchi, Jennifer
COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1992
MA, University of Virginia, 1997
PhD, University of Chicago, 2010

Harb, John N.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1983
MS, University of Illinois, Chicago, 1985
PhD, University of Illinois, Urbana, 1988

Hardin, Perry J.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Geography
RANK: Professor
DEGREES: BS, Brigham Young University, 1982
MA, Brigham Young University, 1984
PhD, University of Utah, 1989

Hardy, Jeffrey
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2001
MA, Brigham Young University, 2006
PhD, Princeton University, 2011

Hardy, Sam A.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1999
MA, University of Nebraska, Lincoln, 2002
PhD, University of Nebraska, Lincoln, 2005

Harker, Alan Reed
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Professor
DEGREES: BS, University of Utah, 1976
PhD, University of Utah, 1982

Harker, Brian Cameron

COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BA, Brigham Young University, 1990
MA, Brigham Young University, 1994
MPhil, Columbia University, 1995
PhD, Columbia University, 1997

Harline, Craig E.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Professor
DEGREES: BA, Brigham Young University, 1980
MA, Rutgers University, 1984
PhD, Rutgers Unviersity, 1986

Harper, James M.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BS, Brigham Young University, 1974
MS, Brigham Young University, 1976
PhD, University of Minnesota, Minneapolis, 1979

Harreld, Donald James

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, University of Minnesota, Minneapolis, 1983
MA, University of Minnesota, Minneapolis, 1996
PhD, University of Minnesota, Minneapolis, 2000

Harrell, Charles

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1976
MS, University of Utah, 1982
PhD, University of Denmark, 1988

Harris, Amy

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1998
MA, American University, 2000
PhD, University of California, Berkeley, 2006

Harris, Bradley Dean

COLLEGE: Marriott School of Management
DEPARTMENT: Recreation Management
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1980
MS, Brigham Young University, 2007

Harris, Richard Wood

COLLEGE: David O. McKay School of Education
DEPARTMENT: Communication Disorders
RANK: Professor
DEGREES: BS, North Dakota State University, 1973
MS, University of Wisconsin, 1974
PhD, Purdue University, West Lafayette, 1978

Harris, Ron

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Professor
DEGREES: BS, University of Oregon, 1982
MS, University of Alaska, Fairbanks, 1985
PhD, University of London, 1989

Harrison, Roger G.

COLLEGE: Physical and Mathematical Sciences

DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Professor
DEGREES: BS, Utah State University, 1986
PhD, University of Utah, 1993

Hart, Craig H.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MS, Brigham Young University, 1982
PhD, Purdue University, 1987

Hart, David Kay
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Professor
DEGREES: BA, Brigham Young University, 1973
MA, University of Washington, 1975
PhD, University of Washington, 1979

Hart, David W.
COLLEGE: Marriott School of Management
DEPARTMENT: Romney Institute of Public Management
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1989
MPA, Brigham Young University, 1991
PhD, State University of New York, Albany, 1997

Hart, Grant W.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1977
PhD, University of Maryland, College Park, 1983

Hart, Gus L. W.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Professor
DEGREES: BS, Brigham Young University, 1994
MS, University of California, Davis, 1997
PhD, University of California, Davis, 1999

Haslam, Gerald Myron
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, University of Utah, 1972
MA, University of Utah, 1974
PhD, Brigham Young University, 1981

Hatch, Nile W.
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1988
MS, Brigham Young University, 1989
PhD, University of California, Berkeley, 1995

Hauglid, Brian Michael
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1984
MA, University of Utah, 1991
PhD, University of Utah, 1998

Hawkins, Aaron R.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, California Institute of Technology, 1994
MS, University of California, Santa Barbara, 1996

PhD, University of California, Santa Barbara, 1998

Hawkins, Alan J.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BS, Brigham Young University, 1979
MOB, Brigham Young University, 1984
PhD, Pennsylvania State University, 1990

Hawkins, Darren Greg

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Professor
DEGREES: BA/BS, University of Utah, 1990
MA, University of Wisconsin, Madison, 1991
PhD, University of Wisconsin, Madison, 1996

Hawkins, John P.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Anthropology
RANK: Professor
DEGREES: BS, Brigham Young University, 1970
AM, University of Chicago, 1972
PhD, University of Chicago, 1978

Hawkins, Kirk A.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1993
MA, Brigham Young University, 1995
MA, Duke University, 1998
PhD, Duke University, 2003

Hawks, Val D.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Professor
DEGREES: AS, Snow College, 1978
BS, Brigham Young University, 1980
MS, Lehigh University, 1986
PhD, Gonzaga University, 2005

Haws, J.B.

COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Assistant Professor
DEGREES: BS, Weber State University, 1997
MA, Brigham Young University, 2003
PhD, University of Utah, 2010

Heaston, Sondra

COLLEGE: Nursing
RANK: Associate Teaching Professor
DEGREES: AD, Weber State University, 1987
BS, Weber State University, 1989
MS, Brigham Young University, 2005

Heath, Melissa Ann

COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1975
PhD, Texas A&M University, 1996

Heaton, Hal B.

COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Professor
DEGREES: BS, Brigham Young University, 1975
MBA, Brigham Young University, 1977
MA, Stanford University, 1981
PhD, Stanford University, 1983

Heaton, Matthew Joseph

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2006
MS, Brigham Young University, 2007
PhD, Duke University, 2011

Heaton, Tim Braley

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Professor
DEGREES: BS, Brigham Young University, 1974
MS, Brigham Young University, 1975
PhD, University of Wisconsin, Madison, 1979

Hecker, William C.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1974
MS, Brigham Young University, 1975
PhD, University of California, Berkeley, 1982

Hedengren, Paul

COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Emeritus
DEGREES: BA, Brown University, 1971
MA, Brown University, 1974
PhD, University of Toronto, 1983

Hedges, Dawson W.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Professor
DEGREES: BS, Weber State College, 1984
MD, University of Utah, 1988

Hegstrom, Valerie

COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1982
MA, Brigham Young University, 1986
MA, University of Kansas, 1988
PhD, University of Kansas, 1992

Heiner, Barta Lee

COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Professor
DEGREES: BA, Brigham Young University, 1971
MFA, American Conservatory Theatre, 1977

Heiner, Steven W.

COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Emeritus
DEGREES: BS, University of Utah, 1955
MS, University of Utah, 1962
EdD, University of Utah, 1969

Heise, Barbara A.

COLLEGE: Nursing
RANK: Associate Professor
DEGREES: AS, Missouri Southern State College, 1983
BS, Missouri Southern State College, 1986
MS, State University of New York, 1989
PhD, University of Virginia, 2007

Helps, C Richard

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology

RANK: Associate Professor
DEGREES: BS, Witwatersrand, South Africa, 1978
MS, Witwatersrand, South Africa, 1986

Hendengren, John D.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2001
MS, Brigham Young University, 2002
PhD, University of Texas at Austin, 2005

Hendrickson, Scott
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics Education
RANK: Associate Teaching Professor
DEGREES: BA, Brigham Young University, 1979
MA, Brigham Young University, 1984

Hendron, Michael Greg
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1996
MBA, University of Virginia, 2000

Heninger, William G.
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1989
MAcc, Brigham Young University, 1989
PhD, University of Georgia, 1997

Henrichsen, Lynn E.
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Professor
DEGREES: BA, Brigham Young University, 1973
TESL Graduate Certificate, Brigham Young University, 1974
MA, Brigham Young University, 1975
EdD, University of Hawaii, Manoa, 1987

Hess, Bret C.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BS, Brigham Young Iniversity, 1982
PhD, Iowa State University, 1988

Hickman, Trenton L
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1994
MA, Brigham Young University, 1996
PhD, State University of New York, Stony Brook, 2000

Hicks, Michael D.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BM, Brigham Young University, 1980
MM, University of Illinois, Urbana-Champaign, 1981
DMA, University of Illinois, Urbana-Champaign, 1984

Higley, James Dee
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MS, University of Wisconsin, Madison, 1983
PhD, University of Wisconsin, Madison, 1985

Hill, Brian Jack

COLLEGE: Marriott School of Management
DEPARTMENT: Recreation Management
RANK: Professor
DEGREES: BS, Brigham Young University, 1986
PhD, Clemson University, 1994

Hill, Edward Jeffrey
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BA, Brigham Young University, 1977
MOB, Brigham Young University, 1984
PhD, Utah State University, 1995

Hill, Ned C.
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Professor
DEGREES: BS, University of Utah, 1969
MS, Cornell University, 1971
PhD, Cornell University, 1976

Hilton, III, John L.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2000
MEd, Harvard University, 2004
PhD, Brigham Young University, 2010

Hilton, Sterling Clint
COLLEGE: David O. McKay School of Education
DEPARTMENT: Educational Leadership and Foundations
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1987
MS, Brigham Young University, 1990
MA, Brigham Young University, 1990
PhD, John Hopkins University, 1996

Himes, Deborah
COLLEGE: Nursing
RANK: Instructor
DEGREES: BS, Brigham Young University, 1991
MS, University of Utah, 1996

Hinckley, Jaren Smith
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, University of Utah, 1993
MM, Indiana University, 1995
DM, Florida State University, 2002

Hintz, Eric G.B.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BS, Case Western Reserve University, 1988
BS, Case Western Reserve University, 1988
PhD, Brigham Young University, 1995

Hirschmann, Eric W.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1991
PhD, University of California, Santa Barbara, 1996

Hite, Julie Melville
COLLEGE: David O. McKay School of Education
DEPARTMENT: Educational Leadership and Foundations
RANK: Professor

RANK: Associate Professor
DEGREES: BA, Utah State University, 1998
MA, Utah State University, 1999
PhD, Northwestern University, 2004

Hoffmann, John P.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Professor
DEGREES: BS, James Madison University, 1984
MS, American University, 1985
PhD, State University of New York, Albany, 1991
MPH, Emory University, 1994

Hogan, Cynthia

COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Assistant Professor
DEGREES: AA, Reedley Community College, 1985
BA, California Institute of the Arts, 1988
MFA, Hollins University, 2011

Holden, Scott L.

COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, University of Michigan, 1992
MM, The Juilliard School, 1995
DMA, Manhattan School of Music, 2002

Holladay, Seth R.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Instructor
DEGREES: BS, Brigham Young University, 2004
MS, Brigham Young University, 2007

Hollingshaus, Wade James

COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1998
MA, University of Washington, 2001
PhD, University of Minnesota, 2008

Holman, Curt W.

COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Associate Professor
DEGREES: MA, Brigham Young University, 1996

Holman, Thomas B.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor

DEGREES: BA, Utah State University, 1970
MEd, Brigham Young University, 1976
PhD, Brigham Young University, 1981

Holmes, Andrew L.
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Associate Professor
DEGREES: BA, Texas A&M University, 1986
MS, Texas A&M University, 1988
PhD, University of Houston, 1992

Holmes, Erin Kramer
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1998
MS, University of Delaware, 2001
PhD, University of Texas, Austin, 2006

Holt-Lunstad, Julianne
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1998
PhD, University of Utah, 2001

Holzapfel, Richard Neitzel
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor

MA, Brigham Young University, 1977
PhD, Brigham Young University, 1994

Huntsman, Eric D.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture

RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1990
MA, University of Pennsylvania, 1992
PhD, University of Pennsylvania, 1997

Hutchings, Brad L.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, University of Utah, 1984
MS, University of Utah, 1987
PhD, University of Utah, 1992

Hutchings, D Mark
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1977
MRECM, University of Denver, 1992
PhD, Texas A&M University, 2002

Hyer, Eric A.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1979
MA, Columbia University, 1981
M.Phil, Columbia University, 1983
PhD, Columbia University, 1990

Hyldahl, Robert
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Assistant Professor
DEGREES: BS, University of Utah, 2003
MS, University of Massachusetts, Amherst, 2008
PhD, University of Massachusetts, Amherst, 2011

Isakson, Richard
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BA, Weber State College, 1970
MEd, Bucknell University, 1971
PhD, Cornell University, 1975

Israelsen, Craig L.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Associate Professor
DEGREES: BS, Utah State University, 1983
MS, Utah State University, 1984
PhD, Brigham Young University, 1990

Iverson, Brian D.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2002
MS, Purdue University, 2004
PhD, Purdue University, 2008

Jaccard, Jerry L.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BMusEd., University of Arizona, 1965
MME, Holy Names University, 1976
EdD, University of Massachusetts, Amherst, 1995

Jackson, Aaron Paul
COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education

RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1985
MA, Brigham Young University, 1989
PhD, University of Missouri, Columbia, 1993

Jackson, Brian David
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 2001
MA, Brigham Young University, 2003
PhD, University of Arizona, 2007

Jackson, Kent P.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BA, Brigham Young University, 1974
MA, University of Michigan, 1976
PhD, University of Michigan, 1980

Jacobson, Cardell K.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Professor
DEGREES: BS, Brigham Young University, 1966
MA, University of North Carolina, Chapel Hill, 1969
PhD, University of North Carolina, Chapel Hill, 1971

Jacoby, Wade
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Professor
DEGREES: BA, Brigham Young University, 1987
PhD, Massachusetts Institute of Technology, 1995

James, Michelle Stott
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Associate Professor
DEGREES: BA, Weber State College, 1978
MA, University of Utah, 1981
PhD, University of Utah, 1987

James, Spencer
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2006
MS, Brigham Young University, 2008
PhD, Pennsylvania State University, 2012

Janetski, Joel C.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Anthropology
RANK: Emeritus
DEGREES: BA, Brigham Young University, 1965
MA, University of Utah, 1977
PhD, University of Utah, 1983

Jarvis, Sabrina
COLLEGE: Nursing
RANK: Assistant Teaching Professor
DEGREES: ADN, Cochise College, 1976
BS, Grandview College, 1985
MS, Brigham Young University, 1990
DNP, University of Utah, 2010

Jarvis, Tyler J.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, Brigham Young University, 1989
MS, Brigham Young University, 1990

MA, Princeton University, 1992
PhD, Princeton University, 1994

Jefferies, Laura
COLLEGE: Life Sciences
DEPARTMENT: Nutrition, Dietetics, and Food Science
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1998
PhD, Utah State University, 2011

Jeffs, Brian Dean
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1978
MS, Brigham Young University, 1982
PhD, University of Southern California, 1989

Jellen, Eric Nathan
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1986
MS, University of Minnesota, 1988
PhD, University of Minnesota, 1992

Jenkins, Paul M.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2000
MS, Brigham Young University, 2002
PhD, University of Wisconsin, Madison, 2006

Jensen, Amy Petersen
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1990
MA, Brigham Young University, 1998
PhD, University of Illinois, Urbana Champaign, 2004

Jensen, Brian
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1996
MS, Brigham Young University, 1998
PhD, University of Michigan, 2004
MS, University of Michigan, 2004

Jensen, Bryant T.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Professor
DEGREES: BA, Arizona State University, 2003
MA, Arizona State University, 2006
PhD, Arizona State University, 2009

Jensen, Charles Gregory
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MS, Brigham Young University, 1982
PhD, Purdue University, 1993

Jensen, Dallas
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Associate Clinical Professor
DEGREES: BA, Brigham Young University, 2000
MA, The Ohio State University, 2002

PhD, Brigham Young University, 2006

Jensen, David A.

COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1996
MA, University of California, Los Angeles, 1998
PhD, University of California, Los Angeles, 2005

Jensen, David W.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MS, Massachusetts Institute of Technology, 1981
PhD, Massachusetts Institute of Technology, 1986

Jensen, Heather Belnap

COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1994
MA, Brigham Young University, 1997
PhD, University of Kansas, 2007

Jensen, Jamie L.

COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1999
MS, Brigham Young University, 2003
PhD, Arizona State University, 2008

Jensen, Michael Allen

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1990
MS, Brigham Young University, 1991
PhD, University of California, Los Angeles, 1994

Jensen, Robert J.

COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1997
MOB, Brigham Young University, 2000
PhD, Wharton School, University of Pennsylvania, 2006

Jensen, Ryan R.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Geography
RANK: Professor
DEGREES: AS, Ricks College, 1992
BS, Brigham Young University, 1996
MS, Brigham Young University, 1997
PhD, University of Florida, 2000

Johns, Andrew L.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MA, University of California, Santa Barbara, 1995
PhD, University of California, Santa Barbara, 2000

Johnson, Aaron Wayne

COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1995
MSPT, University of Alabama, Birmingham, 1997
PhD, Brigham Young University, 2007

Johnson, David J.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Anthropology
RANK: Associate Professor
DEGREES: BA, University of Utah, 1972
MA, University of Utah, 1981
PhD, University of Utah, 1986

Johnson, F Brent

COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1966
MS, Brigham Young University, 1967
PhD, Brigham Young University, 1970

Johnson, Jared Lee

COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Assistant Professor
DEGREES: BA, Weber State University, 1993
MA, Ohio University, 1997
PhD, Georgia State University, 2010

Johnson, Jerald B.

COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Associate Professor
DEGREES: BA, University of Utah, 1995
PhD, University of Vermont, 2000

Johnson, Kimberly

COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, University of Utah, 1992
MA, Johns Hopkins University, 1995
MFA, University of Iowa, 1997
PhD, University of California, Berkeley, 2003

Johnson, Leigh A.

COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1991
PhD, Washington State University, 1996

Johnson, Mark J.

COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Professor
DEGREES: BA, Brigham Young University, 1979
MA, University of Illinois, Urbana, 1983
MFA, Princeton University, 1984
PhD, Princeton University, 1986

Johnson, Robert L.

COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Research Associate Professor
DEGREES: BS, Brigham Young University, 1991
MS, Brigham Young University, 1993
DEGREES: PhD, Brigham Young University, 2008

Johnson, Stanley A.

COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Teaching Professor
DEGREES: BS, Brigham Young University, 1975
MS, Brigham Young University, 1979
EdD, Brigham Young University, 1987

Johnson, Steven M.

COLLEGE: Life Sciences

DEPARTMENT: Microbiology and Molecular Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1994
PhD, Yale University, 2004

Johnson, Steven P.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BA, California State University, Fullerton, 1976
MA, California State University, Fullerton, 1979
PhD, California State University, Los Angeles, 1989

Johnston, James D.
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Associate Professor
DEGREES: BS, Weber State University, 1998
MSPH, University of Utah, 2000
PhD, University of Utah, 2010

Johnston, N Paul
COLLEGE: Life Sciences
DEPARTMENT: Nutrition, Dietetics and Food Science
RANK: Professor
DEGREES: BA, Brigham Young University, 1966
MS, Oregon State University, 1967
MBA, University of Utah, 1969
PhD, Oregon State University, 1971

Jolley, Greg V.
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Assistant Teaching Professor
DEGREES: BS, Brigham Young University, 1995
MLA, Kansas State University, 1999

Jolley, Von Dale
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1970
MS, Iowa State University, 1974
PhD, Iowa State University, 1976

Joner, Michael Deloss
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Research Professor
DEGREES: AA, Clark College, 1975
BS, Brigham Young University, 1979
MS, Brigham Young University, 1981

Jones, Matthew R.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1988
MS, University of Illinois, Urbana, 1990
PhD, University of Illinois, Urbana, 1993

Jones, Megan Sanborn
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1995
MA, Brigham Young University, 1997
PhD, University of Minnesota, Twin Cities, 2004

Jones, Michael D.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1995

MS, Brigham Young University, 1997
PhD, University of Utah, 2001

Jones, Norman L.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1986
MS, University of Texas, Austin, 1988
PhD, University of Texas, Austin, 1990

Jones, Stephen Morrill
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BMu, Brigham Young University, 1983
MMu, University of Cincinnati, 1986
DMA, University of Cincinnati, 1989

Jorgensen, Bruce W.
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1966
MA, Cornell University, 1969
PhD, Cornell University, 1978

Judd, Allan M.
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1973
MS, Brigham Young University, 1978
PhD, West Virginia University, 1982

Judd, Daniel K.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BS, Southern Utah State University, 1980
MS, Brigham Young University, 1985
PhD, Brigham Young University, 1987

Judd, Frank F.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1993
MA, Brigham Young University, 1995
MA, University of North Carolina, Chapel Hill, 1997
PhD, University of North Carolina, Chapel Hill, 2003

Jungheim, David M., Mr.
COLLEGE: Marriott School of Management
DEPARTMENT: Military Science
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2001

Kaiser, David Allen
COLLEGE: Student Life
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1984
MS, University of Florida, 1986
EdD, University of Florida, 1994

Karpowitz, Christopher
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1994
MA, Brigham Young University, 1996
Certificate of Graduate Studies, Duke University, 1998
MA, Princeton University, 2000
PhD, Princeton University, 2006

Katseanes, Kory Lynn

COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: AA, Ricks College, 1974
BA, University of Utah, 1976
MA, University of Utah, 1979

Kauwe, John

COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1999
MS, Brigham Young University, 2001
PhD, Washington University, St. Louis, 2007

Kearl, J R

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Professor
DEGREES: BA, Utah State University, 1971
PhD, Massachusetts Institute of Technology, 1975
PD, Harvard University, 1978

Keith, Jeffrey Davis

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1977
MS, University of Wisconsin, Madison, 1980
PhD, University of Wisconsin, Madison, 1982

Keith, Mark J.

COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2003
MISM, Brigham Young University, 2004
PhD, Arizona State University, 2009

Kelling, Hans-Wilhelm

COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Professor
DEGREES: Abitur, Gymnasium in Bremen, 1952
BA, Brigham Young University, 1958
MA, Stanford University, 1960
PhD, Stanford University, 1967

Kelly, Lincoln Kevin

COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Associate Teaching Professor
DEGREES: BFA, Art Center Collage of Design, Pasadena, 1977

Kelly, Michael Ray

COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1978
MA, Ohio State University, 1990
PhD, Ohio State University, 1996

Kenney, Susan Hobson

COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BS, University of Utah, 1966
MA, Brigham Young University, 1978

Kerry, Paul

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History

RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1989
MA, Bowling Green State University, 1991
MA, University of Chicago, 1995
DPhil, University of Oxford, 1998

Kimball, Richard Ian
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1993
MA, Purdue University, West Lafayette, 1995
PhD, Purdue University, West Lafayette, 1999

Kimball, Wilford (Will) Wayne
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, Brigham Young University, 1994
MM, Duquesne University, 1997
DMA, Arizona State University, 2001

Kirwan, C. Brock
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Assistant Professor
DEGREES: BS, University of Utah, 2001
MA, Johns Hopkins University, 2004
PhD, Johns Hopkins University, 2006

Klein, Ilona
COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Associate Professor
DEGREES: Dottore in Lingue e Letterature Straniere Moderne, Universita La Sapienza, Rome, Italy, 1981
MA, University of Wisconsin, Madison, 1982
PhD, University of Wisconsin, Madison, 1986

Knapp, Nieves Perez
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Associate Teaching Professor
DEGREES: BA, University of Oviedo, Spain, 1986
BA, University of Oviedo, Spain, 1990
MA, Brigham Young University, 1995
PhD, University of Oviedo, Spain, 2003

Knapp, Stan J.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1987
MS, Brigham Young University, 1989
PhD, Florida State University, 1996

Knestel, Andrea
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Assistant Clinical Professor
DEGREES: BA, Utah State University, 1999
MA, Syracuse University, 2008
MS, Syracuse University, 2008
PhD, Syracuse University, 2010

Knotts, Thomas Allen
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 2001
PhD, University of Wisconsin, Madison, 2006

Knutson, Charles Douglas
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science

RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1988
MS, Brigham Young University, 1994
PhD, Oregon State University, 1998

Kohl, James
COLLEGE: Nursing
RANK: Assistant Teaching Professor
DEGREES: BSN, University of San Diego, 1989
MS, University of Maryland, Baltimore, 1996

Koide, Roger T.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BA, Pamona College, 1980
PhD, University of California, Berkeley, 1984

Kooyman, David Lee
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Professor
DEGREES: AA, Ottumwa Heights College, 1974
BS, California State Polytechnic University, Pomona, 1982
MS, California State Polytechnic University, Pomona, 1986
PhD, Ohio University, Athens, 1993

Korth, Byran B.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1993
MS, Brigham Young University, 1995
PhD, Auburn University, 2000

Kowallis, Bart J.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1977
MS, University of Wisconsin, Madison, 1979
PhD, University of Wisconsin, Madison, 1981

Kraczek, Michael S.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1999
MFA, Yale University, 2010

Kramer, Nathaniel Todd
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Associate Professor
DEGREES: PhD, University of California, Los Angeles, 2005

Krause, James Remington
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2003
MA, Brigham Young University, 2005
PhD, Vanderbilt University, 2010

Kryscynski, David
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Assistant Professor
DEGREES: BSE, University of Michigan, 2003
PhD, Emory University, 2011

Kunz, Justin
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Assistant Professor

DEGREES: BFA, Brigham Young University, 1999
MFA, Laguna College of Art and Design, 2011

Kuttler, Kenneth L.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, Brigham Young University, 1974
MS, Brigham Young University, 1976
PhD, University of Texas, Austin, 1981

Lamb, John D.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BS, Brigham Young University, 1971
PhD, Brigham Young University, 1978

Lambert, Michael J.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Professor
DEGREES: BS, University of Utah, 1967
MS, University of Utah, 1968
PhD, University of Utah, 1971

Lambert, Nathaniel
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2005
PhD, Florida State University, 2010

Lambson, Val Eugene
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Professor
DEGREES: BA, Brigham Young University, 1979
MA, University of Rochester, 1982
PhD, University of Rochester, 1983

Lang, William E.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BA, Carleton College, 1974
MS, Yale University, 1975
PhD, Harvard University, 1978

Laraway, David Phillip
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MA, Brigham Young University, 1994
MA, Cornell University, 1997
PhD, Cornell University, 1998

Largey, Dennis L.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BS, Brigham Young University—Hawaii, 1972
MA, Brigham Young University, 1976
EdD, Brigham Young University, 1981

Larsen, Darl
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Professor
DEGREES: BA, University of California, Santa Barbara, 1990
MA, Brigham Young University, 1993
PhD, Northern Illinois University, 2000

Larsen, Kirk W.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MA, Harvard University, 1994
PhD, Harvard University, 2000

Larsen, Lance Eric
COLLEGE: Humanities
DEPARTMENT: English
RANK: Professor
DEGREES: BA, Brigham Young University, 1985
MA, Brigham Young University, 1987
PhD, University of Houston, 1993

Larsen, Randy T.
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2004
MS, Brigham Young University, 2006
PhD, Utah State University, 2008

Larson, Erik Matthew
COLLEGE: Humanities

RANK: Associate Clinical Professor
DEGREES: BS, University of Utah, 1999
MS, Brigham Young University, 2001
PhD, Brigham Young University, 2005

Leavitt, Teresa
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Teaching Professor
DEGREES: BS, Brigham Young University, 1998
MA, University of Phoenix, 2000
PhD, University of Nevada, 2008

LeBaron, Curtis
COLLEGE: Marriott School of Management

DEPARTMENT: Organizational Leadership and Strategy
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1989
MA, University of Utah, 1993
PhD, University of Texas, Austin, 1998

LeCheminant, James
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
MS, Brigham Young University, 2001
PhD, University of Kansas, 2005

Lee, Dah Jye
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, National Taiwan University of Science and Technology, 1984
MS, Texas Tech University, 1987
PhD, Texas Tech University, 1990
MBA, Shenandoah University, 1999

Lee, Daryl
COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MA, Yale University, 1993
PhD, Yale University, 1999

Lee, Milton L.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BA, University of Utah, 1971
PhD, Indiana University, 1975

Lefgren, Lars John
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Professor
DEGREES: BA, Brigham Young University, 1996
PhD, University of Chicago, 2001

Leishman, Timothy W.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1990
PhD, Pennsylvania State University, 2000

Leman, Peter Daniel
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, University of Idaho, 2003
MA, Univeristy of California, Irvine, 2006
PhD, University of California, Irvine, 2011

Lephart, Edwin D.
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1979
MS, Brigham Young University, 1982
PhD, University of Texas Southwestern Medical Center, Dallas, 1989

Lewis, Nathan E.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2006
MS, University of California, San Diego, 2008

PhD, University of California, San Diego, 2011

Lewis, Randy
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1989
PhD, Massachusetts Institute of Technology, 1995

Li, Xian-Jin
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, Hunan Normal University, China, 1982
MS, Academia Sinica, Beijing, China, 1985
PhD, Purdue University, 1993

Liddle, Stephen W.
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Professor
DEGREES: BS, Brigham Young University, 1989
PhD, Brigham Young University, 1995

Lignell, David O.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Assistant Professor
DEGREES: BS, University of Utah, 2001
PhD, University of Utah, 2008

Liljenquist, Katie
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Assistant Professor
DEGREES: BA, Arizona State University, 2000
MA, Northwestern University, 2004
PhD, Northwestern University, 2007

Limb, Gordon Earl
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Social Work
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MSW, University of Utah, 1997
PhD, University of Califonia, Berkeley, 2000

Lindeman, Steve
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BM, Indiana University, Bloomington, 1977
MA, Queens College, City University of New York, 1983
PhD, Rutgers University, New Brunswick, 1995

Lindorf, Ron S.
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1982
MA, Brigham Young University, 1991

Lindsay, Gordon B.
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1977
MS, University of Utah, 1980
PhD, Ohio State University, 1984

Linford, Matthew R.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BS, Brigham Young University, 1990

MS, Stanford University, 1996
PhD, Stanford University, 1996

Livingstone, John Peter
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Associate Professor
DEGREES: BSc, University of Alberta, Canada, 1974
MEd, University of Regina, Canada, 1981
EdD, Brigham Young University, 1986

Lockhart, Barbara D.
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Professor
DEGREES: BS, Michigan State University, 1964
MA, Michigan State University, 1967
EdD, Brigham Young University, 1971

Lockwood, Gayle G.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Teaching Professor
DEGREES: BM, Brigham Young University, 1968
MM, University of Utah, 1971

Long, David G.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1982
MS, Brigham Young University, 1983
PhD, University of Southern California, 1989

Lonsdale, Deryle
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Associate Professor
DEGREES: BSc, University of Alberta, Canada, 1981
MS, Carnegie Mellon University, 1992
PhD, Carnegie Mellon University, 1997

Loosli, Kelly T.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Associate Teaching Professor
DEGREES: BA, Brigham Young University, 1996

Lords, Mark O.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1980
MA, Brigham Young University, 1980
MBA, University of Vermont, 1993

Losser, Janet L.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Teaching Professor
DEGREES: BA, Utah State University, 1989
MEd, Brigham Young University, 1997
PhD, University of Georgia, 2004

Lounsbury, Richard Cecil
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Professor
DEGREES: BA, University of Calgary, Canada, 1970
MA, University of Texas, Austin, 1972
PhD, University of Texas, Austin, 1979

Lowe, Laurence M.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music

RANK: Professor
DEGREES: BM, San Francisco Conservatory of Music, 1980
MM, Eastman School of Music, 1981

Lu, Kening
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, Sichuan University, China, 1982
MS, Sichuan University, China, 1985
PhD, Michigan State University, 1988

Ludlow, Jared W.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MA, University of California, Berkeley, 1994
PhD, University of California, Berkeley, 2000

Lund, Christopher C.
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Professor
DEGREES: BA, Brigham Young University, 1967
MA, University of Texas, Austin, 1970
PhD, University of Texas, Austin, 1974

Lund, Randall James
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1960
MA, Brigham Young University, 1973
PhD, University of Minnesota, Minneapolis, 1986

Lundberg, Grant H.
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MA, University of Kansas, 1994
PhD, University of Kansas, 1999

Lundberg, Karen
COLLEGE: Nursing
RANK: Associate Teaching Professor
DEGREES: AS, Brigham Young University, 1979
BS, University of Utah, 2005
MS, University of Utah, 2007

Lundberg, Neil R.
COLLEGE: Marriott School of Management
DEPARTMENT: Recreation Management
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1995
MS, Brigham Young University, 1997
PhD, Indiana University, 2006

Lundquist, M. Suzanne Evertsen
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1965
MA, Brigham Young University, 1972
DA, University of Michigan, Ann Arbor, 1985

Lunt, Barry Mark
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Professor
DEGREES: BS, Brigham Young University, 1978
MS, Brigham Young University, 1979
PhD, Utah State University, 1993

Luthy, Beth

COLLEGE: Nursing
RANK: Assistant Professor
DEGREES: ADN, Utah Valley State College, 2000
BS, Brigham Young University, 2003
MS, Brigham Young University, 2005
DNP, Rush University, 2008

Mabey, Linda

COLLEGE: Nursing
RANK: Assistant Teaching Professor
DEGREES: BSN, Idaho State University, 1978
MS, University of Utah, 1988
DNP, University of Utah, 2009

Macedone, Jeffrey

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1999
PhD, Brigham Young University, 2004

Macfarlane, Roger T.

COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1985
MA, University of Michigan, Ann Arbor, 1987
PhD, University of Michigan, Ann Arbor, 1991

Macintosh, Janelle

COLLEGE: Nursing
RANK: Assistant Professor
DEGREES: BSN, Radford University, 2001
PhD, University of Utah, 2011

Mack, Gary Wayne

COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Professor
DEGREES: BS, University of California, Davis, 1977
MA, University of California, Davis, 1981
PhD, John A. Burns School of Medicine, 1984

Madden, Patrick

COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BS, University of Notre Dame, 1993
MA, Brigham Young University, 1999
PhD, Ohio University, 2004

Madsen, Peter Micah

COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 2001
PhD, University of California, Berkeley, 2006

Magleby, David B.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Professor
DEGREES: BA, University of Utah, 1973
MA, University of California, Berkeley, 1974
PhD, University of California, Berkeley, 1980

Magleby, Spencer P.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Professor
DEGREES: MS, Brigham Young University, 1983
BS, Brigham Young University, 1983

PhD, University of Wisconsin, Madison, 1988

Magnusson, Brianna
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Assistant Professor
DEGREES: BS, Brigham Young University
MPH, Virginia Commonwealth University
PhD, Virginia Commonwealth University

Manning, Alan D.
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Professor
DEGREES: BA, Brigham Young University, 1984
PhD, Louisiana State University, Baton Rouge, 1988

Manscill, Craig Kent
COLLEGE: Religious Education

RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1982
MEd, Brigham Young University, 1985
PhD, Brigham Young University, 1997

Morris, Thomas H.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
MS, University of Wisconsin, Madison, 1983
PhD, University of Wisconsin, Madison, 1986

Morrison, Timothy G.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1977
MEd, Brigham Young University, 1979
PhD, University of Illinois, 1986

Morse, Bryan Stuart
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1986
MA, Brigham Young University, 1990
PhD, University of North Carolina, Chapel Hill, 1995

Mower, Gordon
COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Assistant Professor
DEGREES: BA, University of Utah, 1988
MA, University of Utah, 1994
PhD, University of Utah, 2007

Muhlestein, Daniel K.
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1984
MA, Brigham Young University, 1987
PhD, Rice University, 1992

Muhlestein, Kerry
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MA, Brigham Young University, 1997

PhD, University of California, Los Angeles, 2003

Mundy, Ryan D., Mr.
COLLEGE: Marriott School of Management
DEPARTMENT: Military Science
RANK: Assistant Professor
DEGREES: BA, Southern Utah University, 2004

Musil, Pamela S.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1978
MA, Brigham Young University, 1985

Myrer, Joseph William
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Professor
DEGREES: BPE, University of Calgary, Canada, 1974
MA, University of Windsor, 1977
PhD, Brigham Young University, 1983

Nadauld, Taylor
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2002
PhD, Ohio State University, 2009

Neff, Lynette
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Adjunct Instructor
DEGREES: BS, Southern Utah University, 1971
MEd, Brigham Young University, 1992

Neiger, Brad Lee
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1983
MS, Brigham Young University, 1984
PhD, University of Utah, 1991

Neilsen, David W
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1992
MS, Brigham Young University, 1995
PhD, University of Texas, Austin, 1999

Nelson, Brent Edwin
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, University of Utah, 1981
MS, University of Utah, 1983
PhD, University of Utah, 1984

Nelson, Charles Riley
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BS, Utah State University, 1980
MS, Utah State University, 1984
PhD, Brigham Young University, 1986

Nelson, David A.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1995

PhD, University of Minnesota, 1999

Nelson, Everett James
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1989
MS, Brigham Young University, 1990
PhD, Brigham Young University, 1994

Nelson, George D.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Professor
DEGREES: BA, Brigham Young University, 1977
MFA, University of Washington, 1979

Nelson, Larry J.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1996
PhD, University of Maryland, College Park, 2000

Nelson, Ray
COLLEGE: Marriott School of Management
DEPARTMENT: Romney Institute of Public Management
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1975
MA, University of California, Berkeley, 1978
MS, University of California, Berkeley, 1978
PhD, University of California, Berkeley, 1981

Nelson, Stephen Tracy
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1984
MS, Brigham Young University, 1987
PhD, University of California, Los Angeles, 1991

Nelson, Tracy W.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Professor
DEGREES: BS, Ohio State University, 1991
MS, Ohio State University, 1993
PhD, Ohio State University, 1998

Newberry, Melissa
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1998
MA, Ohio State University, 2006
PhD, Ohio State University, 2008

Newell, Lloyd
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BA, Brigham Young University, 1980
MA, Brigham Young University, 1985
PhD, Brigham Young University, 1999

Ng, Yiu-Kai Dennis
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1982
MS, Brigham Young University, 1984
PhD, Kansas State University, 1991

Nielsen, Brent Lynn

COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
PhD, Oregon State University, 1985

Nielsen, Dianne Lindley
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1977
PhD, Brigham Young University, 2001

Nielsen, Pace
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2001
PhD, University of California, Berkeley, 2006

Nielsen, Perpetua Lynne
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Associate Teaching Professor
DEGREES: BS, University of Philippines, 1973
MS, Brigham Young University, 1984

Nielsen, Stevan Lars
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1976
PhD, University of Washington, 1984

Nielson, Daniel L.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1988
PhD, University of California, San Diego, 1997

Nielson, Jennifer Burrows
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1988
MS, University of California, San Diego, 1992
PhD, University of California, San Diego, 1997

Nielson, Rex P.
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2002
MA, Brown University, 2004
AM, Brown University, 2007
PhD, Brown University, 2010

Nielson, Troy
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1991
PhD, University of Utah, 1998

Nissen, Shawn L.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Communication Disorders
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1994
MA, Ohio State University, 1998
PhD, Ohio State University, 2003

Noble, Cinzia D.
COLLEGE: Humanities

DEPARTMENT: French and Italian
RANK: Teaching Professor
DEGREES: BA, Brigham Young University, 1978
Dott in Lettere Classiche, G. D'Annunzio, Italy, 1979

Nokes, Jeffery D.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1991
MEd, Utah State University, 1996
PHD, University of Utah, 2005

Nordin, Gregory P.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1984
MS, University of California, Los Angeles, 1986
PhD, University of Southern California, 1992

Norman, Judith L.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Social Work
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1970
BS, Portland State University, 1972
MSW, University of Utah, 1978
DSW, University of Utah, 1990

Novilla, Maria Lelinneth Lagman Beloy
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Associate Professor
DEGREES: BS, University of the Philippines, 1986
MD, University of the City of Manila, College of Medicine, 1991
MPH, University of Utah, 1999

Nuckolls, Charles W.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Anthropology
RANK: Professor
DEGREES: AB, University of Chicago, 1979
MA, University of Wisconsin-Madison, 1980
PhD, University of Chicago, 1987

Nuckolls, Janis
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Associate Professor
DEGREES: BA, University of Wisconsin-Madison, 1981
AM, University of Chicago, 1983
PhD, University of Chicago, 1990

Nuttall, Ronald Brent
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1983
MS, Brigham Young University, 1985

Nyland, Nora Kay
COLLEGE: Life Sciences
DEPARTMENT: Nutrition, Dietetics, and Food Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1974
MS, Brigham Young University, 1981
PhD, Kansas State University, 1989

O'Neill, Kim L.
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Professor

DEGREES: BSc, University Of Ulster, Northern Ireland, 1980
DPhil, University of Ulster, Northern Ireland, 1986

Oaks, Dallin Dixon
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1984
MA, University of Utah, 1986
PhD, Purdue University, 1990

Ogden, D. Kelly
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BA, Weber State College, 1971
MEd, Brigham Young University, 1974
MA, Institute of Holy Land Studies, Jerusalem, 1978
PhD, University of Utah, 1982

Ogletree, Mark D.
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1987
MA, Northern Arizona University, 1994
PhD, Utah State University, 2000

Olivier, Marc Louis
COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1991
MA, University of Washington, 1993
PhD, University of Washington, 1999

Olsen, Dan Reed
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1976
MS, Brigham Young University, 1978
PhD, University of Pennsylvania, 1981

Olson, Camille Fronk
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BA, Utah State University, 1976
MA, Brigham Young University, 1986
PhD, Brigham Young University, 1996

Olson, Terrance D.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BS, Brigham Young University, 1967
MS, Brigham Young University, 1969
PhD, Florida State University, 1973

Oscarson, Christopher
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1997
MA, Brigham Young University, 2000
PhD, University of California, Berkeley, 2006

Osguthorpe, Russell
COLLEGE: David O. McKay School of Education
DEPARTMENT: Instructional Psychology and Technology
RANK: Professor
DEGREES: BS, Brigham Young University, 1971
MS, Brigham Young University, 1973

PhD, Brigham Young University, 1975

Ostenson, Jonathan
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1997
MEd, University of Utah, 2005
PhD, University of Utah, 2010

Ostler, Craig James
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BA, Brigham Young University, 1977
MEd, Brigham Young University, 1979
PhD, Brigham Young University, 1995

Ostraff, Joseph Evan
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Professor
DEGREES: BFA, Brigham Young University, 1982
MFA, University of Washington, 1984

Otterstrom, Samuel M.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Geography
RANK: Professor
DEGREES: BS, Brigham Young University, 1990
MS, Brigham Young University, 1994
PhD, Louisiana State University A&M, 1997

Ouyang, Tiancheng
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: MS, Nankai University, China, 1981
PhD, University of Minnesota, Minneapolis, 1989

Owens, Andrew J., MAJ
COLLEGE: Marriott School of Management
DEPARTMENT: Military Science
RANK: Assistant Professor
DEGREES: BS, Utah Valley University, 2001

Packard, Dennis J.
COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Professor
DEGREES: AA, Miracosta College, 1966
BA, Stanford University, 1968
PhD, Stanford University, 1974

Page, Jeremy
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Assistant Professor
DEGREES: BS, U.S. Air Force Academy, 2002
MPP, Harvard University, 2004
PhD, University of Texas at Austin, 2011

Page, Randy M.
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1979
MHE, Brigham Young University, 1980
PhD, Southern Illinois University, 1982

Palmer, Sheri Patten
COLLEGE: Nursing
RANK: Associate Teaching Professor
DEGREES: AS, Brigham Young University, 1983

BS, Brigham Young University, 1985
MS, Idaho State University, 1990

Parcell, Allen C.
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1993
MS, Iowa State University, 1995
PhD, Ball State University, 1998

Parker, Todd B.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Teaching Professor
DEGREES: BS, Weber State College, 1974
MEd, Brigham Young University, 1978

PhD, Brigham Young University, 1994

Price, Joseph
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 2003
PhD, Cornell University, 2007

Price, Joshua L.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry

RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2003
PhD, University of Wisconsin, 2008

Prince, John T.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2000
PhD, University of Texas, Austin, 2008

Prohosky, Caroline
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1972
MA, University of California, Los Angeles, 1980

Properzi, Mauro
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2000
MTS, Harvard Divinity School, 2002
M.Phil, Cambridge University, 2004
PhD, Durham University, 2010

Prusak, Keven A.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1986
MEd, Utah State University, 1990
PhD, Arizona State University, 2000

Pulfer, Adrian H.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Associate Professor
DEGREES: BFA, Brigham Young University, 1988

Pulsipher, Jenny Hale
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1985
MA, Brigham Young University, 1989
PhD, Brandeis University, 1999

Purcell, Jessica
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Associate Professor
DEGREES: BA, University of Utah, 1998
MS, University of Michigan, 1999
PhD, Stanford University, 2004

Purves, Mark Richard
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2001
MA, University of Virginia, 2004
PhD, University of Virginia, 2007

Quackenbush, Louis Howard
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Professor
DEGREES: BA, Brigham Young University, 1965
MA, Brigham Young University, 1967
PhD, University of Illinois, Urbana, 1970

Radebaugh, Jani

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1993
MS, Brigham Young University, 1999
PhD, University of Arizona, 2005

Radebaugh, Lee H.

COLLEGE: Marriott School of Management
DEPARTMENT: Accountancy, School of
RANK: Professor
DEGREES: BS, Brigham Young University, 1968
BS, Brigham Young University, 1968
MBA, Indiana University, Bloomington, 1972
DBA, Indiana University, Bloomington, 1973

Rader, Russell Ben

COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1977
MS, Brigham Young University, 1982
PhD, Colorado State University, 1987

Randall, Boyd C.

COLLEGE: Marriott School of Management
DEPARTMENT: Accountancy, School of
RANK: Professor
DEGREES: BS, University of Utah, 1965
JD, University of Utah, 1967
MBA, University of Utah, 1968
PhD, University of Minnesota, 1972

Randall, E. Vance

COLLEGE: David O. McKay School of Education
DEPARTMENT: Educational Leadership and Foundations
RANK: Professor
DEGREES: BS, Brigham Young Univesity, 1975
MEd, Brigham Young University, 1978
PhD, Cornell University, 1989

Randle, Quint Bryce

COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1984
MA, Pepperdine University, 1995
PhD, Michigan State University, 2001

Ransom, Michael R

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Professor
DEGREES: BA, Brigham Young University, 1977
MA, Princeton University, 1980
PhD, Princeton University, 1983

Rash, Phillip

COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Associate Clinical Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1996
PhD, Brigham Young University, 2004

Ravert, Patricia (Patty) Kay

COLLEGE: Nursing
RANK: Professor
DEGREES: AS, Brigham Young University, 1974
BS, Brigham Young University, 1975
MS, Brigham Young University, 1994
PhD, University of Utah, 2004

Ray, Gaye

COLLEGE: Nursing
RANK: Assistant Teaching Professor
DEGREES: AS, Brigham Young University, 1981
BSN, Brigham Young University, 1982
MSN, Georgia State University, 2008
Certificate, University of Albany, 2011
Graduate Certificate, University of Missouri, Columbia, 2012

Reber, Jeffrey S.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1999
PhD, Brigham Young University, 2000

Red, Walter Edward

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Professor
DEGREES: BS/MA, Rice University, 1965
PhD, Arizona State University, 1972

Reed, Shelly Jensen

COLLEGE: Nursing
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1984
MSN, University of Utah, 1992
DNP, Case Western Reserve University, 2009

Rees, Lawrence B.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Professor
DEGREES: BS, Brigham Young University, 1976
MS, University of Maryland, College Park, 1979
PhD, University of Maryland, College Park, 1983

Reese, C Shane

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1995
PhD, Texas A&M University, 1999

Reich, Diane Thueson

COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, Utah State University, 1994
MM, Indiana University, 1997
DM, Indiana University, 2003

Reynolds, Linda Ann

COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Professor
DEGREES: AA, Ricks College, 1977
BA, Brigham Young University, 1981
MFA, University of Utah, 1993

Reynolds, Paul R.

COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
MS, Brigham Young University, 2001
PhD, University of Cincinnati, 2004

Rhees, Reuben Ward

COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology

RANK: Professor
DEGREES: BS, University of Utah, 1967
PhD, Colorado State University, 1971

Rhoads, Gary K.
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Professor
DEGREES: BS, Idaho State University, 1978
MBA, Idaho State University, 1982
PhD, Texas Tech University, 1988

Rice, L. Maureen
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1977
MA, Brigham Young University, 1980
PhD, Brigham Young University, 1997

Rice, Michael
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Louisiana Tech University, 1987
PhD, Georgia Institute of Technology, 1991

Rich, Peter Jacob
COLLEGE: David O. McKay School of Education
DEPARTMENT: Instructional Psychology and Technology
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 2002
PhD, University of Georgia, 2007

Richards, A Legrand
COLLEGE: David O. McKay School of Education
DEPARTMENT: Educational Leadership and Foundations
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1975
MEd, Harvard University, 1976
PhD, Brigham Young University, 1982

Richards, John Eric
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Associate Teaching Professor
DEGREES: BA, Brigham Young University, 1985

Richards, Mary Stovall
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1973
MA, University of Chicago, 1976
PhD, University of Chicago, 1983

Richards, P Scott
COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
MA, Brigham Young University, 1983
PhD, University of Minnesota, 1988

Richards, Paul William
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 2000
MS, University of California, San Diego, 2003
PhD, University of California, San Diego, 2004

Richards, Rickelle
COLLEGE: Life Sciences
DEPARTMENT: Nutrition, Dietetics and Food Science

RANK: Associate Professor
DEGREES: BS, Utah State University, 2001
MPH, Tulane University School of Public Health & Tropical Medicine, 2003
PhD, RD, University of Minnesota, 2007

Richardson, Matthew O.
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BA, Brigham Young University, 1987
MEd, Brigham Young University, 1990
EdD, Brigham Young University, 1996

Richardson, Michael J.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1995
MS, University of Utah, 2003
PhD, Brigham Young University, 2009

Ricks, Stephen David
COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Professor
DEGREES: BA, Brigham Young University, 1974
MA, Brigham Young University, 1976
PhD, University of California, Berkeley, 1982

Ricks, Steven Leon
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Associate Professor
DEGREES: BM, Brigham Young University, 1993
MM, University of Illinois, Urbana, 1995
C.A.MS, King's College London, 2000
PhD, University of Utah, 2001

Ridge, Bob
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1987
PhD, University of Minnesota, 1993

Ridge, Sarah Traeger
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Assistant Professor
DEGREES: BS, Skidmore College, 1998
MS, University of Delaware, 2004
PhD, University of Delaware, 2010

Riep, Steven L.
COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Associate Professor
DEGREES: BA, University of California, Berkeley, 1987
MA, University of California, Los Angeles, 1991
PhD, University of California, Los Angeles, 2001

Ringger, Eric Karl
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1992
MS, University of Rochester, 1994
PhD, University of Rochester, 2000

Ritter, Scott M.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1981

MS, Brigham Young University, 1983
PhD, University of Wisconsin, 1986

Roberts, Brian R.
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2001
MA, Brigham Young University, 2003
PhD, University of Virginia, 2008

Roberts, Norman
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BA, Brigham Young University, 1973
MS, University of Utah, 1981
PhD, Brigham Young University, 1994

Robinson, Clyde Clark
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1972
MS, Brigham Young University, 1975
PhD, University of North Carolina, Greensboro, 1982

Robinson, Lee Ann
COLLEGE: David O. McKay School of Education
DEPARTMENT: Communication Disorders
RANK: Associate Clinical Professor
DEGREES: BS, Brigham Young University, 1992
MS, Brigham Young University, 1994

Robinson, Thomas Eugene
COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Professor
DEGREES: BS, Northern Arizona University, 1988
MA, University of Nevada, Las Vegas, 1992
PhD, University of Southern Mississippi, 1996

Robinson, Todd Fergus
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1986
MS, Brigham Young University, 1988
PhD, Cornell University, 1996

Robison, Richard A.
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1978
MS, Brigham Young University, 1980
PhD, Brigham Young University, 1988

Robison, Shani Michelle
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1995
MA, Brigham Young University, 1999

Roby, Jini L.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Social Work
RANK: Professor
DEGREES: BS, Brigham Young University, 1977
MSW, Brigham Young University, 1984
MS, Brigham Young University, 1984
JD, Brigham Young University, 1990

Rodham, Kenneth J.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Teaching Professor
DEGREES: BS, Brigham Young University, 1990
MS, Brigham Young University, 1992
PhD, Brigham Young University, 1995

Roeder, Beverly L.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BA, Wittenberg University, 1978
DVM, Ohio State University, 1982
MS, Kansas State University, 1986
PhD, Pennsylvania State University, 1990

Rogers, Duke S.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BS, Texas A&M University, 1976
MS, Texas A&M University, 1979
PhD, University of California, Berkeley, 1986

Rollins, Kyle
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1982
PhD, University of California, Berkeley, 1987

Romney, Marshall B.
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Professor
DEGREES: BS, Brigham Young University, 1971
MA, Brigham Young University, 1972
PhD, University of Texas, Austin, 1977

Root, Richard, Mr.
COLLEGE: Marriott School of Management
DEPARTMENT: Military Science
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1988
MA, University of Oklahoma, 2005

Roper, Paul Ross
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1976
MS, Brigham Young University, 1979

Roper, Susanne Olsen
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1975
MS, Brigham Young University, 1981
PhD, University of Georgia, 1992

Rosborough, Alessandro A.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1996
MA, University of Utah, 2001
PhD, University of Nevada, Las Vegas, 2010

Rosenberg, John R.
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Professor
DEGREES: BA, Brigham Young University, 1979

MA, Brigham Young University, 1981
PhD, Cornell University, 1985

Roundy, Bruce A.
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Professor
DEGREES: BA, University of Nevada, Reno, 1973
MS, University of Nevada, Reno, 1977
PhD, Utah State University, 1984

Roundy, Robin O.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, Brigham Young University, 1978
MS, Brigham Young University, 1980
PhD, Stanford University, 1984

Rowan, Jamin
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1999
MA, University of Southampton, 2001
MA, Boston College, 2002
PhD, Boston College, 2008

Rowe, Dale C.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Assistant Professor
DEGREES: BEng, University of Kent, 2003
PhD, University of Kent, 2010

Rudy, Jill Terry
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1987
MA, Brigham Young University, 1990
PhD, Indiana University, Bloomington, 1997

Rugh, Jacob S.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2001
MPA, Princeton University, 2008
URP, Princeton University, 2008
PhD, Princeton University, 2012

Rugh, Susan Sessions
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Professor
DEGREES: BA, Brigham Young University, 1974
MA, University of Chicago, 1986
PhD, University of Chicago, 1993

Rupper, Summer
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 2000
MS, University of Washington, 2003
PhD, University of Washington, Seattle, 2007

Russell, Thomas Blair
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Teaching Professor
DEGREES: BA, Brigham Young University, 1988

Ryskamp, George Richard

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Professor
DEGREES: BA, Brigham Young University, 1974
JD, Brigham Young University, 1979

Saito, Mitsuru
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
MS, University of Virginia, 1983
PhD, Purdue University, West Lafayette, 1988

Sampson, Scott E.
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Professor
DEGREES: BA, Brigham Young University, 1988
MBA, University of Virginia, 1991
PhD, University of Virginia, 1993

Sandberg, Jonathan G.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Professor
DEGREES: BS, Brigham Young University, 1993
MS, Brigham Young University, 1995
PhD, Kansas State University, 1998

Sanders, Scott R.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2002
MPA, Cornell University, 2006
MS, Cornell University, 2007
PhD, Cornell University, 2013

Savage, Paul Bennett
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BS, Brigham Young University, 1988
PhD, University of Wisconsin, Madison, 1993

Saville, Kirt
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BM, Brigham Young University, 1976
MM, North Texas State University, 1983
EdD, Utah State University, 1991

Scanlon, Rory Rahn
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Professor
DEGREES: BA, Brigham Young University, 1980
MFA, University of Illinois, Urbana-Champaign, 1984

Schaalje, G Bruce
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Professor
DEGREES: AA, Ricks College, 1975
BS, Brigham Young University, 1977
MS, Brigham Young University, 1979
MS, University of Washington, 1981
PhD, North Carolina State University, 1988

Schonlau, Robert
COLLEGE: Marriott School of Management

DEPARTMENT: Finance
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2000
MBA, Brigham Young University, 2004
MSBA, University of Washington, 2008
PhD, University of Washington, 2010

Schultz, Grant George
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1995
PhD, Texas A&M University, 2003

Schultz, Stephen Marshall
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1992
MS, Brigham Young University, 1994
PhD, Georgia Institute of Technology, 1999

Scott, Del T.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Professor
DEGREES: BS, Brigham Young University, 1970
MS, Brigham Young University, 1973
PhD, Pennsylvania State University, 1977

Scott, Michael A.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2005
MS, Brigham Young University, 2006
MS, University of Texas at Austin, 2008
PhD, University of Texas at Austin, 2011

Scoville, Spencer Dan
COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2002
MA, Georgetown University, 2005
PhD, University of Michigan, 2012

Seamons, Kent Eldon
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1986
PhD, University of Illinois, Urbana, 1996

Seawright, Kristie
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1977
BS, University of Utah, 1987
MBA, University of Utah, 1989
PhD, University of Utah, 1994

Sederberg, Thomas W.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1975
MS, Brigham Young University, 1977
PhD, Purdue University, Lafayette, 1983

Sederholm, Carl
COLLEGE: Humanities

DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Associate Professor
DEGREES: AA, Long Beach City College, 1994
BA, University of California, Los Angeles, 1996
PhD, University of Utah, 2002

Seegmiller, Robert E.
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Professor
DEGREES: BS, University of Utah, 1965
MS, University of Utah, 1967
PhD, McGill University, 1970

Seeley, Matthew Kirk
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Associate Professor
DEGREES: BS, Utah State University, 2000
MS, Utah State University, 2002
PhD, University of Kentucky, 2006

Seely, David R.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BA, Brigham Young University, 1981
MA, Brigham Young University, 1982
AM, University of Michigan, Ann Arbor, 1985
PhD, University of Michigan, Ann Arbor, 1990

Seipel, Michael M O
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Social Work
RANK: Professor
DEGREES: BS, University of Utah, 1974
MSW, University of Utah, 1976
PhD, Cornell University, 1982

Selfridge, Richard H.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, California State University, Sacramento, 1978
MS, University of California, Davis, 1980
PhD, University of California, Davis, 1984

Selway, Joel Sawat
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2002
MA, University of Michigan, 2006
PhD, University of Michigan, 2009

Seppi, Kevin Darrell
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1982
MS, Santa Clara University, 1987
PhD, University of Texas, Austin, 1990

Sevy, Eric T.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MA, Columbia University, 1995
PHM, Columbia University, 1998
PhD, Columbia University, 1999

Sherman, Jr., Alvin Franklin
COLLEGE: Humanities

DEPARTMENT: Spanish and Portuguese
RANK: Professor
DEGREES: BA, Brigham Young University, 1985
MA, Brigham Young University, 1987
PhD, University of Virginia, 1990

Shiozawa, Dennis Kenji
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BA, Weber State College, 1972
MS, Brigham Young University, 1974
PhD, University of Minnesota, St. Paul, 1978

Shirts, Randall Brent
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1973
AM, Harvard University, 1978
PhD, Harvard University, 1979

Showalter, Mark H.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Professor
DEGREES: BA, Brigham Young University, 1986
PhD, Massachusetts Institute of Technology, 1991

Shumway, J. Matthew
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Geography
RANK: Professor
DEGREES: BA, Brigham Young University, 1984
MS, Brigham Young University, 1987
PhD, Indiana University, 1991

Shumway, Jeffrey L.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BA, Brigham Young University, 1976
MA, Juilliard School of Music, 1977
DM, Indiana University East, 1982

Shumway, Jeffrey Merrill
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University—Hawaii, 1992
MA, Brigham Young University, 1994
PhD, University of Arizona, 1999

Shumway, Steven LeRoy
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1987
MS, Utah State University, 1993
PhD, Utah State University, 1999

Siebach, James L.
COLLEGE: Humanities
DEPARTMENT: Philosophy
RANK: Emeritus
DEGREES: BA, Brigham Young University, 1982
PhD, University of Texas, Austin, 1994

Siebert, Daniel K.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics Education
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1989
MS, Brigham Young University, 1993

PhD, University of California, San Diego, 2000

Siegfried, Brandie R.
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1988
MA, Brigham Young University, 1990
PhD, Brandeis University, 1993
MA, Brandeis University, 1993

Silcox, Roy W.
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1981
MS, North Carolina State University, 1984
PhD, North Carolina State University, 1986

Sillito-Walker, Sheli
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1995
MOB, Brigham Young University, 2000

Simmons, Daniel L.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BS, Brigham Young University, 1978
MS, Brigham Young University, 1980
PhD, University of Wisconsin, Madison, 1986

Sims, David
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
PhD, Massachusetts Institute of Technology, 2004

Sites, Jr., Jack W.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BS, Austin Peay State University, 1973
MS, Austin Peay State University, 1975
PhD, Texas A & M University, 1980

Skabelund, Aaron
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1995
MA, Stanford University, 1997
MPhil, Columbia University, 2002
PhD, Columbia University, 2004

Skaggs, Paul Tharlie
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Professor
DEGREES: BFA, Brigham Young University, 1980
MFA, Rochester Institute of Technology, 2001

Skinner, Andrew C.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BS, University of Colorado, 1975
MAR, Iliff School of Theology, 1978
MTh, Harvard University, 1980
PhD, University of Denver, 1986

Skinner, Malcolm R.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Geological Sciences
RANK: Associate Teaching Professor
DEGREES: BS, Brigham Young University, 1992
MS, Brigham Young University, 1996

Skousen, Royal
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Professor
DEGREES: BA, Brigham Young University, 1969
MA, University of Illinois, Urbana, 1971
PhD, University of Illinois, Urbana, 1972

Slade, Barrett A.
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Professor
DEGREES: BS, Brigham Young University, 1983
MS, Brigham Young University, 1989
PhD, University of Georgia, 1997

Slife, Brent D.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Professor
DEGREES: BA, William Jewell College, 1976
MS, Purdue University, 1977
PhD, Purdue University, 1981

Smead, Robert N.
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1981
MA, Brigham Young University, 1983
PhD, University of Texas, Austin, 1988

Smemoe, Wendy Baker
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1991
MA, Brigham Young University, 1995
PhD, University of Illinois, Urbana, 2002

Smith, Barbara M.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Associate Clinical Professor
DEGREES: BS, Brigham Young University, 1978
MEd, Brigham Young University, 1982

Smith, Charles Raymond
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BM, Brigham Young University, 1975
MM, Indiana University, Bloomington, 1976
DM, Indiana University, Bloomington, 1982

Smith, Christian B.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BM, Brigham Young University, 1991
MM, Brigham Young University, 1993
DMA, University of Michigan, 2006

Smith, Laura Catharine
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Associate Professor
DEGREES: BA, Queen's University, Kingston (Canada), 1994

BEd, Queens University, Kingston (Canada), 1995
MA, University of Calgary, 1997
MA, University of Wisconsin, Madison, 2000
PhD, University of Wisconsin, Madison, 2004

Smith, Leigh K.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Professor
DEGREES: AS, Brigham Young University, 1975
BS, Brigham Young University, 1989
MA, Brigham Young University, 1995
PhD, University of Utah, 2002

Smith, Melvin Ray
COLLEGE: Humanities
DEPARTMENT: Humanities Research Center
RANK: Senior Research Fellow
DEGREES: BA, Brigham Young University, 1975

Smith, Steven
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1981
MEd, Brigham Young University, 1983
PhD, University of Minnesota, 1988

Smith, Steven D.
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
MAcc, Brigham Young University, 1999
MS, Cornell University, 2004
PhD, Cornell University, 2005

Smith, Thomas
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1982
MS, University of Alaska, Fairbanks, 1987
PhD, Brigham Young University, 1992

Smith, Timothy B.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Professor
DEGREES: BS, Brigham Young University, 1991
MS, Utah State University, 1993
MA, Rhodes University, South Africa, 1995
MA, Utah State University, 1996
PhD, Utah State University, 1997

Smith, William V.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, University of Utah, 1973
PhD, University of Utah, 1978

Snell, Quinn O.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BS, Utah State University, 1992
MS, Utah State University, 1993
PhD, Iowa State University, 1997

Snyder, Phillip A.
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor

DEGREES: BA, Brigham Young University, 1977
MA, Brigham Young University, 1980
PhD, University of North Carolina, Chapel Hill, 1988

Solovieva, Raissa V.
COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Associate Teaching Professor
DEGREES: BA, Tomsk State University, Russia, 1971
MA, Novosibirsk State University, Russia, 1982
PhD, Kharkov State University, Ukraine, 1987

Sommerfeldt, Scott D.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Professor
DEGREES: BM, Brigham Young University, 1983
MS, Brigham Young University, 1986
PhD, Pennsylvania State University, 1989

Sondrup, Steven P.
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Professor
DEGREES: BA, University of Utah, 1968
MA, Harvard University, 1969
PhD, Harvard University, 1974

Soper, Kerry David
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Associate Professor
DEGREES: BFA, Utah State University, 1992
MA, Emory University, 1994
PhD, Emory University, 1998

Sorensen, Carl D.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
PhD, Massachusetts Institute of Technology, 1985

Sorensen, Rodger D.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Professor
DEGREES: BA, Brigham Young University, 1972
MA, Brigham Young University, 1974
PhD, University of Texas, Dallas, 1999

South, Mikle
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Assistant Professor
DEGREES: BA, Yale University, 1994
MS, University of Utah, 2001
PhD, University of Utah, 2005

Spangler, Diane Louise
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BA, Pomona College, 1989
MS, University of Oregon, 1991
PhD, University of Oregon, 1994

Spencer, David Eugene
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Economics
RANK: Professor
DEGREES: BA, Brigham Young University, 1971
MS, Texas A&M University, 1973
PhD, Texas A&M University, 1974

Spencer, Ross Loren

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Professor
DEGREES: BS, Brigham Young University, 1974
MS, University of Wisconsin, Madison, 1976
PhD, University of Wisconsin, Madison, 1979

Spencer, Thomas Robert

COLLEGE: Humanities
DEPARTMENT: Germanic and Slavic Languages
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2000
MA, University of North Carolina, Chapel Hill, 2003
PhD, University of North Carolina, Chapel Hill, 2008

Sperry, Kip

COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BS, Brigham Young University, 1971
MLS, Brigham Young University, 1974

Spilker, Brian C.

COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1987
MAcc, Brigham Young University, 1987
PhD, University of Texas, Austin, 1993

Sprenger, Anca Mitroi

COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Associate Professor
DEGREES: BA, University of Bucharest, Romania, 1984
DEA, University of Paris, 1991
PhD, University of Southern California, 1997

Sprenger, Scott M.

COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Professor
DEGREES: BA, University of Washington, 1983
MA, Johns Hopkins University, 1990
PhD, Emory University, 1995

St. Clair, Sam

COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1998
MS, Brigham Young University, 1999
PhD, Pennsylvania State University, 2004

St Clair, Larry Lee

COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1974
MS, Brigham Young University, 1975
PhD, University of Colorado, 1984

Staheli, Ronald J.

COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BA, Brigham Young University, 1972
MM, University of Southern California, 1973
DMA, University of Southern California, 1977

Stallings, Gregory C.

COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese

RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1989
MA, Brigham Young University, 1993
PhD, University of California, Irvine, 1999

Stanford, Charlotte A.
COLLEGE: Humanities
DEPARTMENT: Humanities, Classics, and Comparative Literature
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1993
MA, University of Connecticut, 1996
PhD, Pennsylvania State University, 2003

Stark, Michael Robert
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1992
MS, Idaho State University, 1994
PhD, University of California, Irvine, 1998

Steed, Katie Edna
COLLEGE: David O. McKay School of Education
DEPARTMENT: Counseling Psychology and Special Education
RANK: Associate Clinical Professor
DEGREES: BS, Brigham Young University, 2000
MS, Brigham Young University, 2004

Steele, Frost M.
COLLEGE: Life Sciences
DEPARTMENT: Nutrition, Dietetics and Food Science
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1985
MS, Brigham Young University, 1987
PhD, Purdue University, 1990

Steffen, Patrick R.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1993
MS, University of Miami, 1996
PhD, University of Miami, 1998

Steffensen, Scott C.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, University of Utah, 1980
PhD, University of Utah, 1987

Stephens, Denise
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1996
MS, New Mexico State University, 1999
PhD, New Mexico State University, 2002

Stevens, Mikel Ross
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Professor
DEGREES: AS, Snow College, 1975
BS, Brigham Young University, 1977
MS, Brigham Young University, 1983
PhD, University of Arkansas, 1993

Stewart, Dave N.
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BA, Brigham Young University, 1977
MAcc, Brigham Young University, 1977

PhD, University of Florida, 1980

Stewart, John Ryan

COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Associate Professor
DEGREES: BS, Utah State University, 1999
MS, Utah State University, 2001
PhD, Iowa State University, 2005

Stice, Earl K.

COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
MAcc, Brigham Young University, 1982
MS, Cornell University, 1986
PhD, Cornell University, 1988

Stice, James D.

COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1984
MAcc, Brigham Young University, 1984
PhD, University of Washington, 1988

Stiles, Kendall Wayne

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Professor
DEGREES: BA, Brigham Young University, 1982
MA, Brigham Young University, 1983
PD, Johns Hopkins University, 1987

Stirling, Wynn Clair

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BA, University of Utah, 1969
MS, University of Utah, 1971
PhD, Stanford University, 1983

Stock, David Michael

COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2003
MA, Brigham Young University, 2005
PhD, Univeristy of Wisconsin-Madison, 2012

Stocks, Kevin D.

COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1978
MAcc, Brigham Young University, 1978
PhD, Oklahoma State University, 1981

Stokes, Harold T.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Professor
DEGREES: BS, Brigham Young University, 1971
PhD, University of Utah, 1977

Stoneman, Jack Chris

COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1998
MA, Columbia University, 2001
PhD, Columbia University, 2006

Straight, Michael, MSG

COLLEGE: Marriott School of Management
DEPARTMENT: Military Science
RANK: Assistant Professor
DEGREES: AS, Northwest College, 1992
AS, Northwest College, 1993
AS, Excelsior College, 2012

Stratford, Edward P.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2000
MA, University of Chicago, 2002
PhD, University of Chicago, 2010

Strathearn, Gaye
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1991
MA, Brigham Young University, 1992
PhD, Claremont Graduate University, 2004

Strong-Krause, Diane
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Associate Teaching Professor
DEGREES: BA, Brigham Young University, 1975
MA, Brigham Young University, 1977
PhD, Brigham Young University, 2001

Sudweeks, Bryan Lorin
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Associate Teaching Professor
DEGREES: BA, Brigham Young University, 1980
MBA, Brigham Young University, 1982
PhD, George Washington University, 1987

Sudweeks, Richard R.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Instructional Psychology and Technology
RANK: Professor
DEGREES: BS, Brigham Young University, 1965
MA, Brigham Young University, 1973
PhD, University of Illinois, 1978

Sudweeks, Sterling N.
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1992
PhD, University of Utah, 1997

Summers, Scott L.
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1990
MAcc, Brigham Young University, 1990
PhD, Texas A&M University, 1995

Swain, Monte R.
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1987
MAcc, Brigham Young University, 1987
PhD, Michigan State University, 1991

Swensen, James R.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Assistant Professor

DEGREES: BA, Brigham Young University, 1998
MA, Brigham Young University, 2000
PhD, Arizona State University, 2009

Swenson, Eric Lewis
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1987
PhD, Brigham Young University, 1993

Swenson, Michael J.
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MBA, University of Utah, 1981
PhD, University of Oregon, 1989

Swenson, Sharon L.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Theatre and Media Arts
RANK: Assistant Professor
DEGREES: BA, University of Utah, 1968
MA, University of Utah, 1974
PhD, University of Utah, 1993

Swift, Charles
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1983
MA, Brigham Young University, 1987
PhD, Brigham Young University, 2003

Talbot, John
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, University of Utah, 1990
MA, Boston University, 1993
PhD, Boston University, 2001

Taniguchi, Stacy Tooru
COLLEGE: Marriott School of Management
DEPARTMENT: Recreation Management
RANK: Associate Professor
DEGREES: BA, University of Alaska, Anchorage, 1975
MS, University of Utah, 1981
PhD, Brigham Young University, 2004

Tanner, Amy
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics Education
RANK: Assistant Teaching Professor
DEGREES: BA, Brigham Young University, 2002
MA, Brigham Young University, 2005
PhD, University of Michigan, 2010

Tanner, John S.
COLLEGE: Humanities
DEPARTMENT: English
RANK: Professor
DEGREES: BA, Brigham Young University, 1974
PhD, University of California, Berkeley, 1980

Tanner, Mark W.
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Assistant Professor
DEGREES: BA, University of Utah, 1982
MA, University of Southern California, 1985
PhD, University of Pennsylvania, 1991

Tass, Shannon Neeley

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Statistics
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2001
MS, Brigham Young University, 2003
MA, Rice University, 2008
PhD, Rice University, 2008

Tayler, William B.

COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 2002
MAcc, Brigham Young University, 2002
MS, Cornell University, 2006
PhD, Cornell University, 2007

Taylor, Sunny Belliston

COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Assistant Professor
DEGREES: BFA, Brigham Young University, 2005
MFA, Ohio State University, 2007

Teng, Chia-Chi

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Associate Professor
DEGREES: BS, National Tsing Hua University, 1985
MS, University of Washington, 1993
PhD, University of Washington, 2007

Terry, Richard Ellis

COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Professor
DEGREES: BS, Brigham Young University, 1972
MS, Purdue University, 1974
PhD, Purdue University, 1976

Terry, Ronald E.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Professor
DEGREES: BS, Oregon State University, 1971
PhD, Brigham Young University, 1976

Teuscher, Dawn

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics Education
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1994
MS, University of Utah, 2000
PhD, University of Missouri, 2008

Thackeray, Rosemary

COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Professor
DEGREES: BS, Utah State University, 1991
MPH, University of Utah, 1996
PhD, University of Utah, 2000

Thompson, Chantal P

COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Teaching Professor
DEGREES: BA, Brigham Young University, 1970
MA, Brigham Young University, 1972

Thompson, Gregory Lynn

COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese

RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1999
MA, Brigham Young University, 2001
PhD, University of Arizona, 2006

Thompson, Jeffery A.
COLLEGE: Marriott School of Management
DEPARTMENT: Romney Institute of Public Management
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MBA, Brigham Young University, 1995
PhD, University of Minnesota, 1999

Thompson, Michael P.
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1974
MA, Rensselaer Polytechnic Institute, 1978
PhD, Rensselaer Polytechnic Institute, 1985

Thomsen, Steven Riley
COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Professor
DEGREES: BA, Brigham Young University, 1982
MA, Ball State University, 1984
PhD, University of Georgia, 1994

Thomson, David M.
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1999
MS, Brigham Young University, 2001
PhD, East Carolina University, 2005

Thomson, Scott L.
COLLEGE: Ira A. Fulton College of Engineering and Technology

DEGREES: BA, Brigham Young University, 1977
MA, Brigham Young University, 1981

PhD, University of California, Los Angeles, 1988

Unlandt, Nicolaas Gerard Wilhelmus
COLLEGE: Humanities
DEPARTMENT: French and Italian
RANK: Associate Professor
DEGREES: BA, University of Amsterdam, 1983
MA, University of Amsterdam, 1985
PhD, University of Amsterdam, 1993

Valentine, Julie
COLLEGE: Nursing
RANK: Assistant Teaching Professor
DEGREES: BSN, University of Arizona, 1984
MS, University of Utah, 2009

Van Huele, Jean-François S.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BS, Brussels Free University, Belgium, 1979
PhD, Brussels Free University, Belgium, 1987

Vance, Anthony O.
COLLEGE: Marriott School of Management
DEPARTMENT: Information Systems
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2003
MISM, Brigham Young University, 2004
PhD, Georgia State University, 2008
PhD, Université Paris, Dauphine, 2008

Vanfleet, Richard R.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Professor
DEGREES: BS, Brigham Young University, 1992
MS, University of Illinois, 1994
PhD, University of Illinois, 1997

Vehrs, Pat Roy
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Associate Professor
DEGREES: BS, Northern Illinois University, 1984
MS, Northern Illinois University, 1986
PhD, Brigham Young University, 1991

Ventura, Dan Aaron
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1992
MS, Brigham Young University, 1995
PhD, Brigham Young University, 1998

Villamizar, Vianey
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Associate Professor
DEGREES: BS, Universidad Central de Venezuela, 1977
MS, Universidad Central de Venezuela, 1983
PhD, Rensselaer Polytechnic Institute, 1987

Vincent, Lawrence Paul
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Professor
DEGREES: BA, Brigham Young University, 1973
MM, Northern Arizona University, 1978
DMA, University of Michigan, Ann Arbor, 1981

Vorkink, Keith P.
COLLEGE: Marriott School of Management

DEPARTMENT: Finance
RANK: Professor
DEGREES: BA, Brigham Young University, 1994
MS, University of Rochester, 1996
PhD, University of Rochester, 1999

Wadsworth, Lori L.
COLLEGE: Marriott School of Management
DEPARTMENT: Romney Institute of Public Management
RANK: Associate Professor
DEGREES: AS, West Valley College, 1980
BS, Brigham Young University, 1982
MPA, Brigham Young University, 1995
PhD, University of Utah, 2003

Wakamatsu, Kori
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2002
MA, California State University, Long Beach, 2007

Wakefield, B. Lee
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance
RANK: Professor
DEGREES: BA, Brigham Young University, 1977
MA, Brigham Young University, 1982

Wakefield, Robert I.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1980
MA, Brigham Young University, 1990
PhD, University of Maryland, 1997

Walker, Laura Padilla
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Associate Professor
DEGREES: BS, Central Michigan University, 1999
MA, University of Nebraska, Lincoln, 2001
PhD, University of Nebraska, Lincoln, 2005

Walker, Steven C.
COLLEGE: Humanities
DEPARTMENT: English
RANK: Professor
DEGREES: BS, Brigham Young University, 1965
MA, Brigham Young University, 1966
PhD, Harvard University, 1973

Wallin, Cynthia
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1989
MBA, Brigham Young University, 1994
PhD, Arizona State University, 2006

Walters, Lawrence C.
COLLEGE: Marriott School of Management
DEPARTMENT: Romney Institute of Public Management
RANK: Professor
DEGREES: BA, Brigham Young University, 1981
PhD, University of Pennsylvania, 1987

Walz, J Robert
COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Associate Teaching Professor
DEGREES: BA, Brigham Young University, 1982

Wang, Shu Pei

COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Associate Teaching Professor
DEGREES: BA, National Tsing Hua University, 1992
MA, Brigham Young University, 2002
PhD, Brigham Young University, 2007

Ward, Carol J.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Sociology
RANK: Associate Professor
DEGREES: BA, North Texas State University, 1973
MA, North Texas State University, 1976
PhD, University of Chicago, 1992

Ward, Evan

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1995
MA, University of Georgia, 1997
PhD, University of Georgia, 2000

Ward, Peter Joseph

COLLEGE: Marriott School of Management
DEPARTMENT: Recreation Management
RANK: Associate Professor
DEGREES: BA, University of Utah, 1997
MBA, University of Utah, 2003
PhD, University of Utah, 2007

Ware, Michael J.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Physics and Astronomy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1999
PhD, Brigham Young University, 2001

Warnick, J Paul

COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1983
MA, Brigham Young University, 1989
PhD, Ohio State University, 1996

Warnick, Karl F.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1994
PhD, Brigham Young University, 1997

Warnick, Sean C.

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Associate Professor
DEGREES: BS, Arizona State University, 1993
MS, Massachusetts Institute of Technology, 1995
PhD, Massachusetts Institute of Technology, 2003

Warren, Jared S.

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1996
MA, University of Kansas, 1999
PhD, University of Kansas, 2003

Watabe, Masakazu

COLLEGE: Humanities
DEPARTMENT: Asian and Near Eastern Languages
RANK: Professor

DEGREES: BA, Brigham Young University, 1972
MA, Brigham Young University, 1973
PhD, University of Southern California, 1978

Watt, Richard K.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1993
PhD, University of Wisconsin-Madison, 1998

Wayment, Thomas Arvel
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Professor
DEGREES: BA, University of California, Riverside, 1994
MA, Claremont Graduate School, 1998
PhD, Claremont Graduate School, 2000

Weatherford, Douglas J.
COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1988
PhD, Pennsylvania State University, 1997

Webb, Brent W.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Mechanical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
MS, Brigham Young University, 1982
PhD, Purdue University, 1986

Webb, Bruce Lee
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Senior Scientist
DEGREES: BS, Brigham Young University, 1972
MS, Brigham Young University, 1978

Webb, Scott
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Assistant Teaching Professor
DEGREES: BA, College of Idaho, 1994
MS, Air Force Institute of Technology, 1999
PhD, Michigan State University, 2011

Weidman, Justin E.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Assistant Professor
DEGREES: MS, Brigham Young University, 2010
PhD, Virginia Tech, 2012

Wells, Aaron
COLLEGE: Life Sciences
DEPARTMENT: Exercise Sciences
RANK: Assistant Teaching Professor
DEGREES: BS, Brigham Young University, 1999
MEd, University of Nebraska, 2002
PhD, Brigham Young University, 2010

Wentworth, Nancy
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Professor
DEGREES: BA, University of Utah, 1971
MA, University of Utah, 1972
PhD, University of Utah, 1993

West, Colleen N.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Dance

RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1982
MA, Brigham Young University, 1985

West, Joshua H.
COLLEGE: Life Sciences
DEPARTMENT: Health Science
RANK: Assistant Professor
DEGREES: BA, Utah State University, 2005
MPH, San Diego State University, 2005
PhD, University of California, San Diego/San Diego State University, 2008

West, Richard E.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Instructional Psychology and Technology
RANK: Assistant Professor
DEGREES: AA, Ricks College, 1998
BA, Utah State University, 2002
MS, Brigham Young University, 2005
PhD, University of Georgia, 2009

Westover, Paul A.
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1998
MA, Brigham Young University, 2002
PhD, Indiana University, 2008

Wheeler, Dean Richard
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Associate Professor
DEGREES: PhD, University of California, Berkeley, 2002

Wheeler, Nicholas C.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Assistant Professor
DEGREES: BA, Utah State University, 2001
MA, University of Virginia, 2006
PhD, University of Virginia, 2009

Whetten, David A.
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Professor
DEGREES: BS, Brigham Young University, 1970
MS, Brigham Young University, 1971
PhD, Cornell University, 1974

Whipple, Clint
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2000
PhD, University of California, San Diego, 2006

Whitchurch, David M.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BS, Utah State University, 1977
MEd, Brigham Young University, 1982
PhD, Brigham Young University, 1991

Whiting, Erin
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1997
MS, Brigham Young University, 1999
PhD, University of Missouri, Columbia, 2006

Whiting, Michael F.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Professor
DEGREES: BS, Brigham Young University, 1990
PhD, Cornell University, 1994

Whitlark, David B.
COLLEGE: Marriott School of Management
DEPARTMENT: Business Management
RANK: Professor
DEGREES: BA, University of Utah, 1978
MBA, Cornell University, 1985
PhD, University of Virginia, 1989

Wickman, Matthew Farr
COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1992
MA, New York University, 1994
PhD, University of California, Los Angeles, 2000

Widmer, Mark Alan
COLLEGE: Marriott School of Management
DEPARTMENT: Recreation Management
RANK: Professor
DEGREES: BA, Brigham Young University, 1988
MA, Brigham Young University, 1990
PhD, University of Utah, 1993

Wilcox, Bradley Ray
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1985
MEd, Brigham Young University, 1990
PhD, University of Wyoming, 1994

Wilcox, Edward R.
COLLEGE: Life Sciences
DEPARTMENT: Biology
RANK: Research Associate Professor
DEGREES: BA, University of California, Davis, 1977
PhD, University of California, Davis, 1982

Wilcox, Miranda
COLLEGE: Humanities
DEPARTMENT: English
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1999
MMS, University of Notre Dame, 2002
PhD, University of Notre Dame, 2006

Wilde, Doran Kenneth
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1978
MS, Oregon State University, 1994
PhD, Oregon State University, 1995

Wilding, Wade Vincent
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
PhD, Rice University, 1985

Wiley, David
COLLEGE: David O. McKay School of Education
DEPARTMENT: Instructional Psychology and Technology
RANK: Associate Professor
DEGREES: BFA, Marshall University, 1997

PhD, Brigham Young University, 2000

Wilkins, Alan

COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Professor
DEGREES: BA, Brigham Young University, 1972
MBA, Brigham Young University, 1974
PhD, Stanford University, 1979

Wilkinson, Carol

COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Associate Professor
DEGREES: BEd, Durham University, England, 1976
MS, Brigham Young University, 1981
EdD, Brigham Young University, 1983

Wilks, Jeff

COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Professor
DEGREES: BS, Brigham Young University, 1995
MS, Cornell University, 1999
PhD, Cornell University, 2000

Willardson, Barry Matthew

COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BA, Brigham Young University, 1984
PhD, Purdue University, 1990

Williams, D. Pauline

COLLEGE: Life Sciences
DEPARTMENT: Nutrition, Dietetics, and Food Science
RANK: Assistant Teaching Professor
DEGREES: BS, Brigham Young University, 1992
MPA, Brigham Young University, 1998
PhD, Utah State University, 2011

Williams, David Dwayne

COLLEGE: David O. McKay School of Education
DEPARTMENT: Instructional Psychology and Technology
RANK: Professor
DEGREES: BA, Brigham Young University, 1976
MA, Western Michigan University, 1978
PhD, University of Colorado, Boulder, 1981

Williams, Frederick Granger

COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Professor
DEGREES: BA, Brigham Young University, 1965
MA, University of Wisconsin, Madison, 1967
PhD, University of Wisconsin, Madison, 1971

Williams, Geoffrey Lynn

COLLEGE: Humanities
DEPARTMENT: Spanish and Portuguese
RANK: Professor
DEGREES: BA, University of London, 1973
BA, University of London, 1975
PhD, University of London, 1978

Williams, Gustavious Paul

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1987
PhD, Northwestern University, 1994

Williams, Marleen Sue

COLLEGE: Student Life

DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: BS, Brigham Young University, 1987
PhD, Brigham Young University, 1993

Williams, Mary
COLLEGE: Nursing
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1971
MS, University of Utah, 1980
PhD, University of Arizona, 1991

Williams, Richard Nephi
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Professor
DEGREES: BS, Brigham Young University, 1974
MS, Purdue University, 1978
PhD, Purdue University, 1981

Williams, Steven R
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics Education
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MS, Brigham Young University, 1983
PhD, University of Wisconsin, Madison, 1989

Willoughby, Brian
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2004
MS, University of Minnesota, 2006
PhD, University of Minnesota, 2009

Willson, Heather
COLLEGE: Humanities
DEPARTMENT: Linguistics and English Language
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 1996
MA, Arizona State University, 2002
PhD, University of California, Los Angeles, 2008

Wilson, Eric
COLLEGE: Life Sciences
DEPARTMENT: Microbiology and Molecular Biology
RANK: Associate Professor
DEGREES: BS, Utah State University, 1990
MS, Utah State University, 1994
PhD, Montana State University, 2000

Wilson, Keith J.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Associate Professor
DEGREES: BA, Brigham Young University, 1976
MA, Brigham Young University, 1981
PhD, University of Utah, 1995

Wilson, Laurie J.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Communications
RANK: Professor
DEGREES: BA, Brigham Young University, 1979
MA, Brigham Young University, 1982
PhD, American University, 1988

Wilson, Sven Eric
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Political Science
RANK: Professor
DEGREES: BA, Brigham Young University, 1989
MA, University of Chicago, 1992

PhD, University of Chicago, 1997

Wimmer, Jennifer J.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Teacher Education
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1995
MA, Brigham Young University, 2004
PhD, University of Nevada, Las Vegas, 2010

Wing, Debra
COLLEGE: Nursing
RANK: Assistant Teaching Professor
DEGREES: AS, Stevens Henagar College, 1981
ASN, Weber State University, 1994
BSN, Weber State University, 1996
MSNED, Westminster College, 2010

Winters, Blaine
COLLEGE: Nursing
RANK: Assistant Teaching Professor
DEGREES: BS, Brigham Young University, 1992
ADN, Salt Lake Community College, 1995
BS, University of Utah, 1999
MS, University of Utah, 2001
DNP, University of Utah, 2008

Wirthlin, Michael Joseph
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Electrical and Computer Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1992
PhD, Brigham Young University, 1997

Wisco, Jonathan Jayme
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Associate Professor
DEGREES: BS, University of Washington, 1994
PhD, Boston University School of Medicine, 2003

Witesman, Eva
COLLEGE: Marriott School of Management
DEPARTMENT: Romney Institute of Public Management
RANK: Assistant Professor
DEGREES: BUS, University of Utah, 2000
MPA, Indiana University, Bloomington, 2004
PhD, Indiana University, Bloomington, 2008

Wood, David
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Assistant Professor
DEGREES: BA, Brigham Young University, 2005
MA, Brigham Young University, 2005
PhD, Indiana University, 2009

Wood, Steven Glen
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Teaching Professor
DEGREES: BS, Brigham Young University, 1973
MS, Brigham Young University, 1975
PhD, Brigham Young University, 1983

Woodbury, Dixon John
COLLEGE: Life Sciences
DEPARTMENT: Physiology and Developmental Biology
RANK: Professor
DEGREES: BA, University of Utah, 1980
PhD, University of California, Irvine, 1986

Woodfield, Brian F.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry

RANK: Professor
DEGREES: BS, Brigham Young University, 1986
MS, Brigham Young University, 1988
PhD, University of California, Berkeley, 1995

Woodfield, Scott N.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Computer Science
RANK: Professor
DEGREES: BS, Brigham Young University, 1975
MS, Brigham Young University, 1978
PhD, Purdue University, Lafayette, 1980

Woodger, Mary Jane
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MEd, Utah State University, 1992
EdD, Brigham Young University, 1997

Woods, Alexander G.
COLLEGE: Fine Arts and Communications
DEPARTMENT: School of Music
RANK: Assistant Professor
DEGREES: BA, University of Arizona, 2005
MM, Yale University, 2008

Woods, Fred E.
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
MA, Brigham Young University, 1985
PhD, University of Utah, 1991

Woodward, Ryan J.
COLLEGE: Fine Arts and Communications
DEPARTMENT: Visual Arts
RANK: Associate Professor
DEGREES: AA, Ricks College, 1995
BFA, Brigham Young University, 2003
MFA, The Academy of Art University, 2006

Woodworth, Warner P.
COLLEGE: Marriott School of Management
DEPARTMENT: Organizational Leadership and Strategy
RANK: Professor
DEGREES: BS, Brigham Young University, 1967
MS, Brigham Young University, 1969
MA, University of Michigan, Ann Arbor, 1970
PhD, University of Michigan, Ann Arbor, 1974

Woolley, Adam T.
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Chemistry and Biochemistry
RANK: Professor
DEGREES: BS, Brigham Young University, 1992
PhD, University of California, Berkeley, 1997

Woolstenhulme, Loreen Allphin
COLLEGE: Life Sciences
DEPARTMENT: Plant and Wildlife Sciences
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1991
MS, Brigham Young University, 1992
PhD, University of Utah, 1996

Worsham, Ronald Gene
COLLEGE: Marriott School of Management
DEPARTMENT: School of Accountancy
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1985
MAcc, Brigham Young University, 1985

PhD, University of Florida, 1994

Worthen, Vaughn Eugene
COLLEGE: Student Life
DEPARTMENT: Counseling and Career Center
RANK: Clinical Professor
DEGREES: AS, Ricks College, 1980
BS, Brigham Young University, 1983
MEd, Brigham Young University, 1985
PhD, University of Kansas, 1993

Wright, Colbrin
COLLEGE: Marriott School of Management
DEPARTMENT: Finance
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2001
PhD, Florida State University, 2007

Wright, David Grant
COLLEGE: Physical and Mathematical Sciences
DEPARTMENT: Mathematics
RANK: Professor
DEGREES: BS, Brigham Young University, 1970
MA, University of Wisconsin, Madison, 1972
PhD, University of Wisconsin, Madison, 1973

Wright, Dennis Albert
COLLEGE: Religious Education
DEPARTMENT: Church History and Doctrine
RANK: Professor
DEGREES: BS, University of Idaho, 1968
MS, Brigham Young University, 1973
PhD, Arizona State University, 1978

Wright, Geoffrey A.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: School of Technology
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2001
MA, Chapman University, 2003
PhD, Brigham Young University, 2008

Wright, Mark A.
COLLEGE: Religious Education
DEPARTMENT: Ancient Scripture
RANK: Assistant Professor
DEGREES: BA, University of California, Los Angeles, 2003
MA, University of California, Riverside, 2004
PhD, University of California, Riverside, 2008

Yamawaki, Niwako
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: Psychology
RANK: Associate Professor
DEGREES: BS, University of Utah, 1995
MS, University of Utah, 1998
PhD, University of Utah, 2002

Yanchar, Stephen C.
COLLEGE: David O. McKay School of Education
DEPARTMENT: Instructional Psychology and Technology
RANK: Associate Professor
DEGREES: BS, Cleveland State University, 1991
MS, Brigham Young University, 1995
PhD, Brigham Young University, 1997

Yorgason, Jeremy B.
COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: School of Family Life
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1997
MS, Kansas State University, 2000
PhD, Virginia Polytechnic Institute and State University, 2003

York, Neil Longley

COLLEGE: Family, Home, and Social Sciences
DEPARTMENT: History
RANK: Professor
DEGREES: BA, Brigham Young University, 1973
MA, Brigham Young University, 1975
PhD, University of California, Santa Barbara, 1978

Young, Bruce Wilson

COLLEGE: Humanities
DEPARTMENT: English
RANK: Associate Professor

Course Numbering System

A course's level of instruction is shown by the number assigned to it:

Course Number	Type of Course
1 to 99	Preparatory and remedial (noncredit)
100 to 299	Lower-division
300 to 499	Upper-division
500 to 599	Advanced undergraduate or graduate
600 to 799	Graduate

Credit-Hour Designations

One semester hour of credit represents a minimum of one hour of instruction per week in a semester or two hours of instruction per week in a term (e.g., a three-hour class will meet at least three hours per week). The three-number code that appears in parentheses immediately after each course title has the following significance:

First number	Semester hours of credit
Second number	Class hours of lecture, recitation, or seminar meeting per week
Third number	Laboratory hours required per week or hours of field study or individual research per week, beyond the hours shown in the second number

Abbreviations and Symbols

Course Listings

The following abbreviations and symbols are used in the course listings:

A,B	Indicate parts of a course to be taken in separate enrollments.
Arr.	Credit, class, or laboratory hours arranged
ea.	Credit-hour designation applies to each registration
M	Majors-only course
R	Designates a course that may be repeated for credit. Two R courses with the same number on a transcript are treated as two independent courses. An R course cannot be repeated to raise the grade received; all grades will be counted because it is assumed that the subject matter varies from time to time.

When Courses Are Offered

The following words or phrases are used on some courses to indicate when the course will be taught:

Fall	Fall semester
Winter	Winter semester
Spring-Summer	Includes spring term, summer term, and semester-length offerings
Even Fall, Even Winter, etc.	Course taught on even-numbered years in semester/term indicated
Odd Fall, Odd Winter, etc.	Course taught on odd-numbered years in semester/term indicated
First term	Course taught on the term(first half of semester) as indicated
Second term	Course taught on the term (second half of semester) as indicated
On demand	Course may be taught if enough students are interested and an instructor is available

Academic Standards

Academic Support Office, 2500 WSC, (801) 422-2723

A student's academic standing at BYU is determined according to the grades that the student earns **only at BYU. Academic standing is based on a minimum of 6 credit hours as a day-continuing student. Students enrolled for fewer than 6 credit hours in a fall, winter, or spring-summer will have their credits combined with those of their next enrollment until at least 6 credits of graded hours have been accumulated, at which point the academic standing is calculated.** The following outline shows the conditions and expectations according to the student's academic standing. For further information, students are encouraged to check their current academic standing by selecting Student Academic Record, then selecting Current Academic Standing in AIM.

ACADEMIC STANDING	UNDER THESE CONDITIONS	EXPECTATIONS
GOOD	When the most recent GPA* and BYU cumulative GPA are 2.0 or above and the student has NOT been on academic probation.	The student continues to maintain a 2.0 or higher fall, winter, or spring-summer and BYU cumulative GPA.
PREVIOUS	The same as good academic standing but indicates a student has previously been on academic probation, CAP, suspension, or dismissal.	The student continues to maintain a 2.0 or higher fall, winter, or spring-summer and BYU cumulative GPA. However, the student goes directly to academic probation if the student has a GPA* below 2.0.
WARNING Includes a registration block.	When the most recent GPA* is below 2.0 and the student was in good academic standing OR When the most recent GPA* is 2.0 or higher but the BYU cumulative GPA is below 2.0 and the student was on academic warning.	The student is blocked from registrations beyond the subsequent fall, winter, or spring-summer until the student **EITHER** submits a completed Academic Improvement Plan to the Academic Support Office by the appropriate deadline **OR** the student earns at least a 2.0 GPA for the subsequent enrollment (in 6 credits or more) and has at least a 2.0 BYU cumulative GPA. Students with less than a 2.0 BYU cumulative GPA must submit an Academic Improvement Plan during each fall, winter, or spring-summer in which they are enrolled.
PROBATION Includes a registration block.	When the most recent GPA* is below 2.0 and the student was on academic warning OR When the most recent GPA* is below 2.0 and the student was on "previous" academic standing OR When the most recent GPA* is 2.0 or higher but the BYU cumulative GPA is below 2.0 and the student was on academic probation.	The student is blocked from registrations beyond the subsequent fall, winter, or spring-summer until the student **EITHER** submits a completed Academic Improvement Plan to the Academic Support Office by the appropriate deadline **OR** the student earns at least a 2.0 GPA for the subsequent enrollment (in 6 credits or more) and has at least a 2.0 BYU cumulative GPA. Students with less than a 2.0 BYU cumulative GPA must submit an Academic Improvement Plan during each fall, winter, or spring-summer in which they are enrolled. Students on probation who earn less than a 2.0 GPA for a fall, winter, or spring-summer are academically suspended or dismissed if they have previously earned a suspension status.
CONTINUED ACADEMIC PROBATION (CAP) Includes a registration block.	When a student is returning to BYU from academic suspension or dismissal OR When the most recent GPA* is 2.0 or higher but the BYU cumulative GPA is below 2.0 and the student was on CAP.	The student is blocked from registration until the student: 1. Completes an Academic Success Work Book, an Academic Improvement Plan (AIP), and a Graduation Plan. 2. Has the AIP signed by either the supervisor of the student's college advisement center or an assigned faculty member in the student's major. 3. Has the graduation plan signed by the supervisor of the student's college advisement center and by an assigned faculty member in the student's major. 4. Submits the completed forms to an advisor from the Academic Support Office and completes an Academic Contract with the advisor. Students remain on CAP until both their cumulative BYU GPA and fall, winter, or spring-summer GPA are 2.0 or higher in 6 credits or more. Students on CAP who earn less than a 2.0 GPA for a fall, winter, or spring-summer are academically suspended or dismissed. Students on CAP taking more than one enrollment to raise their cumulative BYU GPA to 2.0 or above

		will need to complete an AIP for each enrollment on CAP and visit with an Academic Support advisor.
SUSPENSION	When the most recent semester/term GPA is below 2.0 and the student was on academic probation or CAP OR When a student fails to comply with the conditions prescribed by the Academic Standards Committee.	1. The student is expected to drop his or her enrollments in day, evening, or extension classes (except Independent Study). 2. The student may not enroll in BYU day, evening, or extension classes (except Independent Study) for a minimum of 12 months. During this time the student is expected to resolve all problems leading to the student's academic suspension. After 12 or more months, the student is eligible to return. If the student completes any college-level work while on suspension, the student must receive an overall GPA of 3.2 or higher in that course work to be allowed readmission. The student should contact the Admissions Office, D-155 ASB, (801) 422-2507, for details and pertinent information about deadlines and expectations for readmission. Students who have been academically suspended must submit applications for readmission by published admission deadlines, which may be before the 12 months have passed. A student with extenuating circumstances—who has appropriate support and justification—may appeal the 12-month period out of BYU through the Academic Standards Committee. If students are planning to petition their time away from the university, they should not drop their classes and should continue to attend their classes until after the petition has been reviewed. If the petition is denied, the university will drop their classes for them. The student should contact the Academic Support Office, 2500 WSC, (801) 422-2723, for assistance. No other appeals will be considered.
DISMISSAL	When a student is academically suspended a second time. OR When a student fails to comply with the conditions prescribed by the Academic Standards Committee.	An academically dismissed student may not enroll in day, evening, or extension classes (except Independent Study). After three years a student is eligible to enroll in evening or extension classes. A student may seek an exception to be readmitted as a degree-seeking student after two or more years by petitioning the Academic Standards Committee. In addition to petitioning, dismissed students must apply for readmission by the published admission deadlines. Students on dismissal will be required to complete certain criteria in order to be considered for readmission to BYU such as the number of credit hours to take while on dismissal. For specific information, please contact the Academic Support Office.

Note: College advisement centers (CACs) may also set registration blocks on students not progressing toward timely graduation. In such cases, students must also meet with their CAC to have this block removed.

***** Fall, Winter, or Spring-Summer

Advisement Resources

- Undergraduate Majors
- Undergraduate Minors
- Limited Enrollment Programs

Advisement Resources

BYU undergraduates should develop competence in at least one area of concentration. Competence generally demands study in depth. Such in-depth study helps prepare students for their life's work; it also teaches them that genuine understanding for any subject requires exploring it fully. Students normally acquire such depth from their major and minor fields. (The Aims of a BYU Education)

In addition to completing the university core, each student must choose a specialized area of study—a major. Requirements vary considerably from major to major, but all majors share in common a sequential development from introductory foundation courses to those that expect increasingly greater depth and sophistication. As the aims indicate, "By the time they graduate, students should grasp their discipline's essential knowledge and skills . . . , and many should have participated in scholarly or creative activities that let them demonstrate their mastery." Within this sequential development, prerequisites—whether within or outside the major department—help prepare students for subsequent, more focused work in the major. Some majors also require allied course work in related fields outside the major proper.

Aptitudes, Interests, and Objectives

Success in a major depends upon the right combination of interests, skills, effort, and aptitudes. Students who choose a major only because of its job possibilities and fail to consider their own interests and aptitudes will probably be disappointed. Some majors, particularly those in professional programs (e.g., accounting) lead directly to employment in a particular field; others (e.g., philosophy) provide a rich liberal arts preparation for subsequent graduate study or professional programs (e.g., law) but may not track as directly into employment in the field of the major. Liberal arts majors do open up a great variety of employment opportunities, but students majoring in such fields need to be more conscious of exploring such opportunities over the course of the major.

Flexibility and Adaptability

The only things that can be counted on in the future are change and a continued knowledge explosion. Some futurists have estimated that today's high school graduates will be in five to seven different careers during their lifetime. Flexibility and adaptability, learning how to learn, and learning to think carefully and critically are the aims of a strong liberal arts education.

For some careers a degree in a particular major is not required. Employers respond favorably to applicants who have developed analytical skills, who have the ability to reason abstractly, and who have learned to communicate precisely and effectively.

Choosing a Major

Although some students may change their major several times before arriving at a "good fit," bouncing from major to major can prove to be costly in both time and money. Careful and thoughtful consideration before choosing a major will reduce the time to graduation and help make the most of the time at BYU. Major requirements and course descriptions can be found by using the QuickSearch feature at the top of this page or by using the list of majors. Students may find some combination of the following action steps useful in selecting a major:

1. **Review catalog information pertaining to undergraduate majors.** A list of majors can be found in this section of the catalog or check each department.
2. **Meet as often as needed with an open major advisor in the University Advisement Center (UAC).** Open major advisors are available to help students choose a major or career path. Contact them at 2500 WSC, (801) 422-3826, or e-mail to university_advisement@byu.edu. You can also access their Web page at http://universityadvisement.byu.edu/.
3. **Choose university core requirements carefully.** Once a major is chosen, the college advisement center for your major can help in the selection of classes that both satisfy university core requirements and expose students to the core subject matter of a major or career: http://ge.byu.edu/ge/universitycore-20135.php.
4. **Enroll in a career exploration course or career workshop.** Student Development (StDev) 117, Career Exploration, is a 2-credit course designed to help students choose a major and a career path. In addition, workshops on this subject are available in the Career and Academic Success Center (2590 WSC). These workshops last for one hour and are free of charge. Juniors and seniors may want to take StDev 317, Career Strategies, a 2-credit hour course designed to help upper-division students focus on career placement and take final steps into the workforce.
5. **Visit the Career and Academic Success Center (CASC).** The Career and Academic Success Center (2590 WSC) has hundreds of printed and electronic resources designed to help students educate themselves about majors and career options so that they can make informed decisions. Discover, a Web-based self-assessment and career exploration program, is available in the Career Center. This tool, along with several others, are also available on the Web at http://casc.byu.edu/.
6. **Complete a career interest inventory.** The Career and Academic Success Center (CASC) (2590 WSC) administers career interest inventories that help students match their interests with a major or career. There is a small fee for these tests which covers the cost of the test.
7. **Learn, firsthand, about potential careers.** Part-time work, summer employment, internships, and volunteer work provide

useful opportunities for students to collect information about what a specific career entails and to make contacts that will help them further their career goals. In addition, students might ask relatives or friends doing the kind of work they are interested in if they can be their "shadow" for a day, or perhaps longer. Alternatively, students might interview individuals in these positions, asking them about their work, the associated academic prerequisites, and so forth.

8. **Take introductory or seminar courses for majors/careers being considered.** BYU offers seminar courses for pre-medicine, pre-dentistry, pre-optometry, pre-law, and many of the engineering majors. There are other introductory courses such as Orientation to the Psychology Major (Psych 101), Historian's Craft (Hist 200), that may be helpful. Information on these courses is available through college advisement centers.

9. **Pursue multiple options.** When trying to choose between two majors, take courses that will fill major and minor requirements for both. When deciding which of the two will be the major, the other choice can possibly become a minor.

10. **Seek advice from the faculty.** Faculty members who teach and mentor in a particular major understand the purposes of the major program, its array of courses, and the opportunities available to those who complete it. Students should identify an appropriate member of the faculty and ask for assistance, which will often require an appointment.

11. **Make a firm commitment.** Pursuing a major with a firm commitment to go beyond its requirements will bring satisfaction and ensure future opportunities. Tentative or half-hearted completion of minimum requirements of any major will lead only to discouragement and detachment. Students are encouraged to choose carefully, trust their choice, and diligently pursue their studies in the major.

12. **Learn about deadlines, prerequisites, and application requirements for limited-enrollment programs.** Some majors have limited enrollment and only accept students by application. limited-enrollment programs are identified with an asterisk (*) in the list of majors referred to in step 1. Students should become familiar with the prerequisite courses required for limited-enrollment majors several semesters before they plan to apply. When applying to limited-enrollment programs, students should have a backup plan in case they are not accepted. Advisors in the University Advisement Center (2500 WSC) can help develop alternative academic plans for reaching a given career objective.

Choosing a Minor

A minor offers students the opportunity to increase their breadth of expertise by exploring an area of study in depth but not to the same degree as in a major. Some majors require students to complete a minor from a specified set of options, but for most students a minor is optional. Students who elect to complete a minor often choose fields related to the major. Others may choose a minor in an area in which they have expertise or interest. In most cases, the minor would be chosen from a different department than the major.

Courses used to satisfy the requirements of a student's major may also be used to satisfy the requirements of a minor, unless the minor's requirements place restrictions on the double counting of courses. A list of minors can be found at: http://saas.byu.edu/catalog/2013-2014ucatPDF/Advisement/MinorList.php.

Academic Advisement

The university provides a number of resources to assist students with careful and thoughtful academic and career planning while at BYU. It is expected that students will partner with the university by taking full advantage of these available resources and opportunities to enhance their chances of a successful academic experience.

The university is committed to providing students with access to academic advisors who will:

- Stay abreast of major and university requirements, and the corresponding academic resources
- Assist students by making appropriate recommendations for registration
- Help students in their pursuit of an appropriate major and career
- Aid students in planning an education program consistent with their academic progress
- Offer friendly, attentive, informative service, listening to the student's situation before offering a solution

Students will be successful as they:

- Prepare for and keep appointments with their college advisement center (CAC) advisor; preferably at least once a calendar year
- Establish and follow an academic plan for graduation
- Use university resources such as MyMAP, Major Academic Plans (MAPs), Academic Information Management (AIM), and the progress report
- Become familiar with their basic academic program and requirements
- Review personal academic progress each semester

The key components to advisement are:

- MyMAP (available on MyBYU through the BYU homepage; your net ID and PIN are necessary for access)
- Major MAPs (available on the web at: http://registrar.byu.edu/advisement/map.php and at college and university advisement centers)

AIM

The Academic Information Management (AIM) system provides students with easy access to information on their academic progress and other vital information. In AIM, students can change their addresses and phone numbers, access their class schedules, determine course availabilities and instructor schedules, monitor their progress reports, look at their grades and BYU credit, make PIN changes, check on transfer and AP credit, and conduct personal registration procedures.

MyMAP

BYU offers students a helpful academic planning system (MyMAP) that enables them to plan their academic progress towards graduation. MyMAP is an online tool students may use to plan specific courses to fill University Core, major, minor, and elective requirements, and organize those courses into semesters/terms. In addition, students may register from these courses using the Register tab. Easy access to course descriptions can be found on any MyMAP tab by simply clicking on the course title. As a student fully utilizes MyMAP, they will find that they have important information at their fingertips. Students may access MyMAP under the school section of MyBYU. To learn more about MyMAP go to http://mymap.byu.edu.

Progress Reports

Progress Reports were created to provide students with accurate academic progress information. Students can access their progress report in the AIM system (through *MyMAP*). In the new MyMAP feature in AIM, students can actually use their progress report (on the *Plan* tab) as a tool to plan their academic course of study.

Major Academic Plan (MAP)

This supplement to the BYU Undergraduate Catalog is also a valuable academic resource for students as they plan and prepare their academic schedules. The MAP includes information regarding university core and major requirements, semester-by-semester recommendations for course selection, and course availability. Please see the following Web site for more information: http://registrar.byu.edu/advisement/map.php.

College Advisement Centers (CACs)

A CAC exists in each academic college. At these centers, students receive personal assistance in meeting their educational goals as quickly as possible. Students should contact their advisement centers at least once a calendar year.

University Advisement Center

2500 WSC
(801) 422-3826
E-mail: university_advisement@byu.edu
Web: http://universityadvisement.byu.edu/

The University Advisement Center provides academic advising and career counseling to students seeking information on how to choose majors or careers. **Services include:** general academic advisement, advisement on how to choose a major or career, graduate school advisement, career interest testing, and information and referral to appropriate university resources. The center serves as the college advisement center for open major students but all students are welcome to use its services and resources for assistance in making informed and appropriate decisions about majors or careers. Advisement to special populations, including Summer Visiting Students, international students, enriched environment students, and students in transition, is also provided.

Honors Advisement Center

102A MSRB
(801) 422-5497
E-mail: honors@byu.edu
Web: http://www.byu.edu/honors/

Honors education is open to all students who choose to participate. Students who intend to graduate with University Honors should consult with an advisor in the Honors Advisement Center (102A Maeser Building) for assistance with choosing honors courses and understanding honors graduation requirements.

Preprofessional Advisement Center

3328 WSC
(801) 422-3044
E-mail: health_professions@byu.edu or prelaw@byu.edu
Web: http://ppa.byu.edu/

The Preprofessional Advisement Center serves students preparing to apply to professional graduate programs, specifically law, health (medical, dental, etc.), and graduate management (MBA, MPA, etc.). For those students who are interested in such professional graduate programs, the center offers individual counseling, admissions advice, and student development courses to help students explore these fields and prepare for the study and practice of the student's chosen field. The center is open to students from any major.

Academic Support

2500 WSC
(801) 422-2723
E-mail: academic_support@byu.edu
Web: http://aso.byu.edu/

The Academic Support Office (ASO) provides academic advisement for students who are experiencing difficulty with their studies and are on academic warning, probation, or continued academic probation (CAP). ASO also offers these students help in working through challenges and overcoming obstacles to successful academic performance. Information about the university's academic standards, a student's academic standing, or help with learning problems is available for those students not currently on good or previous academic standing. (See also Academic Standards in this catalog.)

Additional Advisement Resources: Counseling and Career Center

The Counseling and Career Center offers advisement services to students who need help becoming a successful student, choosing a major or career, or considering options for graduate school. Services include the following: (1) general academic advisement, (2) academic standing advisement for students on academic warning, probation, or suspension, (3) advisement on study and learning skills, (4) advisement on choosing a major or a career, (5) graduate school advisement, and (6) workshops on career and learning skills.

Workshops

2590 WSC
(801) 422-2689
E-mail: workshops@byu.edu
Web: http://casc.byu.edu/

Fifty-minute workshops designed to assist students with personal development, study skills, and career decision making are offered each day that BYU classes are in session. Topics include time management, communication, graduate school exploration, choosing a major, testing preparation, listening, and note taking. Printed self-help materials used in the workshops are also available.

Courses for Credit

2510 WSC
(801) 422-4007
Web: http://casc.byu.edu/student-development-classes

Students in various areas of student development can receive credit for courses dealing with college study skills, life planning and decision making, career exploration, and job seeking listed under Student Development (StDev) in the class schedule. See also the Student Development section of this catalog for course numbers and descriptions.

Career Academic Success Center

2590 WSC
(801) 422-2689
E-mail: clic@byu.edu
Web: http://casc.byu.edu/

The Career and Academic Success Center (CASC) is a resource area designed to assist students with a variety of career and/or learning concerns. Printed and electronic resources, personnel, and workshops are available to help students make informed decisions about majors, careers, and graduate school options. In addition, the CASC offers workshops, materials, and assistance to students who desire to improve their learning skills so that they can be more successful academically.

Testing Services

2590 WSC
(801) 422-2689
E-mail: careertests@byu.edu
Web: http://casc.byu.edu/career-assessments

Printed and electronic inventories are available to assess career interests, abilities, and values so that students can more accurately determine suitable career options for themselves. After completing an inventory a student will meet with an advisor who will interpret the results and guide the student toward additional resources so that they can research careers. Although modest fees are charged for most tests, there are no-fee assessments available.

Career Services

2410 WSC
(801) 422-3000
Fax: (801) 422-3444
E-mail: byucareerservices@byu.edu
Web: http://ucs.byu.edu/

The University Career Services (UCS) assists BYU students and alumni from all colleges, departments, majors, and class standings with job and internship preparation and searches. Students who register at http://byu.experience.com gain access to such services as advisement on job and internship search strategies, on-campus interviews with recruiters, and information about specific job and internship opportunities submitted by employers from business, education, and government. A system (eRecruiting.com) is available that allows students to register, research employers search job postings, submit résumés to employers, schedule interviews, and check interview schedules.

Limited Enrollment Programs

Some university programs host only limited enrollments due to resource constraints. These programs are granted Limited Enrollment Program status, and generally require application for student admission to the program. The table below lists all Limited Enrollment Programs at the university, and summarizes the maximum number of student participants and their acceptance rates.

David O. McKay School of Education

	% of Applicants Admitted			Max # of Participants	Application Deadlines

The University Core: General and Religious Education

"The BYU Baccalaureate: The Ideal of Integration"

Many people, when they think of university education, think primarily of the major—a bachelor's degree in, for example, economics or art history or chemistry or engineering. But a baccalaureate is much more than a major and much more than job-based training in a particular field. Although your diploma states your major, something greater has been earned and conferred—a *university* baccalaureate.

There are three formal components to the baccalaureate at Brigham Young University: religious education, general education, and education in a major. Of these, the first two constitute the *university core.* In accordance with *The Aims of a BYU Education*—which invites each student and every member of the university community to wholeness—each of the three components complements the others. They are not partitioned off from one another; none claims preeminence; together they comprise a whole, a harmony.

The idea of the complementary nature of GE, religious education, and education in the major is emphasized in the new mosaics options for GE. The mosaics give students the opportunity of choosing a group of GE requirements built around a theme that complements a student's major course of study. See Mosaics for more information.

Skills and depth are developed over time as the student progresses in both the core and the major; breadth, unfolding partly from historical perspective, ought to characterize the major as well as the core. The relationship between core and major will vary in any given year according to the competing demands upon the student's attention. However, students should strive to develop their programs in such a way that a lively interrelationship between the university core and the major, in which each nourishes and informs the other, is pursued over their entire undergraduate experience.

The major and the core blend into each other. It is here that open electives play their particular role. Without prolonging time at the university, each student enjoys the latitude—and, for some, ample latitude—to design an individual educational experience. Electives enrich; choices that students make about electives define what is unique about their education. Having found a core science course engaging, for example, a student might take cognate courses to explore the subject more deeply.

Having completed the 14-hour religion requirement, students are not barred from taking further religion courses. Majoring in a technical field, students might enlarge their experience of the liberal arts beyond what the core requires. A humanities major might choose to complete an applied minor in computing skills or to construct an unofficial "mini-minor" of courses that open up a particular opportunity for employment or further education at a professional school.

Students are encouraged to acquire skills in both foreign language and mathematics, even though only one of these is required by the core. Additional curricular and extracurricular opportunities in the Honors Program are open to all students at whatever level they might wish to be involved.

Why a University Core?

All students at BYU should be taught the truths of the gospel of Jesus Christ. Any education is inadequate which does not emphasize that His is the only name given under heaven whereby mankind can be saved....

Because the gospel encourages the pursuit of all truth, students at BYU should receive a broad university education. The arts, letters, and sciences provide the core of such an education, which will help students think clearly, communicate effectively, understand important ideas in their own cultural tradition as well as that of others, and establish clear standards of intellectual integrity. (BYU Mission Statement)

Most graduates, five years after completing their degrees, are not employed directly in the areas of their majors, and studies show that those who do best in the long term are those whose breadth of education, rather than specialized training, has given them versatility. A university provides marketable skills; it bestows credentials necessary to some future goal; its graduates, statistically, make more money. But students who enroll at the university seeking only these things—or worse, students who graduate having sought only these things—cheat themselves of the best the university has to offer.

Students benefit most who desire to savor and to ponder, to recognize (in whatever eventual major) the hidden likenesses among the subjects they study, to aim at integration and wholeness. Students benefit most who take the university with them: changed by their experience, they have developed educated habits of mind; they have deepened their faith; they have learned to integrate the sacred and the secular; and they have learned that the craving for knowledge is not fully capable of satisfaction within a lifetime. Students benefit most who become lifelong learners, engaged in service to their fellow human beings.

That it integrates sacred and secular education is the hallmark of a BYU baccalaureate. All disciplines at BYU are "bathed in the light and color of the restored gospel" (Aims, "Spiritually Strengthening"). Religion courses—both Doctrinal Foundation and electives—are not intended as only a devotional supplement to the educational enterprise of the university. At once rigorous and inspiring, they engage the mind and the heart in an ever deeper understanding of the gospel of Jesus Christ through close and meticulous study of the scriptures and the teachings of the living prophets.

General education joins with religious education to make *university* education different from specialized vocational training. It builds a foundation for intellectual development; it increases our understanding of civilization—of humankind's most valuable knowledge and achievements in the arts, letters, and sciences. General education teaches us the importance of critical thinking, an awareness of the past, aesthetic sensibility, and moral judgment. These, together with the training provided in verbal and quantitative skills and in manipulating symbolic systems, help prepare us for a lifetime of learning, effective communication, responsible action, forming and judging arguments, and appreciating and creating the good and the beautiful.

Administration of the University Core

The university core is administered collaboratively by the deans of Undergraduate Education and Religious Education under the direction of the academic vice president. Religious Education is responsible for the Doctrinal Foundation and Religion Electives components and the courses that meet these requirements; Undergraduate Education is responsible for the general education components. The success of the core depends upon dedicated faculty from throughout the university. The Faculty General Education Council, chaired by the associate dean of Undergraduate Education—General Education, reviews and approves all courses meeting general education requirements within the university core.

Who Must Complete University Core Requirements?

All students who receive undergraduate degrees from BYU are required to complete the new core requirements as outlined below. Exceptions to this policy are explained in the Graduation Requirements Policy.

Description of the University Core

The new university core comprises five categories titled Doctrinal Foundation; The Individual and Society; Skills; Arts, Letters, and Sciences; and Core Enrichment: Electives.

Consult the University Core/General Education Courses section of the current class schedule for an up-to-date list of approved courses. The current class schedule is available online at http://core.byu.edu

Doctrinal Foundation and Religion Electives

Religious Education administers and offers courses in ancient and modern scripture, Church history and doctrine, and related subjects. Together these help students toward an ever deeper understanding of "the doctrines, the covenants, the ordinances, the standard works, and the history of the restored gospel" (Aims, "Intellectually Enlarging").

Because The Church of Jesus Christ of Latter-day Saints maintains that regular gospel study is a necessary part of the university experience, religion courses are provided so that students may progress in their religious understanding and convictions simultaneously with their educational progress in secular fields. As such, religion courses are not meant to be a mere devotional supplement but an integral part of the university curriculum that conforms to university standards and expectations. Therefore, while students are enrolled at BYU, they are required to take religion courses from BYU.

Doctrinal Foundation

The heart of the university core's religion component is the doctrinal foundation based upon careful, informed, and reflective study of sacred scripture and doctrines of The Church of Jesus Christ of Latter-day Saints.

While enrolled at BYU, all students must complete the Doctrinal Foundation requirement of the university core as outlined in the chart below. Note that the requirement is different for transfer students. Since the religion requirement is determined by the number of transfer hours, if is important for each student to refer to their official personal progress report or consult with a university advisement center to determine their official status and their corresponding religion requirement for graduation.

All new freshmen are encouraged to complete the Book of Mormon requirement (Rel A 121/H *and* 122/H) during their first year at the university. **All students who have completed an LDS mission and have not previously completed these courses must enroll in Book of Mormon sections designated for returned missionaries.**

Students who are **not LDS** are strongly encouraged to enroll in Rel C 100, Introduction to Mormonism, during their first semester in residence. This course is designed to be informational, to introduce students to the culture, scriptures, and distinctive doctrines of The Church of Jesus Christ of Latter-day Saints, and to prepare them for subsequent religion classes. Rel C 100 may be used to fill either the New Testament or Doctrine and Covenants Doctrinal Foundation requirement.

Religion Electives

In addition to fulfilling the Doctrinal Foundation requirement, all students are required to take a specified number of BYU religion course hours as outlined in the chart below. Fulfilling these hours can be accomplished by taking BYU Doctrinal Foundation courses and/or BYU religion elective courses intended to enrich the Doctrinal Foundation with rigorous study from a variety of religious topics dealing with ancient scripture and Church history and doctrine. **Religion courses taken from LDS institutes of religion (including stake institutes) or Church Educational System schools (BYU–Idaho or BYU–Hawaii) will not fulfill the required number of BYU religion hours to be taken by each student. Only religion hours taken at the Provo campus will fulfill this requirement.**

Religion courses taken at the BYU Salt Lake Center and through the BYU Independent Study program are considered part of the BYU campus and will fulfill the required number of religion courses required of each student.

Because regular gospel study should be a continuous part of a student's university experience, it would be ideal to take one religion class each semester of enrollment. **To encourage this, no more than 4 hours of religion credit per semester (spring/summer counts as one semester) may be counted toward the required religion hours to be taken at BYU.**

No religion course numbered in the 500s and 600s may be applied toward undergraduate religion credit. Religion credit from non-LDS universities will not be counted toward fulfilling any part of the religion requirement.

Total Hours Transferred to BYU	Total BYU Religion Hours to Take While Enrolled at BYU	Doctrinal Foundation Courses Required for Graduation**
0–14.9	14	Book of Mormon (Rel A 121/H and 122/H), New Testament (Rel A 111 or 200 or 211/H or 212/H or 310 or 311), Doctrine and Covenants
15–29.9	12

45–59.9	8	

		(Rel C 324/H or 325/H).
60–74.9	6	Book of Mormon (Rel A 121/H and 122/H), Doctrine and Covenants (Rel C 324/H or 325/H).
75–89.9	4*	
90 or more	2*	Book of Mormon (Rel A 121/H and 122/H).
* More credits may be needed if the Doctrinal Foundation requirement has not been completed. There are no exceptions to the Book of Mormon requirement. **These courses may be transferred from LDS institutes, BYU–Hawaii, or BYU–Idaho but must correspond with BYU courses (number/content and hours) and will not reduce the number of total BYU religion hours that must be taken while enrolled at BYU.		

Individual and Society

The Individual and Society requirements inspire students to continue learning and serving throughout their lives. Students will actively participate in solving family, professional, religious, and social problems after leaving BYU. Under the Individual and Society category is the area of Citizenship which includes American Heritage and Global and Cultural Awareness.

American Heritage gives students an introduction to the political and economic foundations of the American democratic system and helps students appreciate the unique contribution of America to modern civilization. The Global and Cultural Awareness requirement ensures that students develop an "informed awareness of the peoples, cultures, languages, and nations of the world." Students understand important ideas in their own cultural tradition as well as others and are prepared to "go forth to serve."

Skills

In our modern, complex society, the ability to communicate effectively is deemed a crucial skill. Under the Skills category are grouped the following requirements:

- under the heading Effective Communication is First-Year Writing, followed by Advanced Written and Oral Communication;
- Quantitative Reasoning; and
- Languages of Learning.

All these requirements convey information and understanding.

First-Year Writing teaches methods of library research, text or rhetorical analysis, and writing skills in different genres and styles. These essential skills will be used and expanded in all succeeding years of university work. Once students have identified an area for major study, the Advanced Written and Oral Communication requirement introduces them to the discourse and documentation style of their chosen discipline.

To function in a technological society, a basic knowledge of mathematics as a means of communication and problem solving is essential. Quantitative Reasoning requires all students to certify at a basic level of numeracy, either with an appropriately high score on the mathematics section of the ACT or SAT exams or by completion of a BYU course. Then, under the Languages of Learning requirement, students gain advanced symbolic language skills in mathematics, statistics, or a foreign language that broadly applies to a variety of disciplines. Students thus achieve an exposure to cultures and to the ways in which practitioners of the language structure their knowledge.

Arts, Letters, and Sciences

The university's Mission Statement asserts that the "arts, letters, and sciences provide the core of [a broad university] education." These requirements build upon work in other categories of the core by developing "historical perspective" and "a lively appreciation of the artistic, literary, and intellectual achievements of human cultures" and by extending the student's understanding of "basic concepts of the . . . sciences," including "a recognition of the power and limitations of the scientific method" (*Aims,* "Intellectually Enlarging"). This category comprises a Civilization sequence, separate requirements in Arts and in Letters, and requirements in the Biological, Physical, and Social Sciences. The Civilization requirement provides a historical framework and a consideration of important works and themes. Through the Arts and Letters requirements, students deepen their appreciation of artistic and literary works and grow in their capacity to analyze, interpret, and draw justifiable implications from their reading and from their experience with the visual and performing arts.

The area of Scientific Principles and Reasoning contains three requirements: Biological Science, Physical Science, and Social Science. These requirements help develop an understanding of scientific reasoning and the scientific method and expose students to the excitement of discovery in these separate fields. Students will be able to evaluate scientific data to make rational decisions on science-related issues that will affect their lives and community.

Core Enrichment: Electives

This element of the core is in two parts: Religion Electives, which are discussed above in conjunction with the Doctrinal Foundation; and Open Electives, which vary according to the number of credit hours required by the major and other factors. As mentioned, one of the changes in the new general education program implemented fall 2004 was a reduction in hours, aimed at freeing up space for further open electives. Thoughtful choice of electives allows students to design a unique and enriched educational experience. Some suggestions on how these electives might be used are given above under the heading "The BYU Baccalaureate: The Ideal of Integration."

Selection and Timing of GE Classes

Each GE requirement is completed by taking one course or a combination of courses, chosen from the approved list in the table found in the current class schedule. Single-course options are most often designed for students whose major is not closely related to the requirement. On the other hand, combination-of-course options are often designed for majors related to the requirement, and may include courses a student might take to satisfy a major or minor requirement. Students should carefully consider which option best meets their educational needs, keeping in mind the aim of pursuing a lively interrelationship between the core and the major over the whole undergraduate experience.

Not all courses listed in the class schedule are appropriate for all students. For instance, some have prerequisites, some are upper-division courses, and some are designed primarily for certain majors. These courses are labeled in the university core table as either "has prerequisite" or "not for all students." Students should avoid registering for courses for which they are not academically prepared and should consult with the class instructor if they are unsure.

To gain approval to meet a GE requirement, a course is subjected to a rigorous evaluation. Such approval is not granted lightly, and students should ensure that the courses they select are, in fact, *approved* for GE credit. This information is updated each semester/term and published in the current class schedule.

Occasionally it is possible to complete more than one GE requirement with a single course. See the University Core for details; look especially at the Civilization 2 requirements for courses that double-count for Arts, Letters, or Global and Cultural Awareness. Most foreign languages double-count for Global and Cultural Awareness, a few for letters; see Languages of Learning under Skills. Students are encouraged to use such "double-counting" sparingly—the more GE courses a student takes, the greater the breadth and value of the overall educational experience. The individual college advisement center is a valuable resource concerning questions of course selection, timing, and planning.

For First-Year Students. Although the time to complete GE requirements varies according to the major, all new students are expected to complete the First-Year Writing requirement and take at least one course towards completing the American Heritage requirement during their first year. Students are also expected to take one religion course each semester, and complete their schedule by adding other general education and major-related courses. Those individuals beginning summer term are expected to enroll in a 3-credit hour mentored course.

To facilitate success in these courses, the University provides first-year students with a peer mentor. Mentored courses include First-Year Writing, American Heritage, and a number of other general education and major-related courses. These courses are available through the University registration system by envelope. Early registration for fall semester mentored courses may be completed through the Freshman Mentoring website.

In addition, students who need to fill the Quantitative Reasoning requirement (ACT math subscore below 22) should do so in their first year. It is also recommended that all new students begin work in the mathematics or foreign language options under Languages of Learning.

Students planning to satisfy the Scientific Principles and Reasoning: Biological Science or Physical Science requirements with the two-course options (PDBio 120 + MMBio 240; chemistry, geology, and physics combination options) should also complete these during their first two years, making some progress on them in their first year. Civilization courses are designed as sophomore-level courses, although some programs include them during the freshman year. Visit college advisement centers or department offices for advice on when to complete the other GE requirements.

The University Core and the Honors Program

The Honors Program, which is open to all interested students, offers an array of enriched courses that simultaneously satisfy university core and honors graduation requirements. These courses take two forms: those offered through the Honors Program proper (designated Honrs), which explore disciplinary topics in creative and innovative ways; and honors sections of departmental courses (designated by /H or a title that begins with the abbreviation *Honors*). See the Honors Program section of this catalog for a fuller description. Additional information may be obtained from the Honors Advisement Center, 102A MSRB, (801) 422-5497, or by consulting the Honors Program Course Guide at honors.byu.edu.

The University Core and Freshman Mentoring

New freshmen are expected to complete the First-Year Writing requirement and take at least one course towards the American Heritage requirement during their first year. To facilitate enrollment in these courses as well as success in them, the University provides every freshman with a peer mentor. Mentored courses include First-Year Writing, American Heritage, and a number of other general education and major-related courses. Mentored courses include both Honors and non-Honors options.

These courses are available through the university registration system by envelope. Early registration for fall semester mentored courses may be completed through the Freshman Mentoring website.

A brief description of the Freshman Mentoring program and how students are expected to engage with their peer mentor appears in the Undergraduate Education section of this catalog. Detailed information may also be obtained from the Freshman Mentoring website http://freshmanmentoring.byu.edu, by contacting Freshman Mentoring, 2014 JKHB, (801) 422-8176 or 1-877-890-5451, or by emailing freshmanmentoring@byu.edu.

Ways to Complete GE Requirements Other Than by Course Work

In addition to completing approved courses, students may satisfy individual GE requirements within the university core by (1) transferring acceptable credit from other academic institutions, (2) receiving credit from selected Advanced Placement (AP) and International Baccalaureate (IB) examinations, (3) passing exemption or challenge examinations offered for some classes at the university, or (4) fulfilling a GE through a major.

1. Transfer Credit. The application of transfer credit to GE requirements is handled by the Transfer Evaluation Office, A-41 ASB, (801) 422-8522. Transfer Guides have been arranged with several junior and community colleges to facilitate the transfer process for students including those who have completed certain associate degrees. See Transfer Evaluation website for a list of Transfer Guides. The Transfer Evaluation Office can be contacted for up-to-date information regarding the status of agreements with other institutions not listed on their website.

2. Advanced Placement and International Baccalaureate Credit. The results of some Advanced Placement (AP) and International Baccalaureate (IB) exams may be used to meet certain GE requirements and to obtain general university credit. AP or IB credit posted to a transfer institution will be evaluated upon BYU's standards and not those of the transfer institution. The Admission Services Office can be contacted for details regarding credit hours and exemption from GE requirements for both AP and IB exams.

Note: College Level Examination Program (CLEP). BYU stopped giving credit for general exams in 2000. At this time BYU does not give credit for subject exams either. CLEP credit posted to another institution's transcript is reevaluated based on BYU's standards.

3. Exemption and Challenge Examinations. Some requirements can be accomplished by successfully completing an examination. Two types of examinations are available: the exemption exam and the challenge exam. The primary difference between an exemption exam and a challenge exam is that an exemption exam is used exclusively to fulfill a general education requirement. No academic credit or letter grade is posted to the transcript. The challenge exam, however, is not restricted to GE courses, and academic credit and a letter grade may be posted to the transcript if the student so choose. A student may only take an exemption or challenge exam for a single course only once during each semester or term. Students do not have to be enrolled in a course to take an exemption or challenge exam. However, some of the exams are given early enough each semester/term so that students who are enrolled and pass the exam may withdraw from the course. Students not enrolled in a course have an opportunity to take

the challenge or exemption exams offered at the Testing Center. See the chart under Policies and University Core, "Intro to the Undergraduate Degree" for the current semester for more information.

4. GE-Major Overlap. A GE requirement can be fulfilled because of the nature of a major's discipline. For example, an English major would automatically fulfill the Letters requirement because of the nature of the discipline. See the University Core for a list of majors that complete certain GE requirements and the link to the GE-Major Overlap page.

How Do You Get Help with Specific Questions Concerning General Education?

The essential information concerning general education is found in this catalog or online at the University Core section of the current Class Schedule under "Introduction to the Undergraduate Degree" (http://core.byu.edu). Additional late-breaking information, plus advice about general education requirements can be obtained from the college advisement centers. The college advisement centers, together with the University Advisement Center, 2500 WSC, provide assistance with registration, graduation requirements, policies and procedures, fields of study, changes of major, and many other aspects of academic life. Students can access a progress report through MyMAP; this report will generate a personalized report that includes a list of GE requirements students have completed. (Log on to MyBYU; select "School" then "MyMAP"; then the tab, "Plan MyMAP"; click on the Progress Report link on the right-hand side of the page. Students can also type "Plan" in the Quick URL box in the MyBYU home page which will take them to the MyMAP page.)

David O. McKay School of Education

301 MCKB
(801) 422-3694

Dean: K. Richard Young, Professor, Counseling Psychology and Special Education
Associate Dean: Barbara Culatta, Professor, Communication Disorders
Associate Dean: Charles R. Graham, Associate Professor, Instructional Psychology and Technology

The five departments in the David O. McKay School of Education are:

Communication Disorders
Counseling Psychology and Special Education
Educational Leadership and Foundations
Instructional Psychology and Technology
Teacher Education

The principal purposes of the David O. McKay School of Education are:

1. Preparing teachers for public and private schools;
2. Providing graduate programs for the preparation of school principals, counselors, school psychologists, curriculum supervisors, speech-language pathologists, and master teachers;
3. Offering research-based graduate programs; and
4. Researching educational processes and issues.

Education Student Services

Jay Oliver, Director
350 MCKB
(801) 422-3426

The McKay School of Education Student Services is designed to centrally locate a variety of programs for the purpose of better servicing students needs. Services provided include: academic advisement, scholarships, student teaching placement, and teacher licensing recommendation for the State of Utah.

Academic Advisement

Our academic advisors assist undergraduate students majoring in elementary education, early childhood education, special education, physical education teaching/coaching, and communication disorders in the areas of general education, major program requirements, graduation requirements, and teacher licensure procedures.

All other secondary education teaching majors receive advisement in general education and major requirements from their respective college advisement centers. All teaching majors receive licensure advisement in Education Student Services.

Scholarships

The McKay School of Education provides a variety of private scholarships, mentorships, and loans to students majoring in a teaching program and other McKay School majors or programs. An online application is available at http://education.byu.edu/ess.

Student Teaching/Internship Placement

Our advisors coordinate the placement of student teachers and interns in local partnership schools and in schools selected for national and international programs. Students must make application and receive clearance for student teaching and internships by submitting a Student Teaching/Internship Application to 120 MCKB. Forms are available online at: http://education.byu.edu/ess.

Teacher Licensing

Once students have completed all coursework leading to graduation and licensure, our advisors will recommend these students for licensure to the Utah State Office of Education. Licensing recommendations are initiated approximately four weeks after graduation.

The licensure of teachers is a function of the Utah State Office of Education (USOE). Requirements for Utah licensure are available in Education Student Services or online at http://education.byu.edu/ess. As licensure requirements are frequently updated, students should check with Education Student Services to stay informed. Although such modifications are not retroactive, they may still affect the uncompleted portion of a student's program.

Prior to graduation, students are responsible to take and pass the required Praxis II Content Test, to have the test score sent to BYU, to pay the state licensing fees, and to check that their fingerprint background clearance is still current. Students will also be responsible for any additional requirements imposed by the state prior to their graduation. To confirm the status of these requirements, contact Education Student Services, 120 MCKB, (801) 422-3426. Graduation and licensure cannot be processed until these requirements have been completed.

Licensure in Other States. Under reciprocity agreements, Utah licensure is accepted in those states where such agreements are in effect. Specific information is available in Education Student Services. Students who plan to license in another state should contact that state for requirements beyond those in Utah as early in their programs as possible.

Majoring in a Teacher Education Licensure Program

Students wishing to declare a teaching major will do so at their respective college advisement center (see http://education.byu.edu/ess).

Fingerprint Background Clearance

All teaching majors are required to be fingerprinted and pass an FBI background check before participating in required field experiences. A cleared fingerprint background check must be maintained throughout the teaching program in order for the student to be eligible for graduation and licensing. Fingerprinting can be done in Education Student Services, 120 MCKB. Allow from five to six weeks for fingerprints to be processed. FBI background clearance is valid for only three years. If clearance expires before graduation, candidates must repeat the fingerprinting and clearance process, including a new fee payment.

Failing to expunge a police record prior to the background check may result in a blocked registration while a panel reviews the charges. Candidates who cannot pass an FBI background check will be removed from the teacher education licensure program.

Transfer Students. Students who transfer to the David O. McKay School of Education from a two-year college, another university, or another college within BYU must meet the requirements for acceptance set forth above.

McKay School Teacher Preparation Programs

The David O. McKay School of Education seeks students who attain high educational standards and who evidence aptitude for teaching. While in the program students must maintain established standards for personal conduct and interpersonal skills as outlined in the program. Students are encouraged to visit an advisor in Education Student Services, 120 MCKB, to discuss program changes.

Early Childhood Education. The early childhood education major prepares students to teach pre-kindergarten through third grade. This major provides a strong emphasis in early childhood development. Prior to beginning coursework, students are asked to complete an online program entrance form at http://mylink.byu.edu. Students should meet with an academic advisor, 120 MCKB, to plan their program and course schedules. This undergraduate major is open (no application is required) and students should formally declare this major at Education Student Services, 120 MCKB.

Elementary Education. The elementary education major prepares students to teach kindergarten through sixth grade. Prior to beginning coursework, students are asked to complete an online program entrance form at http://mylink.byu.edu. Students should meet with an academic advisor, 120 MCKB, to plan their program and course schedules. This undergraduate major is open (no application is required) and students should formally declare this major at Education Student Services, 120 MCKB.

Special Education. The special education major prepares students to teach kindergarten through twelfth grade students with disabilities. The program includes multiple practica in the schools, and spring/summer enrollment is required. In addition to core courses, majors select an area of emphasis in either mild/moderate or severe disabilities. This major has limited enrollment and requires prior entrance approval through the Department of Counseling Psychology and Special Education. Information can be found online at at http://education.byu.edu/cpse and applicants may apply online at http://mylink.byu.edu/dev/. As part of the application, successful completion of the "Special Education Exploratory Experience" is required for admission. In order not to prolong the time to graduation, students should submit their application before the final semester of the sophomore year. Students should meet with their academic advisor (120 MCKB) when extenuating circumstance require making alternate educational plans. This undergraduate major is a limited enrollment major (application is required). Students should formally declare the premajor at Education Student Services, 120 MCKB.

Physical Education Teaching/Coaching. The physical education teaching/coaching major prepares students to teach K-12 grades. Prior to beginning coursework, students are asked to complete an online program entrance form at http://mylink.byu.edu. Students should meet with an academic advisor, 120 MCKB, to plan their program and course schedules. This undergraduate major is open (no application is required) and students should formally declare this major at Education Student Services, 120 MCKB.

Communication Disorders. The communication disorders major is pre-professional and prepares students for graduate study in either speech-language pathology (requiring a master's degree) or audiology (requiring a doctor's degree). The major focuses on the nature and characteristics of normal and impaired human communication. This major has limited enrollment and requires prior entrance approval through the Department of Communication Disorders. Further information and the application may be found online at http://education.byu.edu/comd. This undergraduate major is a limited enrollment program (application is required) and students should formally declare the premajor at Education Student Services, 120 MCKB.

Secondary Education Teaching. Students planning a career to teach in secondary schools should declare their teaching major at the college advisement center responsible for their major. Questions related to student teaching, internships, or licensing should be addressed to Education Student Services, 120 MCKB. A secondary teaching major incorporates both a major and a professional education program leading to licensure. Students may begin their professional teaching program during their sophomore years. Students are encouraged to visit their major advisement center to plan their program.

Student Teaching. The culminating experience for students in teacher education is a student teaching assignment in a public school classroom under the supervision of mentor teachers and university supervisors. Students must plan their programs carefully to meet requirements for student teaching. A student teaching application must be submitted one semester prior to student teaching. The application is available online at: http://education.byu.edu/ess.

Internships. Internship appointments in a public school are available and may substitute for student teaching. Interns are employed contractually by their school district for a full year and are paid half salary and may receive benefits. Interested students should contact their major teaching supervisor or liaison. An internship application must be submitted one semester prior to the internship. The application is available online at: http://education.byu.edu/ess.

Admission to Degree Program

This is a limited-enrollment program requiring departmental approval for admission. Please see the information below regarding requirements for admission to this major. Additional information is available on the department's website: http://education.byu.edu/comd.

The Discipline

The discipline of communication disorders contains two related fields, speech-language pathology and audiology. The field of speech-language pathology is focused on helping individuals develop their communication abilities or regain lost communication skills through rehabilitation services. The field serves persons with speech and language disorders such as stuttering, articulation problems, aphasia, voice disorders, language delay, and similar communication difficulties. Students develop a knowledge base about speech and language development, the anatomy and physiology of the speech mechanism, the neurology of perception and production of speech and language, the disorders that cause speech and language problems, and the intervention and remediation strategies for treating communication disorders. Professionals often work in public schools, hospitals, private or community clinics, or private practice.

Audiology is a profession that deals with the measurement of hearing and hearing impairment. Audiology includes the study of the nervous system and how we process auditory information, the testing and analysis of disorders of the auditory system, the use of hearing aids, cochlear implants, and other assistive listening devices to enhance hearing capabilities in individuals with hearing loss or other disorders of the auditory system. Professionals typically work with hearing aid manufacturers, in public schools, hospitals, private or community clinics, or in private practice.

Career Opportunities

This is a preprofessional program leading to a graduate degree that is required for entrance into the profession.

Program Acceptance Requirements

Students must be accepted into the Communication Disorders (ComD) major before they may take 300- or 400-level courses in the department. To apply, students must have completed the following three courses:

1. Stat 121
2. PDBio 220
3. ComD 133

Acceptance to the program is based on the grade point average (GPA) from these three courses. The minimum GPA required for admission to the program is determined by number of students admitted to the program (currently 100), and the minimum GPA will thus vary from year to year. Both the number of students admitted and the minimum GPA required for admission are subject to change. GPA data on previous years are not yet available.

Only one repeat of each course is allowed for purposes of determining acceptance to the major. The application deadlines are October 1 and May 1. Application forms are available in the Education Student Services Center (120 MCKB), the ComD department office (136 TLRB), or on the department's web site at http://education.byu.edu/comd. These same program acceptance requirements must be followed to declare a minor in ComD.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Communication Disorders (Program Outcomes)

Minor in Communication Disorders

Students should see their college advisement center for help or information concerning the undergraduate programs.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following pre-major courses:

COMD 133 : Introduction to Speech-Language Pathology and Audiology. (2:2:2)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Overview of communication disorders, assessment strategies, and treatments.

Course Outcomes
- Demonstrate basic understanding of human communication and the systems involved.
- Demonstrate an initial understanding of the clinical applications of the fields of speech-language pathology and audiology.
- Demonstrate understanding of some basic concepts and terms associated with the practice of speech-language pathology and audiology.
- Demonstrate basic familiarity with a variety of communication disorders and the professions of speech-language pathology and audiology.

PDBIO 220 : Human Anatomy (with lab). (3:2:2)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Structure and function of the human body. Lab included.

Course Outcomes
- Students will demonstrate an understanding of the basic microscopic underpinnings of tissue structures and be able to name them.
- Students will demonstrate a greater understanding and appreciation for the human body, it's overall design and connections to other living organisms, and what a marvelous creation it is.
- Students will be able to list the name, location, and function of each of the body's organs and organ systems.

STAT 121 : Principles of Statistics. (3:3:1)
OFFERED: Independent Study also; Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: MATH 110 or equivalent.
DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes
- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

2. Apply for and be admitted to the major.

3. After admission to the major, complete the following:

ASL 101 : First-Year American Sign Language. (4:4:1)
WHEN Fall; Winter; Spring; Summer

TAUGHT:
DESCRIPTION: First in a series of courses which focuses on acquiring basic ASL skills, both receptive and expressive. An introduction to the Deaf community and culture will be provided.
NOTE: Intended for students with little or no experience in ASL.

Course Outcomes
There are no course outcomes available

(Or any other foreign language 101 level or higher, taken at the university level.)

COMD 320 : Speech Anatomy. (3:3:1)
WHEN TAUGHT: Winter
PREREQUISITE: PDBIO 220
DESCRIPTION: Basic anatomy and physiology of speech mechanisms.

Course Outcomes
- Students will demonstrate competent knowledge of the basic elements of anatomy.
- Students will demonstrate competent knowledge of the anatomy and physiology of respiration.
- Students will demonstrate competent knowledge of the anatomy and physiology of phonation.
- Students will demonstrate competent knowledge of the anatomy of articulation and resonation.
- Students will demonstrate competent knowledge of the neuroanatomical and neurophysiological correlates of speech.

COMD 330 : Language Development. (3:3:1)
WHEN TAUGHT: Fall
DESCRIPTION: Overview of how children learn language, including its relationship to cognitive, neural, and social development; language development in bilingual, minority, and handicapped persons.

Course Outcomes
- Demonstrate knowledge of the major theories of language development (social interactionist, linguistic, emergentism).
- Define the major components of language (syntax, semantic, phonology, morphology, & pragmatics).
- Demonstrate knowledge of how cultural factors influence first and second language development.
- Demonstrate knowledge of the developmental sequence of pragmatic, semantic, syntactic, and morphologic language behaviors in production and comprehension modalities.
- Demonstrate knowledge of the development of literacy.

COMD 331 : Clinical Phonetics. (3:3:1)
WHEN TAUGHT: Fall
DESCRIPTION: Transcription and analysis of normal and disordered sound production.

Course Outcomes
- Students will demonstrate competent knowledge of the basic elements of phonetics.
- Students will demonstrate competent knowledge and performance of skills related to the production and transcription of vowel sounds in American English.
- Students will demonstrate competent knowledge and performance of skills related to the production and transcription of consonant sounds in American English.
- Students will demonstrate competent knowledge and performance of skills related to the production and transcription of the suprasegmental aspects of speech.
- Students will demonstrate competent knowledge and performance of skills related to the transcription of disordered speech and dialect variation.
- Students will demonstrate competent knowledge of the appropriate accommodations for culturally and linguistically diverse (CLD) populations of varying ages and differing levels of disability.

COMD 332 : Language Science. (3:3:1)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Morphology, syntax, and semantic roles in language of children and adults; uses both manual and computer-assisted methods.

Course Outcomes
- Discuss English sentence structure and its development in children using common descriptive terms.
- Examine a transcript of a client's language sample and evaluate evidence that the client can use various syntactic constructions.

COMD 334 : Hearing Science and Acoustics. (3:3:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Hearing anatomy, physiology, and science.

Course Outcomes
- Demonstrate an understanding of the decibel and be able to convert among various reference systems.
- Demonstrate an understanding of basic acoustic concepts.
- Explain details of the anatomy and physiology of the auditory pathway.

COMD 350 : Language Impairment. (3:3:1)
WHEN TAUGHT: Winter
PREREQUISITE: COMD 330 & COMD 332
DESCRIPTION: Causes and characteristics of language impairment; techniques for diagnosis, assessment, and treatment of language disorders.

Course Outcomes

- Demonstrate knowledge of the linguistic, academic, and social problems associated with language impairment.
- Describe general models of child language impairment.
- Describe service delivery issues in the assessment of language impairment.
- Demonstrate knowledge of assessment procedures to perform the following tasks: screening, qualifying a child for intervention services, determining goals in intervention, predicting the need for future intervention, and measuring progress in intervention.
- Identify several approaches to the treatment of LI (e.g., focused stimulation).

COMD 351 : Disorders of Articulation and Phonology. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: COMD 331

DESCRIPTION: Causes and characteristics of phonological disorders; techniques for diagnosis, assessment, and treatment.

Course Outcomes

- Demonstrate knowledge regarding the nature of speech sound disorders, including their etiologies, characteristics, anatomical/physiological, acoustic, psychological, developmental, linguistic, and cultural correlates.
- Demonstrate knowledge regarding the principles and methods of the assessment of speech sound disorders, using both formalized and non-formalized methods.
- Demonstrate knowledge regarding the principles and methods of speech sound disorders intervention.

COMD 421 : Speech Science. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: COMD 331 & COMD 334

DESCRIPTION: Laboratory investigation of scientific bases of normal and disordered speech perception and production; for audiologists and speech language pathologists.

Course Outcomes

- Demonstrate knowledge and competence in basic principles of speech production, including acoustic and physiological aspects and their measurement.
- Explain principles and methods of quantifying a variety of speech disorders, based on a sound grasp of the physiologic basis of normal function, with a goal of documenting treatment outcomes.
- Show understanding of the application of principles from the current research literature in measuring speech performance in preparation for participating in evidence-based practice.

COMD 430 : Medical Speech Pathology. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PDBIO 220 & COMD 320

DESCRIPTION: Genetic, gestational, and neurogenic factors related to communication disorders in children and adults; role of the speech-language pathologist in medical teams.

Course Outcomes

- Demonstrate preparation for graduate coursework in organic and neurologic communication and swallowing disorders.
- Describe the collaborative role of the SLP on professional teams in medical settings.
- Describe the causes and characteristics of TBI, fluency disorders, cerebral palsy, aphasia, voice disorders, motor speech disorders and swallowing disorders, and describe several treatment approaches used for those disorder areas by speech-language pathologists.

COMD 438 : Hearing Tests and Measures. (3:3:1)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: COMD 334

DESCRIPTION: Theory and practice of auditory assessment.

Course Outcomes

- Become proficient in the administration of standard audiological testing in adults and older children.
- Demonstrate a theoretical and practical knowledge of hearing tests and measurements in the field of communicative disorders.
- Demonstrate an understanding of the role of hearing and hearing disorders to the broader area of communication disorders.

COMD 442 : Aural Rehabilitation. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: COMD 438

DESCRIPTION: Basic principles of hearing assessment and aural rehabilitation in children from birth to eight years.

Course Outcomes

- Define aural rehabilitation and explain why the service is critical for those who have a hearing impairment.
- Discuss the psychosocial aspects of hearing loss, including the impact on the individual and the family.
- Describe the diagnostic procedures needed as part of a comprehensive AR program, including the diagnosis of hearing loss and rehabilitation by means of amplification, cochlear implants, and other

assistive devices.

COMD 450 : Professional Practices. (3:3:0)

WHEN TAUGHT: Fall
PREREQUISITE: COMD 350
RECOMMENDED: ComD 351.
DESCRIPTION: Overview of issues related to clinical practice in public schools and other settings.

Course Outcomes

- Students will understand the importance of being positive representatives of BYU and the Church of Jesus Christ of Latter-day Saints and will behave in an ethical and professional manner when interacting with other professionals, clients, caregivers, faculty, staff, fellow students, etc
- Students will look for ways to apply professional behavior and leadership skills in their daily lives to improve their relationships with family, friends, fellow students, faculty, staff, ward members, etc
- Students will discover for themselves how their personal worthiness and commitment to the principles of the gospel of Jesus Christ will prepare them to be competent and confident professionals
- Students will demonstrate knowledge of contemporary professional issues through class discussion, class writings, role-plays, out-of-class writing assignments and other application activities
- Students will write an assessment report and will learn to value the editing process as a means to improve written communication

MATH 110 : College Algebra. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 97 or equivalent (see Independent Study).
DESCRIPTION: Functions, polynomials, theory of equations, exponential and logarithmic functions, matrices, determinants, systems of linear equations, permutations, combinations, binomial theorem.

Course Outcomes

- Graph functions using horizontal and vertical shiftsGraph functions using compressions and stretchesGraph functions using reflections about the x-axis or y-axisForm composite functions and find the domainDetermine the inverse of a function and graph an inverse function from the graph of a function
- This course prepares students to take courses in calculus, statistics, mathematics for elementary education majors, and other areas where algebra skills are required. Fluent skills in algebra are necessary for success in any area that uses mathematical analysis. The mastery of college algebra requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. College Algebra develops the concepts of graphing functions, polynomial and rational functions, exponential and logarithmic functions, conic sections, solving systems of equations, the binomial theorem, permutations, combinations, and probability. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information, visit the Math 110 Wiki page.
- Quadratic functionsPolynomial functionsRational functionsPolynomial and rational inequalitiesThe real zeros of a polynomial functionComplex zeros and the Fundamental Theorem of Algebra
- Exponential functionsLogarithmic functionsProperties of LogarithmsLogarithmic and exponential equationsCompound interestExponential growth and decay
- Graph parabolas, ellipses, and hyperbolasFind the equation of parabolas, ellipses, and hyperbolasDiscuss the equation of conic sections to find vertices, foci, asymptotes, and the directrixWork with conic sections that are not centered at the origin
- Solve systems of linear equations using substitution and eliminationSolve systems of non-linear equations using substitution and eliminationDecompose rational functions using partial fractions
- Find terms in a sequence using a formula and a recursive definitionFind a formula for terms in an arithmetic sequence and be able to add the terms of a finite arithmetic sequenceFind a formula for the terms in a geometric sequence and be able to find the sum of finite and infinite geometric seriesProve statements using mathematical induction
- Work with operations on sets such as union, intersection and complement and count the number of elements in a setCompute permutations and combinationsEvaluate binomial coefficients and expand binomials using the Binomial TheoremCompute probabilities of equally likely outcomes

(or equivalent)

*Hours include courses that may fulfill university core requirements.

Program Requirements

1. Complete the following course:

   COMD 133 : Introduction to Speech-Language Pathology and Audiology. (2:2:2)

   WHEN TAUGHT: Fall; Winter

   DESCRIPTION: Overview of communication disorders, assessment strategies, and treatments.

   Course Outcomes
   - Demonstrate basic understanding of human communication and the systems involved.
   - Demonstrate an initial understanding of the clinical applications of the fields of speech-language pathology and audiology.
   - Demonstrate understanding of some basic concepts and terms associated with the practice of speech-language pathology and audiology.
   - Demonstrate basic familiarity with a variety of communication disorders and the professions of speech-language pathology and audiology.

2. Complete an additional 14 hours of ComD courses.

Undergraduate Courses

100-Level Courses

COMD 133 : Introduction to Speech-Language Pathology and Audiology. (2:2:2)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of communication disorders, assessment strategies, and treatments.

Course Outcomes

- Demonstrate basic understanding of human communication and the systems involved.
- Demonstrate an initial understanding of the clinical applications of the fields of speech-language pathology and audiology.
- Demonstrate understanding of some basic concepts and terms associated with the practice of speech-language pathology and audiology.
- Demonstrate basic familiarity with a variety of communication disorders and the professions of speech-language pathology and audiology.

300-Level Courses

COMD 320 : Speech Anatomy. (3:3:1)

WHEN TAUGHT: Winter

PREREQUISITE: PDBIO 220

DESCRIPTION: Basic anatomy and physiology of speech mechanisms.

Course Outcomes

- Students will demonstrate competent knowledge of the basic elements of anatomy.
- Students will demonstrate competent knowledge of the anatomy and physiology of respiration.
- Students will demonstrate competent knowledge of the anatomy and physiology of phonation.
- Students will demonstrate competent knowledge of the anatomy of articulation and resonation.
- Students will demonstrate competent knowledge of the neuroanatomical and neurophysiological correlates of speech.

COMD 330 : Language Development. (3:3:1)

WHEN TAUGHT: Fall

DESCRIPTION: Overview of how children learn language, including its relationship to cognitive, neural, and social development; language development in bilingual, minority, and handicapped persons.

Course Outcomes

- Demonstrate knowledge of the major theories of language development (social interactionist, linguistic, emergentism).
- Define the major components of language (syntax, semantic, phonology, morphology, & pragmatics).
- Demonstrate knowledge of how cultural factors influence first and second language development.
- Demonstrate knowledge of the developmental sequence of pragmatic, semantic, syntactic, and morphologic language behaviors in production and comprehension modalities.
- Demonstrate knowledge of the development of literacy.

COMD 331 : Clinical Phonetics. (3:3:1)

WHEN TAUGHT: Fall

DESCRIPTION: Transcription and analysis of normal and disordered sound production.

Course Outcomes

- Students will demonstrate competent knowledge of the basic elements of phonetics.
- Students will demonstrate competent knowledge and performance of skills related to the production and transcription of vowel sounds in American English.
- Students will demonstrate competent knowledge and performance of skills related to the production and transcription of consonant sounds in American English.
- Students will demonstrate competent knowledge and performance of skills related to the production and transcription of the suprasegmental aspects of speech.
- Students will demonstrate competent knowledge and performance of skills related to the transcription of disordered speech and dialect variation.

Students will demonstrate competent knowledge of the appropriate accommodations for culturally and linguistically diverse (CLD) populations of varying ages and differing levels of disability.

COMD 332 : Language Science. (3:3:1)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Morphology, syntax, and semantic roles in language of children and adults; uses both manual and computer-assisted methods.

Course Outcomes

- Discuss English sentence structure and its development in children using common descriptive terms.
- Examine a transcript of a client's language sample and evaluate evidence that the client can use various syntactic constructions.

COMD 334 : Hearing Science and Acoustics. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Hearing anatomy, physiology, and science.

Course Outcomes

- Demonstrate an understanding of the decibel and be able to convert among various reference systems.
- Demonstrate an understanding of basic acoustic concepts.
- Explain details of the anatomy and physiology of the auditory pathway.

COMD 350 : Language Impairment. (3:3:1)

WHEN TAUGHT: Winter

PREREQUISITE: COMD 330 & COMD 332

DESCRIPTION: Causes and characteristics of language impairment; techniques for diagnosis, assessment, and treatment of language disorders.

Course Outcomes

- Demonstrate knowledge of the linguistic, academic, and social problems associated with language impairment.
- Describe general models of child language impairment.
- Describe service delivery issues in the assessment of language impairment.
- Demonstrate knowledge of assessment procedures to perform the following tasks: screening, qualifying a child for intervention services, determining goals in intervention, predicting the need for future intervention, and measuring progress in intervention.
- Identify several approaches to the treatment of LI (e.g., focused stimulation).

COMD 351 : Disorders of Articulation and Phonology. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: COMD 331

DESCRIPTION: Causes and characteristics of phonological disorders; techniques for diagnosis, assessment, and treatment.

Course Outcomes

- Demonstrate knowledge regarding the nature of speech sound disorders, including their etiologies, characteristics, anatomical/physiological, acoustic, psychological, developmental, linguistic, and cultural correlates.
- Demonstrate knowledge regarding the principles and methods of the assessment of speech sound disorders, using both formalized and non-formalized methods.
- Demonstrate knowledge regarding the principles and methods of speech sound disorders intervention.

400-Level Courses

COMD 421 : Speech Science. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: COMD 331 & COMD 334

DESCRIPTION: Laboratory investigation of scientific bases of normal and disordered speech perception and production; for audiologists and speech language pathologists.

Course Outcomes

- Demonstrate knowledge and competence in basic principles of speech production, including acoustic and physiological aspects and their measurement.
- Explain principles and methods of quantifying a variety of speech disorders, based on a sound grasp of the physiologic basis of normal function, with a goal of documenting treatment outcomes.
- Show understanding of the application of principles from the current research literature in measuring speech performance in preparation for participating in evidence-based practice.

COMD 430 : Medical Speech Pathology. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PDBIO 220 & COMD 320

DESCRIPTION: Genetic, gestational, and neurogenic factors related to communication disorders in children and adults; role of the speech-language pathologist in medical teams.

Course Outcomes

- Demonstrate preparation for graduate coursework in organic and neurologic communication and swallowing disorders.

- Describe the collaborative role of the SLP on professional teams in medical settings.
- Describe the causes and characteristics of TBI, fluency disorders, cerebral palsy, aphasia, voice disorders, motor speech disorders and swallowing disorders, and describe several treatment approaches used for those disorder areas by speech-language pathologists.

COMD 438 : Hearing Tests and Measures. (3:3:1)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: COMD 334

DESCRIPTION: Theory and practice of auditory assessment.

Course Outcomes

- Become proficient in the administration of standard audiological testing in adults and older children.
- Demonstrate a theoretical and practical knowledge of hearing tests and measurements in the field of communicative disorders.
- Demonstrate an understanding of the role of hearing and hearing disorders to the broader area of communication disorders.

COMD 442 : Aural Rehabilitation. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: COMD 438

DESCRIPTION: Basic principles of hearing assessment and aural rehabilitation in children from birth to eight years.

Course Outcomes

- Define aural rehabilitation and explain why the service is critical for those who have a hearing impairment.
- Discuss the psychosocial aspects of hearing loss, including the impact on the individual and the family.
- Describe the diagnostic procedures needed as part of a comprehensive AR program, including the diagnosis of hearing loss and rehabilitation by means of amplification, cochlear implants, and other assistive devices.

COMD 450 : Professional Practices. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: COMD 350

RECOMMENDED: ComD 351.

DESCRIPTION: Overview of issues related to clinical practice in public schools and other settings.

Course Outcomes

- Students will understand the importance of being positive representatives of BYU and the Church of Jesus Christ of Latter-day Saints and will behave in an ethical and professional manner when interacting with other professionals, clients, caregivers, faculty, staff, fellow students, etc
- Students will look for ways to apply professional behavior and leadership skills in their daily lives to improve their relationships with family, friends, fellow students, faculty, staff, ward members, etc
- Students will discover for themselves how their personal worthiness and commitment to the principles of the gospel of Jesus Christ will prepare them to be competent and confident professionals
- Students will demonstrate knowledge of contemporary professional issues through class discussion, class writings, role-plays, out-of-class writing assignments and other application activities
- Students will write an assessment report and will learn to value the editing process as a means to improve written communication

COMD 493R : Readings. (.5-2:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

Course Outcomes

- Students will demonstrate an advanced level of knowledge in a chosen specialty area.
- Students will explain relationships between key concepts in a specialty area.

COMD 495R : Field Experience in Communication Disorders. (1-2:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ComD faculty sponsorship.

DESCRIPTION: Supervised experience in a clinical or educational service-delivery setting under the direction of a faculty member.

Course Outcomes

There are no course outcomes available

500-Level Graduate Courses (available to advanced undergraduates)

COMD 544 : Psychoacoustics. (2:2:1)

DESCRIPTION: Advanced studies in human psychoacoustics and hearing science.

Course Outcomes

No outcomes are available at this time.

Graduate Courses

For 600- and 700-level courses, see the BYU 2013–2014 Graduate Catalog.

Admission to Degree Program

Students must apply to the Counseling Psychology and Special Education Department for admission to the special education undergraduate degree. Information can be found online at http://education.byu.edu/cpse and applicants may apply online at http://mylink.byu.edu/. See additional information below.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Special Education
Mild/Moderate Disabilities Emphasis (Program Outcomes)
Severe Disabilities Emphasis (Program Outcomes)

Students should see their college advisement center for help or information concerning the undergraduate programs.

Graduate Programs and Degrees

MS in Special Education
EdS in School Psychology
PhD in Counseling Psychology

For more information see the BYU 2013–2014 Graduate Catalog.

General Information

Admission to BS Programs

Among other factors, the application review process involves consideration of the following:

1. Significant experience working with individuals who have disabilities (see Special Education Exploratory Experience Log and Summary Report in the online application).
2. A fingerprinting and FBI background check. See Education Student Services (120 MCKB) for instructions.
3. Successful completion of technology skills assessment.

Additional Licensing Requirements

It is the student's responsibility to be sure that the approved PRAXIS II test has been passed and that BYU has received the test scores, that the student's fingerprint background clearance is current, and that state licensing fees have been paid. Students will also be responsible for any additional requirements imposed by the state prior to their graduation. To confirm the status of these requirements, contact Education Student Services, 120 MCKB, (801) 422-3426. Graduation and Utah licensure cannot be processed until these requirements have been completed.

This is a limited-enrollment program requiring departmental admissions approval. Please see Education Student Services (120 MCKB) for information regarding requirements for admission to this program.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

To complete this major, students will also be required to complete the TESOL K-12 minor. The courses the student will need to take in order to complete the minor are reflected in the requirements listed below.

Program Requirements | View MAP | View Program Outcomes

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. Complete the following with at least a B– grade prior to beginning the program:

CPSE 403 : Introduction to Special Education. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FBI fingerprint background clearance.

DESCRIPTION: Understanding the characteristics of students with various exceptionalities, ranging from mild to moderate to severe disabilities. How student with specific disabilities learn; using basic strategies for meeting their educational needs.

Course Outcomes
- 1. Describe the ways in which people differ, learning characteristics and special learning needs.
- 2. Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act.
- 3. Articulate issues related to the identification of students with disabilities, referral and placement and the need to provide differing levels of support.
- 4. Articulate issues related to collaboration in special education. Identify the skills for effective collaboration.
- 5. Describe policies and programs for young children; define elements of the Child Find system.
- 6. Describe the steps in the Individualized Education Program (IEP) process.
- 7. Describe the characteristics, prevalence, and educational implications for students with specific learning disabilities, speech or language impairment, mental retardation, and emotional disturbance.
- 8. Describe the characteristics, prevalence, and educational implications for students with other health impairments, orthopedic impairment, visual impairments, autism, traumatic brain injury, deaf/blindness, and developmental delay.
- 9. Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
- 10. Identify strategies for accommodating to meet individual student needs.
- 10. Demonstrate the ability to use assessment results to make instructional decisions.
- 11. Complete a 12-hour field experience involving volunteer service with four students with disabilities (2 at each site) and submit assignments regarding the experience.

CPSE 425 : Foundations in Language Arts Instruction for Students with Disabilities. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Foundations in analyzing and delivering research-based language arts instruction to students with disabilities, including second language learners with disabilities.

Course Outcomes
- Describe the components of oral language.
- Describe the process of oral language development.
- Describe common communication disorders in children.
- Explain the interplay between culture and language.
- Explain the interplay between language and learning.
- Describe listening comprehension and its effect on learning.
- Describe the demands of learning English as a second language.
- Explain the cognitive processes for changing from spoken to written language.
- Explain the 5 component skills for reading.
- Administer DIBELS©Benchmark assessments for K-1.

3. Complete the following core courses:

CPSE 410 : Applied Behavior Analysis in Education. (3:3:2)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program; FBI fingerprint background clearance.

DESCRIPTION: Strategies for educating individuals with or at-risk for disabilities. Prevention, early intervention, and treatment strategies.

Course Outcomes

- (Knowledge-based objectives)1. Describe the history of ABA.
- 2. Describe several approaches for explaining the occurrence of human behavior.
- 3. Describe the ethical and responsible use of ABA.
- 4. Describe the components of a Functional Behavior Assessment and Behavior Intervention Plan.
- 5. Describe the function and format of target replacement behaviors and behavior objectives.
- 6. Describe data collection and graphing procedures.
- 7. Describe a variety of single-subject designs, their elements, how they are used, and when they are used.
- 8. Describe the principles that underlie the selection of appropriate consequences and providing differential reinforcement.
- 9. Describe stimulus control, its various facets, and how it is used.
- 10. Describe the principle components of generalization procedures and provide appropriate rationale for training for generalization.
- 11. Effectively describe the elements of self-management and how it might be taught to children, youth, and adults.
- (Skill-based objectives)1. Use the Functional Behavior Assessment procedures to determine the function of an identified problem behavior.
- 2. Develop a target replacement behavior (TRB) that serves the same function as the identified problem behavior.
- 3. Develop a behavioral objective that corresponds with the target replacement behavior.
- 4. Observe, count, and graph behavioral data that is based on the target replacement behavior.
- 5. Make data based decisions using these data to determine the most effective intervention to increase the occurrence of the TRB.
- 6. Employ appropriate techniques for designing the Behavioral Intervention Plan. This includes manipulating setting events, using instructional methods, providing differential reinforcement, and arranging appropriate consequences.

CPSE 420 : Assessment and Evaluation of Students with Exceptional Needs. (3:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program; FBI fingerprint background clearance.

DESCRIPTION: Determining present levels of performance, classifying students for special education services, and writing goals and objectives for IEP development.

Course Outcomes

- Demonstrate an understanding of the basic terminology used in an assessment.
- Discuss the ethical concerns related to assessment.
- Outline legal provisions, regulations and program standards regarding assessment.
- Identify the procedure used for screening, pre-referral, referral, and classification.
- Describe the application and interpretation of assessment scores, including grade score vs. standard score, percentile rank, age/grade equivalents, and standings.
- Identify, administer, select and describe the different types of non-biased assessments using appropriate technology when necessary.
- Discuss the components of and procedures for curriculum-based, portfolio, authentic, and functional assessment (informal test procedures), and apply these to different categories of exceptional children (e.g., L.D., E.D, & I.D.).
- Discuss the influence of diversity on assessment, eligibility, programming and placement of exceptional learners.
- Describe the relationship between assessment and placement decisions.
- Outline, develop or modify methods used for monitoring student progress.

CPSE 430 : Teaching Reading/Language Arts to Students with Disabilities. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent; FBI fingerprint background clearance

DESCRIPTION: Research-based methods for teaching language arts to students with disabilities.

Course Outcomes

- 1. Write IEP present levels of educational performance and, measurable annual goals for reading.
- 2. Demonstrate knowledge of core curriculum for reading and language arts
- 3. Task analyze learning objectives for reading and language arts
- 4. Plan daily lessons for reading and language arts.
- 5. Use Dynamic Indicators of Basic Early Literacy Skills (DIBELS) to benchmark and monitor reading progress of one early elementary student.
- 6. Choose reading materials to match student instructional reading levels.
- 7. Demonstrate the teaching of the 5 areas of the national reading panel
- 8. Demonstrate the teaching of writing.
- 9. Demonstrate the use of progress monitoring data to make instructional decisions.

CPSE 440 : Curriculum and Instruction for Secondary Students with Disabilities. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Selection and adaptation of curriculum accommodations, transition planning, and post-secondary

preparation.

Course Outcomes

- Historical foundations, classic studies, major contributors, major legislation, and current issues related to knowledge and practice of transition/secondary special education.
- Continuum of placement and services available for individuals with disabilities at the secondary level.
- Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.
- Specialized materials and instructional approaches for individuals with disabilities at the secondary level.
- Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.
- Strategies for integrating student initiated learning experiences into ongoing instruction.
- Methods for guiding individuals in identifying and organizing critical vocational content.
- Assessing for transition planning.
- Multicultural competence in transition planning processes
- Use research-supported methods for academic instruction of secondary age individuals with disabilities.
- Use research-supported methods for non-academic instruction of secondary age individuals with disabilities.
- Use appropriate adaptations and technology for all individuals with disabilities.
- Use resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments.

CPSE 460 : Collaborating with School and Family. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Foundations in collaborating with school professionals, para-professionals, and families of children with disabilities.

Course Outcomes

- 1. Define and address issues related to collaboration and other models of working together including:a. Teamsb. Consultationc. Team teaching
- 2. Demonstrate understanding of collaborating with the following:a. Other professionalsb. Paraeducatorsc. Families
- 3. Understand and demonstrate appropriate interpersonal skills including:a. Program solvingb. Communicationc. Using statementsd. Asking questionse. Handling difficult interactions

CPSE 470 : Legal Issues Influencing Collaboration in Special Education. (3:3:0)

WHEN TAUGHT: Summer

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Laws and issues influencing special education and educator's roles in collaborating with families and professionals.

Course Outcomes

- Students will describe, discuss and/or apply:1. The six principles basic to P.L. 94-142/IDEA/IDEA 04.
- Rules governing the provision of special education services.
- Create a safe, equitable, positive and supportive learning environment in which diversities are valued.
- Demonstrate sensitivity for the culture, language, religion, gender, disability, socio-economic status, and sexual orientation of individuals.
- Use assessment information in making ineligibility, program, and placement decisions for individuals with exceptional learning needs, including those from culturally and/or linguistically diverse backgrounds.
- Historical points of view and contribution of culturally diverse groups.
- Ways specific cultures are negatively stereotyped.
- Legal provisions and ethical principles regarding assessment of individuals.
- 3. Duties and responsibilities of school personnel in relation to provision of special education services.
- Use assessment information in making eligibility, program, and placement decisions for individuals.
- Communicate effectively with families of individuals with exceptional learning needs from diverse backgrounds.

CPSE 480 : Educational and Multicultural Issues in Special Education. (3:ARR:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: FBI fingerprint background clearance.

DESCRIPTION: Special education issues: multicultural, historical, and legal foundations.

Course Outcomes

- KnowledgeDiffering ways of learning of individuals with exceptional learning needs including those from culturally diverse backgrounds and strategies for addressing these differences.
- Ways to create learning environments that allow individuals to retain and appreciate their own and each others' respective language and cultural heritage.
- Ways specific cultures are negatively stereotyped.
- Strategies used by diverse populations to cope with a legacy of former and continuing racism.
- Characteristics of one's own culture and use of language and the ways in which these can differ from other cultures and uses of languages.
- Ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.
- SkillsMediate controversial intercultural issues among students within the learning environment in ways that enhance any culture, group, or person.
- Students will interact with individuals from a culture different than their own.

CPSE 490 : Capstone Seminar: Students With Disabilities. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Successful completion of all special education courses and concurrent enrollment with student

teaching/internship.

DESCRIPTION: Synthesis of knowledge and skills in special education; development of professional ethics and commitment to professional development.

Course Outcomes

- Models, theories, and philosophies that form the basis for special education practice.
- Rights and responsibilities of students, parents, teachers, and other professionals, and schools related to exceptional learning needs.
- Teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs. Social skills needed for educational and other environments.
- National, state or provincial, and local curricula standards. As well as organizations to support individuals with special needs.
- Prepare and organize materials to implement daily instruction.
- Develop or modify specialized materials for individuals with disabilities.
- Create a safe, equitable, positive, and supportive learning environment in which diversities are valued.
- Continuum of lifelong professional development.

IP&T 387 : Integrating Technology in Special Education 1. (1:1.0:0)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent with CPSE 410.

DESCRIPTION: Integrating instructional technology with special education instructional strategies.

Course Outcomes

There are no course outcomes available

IP&T 487 : Integrating Technology in Special Education 2. (1:1.0:0)

WHEN TAUGHT: Winter

PREREQUISITE: Concurrent with CPSE 430.

DESCRIPTION: Integrating instructional technology with special education instructional strategies.

Course Outcomes

There are no course outcomes available

MTHED 305 : Basic Concepts of Mathematics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Math 110 or equivalent; permission from Teacher Education Department.

DESCRIPTION: Concept-oriented exploration of number, measurement, and informal geometry in relation to children's learning.

NOTE: Required of prospective elementary school teachers.

Course Outcomes

- Students have a deep understanding of central concepts in elementary school mathematics related to whole numbers and whole number operations, number theory, integers and integer operations, geometry, and measurement; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.
- Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.
- Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 305 classroom to make inferences about teaching practices that help children learn mathematics.

4. Complete the following courses which, in conjunction with the other required courses in the program, will allow you to fulfill the requirements of the TESOL K-12 minor:

TELL 410 : Second Language Acquisition. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: EL ED 323 & EL ED 203; or ELANG 223 & SC ED 353; or CPSE 425

DESCRIPTION: Processes and variables in native- and second-language development. How teachers can foster efficient acquisition of language, cognitive, and academic skills in second-language environments.

Course Outcomes

- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas

TELL 440 : Content-Based Language Instruction. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: TELL 410 & TELL 420; or TELL 410 & IP&T 213; or TELL 410 & CPSE 420

RECOMMENDED: El Ed 333, TELL 430, and CPSE 430 concurrently.

DESCRIPTION: Instructional methods, strategies, and materials for integrating curriculum content and language instruction. Teaching, creating, and adapting lesson materials in a multicultural context.

Course Outcomes

- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.

TELL 450 : Family, School, and Community Partnerships. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ELANG 223 & TELL 410 & SC ED 353; or EL ED 203 & EL ED 323

DESCRIPTION: Standards, principles, policies, and processes of partnering with parents, families, schools, and communities in fostering and sustaining the development of children and youth.

Course Outcomes

There are no course outcomes available

TELL 477R : Practicum for Teaching English Language Learners. (.5-4:0:4)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: TELL 440; FBI fingerprint background clearance.

DESCRIPTION: Practicum in teaching English to second-language learners.

NOTE: Can be taken concurrently with student teaching/internship in a diverse-language setting.

Course Outcomes

- Candidates know, understand, and use major concepts, principles, theories, and research related to the nature and role of culture and cultural groups to construct supportive learning environments for ELLs.
- Candidates will use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas in public school settings.

Note: Must take 4 credit hours of TELL 477R.

5. Complete the following emphasis courses:

CPSE 442 : Social and Behavioral Strategies for Students with Mild/Moderate Disabilities. (3:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: CPSE 403 or equivalent; CPSE 410; admission to special education program.

DESCRIPTION: Principles, procedures, and strategies for classroom behavior management, social competence, and individual and school wide intervention plans.

Course Outcomes

- (Knowledge-based Objectives)1. Describe and define the components of schoolwide positive behavior support, it relationship with risk and protetective factors and multicultural issues.
- 2. Describe how to assess and create a positive learning environment in schools.
- 3. Describe how to build strong, positive relationships with children and youth.
- 4. Describe how to use a positive, teaching (discipline) approach.
- 5. Describe how to assess and address the social needs of individuals and groups of students.
- 6. Describe and list the procedural and content steps of an effective social skills program.
- 7. Describe how to organize an effective classroom management system for all students, particularly those with exceptional learning needs (i.e., schedules, procedures, routines, signals, physical set-up of room, rules and consquences, monitoring, transitions).
- 8. Describe the various components and appropriate use of Utah's Least Restrictive Behavioral Interventions (LRBI).
- 9. Describe the elements of multi-level interventions (primary, secondary, and tertiary), includeing positive and reductive interventions. 1. Token economy and response cost 2. Group contingencies 3. Behavioral contracts 4. Home notes 5. Precision commands 6. Time-out 7. Self managment 8. Response cost 9. Administrative intervention 10. Other procedures
- (Skill-based objectives)1. Assess a school climate and identify strengths and areas in which to improve the environment.
- 2. Build strong, positive relationships with children and youth. Develop and use praise notes as one way in which to build such relationships.
- 3. Demonstrate correct use of social skills assessments, procedures and curriculum that can be used in a classroom environment.
- 4. Design a positive behavior support system for classroom and nonclassroom environments. Develop a classroom management plan/disclsure document.
- 5. Demonstrate a variety of effective behavior intervention strategies appropriate to the needs of individuals with exceptional learning needs.
- 6. Select and implement the least intensive intervention consistent with the needs of individuals with exceptionalities. Consider LRBI and multi-level evidence-based practices that offer prevention with various behaviors.

CPSE 446R : Practicum in Secondary Education: Mild/Moderate Disabilities. (1:0:ARR)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent; concurrent enrollment in CPSE 440 (secondary); FBI fingerprint background clearance.

DESCRIPTION: Practicum in teaching students with mild-moderate disabilities in secondary settings.

Course Outcomes

- Continuum of placement and services available for individuals with disabilities at the secondary level.
- Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.
- Specialized materials and instructional approaches for individuals with disabilities at the secondary level.
- Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.
- Strategies for integrating student initiated learning experiences into ongoing instruction.
- Methods for guiding individuals in identifying and organizing critical vocational content.
- Assessing for transition planning.
- Multicultural competence in transition planning processes.
- Skill-Based ObjectivesUse resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments

Demonstrate sensitivity for the culture, language, religion, gender, disability, socio-economic status, and sexual orientation of individuals.
- Create a safe, equitable positive and supportive learning environment in which diversities are valued.
- Organize, develop, and sustain learning environments that support positive intracultural and intercultural experiences.
- Use research-supported methods for academic instruction of secondary age individuals with disabilities.
- Use research-supported methods for non-academic instruction of secondary age individuals with disabilities.
- Use appropriate adaptations and technology for all individuals with disabilities.
- Identify and teach essential concepts, vocabulary, and content across the general curriculum.

CPSE 452 : Effective Teaching Strategies for Students with Mild/Moderate Disabilities. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: IEP-based lesson planning and teacher-directed and student-mediated instructional strategies.

Course Outcomes
- Describe educational characteristics of students with mild/moderate disabilities.
- Describe the components of the IEP process and curriculum scope and sequence standards.
- Describe the process of writing goals, objectives and developing a task analysis.
- Discuss the components of writing effective lesson plans.
- Describe the effective teaching cycle, student response rates, praise, and corrective feedback.
- Identify models of collaboration with parents and general education.
- Discuss differentiated instruction and classroom accommodations for students with disabilities.
- Recognize examples of student-mediated strategies and how they can best be included in teacher-directed lessons.
- Demonstrate an understanding of how to teach learning strategies and academic skills.
- Demonstrate how to incorporate learning strategies in content area instruction.
- Discuss appropriate technologies to support instructional planning and individualized instruction.
- Describe how to design and collect data on informal curriculum based assessments.
- Discuss the role of the special educator in writing IEPs and conducting IEP meetings.
- Demonstrate the collaborative role of the special educator with families and school and community personnel in planning of an individualized program.

CPSE 462 : Teaching Math to Students with Disabilities. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Research-based methods for teaching mathematics to students with disabilities.

Course Outcomes
- 1. Describe research and results for current mathematics research for National Council of Teachers of Mathematics standards.
- 2. Develop Focused and Survey Curriculum Based Assessment.
- 3. Write Present Levels of Academic and Functional Performance (PLAAFP) statements and IEP goals based on informal assessment data.Create a scope and sequence of skills.
- 4. Write lesson plans to address IEP goals and objectives.
- 5. Demonstrate direct instruction presentation techniques.
- 6. Design data systems for monitoring student progress.
- 7. Demonstrate one Morningside Math lesson, with data management

6. Complete 8 hours of the following:

CPSE 466R : Practicum: Teaching Students with Mild/Moderate Disabilities. (1-6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: Admission to special education licensure program; CPSE 403 or equivalent; FBI fingerprint background clearance.

DESCRIPTION: Practicum in the effective teaching cycle for students with mild/moderate disabilities.

Course Outcomes
- 1. Develop a classroom management plan that includes 4-6 operational rules, positive and negative consequences, reinforcement menu and explanation of routines and reward system.
- 2. Administer DIBELS, math CBA assessment to students and record data.Compile and organize summer teaching materials, including instructional binders.Practice effective self-reflection skills.Teach and evaluate language arts and math lessons.Review forms and expectations for Summer Term 466R.Set-up summer teaching classroom.

7. Complete 12 hours of the following student teaching or internship experience:

CPSE 486R : Student Teaching: Students with Mild/Moderate Disabilities. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Successful completion of all core courses and practica in special education; FBI fingerprint background clearance.

DESCRIPTION: Culminating experience teaching students with mild/moderate disabilities in school settings.

NOTE: Fee.

Course Outcomes
- Students must complete the Teacher Work Sample including: a. Contextual Factors b. Unit Framework c. Assessment Plan d. Design for Instruction e. Data-Based Decision Making f. Report of Student Learning
- Planning Rubric: a. Participation in IEP Process b. Developing, Writing, and Conducting and IEP

- Interpersonal Relationships: A. Working with and Training Paraprofessionals a. Role Description b. Training B. Collaboration and School Involement

CPSE 496R : Academic Internship: Special Education. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Departmental approval of application; placement one semester in advance of registration; FBI fingerprint background clearance.

DESCRIPTION: Culminating experience in the licensure program teaching students with disabilities in a school setting full-time for one academic year.

Course Outcomes

- Students must complete the Teacher Work Sample: a. Contextual Factors b. Unit Framework c. Assessment Data d. Design for Instruction e. Data-Based Decision Making f. Report of Student Learning
- Planning Rubric: a. Participating in IEP Process b. Developing, Writing, and Conducting an IEP
- Interpersonal Relationships A. Working with and Training paraprofessionals a. Role Description b. Training B. Collaboration and School Involvement

This is a limited-enrollment program requiring departmental admissions approval. Please see Education Student Services (120 MCKB) for information regarding requirements for admission to this program.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements | View MAP | View Program Outcomes

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. Complete the following with at least a B– grade prior to beginning the program:

CPSE 403 : Introduction to Special Education. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FBI fingerprint background clearance.

DESCRIPTION: Understanding the characteristics of students with various exceptionalities, ranging from mild to moderate to severe disabilities. How student with specific disabilities learn; using basic strategies for meeting their educational needs.

Course Outcomes
- 1. Describe the ways in which people differ, learning characteristics and special learning needs.
- 2. Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act.
- 3. Articulate issues related to the identification of students with disabilities, referral and placement and the need to provide differing levels of support.
- 4. Articulate issues related to collaboration in special education. Identify the skills for effective collaboration.
- 5. Describe policies and programs for young children; define elements of the Child Find system.
- 6. Describe the steps in the Individualized Education Program (IEP) process.
- 7. Describe the characteristics, prevalence, and educational implications for students with specific learning disabilities, speech or language impairment, mental retardation, and emotional disturbance.
- 8. Describe the characteristics, prevalence, and educational implications for students with other health impairments, orthopedic impairment, visual impairments, autism, traumatic brain injury, deaf/blindness, and developmental delay.
- 9. Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
- 10. Identify strategies for accommodating to meet individual student needs.
- 10. Demonstrate the ability to use assessment results to make instructional decisions.
- 11. Complete a 12-hour field experience involving volunteer service with four students with disabilities (2 at each site) and submit assignments regarding the experience.

PETE 461 : Adapted and Multicultural Physical Education for Teaching Majors. (3:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: FBI fingerprint and background clearance.

DESCRIPTION: Legal mandates, assessing and identifying special needs students, multicultural issues, and management and instructional techniques.

Course Outcomes
- *Identify, select, and implement appropriate instruction that is sensitive to the strength/weaknesses, multiple needs, learning style, and experiences of diverse learners.
- *Use appropriate strategies, services, and resources to meet special and diverse learning needs.
- *Create a learning environment which respects and incorporates learners' personal, family, cultural, and community experiences
- Know the principles that address the physiological and biomechanical applications encountered when working with diverse populations.
- Know how to assess and evaluate students with disabilities in order to make appropriate decisions about special services and program components.
- Know how to teach students with disabilities integrated in regular physical education programs.
- Learn how to provide consultation and staff development activities related to students with disabilities and their IEP.
- Learn how to work and attend to the needs of multicultural students integrated in physical education

3. Complete the following core courses:

CPSE 410 : Applied Behavior Analysis in Education. (3:3:2)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program; FBI fingerprint background clearance.

DESCRIPTION: Strategies for educating individuals with or at-risk for disabilities. Prevention, early intervention, and treatment strategies.

Course Outcomes

- (Knowledge-based objectives)1. Describe the history of ABA.
- 2. Describe several approaches for explaining the occurrence of human behavior.
- 3. Describe the ethical and responsible use of ABA.
- 4. Describe the components of a Functional Behavior Assessment and Behavior Intervention Plan.
- 5. Describe the function and format of target replacement behaviors and behavior objectives.
- 6. Describe data collection and graphing procedures.
- 7. Describe a variety of single-subject designs, their elements, how they are used, and when they are used.
- 8. Describe the principles that underlie the selection of appropriate consequences and providing differential reinforcement.
- 9. Describe stimulus control, its various facets, and how it is used.
- 10. Describe the principle components of generalization procedures and provide appropriate rationale for training for generalization.
- 11. Effectively describe the elements of self-management and how it might be taught to children, youth, and adults.
- (Skill-based objectives)1. Use the Functional Behavior Assessment procedures to determine the function of an identified problem behavior.
- 2. Develop a target replacement behavior (TRB) that serves the same function as the identified problem behavior.
- 3. Develop a behavioral objective that corresponds with the target replacement behavior.
- 4. Observe, count, and graph behavioral data that is based on the target replacement behavior.
- 5. Make data based decisions using these data to determine the most effective intervention to increase the occurrence of the TRB.
- 6. Employ appropriate techniques for designing the Behavioral Intervention Plan. This includes manipulating setting events, using instructional methods, providing differential reinforcement, and arranging appropriate consequences.

CPSE 420 : Assessment and Evaluation of Students with Exceptional Needs. (3:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program; FBI fingerprint background clearance.

DESCRIPTION: Determining present levels of performance, classifying students for special education services, and writing goals and objectives for IEP development.

Course Outcomes

- Demonstrate an understanding of the basic terminology used in an assessment.
- Discuss the ethical concerns related to assessment.
- Outline legal provisions, regulations and program standards regarding assessment.
- Identify the procedure used for screening, pre-referral, referral, and classification.
- Describe the application and interpretation of assessment scores, including grade score vs. standard score, percentile rank, age/grade equivalents, and standings.
- Identify, administer, select and describe the different types of non-biased assessments using appropriate technology when necessary.
- Discuss the components of and procedures for curriculum-based, portfolio, authentic, and functional assessment (informal test procedures), and apply these to different categories of exceptional children (e.g., L.D., E.D, & I.D.).
- Discuss the influence of diversity on assessment, eligibility, programming and placement of exceptional learners.
- Describe the relationship between assessment and placement decisions.
- Outline, develop or modify methods used for monitoring student progress.

CPSE 425 : Foundations in Language Arts Instruction for Students with Disabilities. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Foundations in analyzing and delivering research-based language arts instruction to students with disabilities, including second language learners with disabilities.

Course Outcomes

- Describe the components of oral language.
- Describe the process of oral language development.
- Describe common communication disorders in children.
- Explain the interplay between culture and language.
- Explain the interplay between language and learning.
- Describe listening comprehension and its effect on learning.
- Describe the demands of learning English as a second language.
- Explain the cognitive processes for changing from spoken to written language.
- Explain the 5 component skills for reading.
- Administer DIBELS©Benchmark assessments for K-1.

CPSE 430 : Teaching Reading/Language Arts to Students with Disabilities. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent; FBI fingerprint background clearance

DESCRIPTION: Research-based methods for teaching language arts to students with disabilities.

Course Outcomes

- 1. Write IEP present levels of educational performance and, measurable annual goals for reading.
- 2. Demonstrate knowledge of core curriculum for reading and language arts
- 3. Task analyze learning objectives for reading and language arts
- 4. Plan daily lessons for reading and language arts.
- 5. Use Dynamic Indicators of Basic Early Literacy Skills (DIBELS) to benchmark and monitor reading progress of one early elementary student.
- 6. Choose reading materials to match student instructional reading levels.
- 7. Demonstrate the teaching of the 5 areas of the national reading panel
- 8. Demonstrate the teaching of writing.
- 9. Demonstrate the use of progress monitoring data to make instructional decisions.

CPSE 440 : Curriculum and Instruction for Secondary Students with Disabilities. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Selection and adaptation of curriculum accommodations, transition planning, and post-secondary preparation.

Course Outcomes

- Historical foundations, classic studies, major contributors, major legislation, and current issues related to knowledge and practice of transition/secondary special education.
- Continuum of placement and services available for individuals with disabilities at the secondary level.
- Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.
- Specialized materials and instructional approaches for individuals with disabilities at the secondary level.
- Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.
- Strategies for integrating student initiated learning experiences into ongoing instruction.
- Methods for guiding individuals in identifying and organizing critical vocational content.
- Assessing for transition planning.
- Multicultural competence in transition planning processes
- Use research-supported methods for academic instruction of secondary age individuals with disabilities.
- Use research-supported methods for non-academic instruction of secondary age individuals with disabilities.
- Use appropriate adaptations and technology for all individuals with disabilities.
- Use resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments.

CPSE 460 : Collaborating with School and Family. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Foundations in collaborating with school professionals, para-professionals, and families of children with disabilities.

Course Outcomes

- 1. Define and address issues related to collaboration and other models of working together including:a. Teamsb. Consultationc. Team teaching
- 2. Demonstrate understanding of collaborating with the following:a. Other professionalsb. Paraeducatorsc. Families
- 3. Understand and demonstrate appropriate interpersonal skills including:a. Program solvingb. Communicationc. Using statementsd. Asking questionse. Handling difficult interactions

CPSE 470 : Legal Issues Influencing Collaboration in Special Education. (3:3:0)

WHEN TAUGHT: Summer

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Laws and issues influencing special education and educator's roles in collaborating with families and professionals.

Course Outcomes

- Students will describe, discuss and/or apply:1. The six principles basic to P.L. 94-142/IDEA/IDEA 04.
- Rules governing the provision of special education services.
- Create a safe, equitable, positive and supportive learning environment in which diversities are valued.
- Demonstrate sensitivity for the culture, language, religion, gender, disability, socio-economic status, and sexual orientation of individuals.
- Use assessment information in making ineligibility, program, and placement decisions for individuals with exceptional learning needs, including those from culturally and/or linguistically diverse backgrounds.
- Historical points of view and contribution of culturally diverse groups.
- Ways specific cultures are negatively stereotyped.
- Legal provisions and ethical principles regarding assessment of individuals.
- 3. Duties and responsibilities of school personnel in relation to provision of special education services.
- Use assessment information in making eligibility, program, and placement decisions for individuals.
- Communicate effectively with families of individuals with exceptional learning needs from diverse backgrounds.

CPSE 480 : Educational and Multicultural Issues in Special Education. (3:ARR:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: FBI fingerprint background clearance.

DESCRIPTION: Special education issues: multicultural, historical, and legal foundations.

Course Outcomes

- KnowledgeDiffering ways of learning of individuals with exceptional learning needs including those from culturally diverse backgrounds and strategies for addressing these differences.
- Ways to create learning environments that allow individuals to retain and appreciate their own and each others' respective language and cultural heritage.
- Ways specific cultures are negatively stereotyped.
- Strategies used by diverse populations to cope with a legacy of former and continuing racism.
- Characteristics of one's own culture and use of language and the ways in which these can differ from other cultures and uses of languages.
- Ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.
- SkillsMediate controversial intercultural issues among students within the learning environment in ways that enhance any culture, group, or person.
- Students will interact with individuals from a culture different than their own.

CPSE 490 : Capstone Seminar: Students With Disabilities. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Successful completion of all special education courses and concurrent enrollment with student teaching/internship.

DESCRIPTION: Synthesis of knowledge and skills in special education; development of professional ethics and commitment to professional development.

Course Outcomes

- Models, theories, and philosophies that form the basis for special education practice.
- Rights and responsibilities of students, parents, teachers, and other professionals, and schools related to exceptional learning needs.
- Teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs. Social skills needed for educational and other environments.
- National, state or provincial, and local curricula standards. As well as organizations to support individuals with special needs.
- Prepare and organize materials to implement daily instruction.
- Develop or modify specialized materials for individuals with disabilities.
- Create a safe, equitable, positive, and supportive learning environment in which diversities are valued.
- Continuum of lifelong professional development.

IP&T 387 : Integrating Technology in Special Education 1. (1:1.0:0)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent with CPSE 410.

DESCRIPTION: Integrating instructional technology with special education instructional strategies.

Course Outcomes

There are no course outcomes available

IP&T 487 : Integrating Technology in Special Education 2. (1:1.0:0)

WHEN TAUGHT: Winter

PREREQUISITE: Concurrent with CPSE 430.

DESCRIPTION: Integrating instructional technology with special education instructional strategies.

Course Outcomes

There are no course outcomes available

MTHED 305 : Basic Concepts of Mathematics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Math 110 or equivalent; permission from Teacher Education Department.

DESCRIPTION: Concept-oriented exploration of number, measurement, and informal geometry in relation to children's learning.

NOTE: Required of prospective elementary school teachers.

Course Outcomes

- Students have a deep understanding of central concepts in elementary school mathematics related to whole numbers and whole number operations, number theory, integers and integer operations, geometry, and measurement; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.
- Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.
- Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 305 classroom to make inferences about teaching practices that help children learn mathematics.

4. Complete the following emphasis courses:

ASL 101 : First-Year American Sign Language. (4:4:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: First in a series of courses which focuses on acquiring basic ASL skills, both receptive and expressive. An introduction to the Deaf community and culture will be provided.

NOTE: Intended for students with little or no experience in ASL.

Course Outcomes

There are no course outcomes available

ASL 102 : First-Year American Sign Language. (4:4:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ASL 101

DESCRIPTION: Second in a series of courses which focuses on acquiring basic ASL skills, both receptive and expressive. An introduction to the Deaf community and culture will be provided.

NOTE: Teacher may waive prerequisite based on prior experience.

Course Outcomes

- Be able to converse naturally using selected vocabulary.
- Be able to develop and use appropriate classifiers.
- Be able to develop and use appropriate ASL structure.
- Be able to identify and explain selected culture rules.
- able to answer questions about selected films.

CPSE 443 : Social and Behavioral Strategies for Students with Severe Disabilities. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CPSE 403 or equivalent; CPSE 410; admission to special education program; FBI fingerprint background clearance.

DESCRIPTION: Principles, procedures, and strategies for creating positive educational environments, including functional assessment, behavior intervention plans, and development of social competence.

Course Outcomes

- · Demonstrate knowledge of adaptive behavior assessment.
- · Describe the correct, ethical, and responsible use of Functional Behavior Assessment (FUBA) for students with severe disabilities.
- · Demonstrate knowledge of common environmental and personal barriers that hinder accessibility and acceptance of individuals with severe disabilities.
- · Demonstrate knowledge of sources of unique services, networks, and organizations for students with severe disabilities.
- · Demonstrate knowledge of ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.
- · Demonstrate knowledge of cultural perspectives influencing relationships among families, schools, and communities as related to instruction.
- · Demonstrate knowledge of variations in belief, traditions, and values across and within cultures and their effects on relationships among individuals with exceptional learning needs, family, and schooling.
- · Demonstrate knowledge of how to coordinate activities of related services personnel to maximize direct instruction time for individuals with severe disabilities.
- · Demonstrate knowledge of theories of behavior problems in individuals with severe disabilities, including self-stimulation and self-abuse.
- · Demonstrate knowledge of the impact of multiple disabilities on behavior.
- · Demonstrate knowledge of how to integrate functional and social skills training into the curriculum.

CPSE 447R : Practicum in Secondary Education: Severe Disabilities. (1:0:ARR)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent; concurrent enrollment in CPSE 440 (secondary); FBI fingerprint background clearance.

DESCRIPTION: Practicum in teaching students with severe disabilities in secondary settings.

Course Outcomes

- Continuum of placement and services available for individuals with disabilities at the secondary level.
- Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.
- Specialized materials and instructional approaches for individuals with disabilities at the secondary level.
- Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.
- Strategies for integrating student initiated learning experiences into ongoing instruction.
- Methods for guiding individuals in identifying and organizing critical vocational content.
- Multicultural competence in transition planning processes
- Use resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments.

CPSE 453 : Curriculum and Instruction: Severe Disabilities. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: Admission to special education program or instructor's consent.

DESCRIPTION: Strategies for designing and implementing educational programs, curricula, and teaching methods for students with severe disabilities.

Course Outcomes

- The necessity of assessment for curriculum planning.
- Historical foundations, classic studies, major contributors, major legislation, and current issues related to knowledge and practice of curriculum & instruction in special education.
- Effective Teaching principles.
- Positive classroom management.
- Teaching field as a professional setting.
- Various teaching methods used in teaching students with severe disabilities.
- Use research-supported methods for academic instruction of individuals with severe disabilities.
- Use research-supported methods for non-academic instruction of individuals with severe disabilities.
- Use appropriate adaptations and technology for all individuals with disabilities and from diverse

backgrounds.
- Create lesson plans derived from assessments.

CPSE 463 : Assistive Technology for Students with Disabilities. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program or instructor's consent; FBI fingerprint background clearance.

DESCRIPTION: Principles and applications in using assistive technology to improve the education and communication skills of students with disabilities.

Course Outcomes

- Effects of cultural and linguistic differences on growth and development.
- Characteristics of one's own culture and use of language and the ways in which these can differ from other cultures and uses of languages.
- Ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.
- Augmentative and assistive communication strategies.
- Impact of language development and listening comprehension on academic and non-academic learning of individuals with disabilities.
- Communication and social interaction alternatives for individuals who are nonspeaking.
- Use strategies to support and enhance communication skills of individuals with exceptional learning needs.
- Use communication strategies and resources to facilitate understanding of subject matter for students whose primary language is not the dominant language.
- Incorporate and implement instructional and assistive technology into the educational program.
- Use appropriate adaptations and assistive technology for all individuals with disabilities.
- Use and maintain assistive technologies.
- Teach individuals with disabilities to monitor for errors in oral and written language.
- Plan instruction on the use of alternative and augmentative communication systems.
- Develop and use a technology plan based on adaptive technology assessment.

5. Complete 8 hours of the following:

CPSE 467R : Practicum: Teaching Students with Severe Disabilities. (1-6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: Admission to special education licensure program; CPSE 403 or equivalent; FBI fingerprint background clearance.

DESCRIPTION: Practicum in the effective teaching cycle for students with severe disabilities.

Course Outcomes

- Rights and responsibilities of students, parents, teachers, and other professionals, and schools related to exceptional learning needs.
- Models, theories, and philosophies that form the basis for special education practice.
- Specialized materials for individuals with disabilities.
- Use a variety of nonaversive techniques to control targeted behavior and maintain attention of individuals with disabilities.
- Teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs. Social skills needed for educational and other environments.
- National, state or provincial, and local curricula standards.
- Prepare and organize materials to implement daily lesson plans.
- Develop or modify individualized assessment strategies.
- Create a safe, equitable, positive, and supportive learning environment in which diversities are valued.
- Continuum of lifelong professional development.

6. Complete 12 hours of the following student teaching or internship experience:

CPSE 487R : Student Teaching: Students with Severe Disabilities. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Successful completion of all core courses and practica in special education; FBI fingerprint background clearance.

DESCRIPTION: Culminating experience teaching students with severe disabilities in school settings.

Course Outcomes

- Student must complete the Teacher Work Sample: a. Contextual Factors b. Unit Framework c. Assessment Plan d. Design for Instruction e. Data-Based Decision Making f. Report of Student Learning
- Planning Rubric: a. Participating in IEP Process b. Developing, Writing, and Conducting and IEP
- Interpersonal Relationships: A. Working With and Training Paraprofessionals a. Role Description b. Training B. Collaboration and School Involvement

CPSE 496R : Academic Internship: Special Education. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Departmental approval of application; placement one semester in advance of registration; FBI fingerprint background clearance.

DESCRIPTION: Culminating experience in the licensure program teaching students with disabilities in a school setting full-time for one academic year.

Course Outcomes

- Students must complete the Teacher Work Sample: a. Contextual Factors b. Unit Framework c. Assessment Data d. Design for Instruction e. Data-Based Decision Making f. Report of Student Learning
- Planning Rubric: a. Participating in IEP Process b. Developing, Writing, and Conducting an IEP
- Interpersonal Relationships A. Working with and Training paraprofessionals a. Role Description b. Training B. Collaboration and School Involvement

300-Level Courses

CPSE 300 : Exceptional Students: Principles of Collaboration. (2:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: FBI fingerprint background clearance.

DESCRIPTION: Basic principles and legislative issues in effectively communicating and collaborating with professionals, parents, and other service providers to meet needs of individuals with disabilities in inclusive educational environments. Lab.

Course Outcomes
- Analyze student's learning difficulties and plan appropriate accommodations.
- Describe learning characteristics of special needs students.
- Develop assessment plans to evaluate students' progress and collaborate with school experts to support student learning.
- Collaboration: Candidates work effectively with parents, professionals, paraprofessionals, and others in the school and community to help students with disabilities achieve their IEP goals.
- Interpersonal Relations: Candidates work with students, parents, professionals, paraprofessionals, and others in the school and community with kindness and respect regardless of their diverse backgrounds.
- Professional Practice: Candidates fulfill all duties and assignments, comply with all education laws and policies, and continue to improve professional practice.

400-Level Courses

CPSE 401R : Practicum in Educational Partnerships. (1:0:1)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Admission to elementary, secondary, or special education program.

DESCRIPTION: Collaborating with parents, professionals, and others to meet needs of individuals with disabilities in inclusive or special education environments.

Course Outcomes
No outcomes are available at this time.

CPSE 402 : Educating Students with Disabilities in Secondary Classrooms. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or comparable major course; FBI fingerprint background clearance.

DESCRIPTION: Issues, policies, and methods in teaching secondary students with disabilities in general education classrooms. Lab.

Course Outcomes
- Demonstrate sensitivity to individuals with disabilities.
- Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
- Describe the steps in the Individual Education Program (IEP) process, including Individualized Transition Plans for students aged 14-22.
- Use research-supported methods for academic instruction of individuals with disabilities including explicit instruction, learning strategies, task analysis, and active participation.
- Describe models and strategies of consultation and collaboration including co-planning and co-teaching.
- Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act (IDEA).
- Develop a personal philosophy of special education which includes an understanding of the implications of Least Restrictive Environment as defined in IDEA.
- Demonstrate knowledge of basic classroom management theories and an understanding of teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs.
- Describe the characteristics and educational implications of students with high and low incidence disabilities
- Demonstrate ability to identify and prioritize areas of the general curriculum and provide accommodations for individuals with exceptional learning needs

CPSE 403 : Introduction to Special Education. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FBI fingerprint background clearance.

DESCRIPTION: Understanding the characteristics of students with various exceptionalities, ranging from mild to moderate to severe disabilities. How student with specific disabilities learn; using basic strategies for meeting their educational needs.

Course Outcomes

- 1. Describe the ways in which people differ, learning characteristics and special learning needs.
- 2. Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act.
- 3. Articulate issues related to the identification of students with disabilities, referral and placement and the need to provide differing levels of support.
- 4. Articulate issues related to collaboration in special education. Identify the skills for effective collaboration.
- 5. Describe policies and programs for young children; define elements of the Child Find system.
- 6. Describe the steps in the Individualized Education Program (IEP) process.
- 7. Describe the characteristics, prevalence, and educational implications for students with specific learning disabilities, speech or language impairment, mental retardation, and emotional disturbance.
- 8. Describe the characteristics, prevalence, and educational implications for students with other health impairments, orthopedic impairment, visual impairments, autism, traumatic brain injury, deaf/blindness, and developmental delay.
- 9. Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities
- 10. Identify strategies for accommodating to meet individual student needs.
- 10. Demonstrate the ability to use assessment results to make instructional decisions.
- 11. Complete a 12-hour field experience involving volunteer service with four students with disabilities (2 at each site) and submit assignments regarding the experience.

CPSE 410 : Applied Behavior Analysis in Education. (3:3:2)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program; FBI fingerprint background clearance.

DESCRIPTION: Strategies for educating individuals with or at-risk for disabilities. Prevention, early intervention, and treatment strategies.

Course Outcomes

- (Knowledge-based objectives)1. Describe the history of ABA.
- 2. Describe several approaches for explaining the occurrence of human behavior.
- 3. Describe the ethical and responsible use of ABA.
- 4. Describe the components of a Functional Behavior Assessment and Behavior Intervention Plan.
- 5. Describe the function and format of target replacement behaviors and behavior objectives.
- 6. Describe data collection and graphing procedures.
- 7. Describe a variety of single-subject designs, their elements, how they are used, and when they are used.
- 8. Describe the principles that underlie the selection of appropriate consequences and providing differential reinforcement.
- 9. Describe stimulus control, its various facets, and how it is used.
- 10. Describe the principle components of generalization procedures and provide appropriate rationale for training for generalization.
- 11. Effectively describe the elements of self-management and how it might be taught to children, youth, and adults.
- (Skill-based objectives)1. Use the Functional Behavior Assessment procedures to determine the function of an identified problem behavior.
- 2. Develop a target replacement behavior (TRB) that serves the same function as the identified problem behavior.
- 3. Develop a behavioral objective that corresponds with the target replacement behavior.
- 4. Observe, count, and graph behavioral data that is based on the target replacement behavior.
- 5. Make data based decisions using these data to determine the most effective intervention to increase the occurrence of the TRB.
- 6. Employ appropriate techniques for designing the Behavioral Intervention Plan. This includes manipulating setting events, using instructional methods, providing differential reinforcement, and arranging appropriate consequences.

CPSE 420 : Assessment and Evaluation of Students with Exceptional Needs. (3:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program; FBI fingerprint background clearance.

DESCRIPTION: Determining present levels of performance, classifying students for special education services, and writing goals and objectives for IEP development.

Course Outcomes

- Demonstrate an understanding of the basic terminology used in an assessment.
- Discuss the ethical concerns related to assessment.
- Outline legal provisions, regulations and program standards regarding assessment.
- Identify the procedure used for screening, pre-referral, referral, and classification.
- Describe the application and interpretation of assessment scores, including grade score vs. standard score, percentile rank, age/grade equivalents, and standings.
- Identify, administer, select and describe the different types of non-biased assessments using appropriate technology when necessary.
- Discuss the components of and procedures for curriculum-based, portfolio, authentic, and functional assessment (informal test procedures), and apply these to different categories of exceptional children (e.g., L.D., E.D, & I.D.).
- Discuss the influence of diversity on assessment, eligibility, programming and placement of exceptional learners.
- Describe the relationship between assessment and placement decisions.
- Outline, develop or modify methods used for monitoring student progress.

CPSE 425 : Foundations in Language Arts Instruction for Students with Disabilities. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Foundations in analyzing and delivering research-based language arts instruction to students with disabilities, including second language learners with disabilities.

Course Outcomes

- Describe the components of oral language.
- Describe the process of oral language development.
- Describe common communication disorders in children.
- Explain the interplay between culture and language.
- Explain the interplay between language and learning.
- Describe listening comprehension and its effect on learning.
- Describe the demands of learning English as a second language.
- Explain the cognitive processes for changing from spoken to written language.
- Explain the 5 component skills for reading.
- Administer DIBELS©Benchmark assessments for K-1.

CPSE 430 : Teaching Reading/Language Arts to Students with Disabilities. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent; FBI fingerprint background clearance

DESCRIPTION: Research-based methods for teaching language arts to students with disabilities.

Course Outcomes

- 1. Write IEP present levels of educational performance and, measurable annual goals for reading.
- 2. Demonstrate knowledge of core curriculum for reading and language arts
- 3. Task analyze learning objectives for reading and language arts
- 4. Plan daily lessons for reading and language arts.
- 5. Use Dynamic Indicators of Basic Early Literacy Skills (DIBELS) to benchmark and monitor reading progress of one early elementary student.
- 6. Choose reading materials to match student instructional reading levels.
- 7. Demonstrate the teaching of the 5 areas of the national reading panel
- 8. Demonstrate the teaching of writing.
- 9. Demonstrate the use of progress monitoring data to make instructional decisions.

CPSE 440 : Curriculum and Instruction for Secondary Students with Disabilities. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Selection and adaptation of curriculum accommodations, transition planning, and post-secondary preparation.

Course Outcomes

- Historical foundations, classic studies, major contributors, major legislation, and current issues related to knowledge and practice of transition/secondary special education.
- Continuum of placement and services available for individuals with disabilities at the secondary level.
- Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.
- Specialized materials and instructional approaches for individuals with disabilities at the secondary level.
- Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.
- Strategies for integrating student initiated learning experiences into ongoing instruction.
- Methods for guiding individuals in identifying and organizing critical vocational content.
- Assessing for transition planning.
- Multicultural competence in transition planning processes
- Use research-supported methods for academic instruction of secondary age individuals with disabilities.
- Use research-supported methods for non-academic instruction of secondary age individuals with disabilities.
- Use appropriate adaptations and technology for all individuals with disabilities.
- Use resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments.

CPSE 442 : Social and Behavioral Strategies for Students with Mild/Moderate Disabilities. (3:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: CPSE 403 or equivalent; CPSE 410; admission to special education program.

DESCRIPTION: Principles, procedures, and strategies for classroom behavior management, social competence, and individual and school wide intervention plans.

Course Outcomes

- (Knowledge-based Objectives)1. Describe and define the components of schoolwide positive behavior support, it relationship with risk and protetective factors and multicultural issues.
- 2. Describe how to assess and create a positive learning environment in schools.
- 3. Describe how to build strong, positive relationships with children and youth.
- 4. Describe how to use a positive, teaching (discipline) approach.
- 5. Describe how to assess and address the social needs of individuals and groups of students.
- 6. Describe and list the procedural and content steps of an effective social skills program.
- 7. Describe how to organize an effective classroom management system for all students, particularly those with exceptional learning needs (i.e., schedules, procedures, routines, signals, physical set-up of room, rules and consquences, monitoring, transitions).
- 8. Describe the various components and appropriate use of Utah's Least Restrictive Behavioral Interventions (LRBI).
- 9. Describe the elements of multi-level interventions (primary, secondary, and tertiary), includeing positive and reductive interventions. 1. Token economy and response cost 2. Group contingencies 3. Behavioral contracts 4. Home notes 5. Precision commands 6. Time-out 7. Self managment 8. Response cost 9. Administrative intervention 10. Other procedures
- (Skill-based objectives)1. Assess a school climate and identify strengths and areas in which to improve the environment.
- 2. Build strong, positive relationships with children and youth. Develop and use praise notes as one way in which to build such relationships.
- 3. Demonstrate correct use of social skills assessments, procedures and curriculum that can be used in a classroom environment.
- 4. Design a positive behavior support system for classroom and nonclassroom environments. Develop a classroom management plan/disclsure document.

5. Demonstrate a variety of effective behavior intervention strategies appropriate to the needs of individuals with exceptional learning needs.
- 6. Select and implement the least intensive intervention consistent with the needs of individuals with exceptionalities. Consider LRBI and multi-level evidence-based practices that offer prevention with various behaviors.

CPSE 443 : Social and Behavioral Strategies for Students with Severe Disabilities. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CPSE 403 or equivalent; CPSE 410; admission to special education program; FBI fingerprint background clearance.

DESCRIPTION: Principles, procedures, and strategies for creating positive educational environments, including functional assessment, behavior intervention plans, and development of social competence.

Course Outcomes
- · Demonstrate knowledge of adaptive behavior assessment.
- · Describe the correct, ethical, and responsible use of Functional Behavior Assessment (FUBA) for students with severe disabilities.
- · Demonstrate knowledge of common environmental and personal barriers that hinder accessibility and acceptance of individuals with severe disabilities.
- · Demonstrate knowledge of sources of unique services, networks, and organizations for students with severe disabilities.
- · Demonstrate knowledge of ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.
- · Demonstrate knowledge of cultural perspectives influencing relationships among families, schools, and communities as related to instruction.
- · Demonstrate knowledge of variations in belief, traditions, and values across and within cultures and their effects on relationships among individuals with exceptional learning needs, family, and schooling.
- · Demonstrate knowledge of how to coordinate activities of related services personnel to maximize direct instruction time for individuals with severe disabilities.
- · Demonstrate knowledge of theories of behavior problems in individuals with severe disabilities, including self-stimulation and self-abuse.
- · Demonstrate knowledge of the impact of multiple disabilities on behavior.
- · Demonstrate knowledge of how to integrate functional and social skills training into the curriculum.

CPSE 446R : Practicum in Secondary Education: Mild/Moderate Disabilities. (1:0:ARR)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent; concurrent enrollment in CPSE 440 (secondary); FBI fingerprint background clearance.

DESCRIPTION: Practicum in teaching students with mild-moderate disabilities in secondary settings.

Course Outcomes
- Continuum of placement and services available for individuals with disabilities at the secondary level.
- Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.
- Specialized materials and instructional approaches for individuals with disabilities at the secondary level.
- Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.
- Strategies for integrating student initiated learning experiences into ongoing instruction.
- Methods for guiding individuals in identifying and organizing critical vocational content.
- Assessing for transition planning.
- Multicultural competence in transition planning processes.
- Skill-Based ObjectivesUse resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments
- Demonstrate sensitivity for the culture, language, religion, gender, disability, socio-economic status, and sexual orientation of individuals.
- Create a safe, equitable positive and supportive learning environment in which diversities are valued.
- Organize, develop, and sustain learning environments that support positive intracultural and intercultural experiences.
- Use research-supported methods for academic instruction of secondary age individuals with disabilities.
- Use research-supported methods for non-academic instruction of secondary age individuals with disabilities.
- Use appropriate adaptations and technology for all individuals with disabilities.
- Identify and teach essential concepts, vocabulary, and content across the general curriculum.

CPSE 447R : Practicum in Secondary Education: Severe Disabilities. (1:0:ARR)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent; concurrent enrollment in CPSE 440 (secondary); FBI fingerprint background clearance.

DESCRIPTION: Practicum in teaching students with severe disabilities in secondary settings.

Course Outcomes
- Continuum of placement and services available for individuals with disabilities at the secondary level.
- Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.
- Specialized materials and instructional approaches for individuals with disabilities at the secondary level.
- Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.
- Strategies for integrating student initiated learning experiences into ongoing instruction.
- Methods for guiding individuals in identifying and organizing critical vocational content.
- Multicultural competence in transition planning processes
- Use resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments.

CPSE 452 : Effective Teaching Strategies for Students with Mild/Moderate Disabilities. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: IEP-based lesson planning and teacher-directed and student-mediated instructional strategies.

Course Outcomes

- Describe educational characteristics of students with mild/moderate disabilities.
- Describe the components of the IEP process and curriculum scope and sequence standards.
- Describe the process of writing goals, objectives and developing a task analysis.
- Discuss the components of writing effective lesson plans.
- Describe the effective teaching cycle, student response rates, praise, and corrective feedback.
- Identify models of collaboration with parents and general education.
- Discuss differentiated instruction and classroom accommodations for students with disabilities.
- Recognize examples of student-mediated strategies and how they can best be included in teacher-directed lessons.
- Demonstrate an understanding of how to teach learning strategies and academic skills.
- Demonstrate how to incorporate learning strategies in content area instruction.
- Discuss appropriate technologies to support instructional planning and individualized instruction.
- Describe how to design and collect data on informal curriculum based assessments.
- Discuss the role of the special educator in writing IEPs and conducting IEP meetings.
- Demonstrate the collaborative role of the special educator with families and school and community personnel in planning of an individualized program.

CPSE 453 : Curriculum and Instruction: Severe Disabilities. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: Admission to special education program or instructor's consent.

DESCRIPTION: Strategies for designing and implementing educational programs, curricula, and teaching methods for students with severe disabilities.

Course Outcomes

- The necessity of assessment for curriculum planning.
- Historical foundations, classic studies, major contributors, major legislation, and current issues related to knowledge and practice of curriculum & instruction in special education.
- Effective Teaching principles.
- Positive classroom management.
- Teaching field as a professional setting.
- Various teaching methods used in teaching students with severe disabilities.
- Use research-supported methods for academic instruction of individuals with severe disabilities.
- Use research-supported methods for non-academic instruction of individuals with severe disabilities.
- Use appropriate adaptations and technology for all individuals with disabilities and from diverse backgrounds.
- Create lesson plans derived from assessments.

CPSE 460 : Collaborating with School and Family. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Foundations in collaborating with school professionals, para-professionals, and families of children with disabilities.

Course Outcomes

- 1. Define and address issues related to collaboration and other models of working together including:a. Teamsb. Consultationc. Team teaching
- 2. Demonstrate understanding of collaborating with the following:a. Other professionalsb. Paraeducatorsc. Families
- 3. Understand and demonstrate appropriate interpersonal skills including:a. Program solvingb. Communicationc. Using statementsd. Asking questionse. Handling difficult interactions

CPSE 462 : Teaching Math to Students with Disabilities. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Research-based methods for teaching mathematics to students with disabilities.

Course Outcomes

- 1. Describe research and results for current mathematics research for National Council of Teachers of Mathematics standards.
- 2. Develop Focused and Survey Curriculum Based Assessment.
- 3. Write Present Levels of Academic and Functional Performance (PLAAFP) statements and IEP goals based on informal assessment data.Create a scope and sequence of skills.
- 4. Write lesson plans to address IEP goals and objectives.
- 5. Demonstrate direct instruction presentation techniques.
- 6. Design data systems for monitoring student progress.
- 7. Demonstrate one Morningside Math lesson, with data management

CPSE 463 : Assistive Technology for Students with Disabilities. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admission to special education program or instructor's consent; FBI fingerprint background clearance.

DESCRIPTION: Principles and applications in using assistive technology to improve the education and communication skills of students with disabilities.

Course Outcomes

- Effects of cultural and linguistic differences on growth and development.
- Characteristics of one's own culture and use of language and the ways in which these can differ from other cultures and uses of languages.
- Ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.

- Augmentative and assistive communication strategies.
- Impact of language development and listening comprehension on academic and non-academic learning of individuals with disabilities.
- Communication and social interaction alternatives for individuals who are nonspeaking.
- Use strategies to support and enhance communication skills of individuals with exceptional learning needs.
- Use communication strategies and resources to facilitate understanding of subject matter for students whose primary language is not the dominant language.
- Incorporate and implement instructional and assistive technology into the educational program.
- Use appropriate adaptations and assistive technology for all individuals with disabilities.
- Use and maintain assistive technologies.
- Teach individuals with disabilities to monitor for errors in oral and written language.
- Plan instruction on the use of alternative and augmentative communication systems.
- Develop and use a technology plan based on adaptive technology assessment.

CPSE 466R : Practicum: Teaching Students with Mild/Moderate Disabilities. (1-6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: Admission to special education licensure program; CPSE 403 or equivalent; FBI fingerprint background clearance.

DESCRIPTION: Practicum in the effective teaching cycle for students with mild/moderate disabilities.

Course Outcomes

- 1. Develop a classroom management plan that includes 4-6 operational rules, positive and negative consequences, reinforcement menu and explanation of routines and reward system.
- 2. Administer DIBELS, math CBA assessment to students and record data.Compile and organize summer teaching materials, including instructional binders.Practice effective self-reflection skills.Teach and evaluate language arts and math lessons.Review forms and expectations for Summer Term 466R.Set-up summer teaching classroom.

CPSE 467R : Practicum: Teaching Students with Severe Disabilities. (1-6:0:ARR)

WHEN TAUGHT: Spring; Summer

PREREQUISITE: Admission to special education licensure program; CPSE 403 or equivalent; FBI fingerprint background clearance.

DESCRIPTION: Practicum in the effective teaching cycle for students with severe disabilities.

Course Outcomes

- Rights and responsibilities of students, parents, teachers, and other professionals, and schools related to exceptional learning needs.
- Models, theories, and philosophies that form the basis for special education practice.
- Specialized materials for individuals with disabilities.
- Use a variety of nonaversive techniques to control targeted behavior and maintain attention of individuals with disabilities.
- Teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs. Social skills needed for educational and other environments.
- National, state or provincial, and local curricula standards.
- Prepare and organize materials to implement daily lesson plans.
- Develop or modify individualized assessment strategies.
- Create a safe, equitable, positive, and supportive learning environment in which diversities are valued.
- Continuum of lifelong professional development.

CPSE 470 : Legal Issues Influencing Collaboration in Special Education. (3:3:0)

WHEN TAUGHT: Summer

PREREQUISITE: Admission to special education program; CPSE 403 or equivalent.

DESCRIPTION: Laws and issues influencing special education and educator's roles in collaborating with families and professionals.

Course Outcomes

- Students will describe, discuss and/or apply:1. The six principles basic to P.L. 94-142/IDEA/IDEA 04.
- Rules governing the provision of special education services.
- Create a safe, equitable, positive and supportive learning environment in which diversities are valued.
- Demonstrate sensitivity for the culture, language, religion, gender, disability, socio-economic status, and sexual orientation of individuals.
- Use assessment information in making ineligibility, program, and placement decisions for individuals with exceptional learning needs, including those from culturally and/or linguistically diverse backgrounds.
- Historical points of view and contribution of culturally diverse groups.
- Ways specific cultures are negatively stereotyped.
- Legal provisions and ethical principles regarding assessment of individuals.
- 3. Duties and responsibilities of school personnel in relation to provision of special education services.
- Use assessment information in making eligibility, program, and placement decisions for individuals.
- Communicate effectively with families of individuals with exceptional learning needs from diverse backgrounds.

CPSE 480 : Educational and Multicultural Issues in Special Education. (3:ARR:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: FBI fingerprint background clearance.

DESCRIPTION: Special education issues: multicultural, historical, and legal foundations.

Course Outcomes

- KnowledgeDiffering ways of learning of individuals with exceptional learning needs including those from culturally diverse backgrounds and strategies for addressing these differences.
- Ways to create learning environments that allow individuals to retain and appreciate their own and each others' respective language and cultural heritage.
- Ways specific cultures are negatively stereotyped.
- Strategies used by diverse populations to cope with a legacy of former and continuing racism.
- Characteristics of one's own culture and use of language and the ways in which these can differ from other cultures and uses of languages.
- Ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.
- SkillsMediate controversial intercultural issues among students within the learning environment in ways that enhance any culture, group, or person.

- Students will interact with individuals from a culture different than their own.

CPSE 486R : Student Teaching: Students with Mild/Moderate Disabilities. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Successful completion of all core courses and practica in special education; FBI fingerprint background clearance.

DESCRIPTION: Culminating experience teaching students with mild/moderate disabilities in school settings.

NOTE: Fee.

Course Outcomes

- Students must complete the Teacher Work Sample including: a. Contextual Factors b. Unit Framework c. Assessment Plan d. Design for Instruction e. Data-Based Decision Making f. Report of Student Learning
- Planning Rubric: a. Participation in IEP Process b. Developing, Writing, and Conducting and IEP
- Interpersonal Relationships: A. Working with and Training Paraprofessionals a. Role Description b. Training B. Collaboration and School Involement

CPSE 487R : Student Teaching: Students with Severe Disabilities. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Successful completion of all core courses and practica in special education; FBI fingerprint background clearance.

DESCRIPTION: Culminating experience teaching students with severe disabilities in school settings.

Course Outcomes

- Student must complete the Teacher Work Sample: a. Contextual Factors b. Unit Framework c. Assessment Plan d. Design for Instruction e. Data-Based Decision Making f. Report of Student Learning
- Planning Rubric: a. Participating in IEP Process b. Developing, Writing, and Conducting and IEP
- Interpersonal Relationships: A. Working With and Training Paraprofessionals a. Role Description b. Training B. Collaboration and School Involvement

CPSE 490 : Capstone Seminar: Students With Disabilities. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Successful completion of all special education courses and concurrent enrollment with student teaching/internship.

DESCRIPTION: Synthesis of knowledge and skills in special education; development of professional ethics and commitment to professional development.

Course Outcomes

- Models, theories, and philosophies that form the basis for special education practice.
- Rights and responsibilities of students, parents, teachers, and other professionals, and schools related to exceptional learning needs.
- Teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs. Social skills needed for educational and other environments.
- National, state or provincial, and local curricula standards. As well as organizations to support individuals with special needs.
- Prepare and organize materials to implement daily instruction.
- Develop or modify specialized materials for individuals with disabilities.
- Create a safe, equitable, positive, and supportive learning environment in which diversities are valued.
- Continuum of lifelong professional development.

CPSE 493R : Readings. (.5-2:ARR:ARR)

WHEN TAUGHT: Contact Department.

Course Outcomes

- Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activities.

CPSE 496R : Academic Internship: Special Education. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Departmental approval of application; placement one semester in advance of registration; FBI fingerprint background clearance.

DESCRIPTION: Culminating experience in the licensure program teaching students with disabilities in a school setting full-time for one academic year.

Course Outcomes

- Students must complete the Teacher Work Sample: a. Contextual Factors b. Unit Framework c. Assessment Data d. Design for Instruction e. Data-Based Decision Making f. Report of Student Learning
- Planning Rubric: a. Participating in IEP Process b. Developing, Writing, and Conducting an IEP
- Interpersonal Relationships A. Working with and Training paraprofessionals a. Role Description b. Training B. Collaboration and School Involvement

500-Level Graduate Courses (available to advanced undergraduates)

CPSE 580R : Directed Observation in the Schools. (.5-3:0:8)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent.

Course Outcomes
There are no course outcomes available

CPSE 589R : Current Topics in Special Education. (.5-3:3:1)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Instructor's consent.

Undergraduate Courses

200-Level Courses

EDLF 201 : Foundations of Education. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: The purposes of education and schooling in a democracy and the historical, cultural, philosophical, and sociological foundations underlying the development of the American educational system.

Course Outcomes

- Be exposed to the major philosophical, historical, and sociological movements in Western education.
- Confront central issues and contexts of education, e.g., the nature of man, external structure & individual freedom, wealth & poverty, school & family, alternative delivery systems, school & democracy, school & law, religion & education, etc.
- Develop and articulate their own views of education and connect these views to their future professional practice.
- Examine the moral dimensions of education including access to knowledge, providing nurturing pedagogy, stewardship of schools, and perpetuating our political democracy.

300-Level Courses

EDLF 362 : Introduction to International Development Education. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Major concepts and research in educational aspects of poverty alleviation and human development. Role of education as foundation of poverty alleviation, expanding human capabilities, and for promoting national development.

Course Outcomes

- Develop basic literacy in the historical and current debates on the meaning and goals of education and development and a framework.
- Become aware of key theoretical concepts and different understandings on education and development, and the significance of human rights mainstreaming as a pillar in disciplinary and professional divide.
- Grasp the interdependence of socio-cultural, political, and economic systems in education and development.
- Understand development as a problem-solving process advanced through policies and programs at different levels by diverse actors.
- Examine strengths and weaknesses of development architectures--particularly in relation to key problems and issues like poverty, exclusion, gender, empowerment and dignity, sustainability, capabilities and functioning and human rights. Learn to question the "Washington Consensus" wisdom and existing systems, structures, and models are working and, if not, what might work instead.
- Begin the process of coming to a personal definition of poverty and development, in harmony with global guidelines and professional standards.
- Study development as part of the larger International Development community and integrate IDE framework into this professional learning community.

EDLF 363 : Education, Poverty, and Community Development. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Examines the nexus between education, poverty, and socioeconomic development challenges facing developing countries through the perspective of economics, religion, and the state.

Course Outcomes

- Identify and critically reflect upon issues and theories of poverty and human development causes, interrelations, feedback, and be able to offer possible solutions.
- Locate, understand, and critically review development theories and research within their respective disciplines and within the interdisciplinary field of Development Studies
- Analyze relevant development phenomena in a complex manner using key concepts and theories studied during the course.
- Formulate complex research questions regarding development.
- Communicate scientific issues and follow the development of knowledge.
- Develop a more effective understanding of the economics, social, and political dimensions of educational development within and across national boundaries.
- Compare the benefits and limitations of different policy construction and aggregation methods and the kinds of results that one might obtain in interventions.

- Improve critical thinking and reasoning, and writing skills.

EDLF 390R : Special Topics in Education. (1-3:ARR:ARR)
WHEN TAUGHT: Contact Department.
DESCRIPTION: Various topics dealing with educational issues.

Course Outcomes
There are no course outcomes available

EDLF 399R : Academic Internship. (1-9:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Departmental consent.
DESCRIPTION: On-the-job experience and training under the guidance of a mentor.

Course Outcomes
No outcomes are available at this time.

400-Level Courses

EDLF 452 : Foundations of Education. (.5-2:2:0)
WHEN TAUGHT: Contact Department.
DESCRIPTION: Introduction to the philosophical, sociological, and historical foundations of American education, with special reference to current issues in U.S. public schooling.

Course Outcomes
There are no course outcomes available

EDLF 494R : Independent Readings. (1-3:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Departmental consent.
DESCRIPTION: Readings in education.

Course Outcomes
There are no course outcomes available

EDLF 495R : Independent Research. (1-3:0:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Departmental consent.
DESCRIPTION: Student research mentored by faculty member.

Course Outcomes
There are no course outcomes available

500-Level Graduate Courses (available to advanced undergraduates)

EDLF 515R : Special Topics in Education. (.5-3:3:1)
WHEN TAUGHT: Fall; Winter; Summer
NOTE: Credit earned in 515R is not counted toward graduate degrees.

Undergraduate Courses

The Department of Instructional Psychology and Technology does not offer a baccalaureate degree. However, undergraduate courses are offered as service courses to other departments in the David O. McKay School of Education.

200-Level Courses

IP&T 201 : History of Learning in the Arts, Sciences, and Technology (Part 1). (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: History of civilization from antiquity to circa A.D. 1500. This course has two primary goals: to study (1) how past civilizations learned and (2) how we as individuals learn.

Course Outcomes
There are no course outcomes available

IP&T 202 : History of Learning in the Arts, Sciences, and Technology (Part 2). (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: History of civilization from circa A.D. 1500 to present. This course has two primary goals: to study (1) how past civilizations learned and (2) how we as individuals learn.

Course Outcomes
There are no course outcomes available

IP&T 213 : Foundations of Instructional Design and Assessment. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Elementary Education major status.

DESCRIPTION: Curriculum design and assessment theory, strategies, and tools for the K-6 classroom. Backward design and seamless assessment for informing and improving student performance.

Course Outcomes

- Teacher candidates will be able to describe, define and apply the principles and science of assessment to determine instructional needs, design and deliver effective instruction and communicate assessment results to appropriate audiences in a multi-tiered system of support.
- Teacher candidates will be able to describe their role and responsibility regarding curriculum standards and ensure that curriculum addresses the needs of diverse students.
- Teacher candidates will be able to synthesize and employ assessment evidence to inform instructional decision-making, interpret data to evaluate instruction, and apply a problem-solving process to address students' cognitive, social-emotional and linguistic learning needs within a multi-tiered system of support.
- Teacher candidates will be able to define, design and employ evidenced-based instructional practices within a multi-tiered system of support.

IP&T 286 : Instructional Technology in Teaching. (1:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Using instructional design, visual design, and differentiated staffing principles along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for secondary education settings.

Course Outcomes
There are no course outcomes available

IP&T 287 : Instructional Technology for Early Childhood Education. (2:2:ARR)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Using instructional design, visual design, and differentiated staffing principles, along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for early childhood, elementary, and special education settings.

Course Outcomes

- Students will increase their familiarity with and ability to use a wide range of educational technologies.
- Students will develop positive dispositions towards using educational technologies that can help improve student learning.
- Student will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.
- Students will strengthen their knowledge of technologies and teaching methods that can be used effectively with with young children in the K-2 elementary grades.
- Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

300-Level Courses

IP&T 301 : Educational Psychology. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Basic principles of educational psychology applied to teaching, including learning theory, instructional strategies, assessment of learning outcomes, and classroom inquiry.

Course Outcomes

- Identify your own theory of teaching and examine the underlying assumptions of teaching and learning theories.
- Understand student thinking and behavior.
- Construct sound assessments of student learning.
- Apply concepts learned in this class to your own teaching.

IP&T 334 : Integrating Technology in Early Childhood Education. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent with El Ed 333.

DESCRIPTION: Integrating instructional technology with early childhood ecuation instructional strategies.

Course Outcomes

- Students will increase their familiarity with and ability to use a wide range of educational technologies.
- Students will develop positive dispositions towards using educational technologies that can help improve student learning.
- Student will strengthen their knowledge of ways to use technology in teaching math and literacy that lead to improved effectiveness, engagement, and/or efficiency.
- Students will practice their technology integration skills in real-world early childhood elementary level settings and learn to evaluate the strengths and weaknesses of their performance.
- Students will follow fairuse guidelines as they incorporate digital media into their teaching.

IP&T 387 : Integrating Technology in Special Education 1. (1:1.0:0)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent with CPSE 410.

DESCRIPTION: Integrating instructional technology with special education instructional strategies.

Course Outcomes

There are no course outcomes available

400-Level Courses

IP&T 444 : Integrating Technology in Elementary Education. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent with El Ed 445 and El Ed 446.

DESCRIPTION: Integrating instructional technology into K-6 instructional strategies.

Course Outcomes

- Students will increase their familiarity with and ability to use a wide range of educational technologies.
- Students will develop positive dispositions towards using educational technologies that can help improve student learning.
- Student will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.
- Students will practice their technology integration skills in real-world upper elementary level settings and learn to evaluate the strengths and weaknesses of their performance.
- Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

IP&T 470R : Undergraduate Research Training. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction of undergraduate students to the concepts of research and evaluation through practical experience.

Course Outcomes

- To learn some basic issues associated with research, evaluation, and other forms of inquiry
- To participate in a mentored inquiry experience with a faculty member.
- To develop some basic skills in conducting and presenting inquiry studies.

IP&T 487 : Integrating Technology in Special Education 2. (1:1.0:0)

WHEN TAUGHT: Winter

PREREQUISITE: Concurrent with CPSE 430.

DESCRIPTION: Integrating instructional technology with special education instructional strategies.

Course Outcomes
There are no course outcomes available

500-Level Graduate Courses (available to advanced undergraduates)

IP&T 514R : Special Topics in Instructional Psychology. (.5-3:ARR:0)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Topics vary. Topics may include technical applications, effective teaching, student assessment.

Course Outcomes
There are no course outcomes available

: Technical Applications.

Course Outcomes

: Effective Teaching.

Course Outcomes

: Student Assessment.

Course Outcomes

IP&T 515R : Special Topics in Instructional Psychology and Technology. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer Contact Department

Course Outcomes
- Students will develop understanding and competency in a specific area of instructional psychology and technology through focused learning of a topic.

: Evaluating Student Learning.

Course Outcomes

: Program Evaluation.

Course Outcomes

: Instructional Techniques in Teaching.

Course Outcomes

: Tutoring Children in Reading. (2:2:0)

Course Outcomes

: Scholarly Writing and Argumentation. (3:3:0)

Course Outcomes

IP&T 520 : Foundations of Instructional Technology. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Introduction to instructional psychology and technology theory and practice: psychological foundations of human performance technology and learning sciences. Current research issues, professional organization of the field, and ethical issues.

Course Outcomes
- Understand the current issues, discussions, research, and debates in this field as well as comparable sister professions.
- Understand the history of the field of Instructional Technology, including the various trends, people, and issues that shaped it.
- Clarify and define your own professional trajectory into your profession including your personal beliefs; the kind of career you are seeking; and the skills, knowledge, and characteristics you need to develop to be successful.
- Begin to develop skills in literature analysis and scholarly writing.
- Create an initial professional web presence that you can develop during your career.
- Begin defining for yourself what the future of our field is or may be, and what your role may be in that future.

IP&T 560 : Instructional Product Development. (3:3:ARR)

WHEN TAUGHT: Winter

DESCRIPTION: Designing, programming, and debugging a learning product using a high-level computer langauge.

Course Outcomes
- Students will design and develop an e-learning program using a technology of the student's choice.
- Students will build a personal learning environment
- Students will become part of an online community of learners.

IP&T 564 : Instructional Design. (3:3:ARR)

WHEN TAUGHT: Fall; Summer

DESCRIPTION: Identifying instructional problems; specifying objectives, instructional strategies, and media; analyzing learning outcomes; developing instructional materials and assessment instruments; validating instructional systems.

Course Outcomes

- Learn the design languages generally used in the IT field to describe the processes, products, theories, and principles of instructional development.
- Learn to perform process-oriented instructional design.
- Learn to perform architecture-oriented instructional design.
- Learn how to document designs.
- Learn the basic principle of how theory relates to instruction and gain exposure to the key principles of prominent current theories.
- Complete and document two design projects.

IP&T 599R : Academic Internship. (.5-6:0:18)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Departmental consent.

Course Outcomes

- Students will develop greater competency in research, evaluation, measurement, or design by performing professional work for a client.

Graduate Courses

For 600- and 700-level courses, see the BYU 2013–2014 Graduate Catalog.

Admission to Degree Program

Admission to programs in the Teacher Education Department is by department approval. Please see Education Student Services, 120 MCKB, for specific details.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Early Childhood Education (Program Outcomes)
BS in Elementary Education (Program Outcomes)
BS in Physical Education Teaching/Coaching (K–12) (Program Outcomes)

Minor in Coaching and Teaching Physical Education
Minor in TESOL K-12
Minor in Dual-Language Immersion K-12 Teaching

Students should see their college advisement center for help or information concerning the undergraduate programs.

Graduate Programs and Degrees

MA in Teacher Education

For more information see the BYU 2013–2014 Graduate Catalog.

Additional Educator License Endorsements

Additional endorsement may be acquired through completion of a teaching minor in addition to a teaching major.

See Education Student Services (120 MCKB) for further information.

Music Education: Elementary Music Specialist Emphasis

Students completing this major will receive a K-6 Elementary Education license with a Music Teaching endorsement. See the College of Fine Arts and Communications Advisement Center (D-444 HFAC) for music programs and course listings and Education Student Services (120 MCKB) for the education program.

Early Childhood Education

Admission to Degree Program

To begin the early childhood education (ECE) teacher preparation program, students must complete entrance process with the Teacher Education Department (201 MCKB). The entrance process includes but is not limited to the following:

1. Technology Skills Assessment (TSA).
2. FBI fingerprint and background clearance. Check with Education Student Services (120 MCKB) for instructions.
3. Approved graduation plan on file with Education Student Services (120 MCKB).
4. Departmental approval is required for deferment from the four-semester professional sequence.

Admission to this program requires departmental approval. Please see Education Student Services, 120 MCKB, for information regarding requirements for admission to this program.

FBI Fingerprint and Background Check

All candidates for teacher licensure are required by state statute to be fingerprinted and pass an FBI background check before participating in required field experiences. Fingerprints are taken in Education Student Services (ESS) in 120 MCKB. Contact the ESS for the schedule. Allow from five to six weeks for fingerprints to be processed. FBI background clearance is valid for only three years. If clearance expires before graduation, candidates must repeat the fingerprinting and clearance process, including a new fee payment.

Failing to expunge a police record resulting from a background check will result in a blocked registration while a panel reviews the charges. Candidates who cannot pass an FBI background check will be removed from the teacher education licensure program.

Additional Licensing Requirements

It is the student's responsibility to be sure that the approved Praxis test has been taken and passed, that BYU has received the test scores, that fingerprint background clearance is current prior to graduation, and that state licensing fees have been paid. Students will also be responsible for any additional requirements imposed by the state prior to their graduation. To confirm the status of these requirements contact Education Student Services, 120 MCKB, (801) 422-3426. Graduation and Utah licensure cannot be processed until these requirements have been completed.

GE Major Overlap

The following GE requirements will be fulfilled through completion of the Early Childhood Education major: Global & Cultural Awareness and Letters. More information on the GE/major overlap can be found at http://ge.byu.edu/ge/content/ge-major-overlap.

The Discipline

Early childhood education prepares teachers who, having gained their own liberal education, help preschool, kindergarten, and primary-grade children learn by improving the teaching children receive in the home, school, church, and community. Early childhood education helps students enhance their thinking abilities, build their confidence in exploring new ideas, and become self-motivated, independent learners.

In the program prospective teachers learn about the culture of young children, develop a solid foundation in basic principles of teaching and learning that originate in developmental theory and research, and become proficient in appropriately implementing those basic principles in practical settings.

Career Opportunities

A degree in early childhood education leads to licensure in kindergarten through grade three. See Education Student Services for details.

Hide All Course Descriptions

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements | View MAP | View Program Outcomes

To complete this major, students will also be required to complete the TESOL K-12 minor. The courses the student will need to take in order to complete the minor are reflected in the requirements listed below.

1. Complete all GE courses, including the following:
   SFL 210 : Human Development. (3:3:0)
   OFFERED: Independent Study also.
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.
   NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

   Course Outcomes
   - Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
   - Improve your writing and critical thinking skills.
   - Understand the research methodology utilized in the study of human development.

   Note: VAEdu 326: Art for Elementary Teachers is highly recommended. It fulfills requirement 7 below.

   Note: The Global & Cultural Awareness and Letters general education requirements are fulfilled through completion of the Early Childhood Education major.

2. Attend a program orientation meeting (schedule posted in 120 MCKB).

3. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

4. Complete entrance process for the program through the Teacher Education Department (201 MCKB).

5. Complete the following courses for the ECE K-3 major and TESOL K-12 minor:
   - Required courses for the ECE K-3 major:
     CPSE 300 : Exceptional Students: Principles of Collaboration. (2:1:ARR)
     WHEN TAUGHT: Fall; Winter; Spring
     PREREQUISITE: FBI fingerprint background clearance.
     DESCRIPTION: Basic principles and legislative issues in effectively communicating and collaborating with professionals, parents, and other service providers to meet needs of individuals with disabilities in inclusive educational environments. Lab.

     Course Outcomes
     - Analyze student's learning difficulties and plan appropriate accommodations.
     - Describe learning characteristics of special needs students.
     - Develop assessment plans to evaluate students' progress and collaborate with school experts to support student learning.
     - Collaboration: Candidates work effectively with parents, professionals, paraprofessionals, and others in the school and community to help students with disabilities achieve their IEP goals.
     - Interpersonal Relations: Candidates work with students, parents, professionals, paraprofessionals, and others in the school and community with kindness and respect regardless of their diverse backgrounds.
     - Professional Practice: Candidates fulfill all duties and assignments, comply with all education laws and policies, and continue to improve professional practice.

ECE 322 : Parenting and Child Guidance in Early Childhood. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 202

DESCRIPTION: Address young children's socio-emotional development in early childhood classrooms. Review theory and research to related peer interactions and parent-child and teacher-student relationships. Develop an understanding of instructional strategies and guidance practices in early childhood classrooms.

Course Outcomes
No outcomes are available at this time.

ECE 331 : Early Childhood Education Developmentally Appropriate Practices Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 202; ECE 332 concurrently.

DESCRIPTION: Designing an Early Childhood curriculum based on child development as hands-on experiences are created to meet children's individual learning needs and address contextual factors in the child's life experiences.

NOTE: Due to enrollment constraints, ECE 331 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.

Course Outcomes
There are no course outcomes available

ECE 332 : Early Childhood Education Developmentally Appropriate Practices Practicum. (3:0:8)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 202; ECE 331 concurrently.

DESCRIPTION: Intitial practicum with young children in designing an Early Childhood curriculum based on a knowledge of child development that meets children's individual learning needs and address contextual factors in the child's life experience.

NOTE: Due to enrollment constraints, ECE 332 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.

Course Outcomes
There are no course outcomes available

ECE 336 : Planning and Assessment in Early Childhood Education (Pre K-3). (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECE 331 and 332 concurrently.

DESCRIPTION: Learn key instructional principles, instructional strategies, lesson planning procedures that are appropriate and effective when working with young children. Understand formal and informal assessment strategies and data collection procedures for evaluating children's progress, informing instruction, communicating results with key stakeholders.

Course Outcomes
There are no course outcomes available

ECE 337 : Family, School, and Community Partnerships in ECE. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ECE 331 and ECE 332.

DESCRIPTION: Understand policies and processes for partnering with families, schools, and communities of young children in early childhood settings.

Course Outcomes
No outcomes are available at this time.

ECE 433 : Teaching Literacy in Early Childhood Classrooms (Pre K-3). (2-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Admittance to ECE program; concurrent enrollment in ECE 441 and 442.

DESCRIPTION: Study instructional practices for teaching children the literacy concepts, skills and strategies they need to learn in Pre K-3rd grade, and assessing, monitoring and evaluating children's literacy knowledge and learning in Pre K-3rd grade.

Course Outcomes
There are no course outcomes available

ECE 441 : Early Childhood Education Primary Grade Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECE 331; Concurrent with ECE 442.

DESCRIPTION: Gaining insight into significant issues in early childhood education, developing a sense of professional ethics, and becoming personally committed to ongoing professional development.

Course Outcomes
There are no course outcomes available

ECE 442 : Primary Grade Practicum. (2:0:12)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECE 332; ECE 441 concurrently.

DESCRIPTION: Practicum experience in the primary grades. Field experience designed to give students opportunities to interact with primary children (grades 1-3) and apply skills and knowledge acquired in Pre K-3 methods courses.

Course Outcomes
There are no course outcomes available

ECE 445 : Teaching Social Studies in Early Childhood Classrooms (Pre K-3). (2-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in ECE 441 and 442.

DESCRIPTION: This course will prepare teaching candidates (1) with methods, skills and strategies for teaching social studies to children in grades Pre K-3, (2) to model democratic teaching practices, and (3) to establish democratic classroomsas they prepare children to assume roles as participatory citizens in a democracy.

Course Outcomes
There are no course outcomes available

ECE 446 : Teaching Science in Early Childhood Classrooms (Pre K-3). (2-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in ECE 441 and 442.

DESCRIPTION: Develop the pedagogical knowledge, skills, and dispositions necessary to teach science to young children of various ages, abilities, backgrounds, and exceptionalities.

Course Outcomes
There are no course outcomes available

ECE 447 : Teaching Mathematics in Early Childhood Classrooms (Pre K-3). (2-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MTHED 305; ECE 441 and 442 concurrent.

DESCRIPTION: Study the teaching and learning of early childhood mathematics guided by current principles relating to mathematics content, social interaction, student thinking, and child development.

Course Outcomes
There are no course outcomes available

EL ED 202 : Foundations of Child Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Major status.

DESCRIPTION: The development of the whole child including cognitive, social, emotional, linguistic, and physical development and how to apply it to planning, teaching, and assessing children.

Course Outcomes
- The candidate will demonstrate knowledge of social, cognitive and physical development of children ages birth to 12.
- The candidate will understand how the knowledge of child development will impact instructional practices in the school classroom.

EL ED 203 : Foundations of Multicultural Education. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Major status.

DESCRIPTION: Cultural identities in family life, physical attributes, culture, and language. Recognizing prejudice in individuals and institutions. Culturally and linguistically relevant pedagogical frameworks.

Course Outcomes
- Examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavior.
- Recognize and use a moral spiritual framework and the social science theoretical framework to guide multicultural and English language learner education.
- Recognize and acknowledge racism and discrimination in themselves, in others, and within institutions.
- Acknowledge the dynamics of how culture effects students' language learning and school success and teachers' teaching.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.

- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.

EL ED 323 : Foundations of Literacy Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Admittance into elementary education program.

DESCRIPTION: Language and literacy development for first and second language learners including theoretical underpinnings, processes, historical foundations, and instructional contexts that support language and literacy development for all K-6 children.

Course Outcomes

- Explain, compare and critique theories of reading and writing processes and development with supporting research evidence. (IRA Standard 1.1.1)
- Explain and apply first language acquisition processes that support literacy development across elementary years, e.g., cueing systems, vocabulary, teacher talk). (IRA Standard 1.1.2)
- Explain, apply, and compare/contrast knowedge about second language literacy development in context. (IRA Standard 1.1.3 & NCTE Standard 9)
- Explain and apply reading and writing development across elementary years, e.g., word recognition, language comprehension, strategic knowledge, spelling, qualities of good writing, and reading/writing connections. (IRA Standard 1.1.2)
- Identify and synthesize major milestones in literacy instruction.(IRA Standard 1.2.1)

EL ED 335 : Early Childhood Education Integration Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in El Ed 332.

DESCRIPTION: Methods in designing an early childhood curriculum with attention to hands-on experiences meeting children's individual learning needs and addressing contextual factors in the child's life experiences.

Course Outcomes

- a) understanding young childrenâ s characteristics and needs, including issues of diversity, and complex characteristics of families b) understanding effective and appropriate methods for supporting young childrenâ s growth and development in a classroom setting c) knowledge of K-3 instructional and assessment strategies in content areas (literacy, math, science, social studies, arts), d) understanding purposes and application of curriculum integration

EL ED 340 : Children's Literature. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Elementary education or early childhood education major status.

DESCRIPTION: Trends and titles in children's and adolescent literature. Reading and critiquing as well as practical uses of children's literature in both school and home.

Course Outcomes

- 1. Students will understand and apply criteria in evaluating children's books for quality and function.
- 2. Students will gain a knowledge base concerning the field of children's literature as contained in the assigned textbook and class lectures.

IP&T 334 : Integrating Technology in Early Childhood Education. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent with El Ed 333.

DESCRIPTION: Integrating instructional technology with early childhood ecuation instructional strategies.

Course Outcomes

- Students will increase their familiarity with and ability to use a wide range of educational technologies.
- Students will develop positive dispositions towards using educational technologies that can help improve student learning.
- Student will strengthen their knowledge of ways to use technology in teaching math and literacy that lead to improved effectiveness, engagement, and/or efficiency.
- Students will practice their technology integration skills in real-world early childhood elementary level settings and learn to evaluate the strengths and weaknesses of their performance.
- Students will follow fairuse guidelines as they incorporate digital media into their teaching.

MTHED 305 : Basic Concepts of Mathematics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Math 110 or equivalent; permission from Teacher Education Department.

DESCRIPTION: Concept-oriented exploration of number, measurement, and informal geometry in relation to children's learning.

NOTE: Required of prospective elementary school teachers.

Course Outcomes

- Students have a deep understanding of central concepts in elementary school mathematics related to whole numbers and whole number operations, number theory, integers and integer operations, geometry, and measurement; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.
- Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to

make inferences about how children experience and understand mathematics.
- Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 305 classroom to make inferences about teaching practices that help children learn mathematics.

MUSIC 378 : Music for the Elementary Classroom Teacher. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Establishing a classroom environment for musical development; emphasis on appropriate songs, activities, resources, and teaching strategies.

Course Outcomes
- Students will acquire personal musicianship skills applied to knowledge of age-appropriate musical activities, materials and delivery techniques for grades K–6.
- Students will acquire personal musicianship skills applied to knowledge of age-appropriate musical activities, materials and delivery techniques for grades K–6.

SFL 352 : Cognitive Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.

DESCRIPTION: Development of mental abilities; effects of maturation and learning on memory, perception, attention processes, intelligence, social cognition.

Course Outcomes
- Critically examine and discuss selected topics in cognitive development.Identify and discuss selected theories and theoretical models of cognitive development, as well as the various research methods used in the study of cognitive develop. Understand how cognitive development changes throughout life span.
- Evaluate in empirical research studies a specific topic in cognitive development and synthesize in each study the research questions, methodology, findings, and discussions of the findings.
- Succinctly summarize in writing a collection of empirical studies on a topic in cognitive development of your interest.

SFL 355 : Language Development. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Philosophical, social, intellectual, and emotional contexts of language acquisition and usage.

Course Outcomes
There are no course outcomes available

- Required courses for the TESOL K-12 minor:

TELL 410 : Second Language Acquisition. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: EL ED 323 & EL ED 203; or ELANG 223 & SC ED 353; or CPSE 425

DESCRIPTION: Processes and variables in native- and second-language development. How teachers can foster efficient acquisition of language, cognitive, and academic skills in second-language environments.

Course Outcomes
- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas

TELL 420 : Assessing Linguistically Diverse Students. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ELANG 223 & SC ED 353; or EL ED 203

DESCRIPTION: Fundamental concepts in testing, use/interpretation of current instruments for language/academic assessment, appropriate placement of linguistically diverse students, and developing classroom language assessments.

Course Outcomes
- Candidates will know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.
- Candidates will demonstrate understanding of issues and concepts of assessment and use standards-based procedures with ELLs.

TELL 440 : Content-Based Language Instruction. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: TELL 410 & TELL 420; or TELL 410 & IP&T 213; or TELL 410 & CPSE 420

RECOMMENDED: El Ed 333, TELL 430, and CPSE 430 concurrently.

DESCRIPTION: Instructional methods, strategies, and materials for integrating curriculum content and language instruction. Teaching, creating, and adapting lesson materials in a multicultural

context.

Course Outcomes
- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.

TELL 477R : Practicum for Teaching English Language Learners. (.5-4:0:4)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: TELL 440; FBI fingerprint background clearance.
DESCRIPTION: Practicum in teaching English to second-language learners.
NOTE: Can be taken concurrently with student teaching/internship in a diverse-language setting.

Course Outcomes
- Candidates know, understand, and use major concepts, principles, theories, and research related to the nature and role of culture and cultural groups to construct supportive learning environments for ELLs.
- Candidates will use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas in public school settings.

(Must take 4 credit hours of TELL 477R.)

6. Complete one course from the following:

SFL 331 : Infant Development in the Family. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
DESCRIPTION: Conception, prenatal development, pregnancy. Physical, cognitive, and social development of the first twenty-four months. Implications for guidance and care in the family.

Course Outcomes
There are no course outcomes available

SFL 351 : Socialization Across Childhood. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
DESCRIPTION: Processes and sequences of social development across childhood.

Course Outcomes
There are no course outcomes available

SFL 420 : Administering Programs for Young Children. (2:2:0)
WHEN TAUGHT: Contact Department.
PREREQUISITE: SFL 222
DESCRIPTION: Strategies for planning and administering quality programs in settings for young children. Budgeting, staffing, accrediting, selecting equipment, etc.

Course Outcomes
- Demonstrate how to operationalize appropriate curriculum based on your understanding of development and be able to critically design early childhood programs.Plan the physical environment including financing and budgeting of an early childhood program.Obtain information and guidelines on nutrition, health, and safety services for young children.
- Develop strategies for assessing, recording, and reporting children's progress as well as evaluating the overall effectiveness of the program.Critically evaluate ways to contribute to the profession by addressing the individual needs of the families; influencing public policy; and becoming involved in research.

7. Complete one course from the following:

DANCE 326 : Rhythm and Dance. (2:1:2)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Methodology course for elementary education majors; creative dance and structured rhythmic dance forms.

Course Outcomes
- Students will identify the value of dance in the elementary setting, including the following benefits:· Decision making skills· Confidence and self-expression· Cultural perspective· Collaboration and social skills· Physical skills and kinesthetic learning· Accessibility for a diverse population· Recreation and fun
- Students will demonstrate sound dance methodology, including:· Teaching structured dance forms· Leading the creative process· Clear verbalization of directions, cues, side-coaching, and feedback
- Students will identify various dance teaching resources that enrich the curriculum, including:· State Core Curriculum· National Standards· Music resources
- Students will increase knowledge and develop skills in the dance discipline, including:· The elements of dance: space, motion, time, energy· Problem solving through movement· Choreographic skills
- Students will identify age appropriate material and pedagogy that address the needs of the wide age span of elementary students.

Students will identify ways to incorporate dance into school-wide projects that create community, including dance festivals and performances.

TMA 352 : Drama in the Elementary Classroom. (2:4:Arr)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Theatre education major status: TMA 101 or 102; TMA 276. Or early childhood education or elementary education major status. Or instructor's consent.
DESCRIPTION: Varied teaching methodologies for application of drama within the pre-K--6 classroom. Dual emphasis on Utah state elementary drama standards as well as integration with core curricula.

Course Outcomes
There are no course outcomes available

VAEDU 326 : Art for Elementary Teachers. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Preservice preparation designed to help elementary classroom teachers understand the visual arts and develop skills necessary for implementing a discipline-based approach for art education.

Course Outcomes
There are no course outcomes available

8. Complete 8 hours of one of the following (prior application required):

ECE 425 : Grades 1-3 Student Teaching. (6-12:Arr:Arr)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: All ECE core and professional sequence courses; concurrent enrollment in ECE 426; prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (ECE 324, 327, 356, 361, 363, 365); FBI fingerprint background clearance.
DESCRIPTION: Student teaching experience in the primary grades.

Course Outcomes
- 1. The students will observe, plan, teach, assess, and reflect throughout this course as they participate in a primary grade classroom.
- The student will demonstrate ability to be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

EL ED 496R : Academic Internship. (8-12:ARR:ARR)

WHEN TAUGHT: Fall
PREREQUISITE: Three-semester professional sequence and prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (El Ed 302, 356, 357, 361, 363, 365, 372).
DESCRIPTION: A full-year classroom teaching internship in the public schools in lieu of El Ed 400, student teaching.
NOTE: See Education Student Services for application dates.

Course Outcomes
There are no course outcomes available

Recommended Courses

The following courses are strongly recommended:

BIO 175 : Principles of Biology Laboratory. (1:0:2)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: Elementary education or early childhood education pre-major or major status; concurrent enrollment in Bio 100.

Course Outcomes
There are no course outcomes available

ENGL 313 : Expository Writing for Elementary Education Majors. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: First-year writing, junior or senior status.
DESCRIPTION: Learning to write as professional educators and to teach writing to children. Best taken before the professional sequence. Library research paper.
NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes
There are no course outcomes available

GEOG 120 : Geography and World Affairs. (3:3:0)

OFFERED: Honors also. Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Survey of the world, stressing geography of major political regions.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

HLTH 361 : School Health for Elementary Teachers. (2:2:0)

DESCRIPTION: Preparing for the role as a health educator, emphasizing skill-based teaching methods and acquisition of teaching resources.

Course Outcomes

- 1. Students will demonstrate a sound understanding of health education content included in the Utah State Core Curriculum.
- 1. Students will integrate the Utah State Core Curriculum for elementary health instruction into their 9-month teaching calendar.
- 1. Students will demonstrate a variety of methods for teaching the Utah State Core Curriculum for elementary health instruction.
- 1. Students will apply key health education practices and principles.

MTHED 306 : Concepts of Mathematics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: MTHED 305; Permission from Teacher Education Department.

DESCRIPTION: Concept-oriented exploration of rational numbers and proportional reasoning, probability, and early algebraic reasoning in relation to children's learning.

NOTE: Required of prospective elementary school teachers.

Course Outcomes

- Students have a deep understanding of central concepts in elementary school mathematics related to fractions and fraction operations, probability, and early algebraic reasoning; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.
- Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 306 classroom to make inferences about teaching practices that help children learn mathematics.
- Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

300-Level Courses

ECE 322 : Parenting and Child Guidance in Early Childhood. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 202

DESCRIPTION: Address young children's socio-emotional development in early childhood classrooms. Review theory and research to related peer interactions and parent-child and teacher-student relationships. Develop an understanding of instructional strategies and guidance practices in early childhood classrooms.

Course Outcomes
No outcomes are available at this time.

ECE 323 : Integrated Curriculum in Programs for Young Children. (2:2:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Admittance to either ECE or El Ed licensing programs. Dual majors, please see advisor.

DESCRIPTION: Implementing integrated learning experiences in dance, music, drama, and visual art for the very young, including importance of home, family, and environments on child's aesthetic growth.

Course Outcomes

- 2. The student will understand the cognitive processes associated with various kinds of learning (e.g., critical and creative thinking, problem structuring and problem solving, invention, memorization and recall).
- 1. The student will recognize the significance of factors that impact children's learning and development
- 3. The student will understand how an integrated curriculum not only addresses children's cognitive development but how social and emotional development is also incorporated into learning activities.
- 4. The student will know how to integrate the parents and family into the curriculum.
- 5. The student will become aware of the principles and techniques along with advantages and limitations associated with various instructional strategies (e.g., cooperative learning, direct instruction, discovery learning, whole group instruction, independent study and interdisciplinary instruction).
- 6. The student will become familiar with the value and use of national and state curriculum standards in developing curriculum.
- 7. The student will evaluate teaching resources and curriculum materials for usefulness, relevance and appropriateness in teaching ideas and concepts to young children and develop integrated learning activities (e.g., activity enhancers, learning centers, thematic activities, literature extensions, etc.).
- 8. The student will know how to enhance learning through the use of a wide variety of materials as well as human and technological resources (e.g., computers, audiovisual technologies, videotapes and discs,local experts, primary documents and artifacts, texts, reference books, literature and other printresources).
- 9. The student will create developmentally appropriate learning experiences using integrated curriculum strategies (e.g., project work, curriculum mapping) that encourage and allow children tointegrate knowledge, skills and methods of inquiry from several subject areas and thatmaximize student progress.
- 10. The student will create culturally appropriate learning experiences for children utilizing integrated curriculum strategies. Understand the importance of a multicultural and anti-bias curriculum.

ECE 324 : Planning and Management. (2:2:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Admittance to ECE program.

DESCRIPTION: Learning principles, lesson planning, classroom atmosphere, classroom management, professional attitudes and practices.

Course Outcomes

- 1. The student will understand and use a variety of instructional strategies to encourage students' development of critical thinking, problem solving, and performance skills.
- 3. Students will foster relationships with school colleagues, parents, and agencies in the larger community to support students; learning and well being.
- 2. Students will identify, demonstrate, and synthesize multiple qualities of effective child guidance.

ECE 327 : Assessment and Action Research in Early Childhood Programs. (2:2:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Admittance to ECE program.

DESCRIPTION: Formal and informal assessment strategies and data collection procedures for evaluating children's progress; programs to enhance learning, individualize instruction, and communicate with others.

Course Outcomes

- 2. The student will understand the characteristics, uses, advantages, and limitations of different types of assessments.
- 1. The student will understand major concepts, conditions, and assumptions central to assessment.
- 3. The student will select, construct, and use assessment strategies and instruments appropriate to learning outcomes being evaluated and to other diagnostic purposes.
- 4. The student will understand measurement theory and assessment-related issues, such as validity, reliability, bias and scoring concerns.
- 5. The student will recognize the importance of culturally and developmentally relevant assessment
- 5. The student will appropriately use a variety of formal and informal assessment techniques to enhance his or her knowledge of learners, evaluate students' progress and performances and modify teaching and learning strategies.
- 6. The student will use assessment strategies to involve learners in self assessment activities and, when appropriate, to help them become aware of their strengths and needs and to encourage them to set personal goals.
- 7. The student will evaluate the effect of class activities on both individuals and the class as a whole, collecting information through observation of classroom interactions, questioning and analysis of student work.
- 8. The student will know how to maintain useful records of student work and performance and will communicate student progress knowledgeably and responsibly.
- Students will know about communicating regarding assessments with parents and professionals in a manner that develops partnerships and demonstrates professionalism.

ECE 331 : Early Childhood Education Developmentally Appropriate Practices Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 202; ECE 332 concurrently.

DESCRIPTION: Designing an Early Childhood curriculum based on child development as hands-on experiences are created to meet children's individual learning needs and address contextual factors in the child's life experiences.

NOTE: Due to enrollment constraints, ECE 331 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.

Course Outcomes

There are no course outcomes available

ECE 332 : Early Childhood Education Developmentally Appropriate Practices Practicum. (3:0:8)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 202; ECE 331 concurrently.

DESCRIPTION: Intitial practicum with young children in designing an Early Childhood curriculum based on a knowledge of child development that meets children's individual learning needs and address contextual factors in the child's life experience.

NOTE: Due to enrollment constraints, ECE 332 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.

Course Outcomes

There are no course outcomes available

ECE 336 : Planning and Assessment in Early Childhood Education (Pre K-3). (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECE 331 and 332 concurrently.

DESCRIPTION: Learn key instructional principles, instructional strategies, lesson planning procedures that are appropriate and effective when working with young children. Understand formal and informal assessment strategies and data collection procedures for evaluating children's progress, informing instruction, communicating results with key stakeholders.

Course Outcomes

There are no course outcomes available

ECE 337 : Family, School, and Community Partnerships in ECE. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ECE 331 and ECE 332.

DESCRIPTION: Understand policies and processes for partnering with families, schools, and communities of young children in early childhood settings.

Course Outcomes

No outcomes are available at this time.

ECE 353 : Emergent Literacy. (2:2:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: SFL 355 or equivalent.

DESCRIPTION: Issues, themes, and practices of literacy instruction for young children (P-3).

Course Outcomes

- Explain, compare, and critique theories of reading and writing processes and development with supporting research evidence. (IRA Standard 1.1.1)

- Explain and apply first language acquisition processes that support literacy development across elementary years, e.g., cueing systems, vocabulary, teacher talk. (IRA Standard 1.1.2)
- Explain and apply reading and writing development across elementary years, e.g., word recognition, language comprehension, strategic knowledge, spelling, qualities of good writing, and reading/writing connections. (IRA Standard 1.1.2)
- Identify and synthesize major milestones in literacy instruction.(IRA Standard 1.2.1)
- Identify and synthesize major milestones in literacy instruction.(IRA Standard 1.2.1)

400-Level Courses

ECE 422 : Preschool or Kindergarten Student Teaching. (6:0:6.0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: All ECE core and professional sequence courses; concurrent enrollment in ECE 426; prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (ECE 324, 327, 356, 361, 363, 365); FBI fingerprint background clearance.

DESCRIPTION: Student teaching experience in preschool or kindergarten.

Course Outcomes
- 2. The student will demonstrate ability to be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.
- 1. The students will observe, plan, teach, assess, and reflect throughout this course as they participate in a PK or K classroom.

ECE 425 : Grades 1-3 Student Teaching. (6-12:Arr:Arr)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: All ECE core and professional sequence courses; concurrent enrollment in ECE 426; prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (ECE 324, 327, 356, 361, 363, 365); FBI fingerprint background clearance.

DESCRIPTION: Student teaching experience in the primary grades.

Course Outcomes
- 1. The students will observe, plan, teach, assess, and reflect throughout this course as they participate in a primary grade classroom.
- The student will demonstrate ability to be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

ECE 427 : El Ed/ECE Emphasis Capstone Seminar. (.5:1:0)

PREREQUISITE: El Ed majors with an ECE emphasis; concurrent enrollment in ECE student teaching practicum block.

DESCRIPTION: Gaining insight into significant issues in early childhood education, developing a sense of professional ethics, and becoming personally committed to ongoing professional development.

Course Outcomes
- The student will be reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.
- The student will foster relationships with school colleagues, parents, and agencies in the larger community to support students' learning and well-being.

ECE 433 : Teaching Literacy in Early Childhood Classrooms (Pre K-3). (2-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Admittance to ECE program; concurrent enrollment in ECE 441 and 442.

DESCRIPTION: Study instructional practices for teaching children the literacy concepts, skills and strategies they need to learn in Pre K-3rd grade, and assessing, monitoring and evaluating children's literacy knowledge and learning in Pre K-3rd grade.

Course Outcomes
There are no course outcomes available

ECE 441 : Early Childhood Education Primary Grade Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECE 331; Concurrent with ECE 442.

DESCRIPTION: Gaining insight into significant issues in early childhood education, developing a sense of professional ethics, and becoming personally committed to ongoing professional development.

Course Outcomes
There are no course outcomes available

ECE 442 : Primary Grade Practicum. (2:0:12)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ECE 332; ECE 441 concurrently.

DESCRIPTION: Practicum experience in the primary grades. Field experience designed to give students opportunities to interact with primary children (grades 1-3) and apply skills and knowledge acquired in Pre K-3 methods courses.

Course Outcomes
There are no course outcomes available

ECE 445 : Teaching Social Studies in Early Childhood Classrooms (Pre K-3). (2-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in ECE 441 and 442.

DESCRIPTION: This course will prepare teaching candidates (1) with methods, skills and strategies for teaching social studies to children in grades Pre K-3, (2) to model democratic teaching practices, and (3) to establish democratic classroomsas they prepare children to assume roles as participatory citizens in a democracy.

Course Outcomes
There are no course outcomes available

ECE 446 : Teaching Science in Early Childhood Classrooms (Pre K-3). (2-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in ECE 441 and 442.

DESCRIPTION: Develop the pedagogical knowledge, skills, and dispositions necessary to teach science to young children of various ages, abilities, backgrounds, and exceptionalities.

Course Outcomes
There are no course outcomes available

ECE 447 : Teaching Mathematics in Early Childhood Classrooms (Pre K-3). (2-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MTHED 305; ECE 441 and 442 concurrent.

DESCRIPTION: Study the teaching and learning of early childhood mathematics guided by current principles relating to mathematics content, social interaction, student thinking, and child development.

Course Outcomes
There are no course outcomes available

ECE 493R : Independent Readings or Project. (.5-4:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Departmental approval.

Course Outcomes
- Students will demonstrate an advanced level of knowledge in a chosen specialty area.
- Students will explain relationships between key concepts in a specialty area.

ECE 496R : Academic Internship. (12:0:0)

WHEN TAUGHT: Fall

PREREQUISITE: Three-semester professional sequence and prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (ECE 324, 327, 356, 361, 363, 365); FBI fingerprint background clearance.

DESCRIPTION: A full-year classroom teaching internship in the public schools.

NOTE: See Education Student Services for application dates.

Course Outcomes
- 1. The students will observe, plan, teach, assess, and reflect throughout this course as they participate in an early childhood classroom.
- 2. The student will demonstrate ability to be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

Admission to Degree Program

To begin the elementary education teacher preparation program students must complete the entrance process with the Teacher Education Department (201 MCKB). Students must attend an orientation meeting held by Education Student Services prior to completing entrance process.

The entrance process includes but is not limited to the following:

1. Technology Skills Assessment (TSA).
2. FBI fingerprint and background clearance. See Education Student Services (120 MCKB) for instructions.
3. Departmental approval is required for deferment from the professional sequence.
4. Approved graduation plan on file with Education Student Services.

FBI Fingerprint and Background Check

All candidates for teacher licensure are required by state statute to be fingerprinted and pass an FBI background check before participating in required field experiences. Fingerprints are taken in Education Student Services (ESS) in 120 MCKB. Contact the ESS for the schedule. Allow from five to six weeks for fingerprints to be processed. FBI background clearance is valid for only three years. If clearance expires before graduation, candidates must repeat the fingerprinting and clearance process, including a new fee payment.

Failing to expunge a police record prior to the background check may result in a blocked registration while a panel reviews the charges. Candidates who cannot pass an FBI background check will be removed from the teacher education licensure program.

Additional Licensing Requirements

It is the student's responsibility to be sure that the approved Praxis test has been taken and passed, that BYU has received the test scores, that fingerprint background clearance is current prior to graduation, and that state licensing fees have been paid. Students will also be responsible for any additional requirements imposed by the state prior to their graduation. To confirm the status of these requirements contact Education Student Services, 120 MCKB, (801) 422-3426. Graduation and Utah licensure cannot be processed until these requirements have been completed.

GE Major Overlap

The following GE requirements will be fulfilled through completion of the Elementary Education major: Global & Cultural Awareness and Letters. More information on the GE/major overlap can be found at http://ge.byu.edu/ge/content/ge-major-overlap.

The Discipline

Elementary education prepares teachers who, having gained their own liberal education, help elementary school children learn by improving the teaching children receive in the home, school, church, and community. Elementary education helps students enhance their thinking abilities, build their confidence in exploring new ideas, and become self-motivated, independent learners.

In the program prospective teachers learn about the culture of the elementary school, develop a solid foundation in basic principles of teaching and learning that originate in educational theory and research, and become proficient in systematically applying those basic principles in practical settings.

Career Opportunities

A degree in elementary education leads to a K-6 educator licensure, providing opportunities for teaching in elementary schools. The TESOL K-12 minor is a required component of this major and will lead to an ESL endorsement in the State of Utah.

Show All Course Descriptions
Hide All Course Descriptions

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements | View MAP | View Program Outcomes

To complete this major, students will also be required to complete the TESOL K-12 minor. The courses the student will need to take in order to complete the minor are reflected in the requirements listed below.

1. Complete all GE courses, including the following:

   SFL 210 : Human Development. (3:3:0)

   OFFERED: Independent Study also.
   WHEN TAUGHT: Fall; Winter; Spring; Summer
   DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.
   NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

   Course Outcomes
   - Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
   - Improve your writing and critical thinking skills.
   - Understand the research methodology utilized in the study of human development.

   Note: The Global & Cultural Awareness and Letters general education requirements are fulfilled through completion of the Elementary Education major.

2. Attend a program orientation meeting (schedule posted in 120 MCKB).

3. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

4. Complete entrance process for the program through the Teacher Education Department (201 MCKB).

5. Complete the following courses:

   CPSE 300 : Exceptional Students: Principles of Collaboration. (2:1:ARR)

   WHEN TAUGHT: Fall; Winter; Spring
   PREREQUISITE: FBI fingerprint background clearance.
   DESCRIPTION: Basic principles and legislative issues in effectively communicating and collaborating with professionals, parents, and other service providers to meet needs of individuals with disabilities in inclusive educational environments. Lab.

   Course Outcomes
   - Analyze student's learning difficulties and plan appropriate accommodations.
   - Describe learning characteristics of special needs students.
   - Develop assessment plans to evaluate students' progress and collaborate with school experts to support student learning.
   - Collaboration: Candidates work effectively with parents, professionals, paraprofessionals, and others in the school and community to help students with disabilities achieve their IEP goals.
   - Interpersonal Relations: Candidates work with students, parents, professionals, paraprofessionals, and others in the school and community with kindness and respect regardless of their diverse backgrounds.
   - Professional Practice: Candidates fulfill all duties and assignments, comply with all education laws and policies, and continue to improve professional practice.

   EDLF 201 : Foundations of Education. (3:3:0)

   WHEN TAUGHT: Fall; Winter; Spring; Summer
   DESCRIPTION: The purposes of education and schooling in a democracy and the historical, cultural, philosophical,

and sociological foundations underlying the development of the American educational system.

Course Outcomes
- Be exposed to the major philosophical, historical, and sociological movements in Western education.
- Confront central issues and contexts of education, e.g., the nature of man, external structure & individual freedom, wealth & poverty, school & family, alternative delivery systems, school & democracy, school & law, religion & education, etc.
- Develop and articulate their own views of education and connect these views to their future professional practice.
- Examine the moral dimensions of education including access to knowledge, providing nurturing pedagogy, stewardship of schools, and perpetuating our political democracy.

EL ED 202 : Foundations of Child Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Major status.

DESCRIPTION: The development of the whole child including cognitive, social, emotional, linguistic, and physical development and how to apply it to planning, teaching, and assessing children.

Course Outcomes
- The candidate will demonstrate knowledge of social, cognitive and physical development of children ages birth to 12.
- The candidate will understand how the knowledge of child development will impact instructional practices in the school classroom.

EL ED 203 : Foundations of Multicultural Education. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Major status.

DESCRIPTION: Cultural identities in family life, physical attributes, culture, and language. Recognizing prejudice in individuals and institutions. Culturally and linguistically relevant pedagogical frameworks.

Course Outcomes
- Examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavior.
- Recognize and use a moral spiritual framework and the social science theoretical framework to guide multicultural and English language learner education.
- Recognize and acknowledge racism and discrimination in themselves, in others, and within institutions.
- Acknowledge the dynamics of how culture effects students' language learning and school success and teachers' teaching.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.

EL ED 211 : Introductory Framing Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in PETE 212.

DESCRIPTION: Develop as reflective practitioners who integrate foundational knowledge of teaching with the practice of teaching. Continually evaluate the effects of their choices and actions on students, parents, and other professionals in the learning community.

Course Outcomes
There are no course outcomes available

EL ED 323 : Foundations of Literacy Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Admittance into elementary education program.

DESCRIPTION: Language and literacy development for first and second language learners including theoretical underpinnings, processes, historical foundations, and instructional contexts that support language and literacy development for all K-6 children.

Course Outcomes
- Explain, compare and critique theories of reading and writing processes and development with supporting research evidence. (IRA Standard 1.1.1)
- Explain and apply first language acquisition processes that support literacy development across elementary years, e.g., cueing systems, vocabulary, teacher talk). (IRA Standard 1.1.2)
- Explain, apply, and compare/contrast knowedge about second language literacy development in context. (IRA Standard 1.1.3 & NCTE Standard 9)
- Explain and apply reading and writing development across elementary years, e.g., word recognition, language comprehension, strategic knowledge, spelling, qualities of good writing, and reading/writing connections. (IRA Standard 1.1.2)
- Identify and synthesize major milestones in literacy instruction.(IRA Standard 1.2.1)

EL ED 324 : Foundations of Classroom Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Exploring philosophies of classroom management focusing on promoting child guidance in an engaging and effective K-6 classroom learning environment.

Course Outcomes

- Upon completion of this course, students will be able to compare and contrast various theories and approaches to classroom management, describe ways to prevent management problems, describe practical approaches for addressing problems that arise, and identify approaches that align with the vision of the McKay School of Education.
- Upon completion of this course, students will be able to describe and justify necessary components of an effective learning environment, including, but not limited to, aspects related to physical space, academic approaches, and the social/emotional environment.
- Upon completion of this course, students will formulate a personal philosophy statement describing their approach to management and the learning environment which includes expectations and responsibilities of both the teacher and of the students.

EL ED 330 : K-2 Practicum Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 211; Concurrent enrollment in El Ed 332.

DESCRIPTION: Prepare for and reflect on the K-2 practicum experience.

Course Outcomes

There are no course outcomes available

EL ED 331 : Grades K-2 Framing Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 211; Concurrent enrollment in El Ed 332.

DESCRIPTION: Develop as reflective practitioners who continually integrate foundations of teaching with the practice of teaching in Grades K-2. Evaluate the effects of their choices and actions on students, parents, and other professionals in the learning community.

Course Outcomes

- Teacher candidates will identify and practice professionalism in their interactions with peers, professors, students, and others.
- Teacher candidates will identify and experience collaborative strategies in this course and other educational settings.

EL ED 332 : Practicum in Grades K-2. (2:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 324; concurrent enrollment in El Ed 330 & 331; FBI fingerprint and background clearance.

DESCRIPTION: Applying knowledge from foundational and content courses to teaching in a K-2 setting. Observing, planning, teaching, assessing, and reflecting in a public school setting.

Course Outcomes

There are no course outcomes available

EL ED 333 : Teaching Literacy in the Primary Grades (K-2). (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 323; Concurrent enrollment in El Ed 332.

DESCRIPTION: Instructional practices for teaching children the literacy concepts, skills, and strategies they need to learn in grades K-2. Assessing, monitoring, and evaluating children's literacy knowledge and learning in grades K-2.

Course Outcomes

There are no course outcomes available

EL ED 335 : Early Childhood Education Integration Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in El Ed 332.

DESCRIPTION: Methods in designing an early childhood curriculum with attention to hands-on experiences meeting children's individual learning needs and addressing contextual factors in the child's life experiences.

Course Outcomes

- a) understanding young childrenâ s characteristics and needs, including issues of diversity, and complex characteristics of families b) understanding effective and appropriate methods for supporting young childrenâ s growth and development in a classroom setting c) knowledge of K-3 instructional and assessment strategies in content areas (literacy, math, science, social studies, arts), d) understanding purposes and application of curriculum integration

EL ED 340 : Children's Literature. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Elementary education or early childhood education major status.

DESCRIPTION: Trends and titles in children's and adolescent literature. Reading and critiquing as well as practical uses of children's literature in both school and home.

Course Outcomes

- 1. Students will understand and apply criteria in evaluating children's books for quality and function.

2. Students will gain a knowledge base concerning the field of children's literature as contained in the assigned textbook and class lectures.

EL ED 440 : Grades 3-6 Practicum Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 332; concurrent with El Ed 442; FBI fingerprint and background clearance.

DESCRIPTION: Prepare for and reflect on the 3-6 practicum experience.

Course Outcomes
There are no course outcomes available

EL ED 441 : Grades 3-6 Framing Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 331; Concurrent enrollment in El Ed 442.

DESCRIPTION: Develop as reflective practitioners who integrate foundational knowledge of teaching with the practice of teaching in grades 3-6. Continually evaluate the effects of their choices and actions on students, parents, and other professionals in the learning community.

Course Outcomes
There are no course outcomes available

EL ED 442 : Practicum in the Elementary Education 3-6 Classroom. (2:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 332; Concurrent enrollment in El Ed 440.

DESCRIPTION: Applying knowledge from foundational and content courses to teaching in a 3-6 classroom. Observing, planning, teaching, assessing, and reflecting in a 3-6 public school setting.

Course Outcomes
There are no course outcomes available

EL ED 443 : Teaching Literacy in the Intermediate Grades (3-6). (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 333; Concurrent enrollment in El Ed 442.

DESCRIPTION: Information and skills needed to make informed decisions about literacy instruction and evaluation. Establishing an effective 3-6 grade classroom literacy environment.

Course Outcomes
There are no course outcomes available

EL ED 445 : Teaching Social Studies in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: The methods, skills, and strategies for teaching social studies in grades K-6. Modeling democratic teaching practices and establishing democratic classrooms to prepare children to assume roles as participatory citizens in a democracy.

Course Outcomes
There are no course outcomes available

EL ED 446 : Teaching Science in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: Developing the pedagogical knowledge, skills, and dispositions necessary to teach science to elementary children of various ages, abilities, backgrounds, and exceptionalities.

Course Outcomes
There are no course outcomes available

EL ED 447 : Teaching Mathematics in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MTHED 305 & MTHED 306 & IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: The teaching and learning of elementary school mathematics guided by current principles relating to mathematics content, social interaction, student thinking, and child development.

Course Outcomes
- Preservice teachers enrolled in El Ed 447 will:Make appropriate decisions relative to teaching mathematics in K-6 classroomsPlan and implement standards-based lessons to teach mathematics conceptsPlan and use mathematics inquiry groups and student discourse for assessing studentsExamine provisions for students with varying language and cultural backgroundsPractice professionalism: in commitment to learning to teach, in appearance and demeanor, and in the quality of work submitted

IP&T 213 : Foundations of Instructional Design and Assessment. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Elementary Education major status.

DESCRIPTION: Curriculum design and assessment theory, strategies, and tools for the K-6 classroom. Backward design and seamless assessment for informing and improving student performance.

Course Outcomes

- Teacher candidates will be able to describe, define and apply the principles and science of assessment to determine instructional needs, design and deliver effective instruction and communicate assessment results to appropriate audiences in a multi-tiered system of support.
- Teacher candidates will be able to describe their role and responsibility regarding curriculum standards and ensure that curriculum addresses the needs of diverse students.
- Teacher candidates will be able to synthesize and employ assessment evidence to inform instructional decision-making, interpret data to evaluate instruction, and apply a problem-solving process to address students' cognitive, social-emotional and linguistic learning needs within a multi-tiered system of support.
- Teacher candidates will be able to define, design and employ evidenced-based instructional practices within a multi-tiered system of support.

IP&T 334 : Integrating Technology in Early Childhood Education. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent with El Ed 333.

DESCRIPTION: Integrating instructional technology with early childhood ecuation instructional strategies.

Course Outcomes

- Students will increase their familiarity with and ability to use a wide range of educational technologies.
- Students will develop positive dispositions towards using educational technologies that can help improve student learning.
- Student will strengthen their knowledge of ways to use technology in teaching math and literacy that lead to improved effectiveness, engagement, and/or efficiency.
- Students will practice their technology integration skills in real-world early childhood elementary level settings and learn to evaluate the strengths and weaknesses of their performance.
- Students will follow fairuse guidelines as they incorporate digital media into their teaching.

IP&T 444 : Integrating Technology in Elementary Education. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent with El Ed 445 and El Ed 446.

DESCRIPTION: Integrating instructional technology into K-6 instructional strategies.

Course Outcomes

- Students will increase their familiarity with and ability to use a wide range of educational technologies.
- Students will develop positive dispositions towards using educational technologies that can help improve student learning.
- Student will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.
- Students will practice their technology integration skills in real-world upper elementary level settings and learn to evaluate the strengths and weaknesses of their performance.
- Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

MTHED 305 : Basic Concepts of Mathematics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Math 110 or equivalent; permission from Teacher Education Department.

DESCRIPTION: Concept-oriented exploration of number, measurement, and informal geometry in relation to children's learning.

NOTE: Required of prospective elementary school teachers.

Course Outcomes

- Students have a deep understanding of central concepts in elementary school mathematics related to whole numbers and whole number operations, number theory, integers and integer operations, geometry, and measurement; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.
- Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.
- Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 305 classroom to make inferences about teaching practices that help children learn mathematics.

MTHED 306 : Concepts of Mathematics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: MTHED 305; Permission from Teacher Education Department.

DESCRIPTION: Concept-oriented exploration of rational numbers and proportional reasoning, probability, and early algebraic reasoning in relation to children's learning.

NOTE: Required of prospective elementary school teachers.

Course Outcomes

- Students have a deep understanding of central concepts in elementary school mathematics related to fractions and fraction operations, probability, and early algebraic reasoning; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.
- Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 306 classroom to make inferences about teaching practices that help children learn mathematics.
- Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.

PETE 169 : Elementary Skills and Activities. (1:0:2)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Physical skills and activities specific to elementary-age children.
NOTE: Required for elementary education majors.

Course Outcomes
- 1. The students will develop the skills for physical education activities taught in elementary schools.

PETE 212 : Physical Education for Elementary School Teachers. (2:1:3)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: PETE 169; FBI fingerprint and background clearance.

Course Outcomes
- The students will Interact with students with special needs.
- The students will explore interactions of students in the classroom.

6. Complete the following courses, which, in conjunction with the other required courses in this program, will allow you to fulfill the requirements of the TESOL K-12 minor:

TELL 410 : Second Language Acquisition. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: EL ED 323 & EL ED 203; or ELANG 223 & SC ED 353; or CPSE 425
DESCRIPTION: Processes and variables in native- and second-language development. How teachers can foster efficient acquisition of language, cognitive, and academic skills in second-language environments.

Course Outcomes
- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas

TELL 440 : Content-Based Language Instruction. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: TELL 410 & TELL 420; or TELL 410 & IP&T 213; or TELL 410 & CPSE 420
RECOMMENDED: El Ed 333, TELL 430, and CPSE 430 concurrently.
DESCRIPTION: Instructional methods, strategies, and materials for integrating curriculum content and language instruction. Teaching, creating, and adapting lesson materials in a multicultural context.

Course Outcomes
- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.

TELL 450 : Family, School, and Community Partnerships. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: ELANG 223 & TELL 410 & SC ED 353; or EL ED 203 & EL ED 323
DESCRIPTION: Standards, principles, policies, and processes of partnering with parents, families, schools, and communities in fostering and sustaining the development of children and youth.

Course Outcomes
There are no course outcomes available

TELL 477R : Practicum for Teaching English Language Learners. (.5-4:0:4)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: TELL 440; FBI fingerprint background clearance.
DESCRIPTION: Practicum in teaching English to second-language learners.
NOTE: Can be taken concurrently with student teaching/internship in a diverse-language setting.

Course Outcomes
- Candidates know, understand, and use major concepts, principles, theories, and research related to the nature and role of culture and cultural groups to construct supportive learning environments for ELLs.
- Candidates will use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas in public school settings.

(Must take 4 credit hours of TELL 477R.)

7. Complete two courses from the following:

DANCE 326 : Rhythm and Dance. (2:1:2)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Methodology course for elementary education majors; creative dance and structured rhythmic dance forms.

Course Outcomes

- Students will identify the value of dance in the elementary setting, including the following benefits:· Decision making skills· Confidence and self-expression· Cultural perspective· Collaboration and social skills· Physical skills and kinesthetic learning· Accessibility for a diverse population· Recreation and fun
- Students will demonstrate sound dance methodology, including:· Teaching structured dance forms· Leading the creative process· Clear verbalization of directions, cues, side-coaching, and feedback
- Students will identify various dance teaching resources that enrich the curriculum, including:· State Core Curriculum· National Standards· Music resources
- Students will increase knowledge and develop skills in the dance discipline, including:· The elements of dance: space, motion, time, energy· Problem solving through movement· Choreographic skills
- Students will identify age appropriate material and pedagogy that address the needs of the wide age span of elementary students.
- Students will identify ways to incorporate dance into school-wide projects that create community, including dance festivals and performances.

MUSIC 378 : Music for the Elementary Classroom Teacher. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Establishing a classroom environment for musical development; emphasis on appropriate songs, activities, resources, and teaching strategies.

Course Outcomes

- Students will acquire personal musicianship skills applied to knowledge of age-appropriate musical activities, materials and delivery techniques for grades K–6.
- Students will acquire personal musicianship skills applied to knowledge of age-appropriate musical activities, materials and delivery techniques for grades K–6.

TMA 352 : Drama in the Elementary Classroom. (2:4:Arr)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Theatre education major status: TMA 101 or 102; TMA 276. Or early childhood education or elementary education major status. Or instructor's consent.

DESCRIPTION: Varied teaching methodologies for application of drama within the pre-K--6 classroom. Dual emphasis on Utah state elementary drama standards as well as integration with core curricula.

Course Outcomes

There are no course outcomes available

8. Complete 8 hours of one of the following (prior application required):

EL ED 400R : Elementary Student-Teaching. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Semester-long or two consecutive term, full-day student teaching experience in the public schools. Seminar attendance required.

NOTE: See Education Student Services for application dates.

Course Outcomes

- The student teacher will observe, plan, teach, assess, and reflect throughout the course as they participate in a public school setting.
- The student teacher will apply knowledge from various content courses as they relate to teaching in an elementary classroom.
- The student teacher will apply knowledge of various pedagogical approaches and methods and when they are most appropriate for which subject or lesson type.

EL ED 496R : Academic Internship. (8-12:ARR:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: Three-semester professional sequence and prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (El Ed 302, 356, 357, 361, 363, 365, 372).

DESCRIPTION: A full-year classroom teaching internship in the public schools in lieu of El Ed 400, student teaching.

NOTE: See Education Student Services for application dates.

Course Outcomes

There are no course outcomes available

Recommended Courses

The following courses are strongly recommended:

BIO 100 : Principles of Biology. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Introductory course for general education students.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

BIO 175 : Principles of Biology Laboratory. (1:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Elementary education or early childhood education pre-major or major status; concurrent enrollment in Bio 100.

Course Outcomes

There are no course outcomes available

ENGL 313 : Expository Writing for Elementary Education Majors. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Learning to write as professional educators and to teach writing to children. Best taken before the professional sequence. Library research paper.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

There are no course outcomes available

GEOG 120 : Geography and World Affairs. (3:3:0)

OFFERED: Honors also. Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Survey of the world, stressing geography of major political regions.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

There are no course outcomes available

HLTH 361 : School Health for Elementary Teachers. (2:2:0)

DESCRIPTION: Preparing for the role as a health educator, emphasizing skill-based teaching methods and acquisition of teaching resources.

Course Outcomes

- 1. Students will demonstrate a sound understanding of health education content included in the Utah State Core Curriculum.
- 1. Students will integrate the Utah State Core Curriculum for elementary health instruction into their 9-month teaching calendar.
- 1. Students will demonstrate a variety of methods for teaching the Utah State Core Curriculum for elementary health instruction.
- 1. Students will apply key health education practices and principles.

VAEDU 326 : Art for Elementary Teachers. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Preservice preparation designed to help elementary classroom teachers understand the visual arts and develop skills necessary for implementing a discipline-based approach for art education.

Course Outcomes

There are no course outcomes available

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

200-Level Courses

EL ED 202 : Foundations of Child Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Major status.

DESCRIPTION: The development of the whole child including cognitive, social, emotional, linguistic, and physical development and how to apply it to planning, teaching, and assessing children.

Course Outcomes

- The candidate will demonstrate knowledge of social, cognitive and physical development of children ages birth to 12.
- The candidate will understand how the knowledge of child development will impact instructional practices in the school classroom.

EL ED 203 : Foundations of Multicultural Education. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Major status.

DESCRIPTION: Cultural identities in family life, physical attributes, culture, and language. Recognizing prejudice in individuals and institutions. Culturally and linguistically relevant pedagogical frameworks.

Course Outcomes

- Examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavior.
- Recognize and use a moral spiritual framework and the social science theoretical framework to guide multicultural and English language learner education.
- Recognize and acknowledge racism and discrimination in themselves, in others, and within institutions.
- Acknowledge the dynamics of how culture effects students' language learning and school success and teachers' teaching.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.

EL ED 211 : Introductory Framing Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in PETE 212.

DESCRIPTION: Develop as reflective practitioners who integrate foundational knowledge of teaching with the practice of teaching. Continually evaluate the effects of their choices and actions on students, parents, and other professionals in the learning community.

Course Outcomes

There are no course outcomes available

300-Level Courses

EL ED 323 : Foundations of Literacy Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Admittance into elementary education program.

DESCRIPTION: Language and literacy development for first and second language learners including theoretical underpinnings, processes, historical foundations, and instructional contexts that support language and literacy development for all K-6 children.

Course Outcomes

- Explain, compare and critique theories of reading and writing processes and development with supporting research evidence. (IRA Standard 1.1.1)

- Explain and apply first language acquisition processes that support literacy development across elementary years, e.g., cueing systems, vocabulary, teacher talk). (IRA Standard 1.1.2)
- Explain, apply, and compare/contrast knowedge about second language literacy development in context. (IRA Standard 1.1.3 & NCTE Standard 9)
- Explain and apply reading and writing development across elementary years, e.g., word recognition, language comprehension, strategic knowledge, spelling, qualities of good writing, and reading/writing connections. (IRA Standard 1.1.2)
- Identify and synthesize major milestones in literacy instruction.(IRA Standard 1.2.1)

EL ED 324 : Foundations of Classroom Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Exploring philosophies of classroom management focusing on promoting child guidance in an engaging and effective K-6 classroom learning environment.

Course Outcomes

- Upon completion of this course, students will be able to compare and contrast various theories and approaches to classroom management, describe ways to prevent management problems, describe practical approaches for addressing problems that arise, and identify approaches that align with the vision of the McKay School of Education.
- Upon completion of this course, students will be able to describe and justify necessary components of an effective learning environment, including, but not limited to, aspects related to physical space, academic approaches, and the social/emotional environment.
- Upon completion of this course, students will formulate a personal philosophy statement describing their approach to management and the learning environment which includes expectations and responsibilities of both the teacher and of the students.

EL ED 330 : K-2 Practicum Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 211; Concurrent enrollment in El Ed 332.

DESCRIPTION: Prepare for and reflect on the K-2 practicum experience.

Course Outcomes

There are no course outcomes available

EL ED 331 : Grades K-2 Framing Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 211; Concurrent enrollment in El Ed 332.

DESCRIPTION: Develop as reflective practitioners who continually integrate foundations of teaching with the practice of teaching in Grades K-2. Evaluate the effects of their choices and actions on students, parents, and other professionals in the learning community.

Course Outcomes

- Teacher candidates will identify and practice professionalism in their interactions with peers, professors, students, and others.
- Teacher candidates will identify and experience collaborative strategies in this course and other educational settings.

EL ED 332 : Practicum in Grades K-2. (2:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 324; concurrent enrollment in El Ed 330 & 331; FBI fingerprint and background clearance.

DESCRIPTION: Applying knowledge from foundational and content courses to teaching in a K-2 setting. Observing, planning, teaching, assessing, and reflecting in a public school setting.

Course Outcomes

There are no course outcomes available

EL ED 333 : Teaching Literacy in the Primary Grades (K-2). (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 323; Concurrent enrollment in El Ed 332.

DESCRIPTION: Instructional practices for teaching children the literacy concepts, skills, and strategies they need to learn in grades K-2. Assessing, monitoring, and evaluating children's literacy knowledge and learning in grades K-2.

Course Outcomes

There are no course outcomes available

EL ED 335 : Early Childhood Education Integration Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in El Ed 332.

DESCRIPTION: Methods in designing an early childhood curriculum with attention to hands-on experiences meeting children's individual learning needs and addressing contextual factors in the child's life experiences.

Course Outcomes

- a) understanding young childrenâ s characteristics and needs, including issues of diversity, and complex characteristics of families b) understanding effective and appropriate methods for supporting young childrenâ s growth and development in a classroom setting c) knowledge of K-3 instructional and assessment

strategies in content areas (literacy, math, science, social studies, arts), d) understanding purposes and application of curriculum integration

EL ED 340 : Children's Literature. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Elementary education or early childhood education major status.

DESCRIPTION: Trends and titles in children's and adolescent literature. Reading and critiquing as well as practical uses of children's literature in both school and home.

Course Outcomes

- 1. Students will understand and apply criteria in evaluating children's books for quality and function.
- 2. Students will gain a knowledge base concerning the field of children's literature as contained in the assigned textbook and class lectures.

EL ED 343 : Language Acquisition in Elementary Education. (2:2:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: EL ED 203; major status.

DESCRIPTION: Processes and variables in native- and second-language development. Fostering efficient acquisition of language, cognitive, and academic skills in second-language environments.

Course Outcomes

No outcomes are available at this time.

EL ED 344 : Content-Based Literacy. (2:2:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: El Ed 343 or concurrent enrollment.

DESCRIPTION: Instructional methods, strategies, and materials for integrating curriculum content and language instruction. Teaching, creating, and adapting lesson materials in a multicultural context.

Course Outcomes

No outcomes are available at this time.

EL ED 345 : Family, School, and Community Partnership. (2:2:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: El Ed 344 or concurrent enrollment.

DESCRIPTION: Standards, principles, policies, and processes of collaborating with parents, families, schools, and communities in fostering and sustaining the development of children and youth.

Course Outcomes

No outcomes are available at this time.

400-Level Courses

EL ED 400R : Elementary Student-Teaching. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Semester-long or two consecutive term, full-day student teaching experience in the public schools. Seminar attendance required.

NOTE: See Education Student Services for application dates.

Course Outcomes

- The student teacher will observe, plan, teach, assess, and reflect throughout the course as they participate in a public school setting.
- The student teacher will apply knowledge from various content courses as they relate to teaching in an elementary classroom.
- The student teacher will apply knowledge of various pedagogical approaches and methods and when they are most appropriate for which subject or lesson type.

EL ED 440 : Grades 3-6 Practicum Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 332; concurrent with El Ed 442; FBI fingerprint and background clearance.

DESCRIPTION: Prepare for and reflect on the 3-6 practicum experience.

Course Outcomes

There are no course outcomes available

EL ED 441 : Grades 3-6 Framing Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 331; Concurrent enrollment in El Ed 442.

DESCRIPTION: Develop as reflective practitioners who integrate foundational knowledge of teaching with the practice of teaching in grades 3-6. Continually evaluate the effects of their choices and actions on students, parents, and other professionals in the learning community.

Course Outcomes
There are no course outcomes available

EL ED 442 : Practicum in the Elementary Education 3-6 Classroom. (2:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 332; Concurrent enrollment in El Ed 440.

DESCRIPTION: Applying knowledge from foundational and content courses to teaching in a 3-6 classroom. Observing, planning, teaching, assessing, and reflecting in a 3-6 public school setting.

Course Outcomes
There are no course outcomes available

EL ED 443 : Teaching Literacy in the Intermediate Grades (3-6). (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 333; Concurrent enrollment in El Ed 442.

DESCRIPTION: Information and skills needed to make informed decisions about literacy instruction and evaluation. Establishing an effective 3-6 grade classroom literacy environment.

Course Outcomes
There are no course outcomes available

EL ED 445 : Teaching Social Studies in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: The methods, skills, and strategies for teaching social studies in grades K-6. Modeling democratic teaching practices and establishing democratic classrooms to prepare children to assume roles as participatory citizens in a democracy.

Course Outcomes
There are no course outcomes available

EL ED 446 : Teaching Science in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: Developing the pedagogical knowledge, skills, and dispositions necessary to teach science to elementary children of various ages, abilities, backgrounds, and exceptionalities.

Course Outcomes
There are no course outcomes available

EL ED 447 : Teaching Mathematics in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MTHED 305 & MTHED 306 & IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: The teaching and learning of elementary school mathematics guided by current principles relating to mathematics content, social interaction, student thinking, and child development.

Course Outcomes
- Preservice teachers enrolled in El Ed 447 will:Make appropriate decisions relative to teaching mathematics in K-6 classroomsPlan and implement standards-based lessons to teach mathematics conceptsPlan and use mathematics inquiry groups and student discourse for assessing studentsExamine provisions for students with varying language and cultural backgroundsPractice professionalism: in commitment to learning to teach, in appearance and demeanor, and in the quality of work submitted

EL ED 493R : Independent Readings or Project. (.5-4:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Departmental approval.

Course Outcomes
- Students will explore and demonstrate knowledge in an area of specialization under the direction of a faculty member.

EL ED 496R : Academic Internship. (8-12:ARR:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: Three-semester professional sequence and prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (El Ed 302, 356, 357, 361, 363, 365, 372).

DESCRIPTION: A full-year classroom teaching internship in the public schools in lieu of El Ed 400, student teaching.

NOTE: See Education Student Services for application dates.

Course Outcomes
There are no course outcomes available

500-Level Graduate Courses (available to advanced undergraduates)

EL ED 589R : Special Topics in Education. (.5-3:Arr.:Arr.)

WHEN TAUGHT: Contact Department.
DESCRIPTION: Topics vary.
NOTE: Does not count toward a graduate degree without prior approval.

Secondary Education

The Discipline

The Department of Teacher Education provides a program which licenses secondary teachers for the public schools. In addition to content courses in the field(s) in which they plan to teach, students complete professional education courses and practicum experiences which prepare them to teach in a secondary school setting.

Career Opportunities

Secondary education teacher.

Teaching Majors

The following is a list of teaching majors and minors offered jointly with the Department of Teacher Education and other academic departments throughout the university. For specific major course requirements, see the department offering the teaching major or minor. For licensure requirements, refer to Education Student Services, 120 MCKB, (801) 422-3426.

Teaching Majors and Composite Teaching Majors

(Hours listed include courses taken to fill both major and licensure requirements.)

- Art Education (K–12) (80 hours) (see Department of Visual Arts)
- Biological Science Education (84 hours) (see Department of Biology)
- Chemistry Education (80.5 hours)
- Dance Education K-12 (80 hours)
- Earth and Space Science Education (83–86 hours)(see Department of Geological Sciences)
- English Teaching (74–91 hours)
- Family and Consumer Science Education (75–76 hours) (see School of Family Life)
- French Teaching (69–92 hours)
- German Teaching (79–100 hours)
- History Teaching (67–84 hours)
- Latin Teaching (78–91 hours) (see Department of Humanities, Classics, and Comparative Literature)
- Mathematics Education (74 hours)
- Music Education: K–12 Choral Emphasis (87 hours)
- Music Education: K–12 Instrumental Emphasis (92 hours)
- Physical Education Teaching/Coaching (K–12) (59 hours) (see Department of Teacher Education)
- Physics Teaching (74.5–77.5 hours)
- School Health Education (75–80 hours)
- Spanish Teaching (75–108 hours)
- Special Education: Mild/Moderate Disabilities Emphasis (59 hours)
- Special Education: Severe Disabilities Emphasis (59 hours)
- Teaching Physical Science (77.5–78.5 hours)
- Teaching Social Science (76 hours) (see Department of History)
- Technology and Engineering Education (73–74 hours) (see School of Technology)
- Theatre Arts Education K-12 (83 hours)

Teaching Minors

- Art Education (24.5 hours) (see Department of Visual Arts)
- Chemistry Education (18.5–20.5 hours)
- Chinese Teaching (23–39 hours) (see Department of Asian and Near Eastern Languages)
- Coaching and Teaching Physical Education (22 hours) (see Department of Teacher Education)
- Computer Science Teaching (18–19 hours)
- Dual-Language Immersion K-12 Teaching (21 hours)
- English Teaching (27 hours)
- French Teaching (23–38 hours)
- Geography Teaching (19 hours)
- Geology Teaching (16 hours)
- German Teaching (20–36 hours)
- Health Education (22 hours)
- History Teaching (21 hours)
- Japanese Teaching (25–41 hours) (see Department of Asian and Near Eastern Languages)
- Latin Teaching (23–31 hours) (see Department of Humanities, Classics, and Comparative Literature)
- Mathematics Education (33 hours)
- Physics Teaching (26 hours)
- Political Science Teaching (21 hours)
- Portuguese Teaching (18–40 hours)
- Psychology Teaching (21 hours)
- Russian Teaching (17–32 hours) (see Department of Germanic and Slavic Languages)
- Spanish Teaching (21–37 hours)
- Teaching English to Speakers of Other Languages (TESOL) K–12 (19 hours)

Professional Education Requirements

All teacher candidates in secondary education complete an approved sequence of required professional education courses. Please see the appropriate department listing for each teaching major.

FBI Fingerprint and Background Check

All candidates for teacher licensure are required by state statute to be fingerprinted and pass an FBI background check before participating in required field experiences. Fingerprints are taken in Education Student Services (ESS) in 120 MCKB. FBI background clearance is valid for only three years. If clearance expires before graduation, candidates must repeat the fingerprinting and clearance process, including new fee payments.

Failing to expunge a police record prior to the background check may result in a blocked registration while a state panel reviews the charges. Candidates who cannot pass an FBI background check will be removed from the teacher education licensure program.

Licensing Requirements

Only students graduating with a teaching major will be recommended for a Utah State teacher license. Students who also complete a teaching minor will have the appropriate endorsement listed on their teacher license by the Utah State Office of Education. No student can receive a teacher license by completing only a teaching minor without also completing a teaching major.

It is the student's responsibility to be sure the approved PRAXIS II tests have been taken and passed, that BYU has received the test scores, that fingerprint background clearance is current prior to graduation, and state licensing fees have been paid. Students will also be responsible for any additional requirements imposed by the state prior to their graduation. To confirm the status of these requirements contact Education Student Services, 120 MCKB, (801) 422-3426. Graduation and Utah licensure cannot be processed until these requirements have been completed. For additional requirements see the following: http://education.byu.edu/ESS/Licensing.html.

Student Teaching Prerequisites

1. *Teaching Major & Teaching Minor.* Complete all teaching major and teaching minor requirements. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. *Application.* Apply for student teaching at Education Student Services. Packets are available online at http://education.byu.edu/ess/

Licensing Procedures

Students are responsible for keeping Education Student Services informed of their progress toward licensure.

To avoid undue licensing delay, students are urged to arrange for a personal review of their licensing records well in advance of registering for their final semester. See Education Student Services, 120 MCKB and http://education.byu.edu/ess/licensing.html.

Show All Course Descriptions
Hide All Course Descriptions

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

The Discipline

Students preparing to teach physical education and/or coach will have a variety of experiences that will enhance proficiency in the knowledge and skills requisite to working in the contemporary school setting. Majors learn to perform a variety of sport, outdoor adventure, and dance activities. After becoming proficient, students take courses and have practical experiences in teaching and coaching children, adolescents, and adults. The discipline is interesting and rewarding, and those in a teaching/coaching career help others pursue and practice healthy lifestyle habits.

Career Opportunities

Graduates seek teaching and physical education/coaching careers in elementary and secondary education settings. With an advanced degree, teaching and coaching positions at institutions of higher learning are available.

It is recommended that students desiring to be optimally employable in secondary schools complete an approved teaching minor.

Program Requirements | View MAP | View Program Outcomes

1. Students who are interested in the program should meet with the Physical Education Teaching Education program director (249-D SFH) and Education Student Services (120 MCKB) in September of their sophomore year. Then they must complete the online application (found at http://mylink.byu.edu). Applications for the Physical Education Teaching Education program are due October 1 for Winter semester and February 1 for Fall semester.
2. A teaching minor is not required for licensure. However, it is *strongly* recommended (approximately 16-30 hours).
3. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.
4. Complete the following required prerequisite courses:

PDBIO 220 : Human Anatomy (with lab). (3:2:2)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Structure and function of the human body. Lab included.

Course Outcomes

- Students will demonstrate an understanding of the basic microscopic underpinnings of tissue structures and be able to name them.
- Students will demonstrate a greater understanding and appreciation for the human body, it's overall design and connections to other living organisms, and what a marvelous creation it is.
- Students will be able to list the name, location, and function of each of the body's organs and organ systems.

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

5. Complete the following:

EXSC 302 : Philosophical and Ethical Issues in Exercise Sciences. (1:1:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Philosophical and ethical issues common to exercise sciences majors. Concept of mind, body, spirit.

Course Outcomes

- Learn contemporary tenets of philosophy that will serve as a basis for understanding important ideas in our own cultural tradition as well as that of others.
- Comprehend philosophical worldviews to facilitate respectful relationships with others.
- Pursue truth, think clearly and communicate effectively one's own beliefs and values; deepen one's understanding of the nature of being.
- Comprehend and apply the truths of the gospel of Jesus Christ. Reflect devout love of God and a loving, genuine concern for the welfare of others in the learning environment.
- Acquire/reinforce a profound respect for the divine nature of one's own life, a reverence for one's value, the purpose of one's life and a desire to live a healthy lifestyle.
- Articulate one's valuing of the entire self, bodymindspirit, with particular focus on the meaning and importance of the physical body.
- Strengthen the formulation of own personal and professional philosophy establishing clear standards of integrity. Improve the communication of one's beliefs, written and verbal.
- Analyze contemporary issues from an ethical standpoint. Demonstrate own professional ethical behavior, think critically and take an informed position on an issue.

EXSC 320 : Basic Athletic Training. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: PDBIO 220; Some majors require concurrent enrollment in ExSc 321. Check MAP requirements for major.

DESCRIPTION: Recognition, evaluation, and care of athletic injuries. Techniques in taping, preventing, and rehabilitating injuries.

Course Outcomes

- Review general responsibilities, roles, and tasks of athletic trainers, physical therapists, and otherallied health professionals involved in sports medicine.
- Learn assessment, first aid, and treatments for common musculoskeletal injuries.
- Examine methods of injury prevention including conditioning principles, environmental hazards,and protective equipment.
- Learn and utilize resources available to sports medicine professionals.
- Apply knowledge to practical situations.

EXSC 321 : Basic Athletic Training Lab. (.5:0:.5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Concurrent enrollment in ExSc 320.

NOTE: Fee.

Course Outcomes

- Demonstrate competency and proficiency in taping the ankle, foot, lower leg, knee, thigh/hip,shoulder, elbow, wrist, thumb, and finger joints.
- Demonstrate competency and proficiency in wrapping the ankle, foot, lower leg, thigh/hip,shoulder, elbow, wrist, thumb, and finger joints.
- Demonstrate competency and profiency in wound care management.
- Demonstrate competency and profiency in injury evaluation.
- Demonstrate competency and profiency in injury treatment management.
- Demonstrate competency and profiency in spineboarding and splinting.

EXSC 365 : Scientific Bases of Sport: Kinesiology. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Kinesiology and biomechanics for physical education/coaching minor.

Course Outcomes

- Students will demonstrate how to apply physical laws to human performance. Included physical laws deal with: Linear motion, projectile motion, forces, impulse and momentum, fluid mechanics, and tissue mechanics.

EXSC 366 : Scientific Bases of Sport: Exercise Physiology. (2.5:2:0)

WHEN TAUGHT: Fall; Winter

RECOMMENDED: PDBio 305.

DESCRIPTION: Physiology of activity for physical education teaching students.

Course Outcomes

There are no course outcomes available

PETE 230 : K-12 Physical Activities Content and Skills 1. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admittance into PETE program.

DESCRIPTION: Skills, content, and pedagogical knowledge in lifetime activities: golf, soccer, softball, tennis,

walking/jogging.

Course Outcomes
- Demonstrate proper technique for the major skills of each sport
- Develop basic skills for each sport/activity
- Learn the basic rules of each sport/activity
- Learn basic drills and lead-up games for each sport
- Understand how to ensure safety in the physical education program, focusing on prevention

PETE 231 : K-12 Physical Activities Content and Skills 2. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admittance into PETE program.

DESCRIPTION: Skills, content, and pedagogical knowledge in lifetime activities: aerobics, badminton, basketball, flag football, and volleyball.

Course Outcomes
- The students will know a variety of sport/activity specific drills and activities that can be used in future teaching through participation in class.
- The students will demonstrate knowledge of sport/activity specific skills, drills, rules and strategies and their applications to Secondary PE settings as demonstrated on an exam.
- The students wil demonstrate how to teach a sport/activity specific skill, drill, or strategy through a group teaching assignment.
- Demonstrate skill ability in the basic sport/activity skills through a skill assessment.

PETE 300 : Advocacy for Physical Education. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admittance into PETE program.

DESCRIPTION: Historical and sociological cornerstones of physical education.

Course Outcomes
- The students will use the knowledge and experience of the past to understand the programs of today and apply it toward building programs of the future.
- The students will interpret and communicate knowledge and experience in both written and verbal forms.
- The students will demonstrate an understanding of the principles of effective advocacy in the K-12 school teaching setting.
- The students will demonstrate an understanding of the history of physical education and its impact on the future.

PETE 301 : K-12 Healthy and Active Lifestyle Management. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admittance into PETE program.

DESCRIPTION: Understanding the content and pedagogical knowledge required to manage a healthy and active lifestyle; how to impart this knowledge to public school students.

Course Outcomes
- Learn and apply lifestyle (nutrition/weight control and physical activity) management skills in their personal lives.
- Demonstrate understanding of current curricular trends specific to healthy lifestyle choices such as the health club model.
- Demonstrate understanding and ability to design, implement and manage a healthy and active school environment program.
- Demonstrate understanding of the Wellness and Nutrition act and its implications in the public school setting.
- Demonstrate understanding and application of concepts specific to healthy and active lifestyle management and their accompanying pedagogical strategies.

PETE 364 : Scientific Bases of Sport: Motor Learning. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Motor learning principles for physical education and coaching.

Course Outcomes
There are no course outcomes available

PETE 399R : Academic Internship: Coaching. (1-4:0:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Advisor's consent.

DESCRIPTION: On-the-job experience in coaching.

Course Outcomes
- Students will demonstrate their ability to coach a variety of sports in the 7-12 classroom.

(1 hour required)

PETE 430 : Principles of Coaching. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Developing a philosophy of coaching; understanding coaching responsibilities and techniques; preparing athletes; valuing professional relationships with others.

Course Outcomes

- Develop a philosophy of coaching and officiating after discussion of the psychological, physiological and sociological implication of coaching students.
- Gain an understanding of various coaching responsibilities and team organizational procedures such as: public relations, team selection, motivation, scheduling, etc.
- Understand the student-athlete and the techniques of team leadership and interaction.
- Become acquainted with a variety of coaching techniques.
- Explore player preparation in the areas of conditioning, skill acquisition, and evaluation.
- Become aware of the literature and resources available to aid coaches.
- Participate in an extensive class project.
- Gain an understanding of preparation necessary for becoming an official for youth sports.
- Develop an understanding of and be able to make application of rules and strategies relating to specific sports.
- Develop an understanding of methods to develop a professional relationship with coaches, administrators, officials, fans, parents, and players.
- Learn to observe and critique game official's performance from a professional viewpoint.

RECM 123 : Introduction to Outdoor Recreation Activities. (2:1:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Participation in a variety of outdoor activities.

Course Outcomes

There are no course outcomes available

6. Complete one course from the following:

PETE 330R : Coaching Selected Sports. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching golf, tennis, or wrestling.

Course Outcomes

- Understand procedures, guidelines, and duties of the coach as they relate to risk management.
- Gain an understanding of offense, defense, special situations, and philosophy.
- Understand the importance of discussing the sport, how it should be taught, and safety procedures with other coaches.
- Demonstrate knowledge of the rules and strategies of your selected sport.

PETE 335 : Coaching Competitive Swimming. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching swimming.

Course Outcomes

- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 341 : Coaching Basketball. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching basketball.

Course Outcomes

- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 342 : Coaching Track and Field. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching track and field.

Course Outcomes

- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 344 : Coaching Football. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching football.

Course Outcomes

- The students will demonstrate knowledge of the rules and strategies of football .

PETE 345 : Coaching Volleyball. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching volleyball.

Course Outcomes

The students will demonstrate knowledge of the rules and strategies of volleyball .

PETE 346 : Coaching Baseball and Softball. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching baseball and softball.

Course Outcomes

- The students will demonstrate knowledge of the rules and strategies of baseball and softbball.

PETE 347 : Coaching Soccer. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching soccer.

Course Outcomes

- The students will demonstrate knowledge of the rules and strategies of soccer .

7. Complete the Professional Education Component:
   - Complete the following:

PETE 274 : Fundamental Skills and Teaching Methods for Elementary Physical Education. (3:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent enrollment in PETE 230; FBI fingerprint and background clearance.

DESCRIPTION: Identifying and demonstrating fundamental skills; identifying immature and mature movement patterns; selecting developmentally appropriate activities; appropriate management techniques.

Course Outcomes

- Demonstrate an understanding of the National Standards for Elementary School Physical Education
- Learn the tools to effectively manage and instruct a classroom
- Learn, select and implement in your lessons management and instruction strategies based on developmental levels, and safety issues.
- Apply activities and techniques that encourages learners to see, question, and interpret physical activity from diverse perspectives

PETE 276R : Exploration of Teaching. (3:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: PETE 230 & PETE 274; FBI fingerprint and background clearance.

DESCRIPTION: Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

Course Outcomes

- The students will demonstrate an understanding of the National Standards in relationship to junior high school students.
- The students will demonstrate attitudes and behaviors that exhibit professionalism.
- The students will demonstrate traditional and authentic assessment strategies by applying them to an assigned unit of instruction, creating objectives and designing assessments to meet those objectives in all three learning domains completing two sections of the Teacher Work Sample (TWS).
- The students will write developmentally appropriate lesson plans for junior high school students using the known characteristics of junior high students.
- The students will demonstrate the ability to identify the current trends in physical education assessment and grading strategies.
- The students will model appropriate instruction and management skills when teaching junior high students.

PETE 377 : Secondary Practicum. (3:1:3)

WHEN TAUGHT: Fall

PREREQUISITE: PETE 231 & PETE 276R; FBI fingerprint and background clearance.

DESCRIPTION: Written and practical teaching assignments designed to help prospective teachers plan, conduct, and evaluate lessons and unit plans appropriate to adolescent students.

Course Outcomes

- The students will understand the tasks associated with the effective running of a physical education program.
- The students will incorporate effective management and instructional strategies when teaching.
- The students will understand types of tournaments and when to use them.
- The students will adapt the discipline plan that they created in ScEd 276 and make it applicable for high school students.
- The students will understand how to integrate reading skills into the physical education curriculum by passing the reading assignments.
- The students will demonstrate competency in instructional design principles by completing a unit plan of instruction and passing the assignment.

PETE 461 : Adapted and Multicultural Physical Education for Teaching Majors. (3:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: FBI fingerprint and background clearance.

DESCRIPTION: Legal mandates, assessing and identifying special needs students, multicultural issues, and management and instructional techniques.

Course Outcomes

- *Identify, select, and implement appropriate instruction that is sensitive to the strength/weaknesses, multiple needs, learning style, and experiences of diverse learners.
- *Use appropriate strategies, services, and resources to meet special and diverse learning needs.
- *Create a learning environment which respects and incorporates learners' personal, family, cultural, and community experiences
- Know the principles that address the physiological and biomechanical applications encountered when working with diverse populations.
- Know how to assess and evaluate students with disabilities in order to make appropriate decisions about special services and program components.
- Know how to teach students with disabilities integrated in regular physical education programs.
- Learn how to provide consultation and staff development activities related to students with disabilities and their IEP.
- Learn how to work and attend to the needs of multicultural students integrated in physical education

IP&T 286 : Instructional Technology in Teaching. (1:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Using instructional design, visual design, and differentiated staffing principles along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for secondary education settings.

Course Outcomes

There are no course outcomes available

SC ED 350 : Adolescent Development in an Education Context. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Adolescent development and its implications for integrated school culture, curriculum design, instructional practices, and assessment.

Course Outcomes

- The students will demonstrate how the stages of development impact instructional practices.
- The students will understand the social, physical, and cognitive developmental stages of adolescence in relation to the tasks of automony, identity and intimacy.
- The students will demonstrate how the stages of development impact classroom environments and management.

Note: FBI fingerprinting and background clearance must be completed prior to enrollment in PETE 276R.

- Complete 12 hours of one of the following:

PETE 476R : Student Teaching - Physical Education (12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes

There are no course outcomes available

SC ED 496R : Academic Internship: Secondary Education. (12:ARR:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

DESCRIPTION: Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes

- Students will demonstrate that they can teach, manage, and assess content area knowledge and skills in the 7-12 classroom.
- Foster relationships with school colleagues, parents, and the larger community.

: Academic Internship: Social Sciences.

Course Outcomes

: Academic Internship: English.

Course Outcomes

: Academic Internship: Mathematics.

Course Outcomes

: Academic Internship: Biological Sciences.

Course Outcomes

: Academic Internship: Physical Sciences.

Course Outcomes

Note: PETE 399R must be completed before PETE 476R and SC ED 496R.

8. Complete the senior exit interview.
9. Complete the PRAXIS II exam.

*Hours include courses that may fulfill university core requirements.

Hide All Course Descriptions

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Program Requirements | View MAP

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.

2. Complete the following:

EXSC 320 : Basic Athletic Training. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: PDBIO 220; Some majors require concurrent enrollment in ExSc 321. Check MAP requirements for major.
DESCRIPTION: Recognition, evaluation, and care of athletic injuries. Techniques in taping, preventing, and rehabilitating injuries.

Course Outcomes
- Review general responsibilities, roles, and tasks of athletic trainers, physical therapists, and otherallied health professionals involved in sports medicine.
- Learn assessment, first aid, and treatments for common musculoskeletal injuries.
- Examine methods of injury prevention including conditioning principles, environmental hazards,and protective equipment.
- Learn and utilize resources available to sports medicine professionals.
- Apply knowledge to practical situations.

EXSC 321 : Basic Athletic Training Lab. (.5:0:.5)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Concurrent enrollment in ExSc 320.
NOTE: Fee.

Course Outcomes
- Demonstrate competency and proficiency in taping the ankle, foot, lower leg, knee, thigh/hip,shoulder, elbow, wrist, thumb, and finger joints.
- Demonstrate competency and proficiency in wrapping the ankle, foot, lower leg, thigh/hip,shoulder, elbow, wrist, thumb, and finger joints.
- Demonstrate competency and profiency in wound care management.
- Demonstrate competency and profiency in injury evaluation.
- Demonstrate competency and profiency in injury treatment management.
- Demonstrate competency and profiency in spineboarding and splinting.

EXSC 365 : Scientific Bases of Sport: Kinesiology. (2:2:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Kinesiology and biomechanics for physical education/coaching minor.

Course Outcomes
- Students will demonstrate how to apply physical laws to human performance. Included physical laws deal with: Linear motion, projectile motion, forces, impulse and momentum, fluid mechanics, and tissue mechanics.

EXSC 366 : Scientific Bases of Sport: Exercise Physiology. (2.5:2:0)

WHEN TAUGHT: Fall; Winter
RECOMMENDED: PDBio 305.
DESCRIPTION: Physiology of activity for physical education teaching students.

Course Outcomes
There are no course outcomes available

PETE 229 : Physical Education Pedagogy. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PETE 234; physical education/coaching minor status.

DESCRIPTION: Sport pedagogy for students minoring in coaching and teaching physical education.

Course Outcomes

- Acquire the basic knowledge and skills necessary to effectively help secondary students become physically educated.
- Understand current instructional methods and the theories upon which they are based.
- Develop and demonstrate the ability to teach using a variety of teaching styles and methods effectively in the physical education setting.
- Learn the tools to effectively manage and instruct a physical education classroom.
- Analyze and evaluate your teaching performance by watching the video of each of your teaching performance and completing a self-evaluation form setting goals and strategies to be implemented in the next lesson.
- Learn how to be an effective observer and evaluator of your peer by completing a peer evaluation form for each lesson taught.

PETE 234 : Team Sport Fundamentals. (2:0:4)

WHEN TAUGHT: Fall

PREREQUISITE: Physical education/coaching minor status.

DESCRIPTION: Skills, content, and pedagogical knowledge in team sports including softball, basketball, volleyball, and football.

Course Outcomes

- Develop basic skills for each sport/activity
- Demonstrate proper technique for the major skills of each sport
- Learn the basic rules of each sport/activity
- Learn basic drills and lead-up games for each sport
- Prepare and peer teach a micro unit of instruction of a selected skill
- Develop an activity file with ideas and samples of activities for each sport

PETE 351 : Administration of Physical Education and Athletics. (2:2:0)

WHEN TAUGHT: Fall

DESCRIPTION: Management styles and techniques for physical education and athletic programs; policies concerning eligibility, contest management, safety, facilities, and legal concerns.

NOTE: For teaching and coaching minors.

Course Outcomes

- Gain expertise required of an administrator in the context of the gospel of Jesus Christ.
- Reflect devout love of God and a loving, genuine concern for the welfare of others in the learning and athletic environment.
- Critical, clear thinking that leads to the articulation and further development of one's philosophy.
- Further development of leadership abilities and growth of character which results in competence that reflects the highest professional standards, strengthened and ennobled by Christ-like attributes.

PETE 364 : Scientific Bases of Sport: Motor Learning. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Motor learning principles for physical education and coaching.

Course Outcomes

There are no course outcomes available

PETE 430 : Principles of Coaching. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Developing a philosophy of coaching; understanding coaching responsibilities and techniques; preparing athletes; valuing professional relationships with others.

Course Outcomes

- Develop a philosophy of coaching and officiating after discussion of the psychological, physiological and sociological implication of coaching students.
- Gain an understanding of various coaching responsibilities and team organizational procedures such as: public relations, team selection, motivation, scheduling, etc.
- Understand the student-athlete and the techniques of team leadership and interaction.
- Become acquainted with a variety of coaching techniques.
- Explore player preparation in the areas of conditioning, skill acquisition, and evaluation.
- Become aware of the literature and resources available to aid coaches.
- Participate in an extensive class project.
- Gain an understanding of preparation necessary for becoming an official for youth sports.
- Develop an understanding of and be able to make application of rules and strategies relating to specific sports.
- Develop an understanding of methods to develop a professional relationship with coaches, administrators, officials, fans, parents, and players.
- Learn to observe and critique game official's performance from a professional viewpoint.

3. Complete a minimum of 1 hour from the following:

PETE 399R : Academic Internship: Coaching. (1-4:0:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Advisor's consent.
DESCRIPTION: On-the-job experience in coaching.

Course Outcomes
- Students will demonstrate their ability to coach a variety of sports in the 7-12 classroom.

4. Complete one course from the following:

PETE 330R : Coaching Selected Sports. (2:1:2)
WHEN TAUGHT: Winter
PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.
DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching golf, tennis, or wrestling.

Course Outcomes
- Understand procedures, guidelines, and duties of the coach as they relate to risk management.
- Gain an understanding of offense, defense, special situations, and philosophy.
- Understand the importance of discussing the sport, how it should be taught, and safety procedures with other coaches.
- Demonstrate knowledge of the rules and strategies of your selected sport.

PETE 335 : Coaching Competitive Swimming. (2:1:2)
WHEN TAUGHT: Fall
PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.
DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching swimming.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 341 : Coaching Basketball. (2:1:2)
WHEN TAUGHT: Fall
PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.
DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching basketball.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 342 : Coaching Track and Field. (2:1:2)
WHEN TAUGHT: Fall
PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.
DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching track and field.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 344 : Coaching Football. (2:1:2)
WHEN TAUGHT: Winter
PREREQUISITE: Appropriate skills and teaching techniques class or equivalent
DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching football.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of football .

PETE 345 : Coaching Volleyball. (2:1:2)
WHEN TAUGHT: Winter
PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.
DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching volleyball.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of volleyball .

PETE 346 : Coaching Baseball and Softball. (2:1:2)
WHEN TAUGHT: Fall
PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.
DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching baseball and softball.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of baseball and softbball.

PETE 347 : Coaching Soccer. (2:1:2)
WHEN TAUGHT: Fall
PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.
DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching soccer.

Course Outcomes

- The students will demonstrate knowledge of the rules and strategies of soccer .

Undergraduate Courses

100-Level Courses

PETE 169 : Elementary Skills and Activities. (1:0:2)
WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Physical skills and activities specific to elementary-age children.
NOTE: Required for elementary education majors.

Course Outcomes
- 1. The students will develop the skills for physical education activities taught in elementary schools.

200-Level Courses

PETE 212 : Physical Education for Elementary School Teachers. (2:1:3)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: PETE 169; FBI fingerprint and background clearance.

Course Outcomes
- The students will Interact with students with special needs.
- The students will explore interactions of students in the classroom.

PETE 229 : Physical Education Pedagogy. (3:3:0)
WHEN TAUGHT: Winter
PREREQUISITE: PETE 234; physical education/coaching minor status.
DESCRIPTION: Sport pedagogy for students minoring in coaching and teaching physical education.

Course Outcomes
- Acquire the basic knowledge and skills necessary to effectively help secondary students become physically educated.
- Understand current instructional methods and the theories upon which they are based.
- Develop and demonstrate the ability to teach using a variety of teaching styles and methods effectively in the physical education setting.
- Learn the tools to effectively manage and instruct a physical education classroom.
- Analyze and evaluate your teaching performance by watching the video of each of your teaching performance and completing a self-evaluation form setting goals and strategies to be implemented in the next lesson.
- Learn how to be an effective observer and evaluator of your peer by completing a peer evaluation form for each lesson taught.

PETE 230 : K-12 Physical Activities Content and Skills 1. (2:2:0)
WHEN TAUGHT: Fall
PREREQUISITE: Admittance into PETE program.
DESCRIPTION: Skills, content, and pedagogical knowledge in lifetime activities: golf, soccer, softball, tennis, walking/jogging.

Course Outcomes
- Demonstrate proper technique for the major skills of each sport
- Develop basic skills for each sport/activity
- Learn the basic rules of each sport/activity
- Learn basic drills and lead-up games for each sport
- Understand how to ensure safety in the physical education program, focusing on prevention

PETE 231 : K-12 Physical Activities Content and Skills 2. (2:2:0)
WHEN TAUGHT: Winter
PREREQUISITE: Admittance into PETE program.
DESCRIPTION: Skills, content, and pedagogical knowledge in lifetime activities: aerobics, badminton, basketball, flag football, and volleyball.

Course Outcomes

- The students will know a variety of sport/activity specific drills and activities that can be used in future teaching through participation in class.
- The students will demonstrate knowledge of sport/activity specific skills, drills, rules and strategies and their applications to Secondary PE settings as demonstrated on an exam.
- The students wil demonstrate how to teach a sport/activity specific skill, drill, or strategy through a group teaching assignment.
- Demonstrate skill ability in the basic sport/activity skills through a skill assessment.

PETE 234 : Team Sport Fundamentals. (2:0:4)

WHEN TAUGHT: Fall

PREREQUISITE: Physical education/coaching minor status.

DESCRIPTION: Skills, content, and pedagogical knowledge in team sports including softball, basketball, volleyball, and football.

Course Outcomes

- Develop basic skills for each sport/activity
- Demonstrate proper technique for the major skills of each sport
- Learn the basic rules of each sport/activity
- Learn basic drills and lead-up games for each sport
- Prepare and peer teach a micro unit of instruction of a selected skill
- Develop an activity file with ideas and samples of activities for each sport

PETE 274 : Fundamental Skills and Teaching Methods for Elementary Physical Education. (3:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent enrollment in PETE 230; FBI fingerprint and background clearance.

DESCRIPTION: Identifying and demonstrating fundamental skills; identifying immature and mature movement patterns; selecting developmentally appropriate activities; appropriate management techniques.

Course Outcomes

- Demonstrate an understanding of the National Standards for Elementary School Physical Education
- Learn the tools to effectively manage and instruct a classroom
- Learn, select and implement in your lessons management and instruction strategies based on developmental levels, and safety issues.
- Apply activities and techniques that encourages learners to see, question, and interpret physical activity from diverse perspectives

PETE 276R : Exploration of Teaching. (3:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: PETE 230 & PETE 274; FBI fingerprint and background clearance.

DESCRIPTION: Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

Course Outcomes

- The students will demonstrate an understanding of the National Standards in relationship to junior high school students.
- The students will demonstrate attitudes and behaviors that exhibit professionalism.
- The students will demonstrate traditional and authentic assessment strategies by applying them to an assigned unit of instruction, creating objectives and designing assessments to meet those objectives in all three learning domains completing two sections of the Teacher Work Sample (TWS).
- The students will write developmentally appropriate lesson plans for junior high school students using the known characteristics of junior high students.
- The students will demonstrate the ability to identify the current trends in physical education assessment and grading strategies.
- The students will model appropriate instruction and management skills when teaching junior high students.

300-Level Courses

PETE 300 : Advocacy for Physical Education. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admittance into PETE program.

DESCRIPTION: Historical and sociological cornerstones of physical education.

Course Outcomes

- The students will use the knowledge and experience of the past to understand the programs of today and apply it toward building programs of the future.
- The students will interpret and communicate knowledge and experience in both written and verbal forms.
- The students will demonstrate an understanding of the principles of effective advocacy in the K-12 school teaching setting.
- The students will demonstrate an understanding of the history of physical education and its impact on the future.

PETE 301 : K-12 Healthy and Active Lifestyle Management. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: Admittance into PETE program.

DESCRIPTION: Understanding the content and pedagogical knowledge required to manage a healthy and active lifestyle; how to impart this knowledge to public school students.

Course Outcomes

- Learn and apply lifestyle (nutrition/weight control and physical activity) management skills in their personal

lives.
- Demonstrate understanding of current curricular trends specific to healthy lifestyle choices such as the health club model.
- Demonstrate understanding and ability to design, implement and manage a healthy and active school environment program.
- Demonstrate understanding of the Wellness and Nutrition act and its implications in the public school setting.
- Demonstrate understanding and application of concepts specific to healthy and active lifestyle management and their accompanying pedagogical strategies.

PETE 330R : Coaching Selected Sports. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching golf, tennis, or wrestling.

Course Outcomes
- Understand procedures, guidelines, and duties of the coach as they relate to risk management.
- Gain an understanding of offense, defense, special situations, and philosophy.
- Understand the importance of discussing the sport, how it should be taught, and safety procedures with other coaches.
- Demonstrate knowledge of the rules and strategies of your selected sport.

PETE 335 : Coaching Competitive Swimming. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching swimming.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 341 : Coaching Basketball. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching basketball.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 342 : Coaching Track and Field. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching track and field.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of your selected sport .

PETE 344 : Coaching Football. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching football.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of football .

PETE 345 : Coaching Volleyball. (2:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching volleyball.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of volleyball .

PETE 346 : Coaching Baseball and Softball. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching baseball and softball.

Course Outcomes
- The students will demonstrate knowledge of the rules and strategies of baseball and softbball.

PETE 347 : Coaching Soccer. (2:1:2)

WHEN TAUGHT: Fall

PREREQUISITE: Appropriate skills and teaching techniques class or equivalent.

DESCRIPTION: Theory, fundamentals, strategies, and techniques of coaching soccer.

Course Outcomes

- The students will demonstrate knowledge of the rules and strategies of soccer .

PETE 351 : Administration of Physical Education and Athletics. (2:2:0)

WHEN TAUGHT: Fall

DESCRIPTION: Management styles and techniques for physical education and athletic programs; policies concerning eligibility, contest management, safety, facilities, and legal concerns.

NOTE: For teaching and coaching minors.

Course Outcomes

- Gain expertise required of an administrator in the context of the gospel of Jesus Christ.
- Reflect devout love of God and a loving, genuine concern for the welfare of others in the learning and athletic environment.
- Critical, clear thinking that leads to the articulation and further development of one's philosophy.
- Further development of leadership abilities and growth of character which results in competence that reflects the highest professional standards, strengthened and ennobled by Christ-like attributes.

PETE 364 : Scientific Bases of Sport: Motor Learning. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Motor learning principles for physical education and coaching.

Course Outcomes

There are no course outcomes available

PETE 377 : Secondary Practicum. (3:1:3)

WHEN TAUGHT: Fall

PREREQUISITE: PETE 231 & PETE 276R; FBI fingerprint and background clearance.

DESCRIPTION: Written and practical teaching assignments designed to help prospective teachers plan, conduct, and evaluate lessons and unit plans appropriate to adolescent students.

Course Outcomes

- The students will understand the tasks associated with the effective running of a physical education program.
- The students will incorporate effective management and instructional strategies when teaching.
- The students will understand types of tournaments and when to use them.
- The students will adapt the discipline plan that they created in ScEd 276 and make it applicable for high school students.
- The students will understand how to integrate reading skills into the physical education curriculum by passing the reading assignments.
- The students will demonstrate competency in instructional design principles by completing a unit plan of instruction and passing the assignment.

PETE 399R : Academic Internship: Coaching. (1-4:0:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Advisor's consent.

DESCRIPTION: On-the-job experience in coaching.

Course Outcomes

- Students will demonstrate their ability to coach a variety of sports in the 7-12 classroom.

400-Level Courses

PETE 430 : Principles of Coaching. (2:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Developing a philosophy of coaching; understanding coaching responsibilities and techniques; preparing athletes; valuing professional relationships with others.

Course Outcomes

- Develop a philosophy of coaching and officiating after discussion of the psychological, physiological and sociological implication of coaching students.
- Gain an understanding of various coaching responsibilities and team organizational procedures such as: public relations, team selection, motivation, scheduling, etc.
- Understand the student-athlete and the techniques of team leadership and interaction.
- Become acquainted with a variety of coaching techniques.
- Explore player preparation in the areas of conditioning, skill acquisition, and evaluation.
- Become aware of the literature and resources available to aid coaches.
- Participate in an extensive class project.
- Gain an understanding of preparation necessary for becoming an official for youth sports.
- Develop an understanding of and be able to make application of rules and strategies relating to specific sports.
- Develop an understanding of methods to develop a professional relationship with coaches, administrators, officials, fans, parents, and players.
- Learn to observe and critique game official's performance from a professional viewpoint.

PETE 450 : Psychology of Sport. (2:2:0)

WHEN TAUGHT: Fall

DESCRIPTION: Basic overview of sports psychology.

Course Outcomes

There are no course outcomes available

PETE 461 : Adapted and Multicultural Physical Education for Teaching Majors. (3:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: FBI fingerprint and background clearance.

DESCRIPTION: Legal mandates, assessing and identifying special needs students, multicultural issues, and management and instructional techniques.

Course Outcomes

- *Identify, select, and implement appropriate instruction that is sensitive to the strength/weaknesses, multiple needs, learning style, and experiences of diverse learners.
- *Use appropriate strategies, services, and resources to meet special and diverse learning needs.
- *Create a learning environment which respects and incorporates learners' personal, family, cultural, and community experiences
- Know the principles that address the physiological and biomechanical applications encountered when working with diverse populations.
- Know how to assess and evaluate students with disabilities in order to make appropriate decisions about special services and program components.
- Know how to teach students with disabilities integrated in regular physical education programs.
- Learn how to provide consultation and staff development activities related to students with disabilities and their IEP.
- Learn how to work and attend to the needs of multicultural students integrated in physical education

PETE 476R : Student Teaching - Physical Education (12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Undergraduate Courses

200-Level Courses

SC ED 250 : Literacy and Learning for the Disciplines. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: An investigation of the literacies needed to participate in the various disciplines and the support needed to learn those literacies.

Course Outcomes
There are no course outcomes available

SC ED 276R : Exploration of Teaching. (3-4:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Major-area preadmission requirements; FBI fingerprint and background clearance.

DESCRIPTION: Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

Course Outcomes
No outcomes are available at this time.

300-Level Courses

SC ED 350 : Adolescent Development in an Education Context. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or HIth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Adolescent development and its implications for integrated school culture, curriculum design, instructional practices, and assessment.

Course Outcomes
- The students will demonstrate how the stages of development impact instructional practices.
- The students will understand the social, physical, and cognitive developmental stages of adolescence in relation to the tasks of autonomy, identity and intimacy.
- The students will demonstrate how the stages of development impact classroom environments and management.

SC ED 353 : Multicultural Education. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 350 or concurrent enrollment; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or HIth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Designing and adapting instruction for diverse learners; collaborating with families, cultures, and communities in promoting and sustaining learning.

Course Outcomes
- Students will examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavio through a process of reflection.
- Acknowledge the dynamics of culture and diversity in school success and teachers' teaching. This includes recognizing and overcoming deficit thinking.
- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.
- Recognize and acknowledge racism, discrimination and other forms of inquity and privilege in themselves, in others, and within institutions.
- Recognize and use a personal moral spiritual framework along with principles and concepts of social science to guide educational accomplishments for diverse learners.

SC ED 375 : Theory and Methods of Secondary Education. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Disciplines of education; analysis of educational practice and relationship between theories and research on education and the practice of teaching.

Course Outcomes

- Students will demonstrate readiness to assume the responsibilities of studentteaching in general, choral, or instrumental music in the public schools.

SC ED 377R : Teaching Methods and Instruction. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Major-specific program requirements.

DESCRIPTION: Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes

- The students will understand and implement a variety of teaching strategies in teaching content in secondary classrooms.
- The students will link assessment to learning goals and strategies in teaching content in secondary classrooms.
- Students will create learning objectives to meet content and instructional goals.

SC ED 379 : Classroom Management. (1:1:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Concurrent enrollment in Sc Ed 377R and 378, or equivalent major courses; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.

DESCRIPTION: Current theory, research, and application in classroom management; creating positive teacher-student and peer relationships; developing optimal learning environments.

Course Outcomes

- The student will create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.
- The student will plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.
- The student will be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

SC ED 380 : Content-Area Literacy. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent enrollment in Sc Ed 377 or equivalent course.

DESCRIPTION: Current theory and related practices in literacy assessment and instruction for content-area classrooms.

Course Outcomes

- Teacher candidates will gain an understanding of theories related to literacy, reading, writing, texts, and literacy instruction.
- Teacher candidates will use instructional strategies and design curriculum materials to support students' creation, negotiation, and use of texts.
- Teacher candidates will develop an understanding of the place of literacy instruction in content-area classrooms to support students' access to knowledge and participation in a social and political democracy.

400-Level Courses

SC ED 476R : Secondary Student-Teaching. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.

DESCRIPTION: Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

Course Outcomes

- Students will put into practice the theories they have learned in content and pedagogy courses including planning lessons, assessing students of all abilities and cultural backgrounds, using a variety of instructional strategies, and collaborating with other teachers and with the community.

Teaching English Language Learners Program

Admission to TESOL K–12 and Dual-Language Immersion K-12 Teaching Minors

Only students completing teaching programs may enroll in these minors.

The Discipline

Preparation to teach English to children and youth of other languages which involves multidisciplinary course work in a number of areas, including language acquisition; teaching methods and materials; educational programs; and family, school, and community partnerships.

The TESOL K–12 minor focuses on teaching students of limited English proficiency who are in the public schools of the United States.

Career Opportunities

The TESOL K–12 minor meets the requirements, as approved by the Utah State Board of Education, leading to the Utah ESL endorsement. Earning this endorsement will enhance the career possibilities of licensed teachers.

Show All Course Descriptions
Hide All Course Descriptions

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

Note: Courses must be taken in sequential order and no more than two TELL courses can be taken in the same semester/term.

Program Requirements

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.
2. A multicultural course is required for this minor and must be taken before or concurrently with TELL 410. El Ed and ECE majors should take El Ed 202; secondary education majors should take Sc Ed 353.
3. Complete the following core courses:

ELANG 223 : Introduction to the English Language. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Overview of English from linguistic point of view, emphasizing structure of English and social, biological, and psychological aspects of language.

Course Outcomes
- Students will have acquired basic analytical tools in core areas of linguistics: phonology, morphology, syntax, semantics, and pragmatics.
- Students will be able to apply these analytical tools to English language data of various types, such as those involving aspects of variation, acquisition, and historical change.

TELL 400 : Foundations in Education for English Language Learners. (2:2:1)

WHEN TAUGHT: Contact Department.

DESCRIPTION: Identifying and assessing legal, linguistic, cultural, community, and familial issues affecting access of Limited English Proficient (LEP) student populations to education.

Course Outcomes
- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.

TELL 410 : Second Language Acquisition. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: EL ED 323 & EL ED 203; or ELANG 223 & SC ED 353; or CPSE 425

DESCRIPTION: Processes and variables in native- and second-language development. How teachers can foster efficient acquisition of language, cognitive, and academic skills in second-language environments.

Course Outcomes
- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas

TELL 420 : Assessing Linguistically Diverse Students. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ELANG 223 & SC ED 353; or EL ED 203

DESCRIPTION: Fundamental concepts in testing, use/interpretation of current instruments for language/academic assessment, appropriate placement of linguistically diverse students, and developing classroom language assessments.

Course Outcomes
- Candidates will know, understand, and use the major theories and research related to the structure and

acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.
- Candidates will demonstrate understanding of issues and concepts of assessment and use standards-based procedures with ELLs.

TELL 430 : Developing K-12 Literacy in a Second Language. (2:2:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ELANG 223 & SC ED 353 & TELL 410

DESCRIPTION: Instructional strategies, methodologies, and materials for developing reading and writing skills in a second language. Developing cognitive academic language proficiency and integrating multiple cultural perspectives.

Course Outcomes
- Candidates will know, understand, and use evidence-based practices and strategies related to planning, implementing, and managing standards-based ESL and content instruction.
- Candidates will know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.
- Candidateswill integrate technology as well as choose and adapt classroom resources appropriate for their ELLs.

4. Complete the following after completing the core courses above:

TELL 440 : Content-Based Language Instruction. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: TELL 410 & TELL 420; or TELL 410 & IP&T 213; or TELL 410 & CPSE 420

RECOMMENDED: El Ed 333, TELL 430, and CPSE 430 concurrently.

DESCRIPTION: Instructional methods, strategies, and materials for integrating curriculum content and language instruction. Teaching, creating, and adapting lesson materials in a multicultural context.

Course Outcomes
- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.

TELL 450 : Family, School, and Community Partnerships. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: ELANG 223 & TELL 410 & SC ED 353; or EL ED 203 & EL ED 323

DESCRIPTION: Standards, principles, policies, and processes of partnering with parents, families, schools, and communities in fostering and sustaining the development of children and youth.

Course Outcomes
There are no course outcomes available

5. Complete four credit hours of the following after all the above courses have been completed:

TELL 477R : Practicum for Teaching English Language Learners. (.5-4:0:4)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: TELL 440; FBI fingerprint background clearance.

DESCRIPTION: Practicum in teaching English to second-language learners.

NOTE: Can be taken concurrently with student teaching/internship in a diverse-language setting.

Course Outcomes
- Candidates know, understand, and use major concepts, principles, theories, and research related to the nature and role of culture and cultural groups to construct supportive learning environments for ELLs.
- Candidates will use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas in public school settings.

Minor in Dual-Language Immersion K-12 Teaching (20 hours)

Show All Course Descriptions
Hide All Course Descriptions

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

The Dual-Language Immersion K-12 Teaching Minor is offered through the Department of Teaching Education in the McKay School of Education. This minor prepares educators to teach in a public school setting where both English and one other approved foreign language are taught. Currently approved languages include Chinese, French, German, Portuguese, and Spanish. This minor can lead to a Dual-Language Immersion endorsement through the Utah State Office of Education.

Non-language teaching majors and minors: Students must pass the OPI at an advanced-mid level and the Praxis in the target language before they can start the Dual-Immersion minor. If a student does not pass, the student will be encouraged to take a conversational class in the language before taking the OPI and Praxis again and applying for the minor.

Language teaching majors and minors: Students must take the OPI and Praxis before TELL 435. If a student does not pass, the student will be encouraged to take a conversational class in the language. If an instructor believes a student could pass OPI before taking TELL 445, they can make the decision to allow the student into the class. However, if they don't pass the OPI and/or Language Praxis, they will not be allowed to continue on to TELL 445.

Note: Courses must be taken in sequential order and no more than two TELL courses can be taken in the same semester/term.

Program Requirements

1. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.
2. A multicultural course is required for this minor and must be taken before or concurrently with TELL 410. El Ed and ECE majors should take El Ed 202; secondary education majors should take Sc Ed 353.
3. Complete the following core courses:

FLANG 300 : Foundations of Dual Language and Immersion Education. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Historical overview, theoretical and research foundations for dual language and immersion education; practical application of theory and research in immersion programs.

Course Outcomes

- Discuss theoretical principles and research findings that underlie dual language and immersion education
- Explain differences and similarities between one-way, two-way, developmental bilingual and indigenous language immersion programs
- Summarize key principles of first and second language learning in dual language and immersion classrooms
- Discuss the social and political contexts for dual language education and their implications for classrooms and programs
- Synthesize lessons that can be learned from dual language and immersion programs around the world

*TELL 410 : Second Language Acquisition. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: EL ED 323 & EL ED 203; or ELANG 223 & SC ED 353; or CPSE 425

DESCRIPTION: Processes and variables in native- and second-language development. How teachers can foster efficient acquisition of language, cognitive, and academic skills in second-language environments.

Course Outcomes

- Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas

TELL 420 : Assessing Linguistically Diverse Students. (2:2:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ELANG 223 & SC ED 353; or EL ED 203

DESCRIPTION: Fundamental concepts in testing, use/interpretation of current instruments for language/academic assessment, appropriate placement of linguistically diverse students, and developing classroom

language assessments.

Course Outcomes
- Candidates will know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.
- Candidates will demonstrate understanding of issues and concepts of assessment and use standards-based procedures with ELLs.

TELL 435 : Language and Literacy Instruction in K-12 Dual Immersion Settings. (3:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: FLANG 300 & TELL 410 & TELL 420; or FLANG 300 & TELL 410 & IP&T 213; OPI (Advanced-Mid), FBI fingerprint background clearance.

DESCRIPTION: Theory and rationale for developing language and literacy in two or more languages. Focus on the development of a variety of language arts and literacy instruction, techniques, methods, and theory in K-12 dual immersion classrooms.

Course Outcomes
- The students will identify the historical and legal foundations of bilingual/dual-immersion education and relate these to specific requirements and procedures in Utahl
- The students will identify different models of bilingual/dual-immersion programs in relation to characteristics of effective instructional practices in a variety of content subjects
- The students will identify and be able to articulate theories and philosophies of second language acquisition and language teaching in bilingual/dual-immersion instruction
- The students will create meaningful lesson plans and activities that demonstrate appropriate decision-making procedures to meet bilingual/dual-immersion educational program needs.
- The students will implement techniques, strategies, tasks, related to the teaching of content literacy and language in bilingual or dual-immersion programs in the classroom.

***Note:** Elementary Education students will take El Ed 343 rather than TELL 410.

4. Complete the following after completing the core courses above:

TELL 445 : Content-Based Language Instruction in K-12 Dual-Language Immersion Settings. (3:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: TELL 435; OPI (Advanced-Mid), FBI fingerprint background clearance.

DESCRIPTION: Methods, theories, and practice for teaching language in content area subjects such as math, science, and social studies in K-12 dual immersion environments.

Course Outcomes
There are no course outcomes available

5. Complete one of the following target language teaching methods courses:

CHIN 377 : Chinese Language Teaching Procedures. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Chin 301 or instructor's consent.

DESCRIPTION: Acquiring knowledge and skills specific to teaching Chinese as a foreign language. Conducted in Chinese and English.

Course Outcomes
- Students will prepare lesson plans and implement their plans in teaching demonstrations (see Chinese major expected learning outcome 3).
- Learn to critically evaluate existing language materials and teaching methods, develop an understanding of curriculum design and materials development, and develop effective teaching materials (see Chinese major expected learning outcome 3).
- Demonstrate an understanding of the basic principles and methods of teaching the four language skills: listening, speaking, reading, and writing, within a cultural context (see Chinese major expected learning outcomes 1-3).
- Apply a knowledge of basic theories and methodologies for teaching a foreign language including being able to use a performance-based approach for teaching Chinese (see Chinese major expected learning outcome 3).

FREN 377 : Introduction to French Language Teaching. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Fren 321; FLang 276 (if a French teaching major)

DESCRIPTION: Language acquisition theories and instructional practices specific to French language classrooms. Includes teaching phonological features and pronunciation. Lectures, demonstrations, and microteaching.

NOTE: Taught in French and English.

Course Outcomes
- Design and deliver effective French instruction appropriate to learners' needs.
- Discuss and apply basic principles of language acquisition.
- Discuss and apply basic principles of formal and informal assessment.
- Reflect on and justify instructional choices and actions.
- Describe the phonological features of French and diagnose your own pronunciation problems.

GERM 377 : Methods in Teaching German. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: GERM 303 & GERM 344 & FLANG 276

DESCRIPTION: Developing meaningful and engaging instruction for secondary students in German; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Course Outcomes
There are no course outcomes available

SPAN 377 : Spanish Teaching Methods 1. (3:3:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SPAN 321 & SPAN 326 & SPAN 345; or SPAN 321 & SPAN 326 & SPAN 355; Spanish Teaching major or minor status.

DESCRIPTION: History of language teaching methods; standards-based unit and lesson planning; strategies for teaching speaking, listening, reading, writing, grammar, and vocabulary.

Course Outcomes
- explain the benefits of studying a foreign language
- discuss major historical trends in foreign language teaching
- discuss ways of setting up your classroom to motivate students to learn Spanish
- select and evaluate textbooks for your program
- use the Standards for Foreign Language Learning to plan units and lessons
- plan and implement various methods for teaching oral skills (including pronunciation, conversation, games, and songs)
- plan and implement methods for teaching listening, reading, and writing
- plan and implement methods for teaching grammar and vocabulary

SPAN 378 : Spanish Teaching Methods 2. (3:3:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: SPAN 377

DESCRIPTION: Strategies for teaching culture; use of instructional media and technology; assessment of learner performance; foreign language program models; planning for continuing professional development.

Course Outcomes
- Use professional reading to develop a research-based repertoire of instructional strategies that help secondary students meet each of the National Standards for Foreign Language Learning
- Design units, lessons, and activities that develop students' proficiency in Spanish across the three modes of communication
- Contextualize language learning experiences in cultural products, practices, and perspectives using various techniques for teaching and assessing culture learning
- Develop and adapt assessments to evaluate students' proficiency and provide them with feedback that will improve their performance
- Utilize a variety of emerging technologies to enhance instruction, develop language proficiency and cultural competence, improve your professional productivity, and support your professional
- Adapt learning experiences appropriately to better meet the needs of culturally diverse learners, including students with a variety of learning styles and special needs
- Compare and contrast various program models for world language learning
- Participate professionally in the school community, in professional organizations and professional development activities, and engage in professional dialogue and reflection with colleagues to improve teaching skills and your program

6. Complete four credit hours of the following after all the above courses have been completed:

TELL 478R : Practicum in Dual-Language Immersion K-12 Teaching Minor. (.5-4:0:Arr.)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: TELL 435 & TELL 445; FBI fingerprint background clearance; Language teaching methods in the target language; Passing OPI at advanced-mid; Praxis II.

DESCRIPTION: Supervised practice in public school dual immersion settings, including conducting formative evaluations, designing instruction based on formative evaluations, implementing that instruction, and then evaluating the students' academic and language (English & target) performance.

Dean: Alan R. Parkinson, Professor, Mechanical Engineering
Assistant Dean: David K. Anthony
Associate Dean: David G. Long, Electrical and Computer Engineering
Associate Dean: Spencer P. Magleby, Professor, Mechanical Engineering

The Ira A. Fulton College of Engineering and Technology is accredited under the Accreditation Board for Engineering and Technology (ABET) for all engineering and technology programs. The men and women who have graduated from our college will be prepared for entry into the finest graduate schools or workplaces. The mission of the Fulton College is to develop men and women of faith, character, and technical ability who will become outstanding leaders throughout the world.

Alphabetical list of majors offered in the College of Engineering and Technology:

Chemical Engineering (Ch En)
Civil and Environmental Engineering (CE En)
Construction Management (CM)
Electrical and Computer Engineering (EC En)
Facility and Property Management (FPM)
Industrial Design (InDes)
Information Technology (IT)
Manufacturing Engineering Technology (MET)
Mechanical Engineering (Me En)
Technology and Engineering Education (TEE)

Minors offered in the College of Engineering and Technology:

Information Technology (IT)
Manufacturing (Mfg)

See the department sections in this catalog for details regarding these programs or go to http://www.et.byu.edu.

Student Service Center/Advisement

Pamela O. Williamson, Manager Student Center/Advisement Supervisor
Judith Ann Benedict, Advisor
242 Clyde Building
(801) 422-4325
engineering_advisement@byu.edu

The Student Service Center provides assistance with resumes, resources for internships, and career placement. In Advisement, professional academic advisors are available to assist students with academic planning and provide information for specific majors. Students are assisted in major exploration and basic developmental career issues. Information is also provided regarding university resources and further career and major exploration. Advisement services also include assistance with university core, change of major, academic success, graduation processes, university policies and procedures, and scholarships.

Admission to Degree Program

The chemical engineering degree program is open to all students.

The Discipline

Chemical engineering is the application of chemistry, biology, physics, mathematics, computer skills, and economics to designing, developing, and implementing chemical processes that convert raw materials into more useful, valuable products. Engineering skills are required for design, testing, scale-up, operation, control, and optimization. Applications range in size from the molecular level to large chemical production facilities with objectives ranging from economic performance to protection of the environment and the safety of workers and consumers. Chemical engineers are engaged in developing and producing a diverse range of products from raw materials to commodity and specialty chemicals. These products include high-performance materials needed for aerospace, automotive, biomedical, electronic, environmental, and military applications. Chemical engineers work in a variety of industries, including chemical manufacturing, energy, biotechnology, electronics, food, clothing, paper, health care, and business services.

Educational Objectives

The Chemical Engineering Department's educational objectives apply to graduates in the years following their graduation. These graduates will:

1. Remain committed to and exhibit lives of faith in Jesus Christ and service to family and community (including church).
2. Demonstrate effective reasoning and communication skills, continue to be informed about contemporary and global issues, and pursue life-long learning.
3. Be effective and innovative in developing and implementing solutions to open-ended problems (technical and/or non-technical), and thereby contribute to the improvement of society. In doing this, graduates will draw on the foundation of a broad university education and of excellent preparation in mathematics, science, and engineering.
4. Exemplify sound ethics, be professionally responsible, interact effectively with others, appreciate their contributions, and contribute to their growth and development.

These objectives will be achieved through the development of the following attributes in students graduating from the program:

1. A knowledge of the requirements of the chemical engineering major, familiarity with professional opportunities, and a knowledge of contemporary issues.
2. An ability to apply knowledge of fundamental principles of mathematics and science.
3. An ability to apply knowledge of chemical engineering fundamentals.
4. Practical experience with chemical process equipment, chemical handling, chemical analysis, and process instrumentation, including the ability to design and conduct experiments, as well as to analyze and interpret data.
5. An ability to use modern engineering tools necessary for engineering practice.
6. An ability to define and solve engineering problems, including the utilization of creative and innovative skills.
7. An understanding of the impact of engineering solutions in a global, economic, environmental, and societal context. A dedication to safe, environmentally and societally responsible engineering.
8. An ability to communicate ideas effectively in both oral and written form.
9. An ability to work effectively with others from diverse backgrounds to accomplish common goals.
10. An ability to apply chemical engineering fundamentals to design process units and systems of process units including multiple operations, within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
11. An appreciation for and a commitment to ethical, professional, and personal responsibilities.
12. An appreciation for and a commitment to the continuing pursuit of excellence and the full realization of human potential in self and others.

Career Opportunities

The combination of knowledge about process engineering, math, and chemistry obtained in the chemical engineering curriculum is a versatile preparation that opens a wide variety of opportunities to graduates. This versatility is one reason why chemical engineers have traditionally been among the highest paid professionals in the engineering and science disciplines.

Chemical engineers make a significant difference in the quality of life. Some develop clean, new energy sources to power society. Some develop and produce fertilizers and other agricultural chemicals to feed mankind. Virtually all pharmaceuticals are produced by chemical engineers to enhance the life of millions. Others study and produce biomedical devices and artificial organs. Still others are involved in development and production of new materials for use in new high-tech products.

Chemical engineers produce chemicals ranging in use from cleaning products to medicines and from man-made fibers for clothing and textiles to plastics for construction and consumer goods. Another large employer of chemical engineers is the semiconductor industry. In work that involves significant knowledge of chemistry and related processes, chemical engineers assist in the design and manufacture of semiconductor chips and circuit boards. The petroleum industry also employs chemical engineers, requiring their

expertise for the discovery, production, and refining of petro-chemicals, including fuels, chemicals, and oils.

Many chemical engineers are employed in environmentally related positions, working on ways to improve air and water quality, to reduce acid rain and smog, and to recycle and reduce waste. Additionally, chemical engineers are employed by universities as teachers and researchers and by government agencies to provide answers for energy, environmental, and defense concerns. Chemical engineers also train to work in the medical, business, and legal professions.

Though chemical engineering career opportunities are diverse, job functions can be categorized more easily. Chemical engineers are usually involved in research, design, development, production, technical sales, or management.

In research, they develop new ideas, new products, and new ways to produce existing products more economically and with less environmental impact.

In design, they create the processes that convert raw materials into finished products with emphasis on efficiency, safety, consumer needs, and environmental protection.

The development engineer improves existing processes and technology to better meet changing needs.

Production engineering involves supervision, quality control, and testing of production processes and operations.

Management and technical sales involve decision making with regard to consumer needs and technical capabilities.

Chemical engineers are creative problem solvers. Their careers are rewarding not only from an intellectual and financial view, but also from a personal perspective. Affecting the lives of millions, their solutions provide a better lifestyle for mankind.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Chemical Engineering (Program Outcomes)

Students should see their college advisement center for help or information concerning the undergraduate programs.

Graduate Programs and Degrees

MS in Chemical Engineering
PhD in Chemical Engineering

For more information see the BYU 2013–2014 Graduate Catalog.

General Information

The Chemical Engineering Department offers a professional program leading to the bachelor of science degree. The first two years of this program are considered to be preprofessional with course work emphasis on math, chemistry, and chemical engineering fundamentals. The remaining two years are considered to constitute the professional program.

Any student who is admitted to the university may choose this program as a possible major. All students are urged to declare their intention to major in the department upon first entry to the university or as soon thereafter as possible by contacting the college advisement center (242 CB). Students electing to major in this program must successfully complete the minimum preprofessional program requirements and submit an application for the department's professional program.

Transfer Students. Provisions have been made so that a qualified student transferring from a junior college or from another university, college, or department, who has completed the equivalent of the first two years of the academic program, can complete the BS degree requirements in another two years. Contact the department at the earliest date possible so that any variations can be accommodated with minimum loss of time.

Integrated Master's Program. At the end of the sophomore year or during the junior year, qualified students desiring a master's degree in chemical engineering may elect to enter the integrated master's program. The purpose of this program is to afford greater flexibility in scheduling course work than is normally available through the traditional BS degree followed by MS degree program. In this program students may work toward both the bachelor's and master's degrees simultaneously, either receiving the BS degree before or at the same time as the MS degree. At the end of the sophomore year students must have a cumulative GPA of 3.5 or more. All credit to be counted toward the master's degree must carry a cumulative GPA of 3.0 or better.

Before completing the final 30 hours of undergraduate course work, students should submit a formal application for admission to the Office of Graduate Studies. Additional details may be obtained from the college advisement center.

Professional Registration. The Chemical Engineering Department encourages graduates to become registered professional engineers. General qualifications for becoming registered are explained in the Ira A. Fulton College of Engineering and Technology section of this catalog. Some states require this status for consulting and practice in the private sector. Successful completion of the basic chemical engineering program outline prepares graduates to pass the Fundamentals of Engineering (FE) examination. Students who wish to become registered as professional engineers are also advised to talk to their advisor about developing their own professional engineering option, which may include additional FE preparation courses.

Professional Program Admission Policy. Admission to the professional program is available to all students in good academic standing with the university who have (a) passed the prerequisite courses for the first-semester professional courses, namely Ch En 273 and Math 302, and (b) submitted to the department an Application for the Chemical Engineering Professional Program.

The Application for the Chemical Engineering Professional Program requires the student to meet with their department advisor for direction and counseling with regard to performance in the preprofessional program courses and successful completion of the professional program.

Academic Standards and Continuance Policy. The student's academic standing with the university must be "Good" or "Previous" to enroll in professional program courses. Anyone who accumulates chemical engineering grades below C– in excess of 6 hours may not take further chemical engineering courses until he or she has reduced the unacceptable credits to 6 hours or less. A student may not graduate with more than 3 hours below C– in chemical engineering courses. Since all grades earned for a course (original and any retakes) are retained in university records and GPA calculations, this policy applies to the most recent grades for retaken courses.

Program Requirements | View MAP | View Program Outcomes

1. Students are strongly encouraged to consult with the department about their course scheduling.
2. Complete the following preprofessional courses:

CH EN 170 : Introduction to Chemical Engineering. (2:2:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: CHEM 105; or CHEM 111
DESCRIPTION: Principles of chemical processes and analyses with spreadsheets and graphics. Applying chemical engineering to current problems.
NOTE: The prerequisites may be taken concurrent with the course. Check with the department.

Course Outcomes

- Students will gain a knowledge of the major through the course material.
- Students will be introduced to chemical processes, units, and corresponding equipment.
- Students will gain a familiarity with the chemical engineering field, career options, and potential job functions, and be aware of contemporary issues that may have an impact on professional activities, through lectures and solving homework problems.
- Students will gain appreciation and respect for other disciplines and a knowledge of how chemical engineering relates to other disciplines through faculty lectures and homework problems.
- Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems.
- Students will be introduced to the solution of steady-state, overall, material and energy balances.
- Students will be introduced to the mechanical energy balance equation to solve fluid flow problems both with and without friction.
- Students will be introduced to conduction, forced and free convection, and radiation.
- Students will be introduced to the fundamentals of kinetics including definitions of rate and forms of rate expressions.
- Students will be introduced to the first law of thermodynamics for closed and open systems.
- Students will be introduced to process control terminology and feed-back and feed-forward control systems.
- Students will be introduced to the effective interpretation of graphical data.
- Students will be introduced to a spreadsheet package to perform engineering calculations.
- Students will be introduced to engineering problems and their solutions.
- Students will be introduced to a problem solving strategy to define and solve engineering problems.
- Students will be introduced to critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be introduced to the notions of rationalizing units, making order of magnitude estimates, assessing reasonableness of solutions, and selecting appropriate levels of solution sophistication.
- Students will be introduced to how environmental considerations are incorporated into engineering problem solving.
- Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).
- Students will practice good teamwork principles.
- Students will demonstrate experience working together in teams.
- Students will be introduced to performance calculations on CSTR reactors.
- Students will be introduced to preliminary size and performance calculations on shell-and-tube heat exchangers.
- Students will be introduced to practical considerations of heat exchangers including types of heat exchangers, materials of construction, and fouling.
- Students will be introduced to the design of flow systems involving pumps for Newtonian fluids.
- Students will be introduced to environmental, social, political, ethical, health and safety, manufacturability, and sustainability constraints in process synthesis.
- Students will be introduced to costs in capital ventures (e.g., capital vs operating costs, salvage value, equipment costing).
- Students will develop a sense of professional community with students by working in teams.
- Students will be introduced to the effective reading of technical material.

CH EN 191 : Preprofessional Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Presentations by faculty, advisors, and industrial representatives.
NOTE: College Lecture attendance required.

Course Outcomes

- Students will gain a knowledge of the major and required curriculum through lectures.
- Students will gain a familiarity with the chemical engineering field, career options, and potential job

functions, and be aware of contemporary issues that may have an impact on professional activities, through presentations by faculty and guest lecturers.
- Students will demonstrate a sense of the importance of life-long learning.
- Students will learn to take responsibility for their own learning experience at BYU by maintaining disciplined study habits.
- Students will understand the importance of a well-written resume in obtaining professional employment.

CH EN 263 : Computational Tools for Chemical Engineers. (2:2:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CH EN 170 & MATH 113; or concurrent enrollment.

DESCRIPTION: Use of spreadsheets, advanced equation-solving packages, and structured languages to solve engineering problems. Introduction to chemical process principles.

NOTE: College Lecture attendance required.

Course Outcomes
- Students will demonstrate an understanding of fundamental mathematics (including calculus, linear and nonlinear simultaneous equation solving, etc.) by using computer tools to solve problems.
- Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems while using an equation solver like Mathcad.
- Students will be able to use a spreadsheet package to perform engineering calculations which include some of the following: economic analysis, processing and analysis of data, graphical analysis and presentation, etc.
- Students will be able to solve numerical and symbolic problems using advanced math software (e.g. Mathcad).
- Students will be able to write program structures, and understand when programming is most appropriate.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to convert problem solving strategies to procedural algorithms.
- Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

CH EN 273 : Chemical Process Principles. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: CHEM 106 & CH EN 263; or CHEM 112 & CH EN 263; or concurrent enrollment.

DESCRIPTION: Material and energy balances.

NOTE: College Lecture attendance required.

Course Outcomes
- Students will learn about chemical processes, units, and corresponding equipment
- Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems both by hand and with an equation solver.
- Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.
- Students will be able to set up and solve simple transient material balances.
- Students will be able to use a degree-of-freedom approach to assist in the solution of material and energy balances.
- Students will be able to read pure component and mixture phase diagrams (e.g. psychrometric chart, solid solubility, liquid-liquid, VLE) and construct mass balances from them using the lever rule, tie lines, etc.
- Students will understand the phase behavior of pure substances in relationship to the variables T, P, and density (including vapor pressure, critical point, freezing line, triple point, etc.).
- Students will be able to use the mechanical energy balance equation to solve fluid flow problems both with and without friction.
- Students will be able to solve simple fluid statics problems (e.g., manometers, fluid head, etc.)
- Students will be introduced to the first law of thermodynamics for closed and open systems.
- Students will be able to apply Raoult's law to solve VLE problems including bubble point, dew point, and flash calculations.
- Students will understand and be able to use the extent of reaction in material balances
- Students will be introduced to equations of state and corresponding states correlations.
- Students will be introduced to the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.
- Students will be introduced to process variables (e.g., P, T, flow rate, conc.) and their measurement.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to solve numerical and symbolic problems using advanced math software (e.g. Mathcad).
- Students will be introduced to the use of appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to use a problem solving strategy to define and solve engineering problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.
- Students will be introduced to the notions of rationalizing units, making order of magnitude estimates, assessing reasonableness of solutions, and selecting appropriate levels of solution sophistication.
- Students will be introduced to how safety considerations are incorporated into engineering problem solving.
- Students will be introduced to how environmental considerations are incorporated into engineering problem solving.
- Students will practice good teamwork principles.
- Students will demonstrate experience working together in teams.
- Students will be introduced to calculations involving work in turbines, compressors, and pumps.
- Students will be introduced to the AIChE code of ethics.
- Students will demonstrate effective reading of technical material.

EC EN 301 : Elements of Electrical Engineering. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: PHSCS 220 & MATH 303; or PHSCS 220 & MATH 334

DESCRIPTION: Linear electric circuits, computer organization, and logic circuits for nonmajors.

NOTE: Fee.

Course Outcomes

- Understand and apply basic principles of electronic circuits.

MATH 112 : Calculus 1. (4:5:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

MATH 113 : Calculus 2. (4:5:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 112.

DESCRIPTION: Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 2 develops techniques of integration, applications of integration, infinite sequences and series, parametric curves, polar coordinates, and conic sections. This course contributes to all the expected learning outcomes of the Mathematics BS. For a more detailed course description, visit the Math 113 Wiki page.

PHSCS 121 : Introduction to Newtonian Mechanics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Calculus or concurrent enrollment.

DESCRIPTION: Linear, circular, and projectile motion; their prediction from forces and torques. Conservation of energy and momentum. Weekly lab.

Course Outcomes

- Convert quantities from one set of units to another and use a reasonable number of significant digits when expressing answers.
- Compute a particle's classical translational motion in one or two dimensions, including circular motion, both in Cartesian coordinates and in polar coordinates.
- Use the ideas of energy, work, power, linear momentum, and angular momentum to arrive at conclusions about the motion of a system, including the motion of satellites and the planets.
- Use Newton's Second Law to calculate the motion of objects, including those in simple harmonic motion, as well as the forces and torques acting on systems in equilibrium.
- Demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strenghts and weaknesses of this process

And complete one of the following options:

Either

CHEM 111 : Principles of Chemistry. (4:3:3)

OFFERED: Honors also.

WHEN TAUGHT: Fall

PREREQUISITE: Math 110 or equivalent.

RECOMMENDED: High school chemistry, physics, and introductory calculus or concurrent enrollment in Math 112.

DESCRIPTION: Stoichiometry, kinetic-molecular theory, thermodynamics, states of matter, solutions and equilibria, electrochemistry, structure and bonding, chemical reactions, kinetics.

NOTE: Tutorial included.

Course Outcomes

- Students will demonstrate the ability to use valence shell and molecular orbital models of bonding

to predict molecular shapes, reactivity, and spectroscopic properties.
- Students will be able to apply the kinetic theory of gases, including properties of ideal gases and interactions that lead to non-ideal behavior, to predict gas behavior with varied temperature, pressure and volume.
- Students will demonstrate the ability to use core concepts of chemical thermodynamics, with emphasis on the first and second laws, to predict physical changes and reaction outcomes based on Gibbs energies.
- Students will be able to apply concepts of the quantum mechanical nature of light and matter to explain observations that originally led to the development of atomic theory.

: Honors Principles of Chemistry.

Course Outcomes

CHEM 112 : Principles of Chemistry. (3:3:2)

WHEN TAUGHT: Winter
PREREQUISITE: Chem 111 or equivalent.
DESCRIPTION: Continuation of Chem 111.
NOTE: Tutorial included.

Course Outcomes
- Students will be able to use thermodynamic principles and their application to physical and chemical equilibria to calculate entropic and enthalpic contributions to physical changes and reactions and predict equilibria given entropic and enthalpic changes.
- Students will be able to apply acid-base theory, including interactions of strong and weak acids and bases, to determination of pH values of solutions, calculating buffering capacity and performance of acid-base titrations. They will be able to use structural features of molecules to estimate acid and base strength.
- Students will demonstrate an understanding of electrochemistry in designing simple electrodes and will use reduction/oxidation potentials to characterize electrodes.
- Students will be able to apply transition state theory to reaction kinetics. Students will be able to model mathematically rates of multiple reaction types.
- Students will be able to apply the periodic nature of the elements to classify elements and identify the compositions of inorganic salts.

Or

CHEM 105 : General College Chemistry. (4:5:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 110 (or equivalent) or concurrent enrollment.
DESCRIPTION: Atomic and molecular structure including bonding and periodic properties of the elements; reaction energetics, electrochemistry, acids and bases, inorganic and organic chemistry.
NOTE: Primarily for students in engineering and biological sciences. Three lectures and two recitation sections per week.

Course Outcomes
- Students will demonstrate a familiarity with the basic vocabulary and concepts of chemistry.
- Students will demonstrate a qualitative and basic quantitative understanding of the fundamental chemical laws which govern the material substances in our universe and which express how one variable in nature depends on another.
- Students will demonstrate the ability to manipulate quantitative descriptors of natural phenomena expressed both in the form of equations and of proportionalities, and solve chemistry problems using these skills.
- A successful Chemistry 105 students describes chemical phenomenon by first focusing on properties of the elements at the atomic level. Chemistry 105 students will gain a knowledge base of reactivity patterns of elements and compounds.
- Chemistry 105 students will be able to use their chemistry experience, knowledge, and skills to better understand and work in their own field of study.

CHEM 106 : General College Chemistry. (3:4:0)

WHEN TAUGHT: Fall; Winter; Summer
PREREQUISITE: CHEM 105; or CHEM 111
DESCRIPTION: Continuation of Chem 105 but covering most of the topics in a more quantitative way. Detailed treatment of thermodynamics and equilibria.
NOTE: Three lectures and one recitation section per week.

Course Outcomes
- Students will demonstrate an expanded mastery of the concepts that were learned in Chemistry 105 including: kinetics, chemical equilibrium, acids and bases, solubility and complexation equilibrium, electrochemistry, thermodynamics, organic, biochemistry, and nuclear chemistry.
- Students will demonstrate the ability to solve mathematical problems, typically using algebra, in kinetics, chemical equilibrium, acids and bases, solubility and complexation equilibrium, electrochemistry, and thermodynamics.

CHEM 107 : General College Chemistry Laboratory. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Chem 106 or Chem 112 or concurrent enrollment.
DESCRIPTION: Chemical properties, chemical reactions, collection and interpretation of data, preparation of reports.
NOTE: Required for most students needing one year of general chemistry.

Course Outcomes
- Through laboratory experiments, students will demonstrate that they can use precise scientific instrumentation to find quantitative answers to significant problems within the total precision allowed by the equipment.
- Students will demonstrate that they can perform simple experiments, observe the outcomes accurately, then make reasoned, accurate decisions about the meanings of the results.

3. Complete one of the following options:

Either

MATH 302 : Mathematics for Engineering 1. (4:4:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: Math 113.
DESCRIPTION: Multivariable calculus, linear algebra, and numerical methods.

Course Outcomes
- This course is designed to give students from the College of Engineering and Technology the mathematics background necessary to succeed in their chosen field. For more detailed information, please visit the department wiki for this course at Math 302 Wiki.

MATH 303 : Mathematics for Engineering 2. (4:4:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: MATH 302
DESCRIPTION: ODEs, Laplace transforms, Fourier series, PDEs.

Course Outcomes
- This course is designed to give students from the College of Engineering and Technology the mathematics background necessary to succeed in their chosen field. For a more detailed course description, visit Math 303 Wiki.

Or

MATH 313 : Elementary Linear Algebra. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 112.
RECOMMENDED: Math 290.
DESCRIPTION: Linear systems, matrices, vectors and vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and eigenvectors.

Course Outcomes
- This course is aimed at majors in mathematics, the physical sciences, engineering, and other students interested in applications of mathematics to their disciplines. Linear algebra is used more than any other form of advanced mathematics in industry and science. A key idea is the mathematical modeling of a problem via systems of linear equations. For more detailed information visit the Math 313 Wiki page.

: Honors Elementary Linear Algebra. (3:3:1)

Course Outcomes

MATH 314 : Calculus of Several Variables. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 313.
DESCRIPTION: Partial differentiation, the Jacobian matrix, and integral theorems of vector calculus.

Course Outcomes
- This course is aimed at students majoring in mathematical and physical sciences, and engineering, and students minoring in mathematics or mathematical education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed manipulative skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus of several variables extends the concepts of limit, integral, and derivative from one dimension to higher dimensional settings and is therefore fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information visit the Math 314 Wiki page.

MATH 334 : Ordinary Differential Equations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 113 and Math 313.
DESCRIPTION: Methods and theory of ordinary differential equations.

Course Outcomes
There are no course outcomes available

4. Complete the following professional courses:

CH EN 311 : Chemical Engineering and Society. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 273 & ENG T 231
DESCRIPTION: Responsibility of chemical engineers in society relative to ethics, leadership, safety, environment, and energy.

Course Outcomes

- Students will demonstrate effective interpretation of graphical data.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will pass the HAZCOM test.
- Students will be dedicated to safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations; understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will be dedicated to environmentally responsible engineering; demonstrate knowledge of pertinent environmental laws and regulations; understand and have a basic knowledge of how environmental considerations, including green engineering strategies, are incorporated into engineering problem solving.
- Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).
- Students will understand teamwork principles including: recognition of team members' strengths and weaknesses; importance of effective communication skills; recognition of unique contributions of team members; and the need to facilitate team members' development.
- Students will demonstrate experience working together in teams.
- Students will understand safety constraints and be able to use hazard evaluation tools (e.g., HAZOP, fault-tree).
- Students will understand and commit to practice gospel standards as a basis for sound ethical behavior.
- Students will understand and commit to practice the AIChE code and other professional codes of ethics.
- Students will incorporate an engineering and a gospel-centered problem solving approach to the resolution of ethical dilemmas.
- Students will develop a sense of professional community with students by working in teams.
- Students will understand and strive to develop the qualities of a good leader whose public and private lives are consistent.
- Students will demonstrate effective reading of technical material.

CH EN 373 : Chemical Engineering Thermodynamics. (3:3:0)

WHEN TAUGHT: Winter
PREREQUISITE: CH EN 273 & CHEM 467
RECOMMENDED: Chem 461.
DESCRIPTION: First and second laws of thermodynamics as applied to behavior of real fluids; physical and chemical equilibrium.
NOTE: College Lecture attendance required.

Course Outcomes

- Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.
- Students will be able to read mixture phase diagrams (liquid-liquid and VLE) and construct mass balances from them using the lever rule, tie lines, etc.
- Students will be able to set up and solve simple transient energy balances.
- Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.
- Students will demonstrate an ability to solve engineering problems.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to use equations of state and corresponding states correlations in the determination of properties.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to perform energy conversion calculations for Rankine power and compression refrigeration cycles.
- Students will be able to set up and solve single-stage flash calculations.
- Students will understand the phase behavior of pure substances in relationship to the variables T, P, and density (including vapor pressure, critical point, freezing line, triple point, etc.)
- Students will understand the concept of entropy and the second law of thermodynamics and be able to apply the second law to closed and open systems.
- Students will understand the fundamental principles of chemical reaction equilibria including extent of reaction, equilibrium constant and its temperature-dependence, equilibrium conversion.
- Students will be able to use modern property databases to assist in problem solving.
- Students will be able to apply the first law of thermodynamics to closed and open systems (including energy, work, and heat transformations in process units such as tanks, turbines, compressors, valves, etc.).
- Students will be able to perform design (sizing) calculations for turbines and compressors (e.g., involving delta H, delta S, work, heat, efficiencies).
- Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will demonstrate effective reading of technical material.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

CH EN 374 : Fluid Mechanics. (3:3:0)

WHEN TAUGHT: Fall
PREREQUISITE: CH EN 273 & CH EN 311 & MATH 302; or CH EN 273 & CH EN 311 & MATH 314; or concurrent

enrollment; admission to professional program.

DESCRIPTION: Basic mass, momentum, and energy relations of fluid flow; design of fluid-handling systems and equipment.

NOTE: College Lecture attendance required.

Course Outcomes

- Students will understand mechanical behavior of materials including elastic, viscous, surface, and stress phenomena as it pertains to fluid flow applications.
- Students will be able to use the mechanical energy balance equation to solve fluid flow problems both with and without friction.
- Students will understand and be able to describe the physical significance of key dimensionless quantities including Re and f.
- Students will be able to solve simple fluid statics problems.
- Students will be able to determine velocity profiles for steady-state, laminar flow in simple geometries for Newtonian and power-law fluids.
- Students will understand the significance of steady-state, integral and differential mass, energy, and momentum balances in one dimension.
- Students will understand and be able to use advanced fluid mechanical concepts including boundary-layer theory, creeping flow, non-Newtonian flow, rheology, and turbulent flow.
- Students will understand qualitatively how external flow around objects affects drag and will be able to calculate drag forces and terminal velocities.
- Students will understand basic concepts relating to compressible flow, including Mach numbers, shock waves, and choked flow.
- Students will demonstrate effective interpretation of graphical data.
- Students will demonstrate an ability to solve engineering problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will be able to design flow systems involving pipes, valves, fittings, and pumps for Newtonian fluids.
- Students will be able to select, based on performance characteristics and operational constraints, the appropriate kind of pumps (positive displacement, radial, axial, etc.), turbines (impulse, Francis, Kaplan, etc), and valves for a given application.
- Students will be able to design flow systems involving pipes and pumps for power-law fluids.
- Students will be familiar with the use of computational fluid dynamics as a tool for solving fluid flow in complex geometries.
- Students will demonstrate effective reading of technical material.

CH EN 376 : Heat and Mass Transfer. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 374

DESCRIPTION: Heat and mass transfer, including conduction, convection, radiation, diffusion; steady and unsteady state systems; transport analogies; design applications.

Course Outcomes

- Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates for both external and internal flows and across phase boundaries.
- Students will understand radiative heat transfer including blackbody radiation and Kirchoffí¿½s law, and be able to solve radiative problems involving view factors and radiative exchange between surfaces.
- Students will learn about chemical processes, units, and corresponding equipment related to heat and mass transfer
- Students will understand qualitatively conduction, forced and free convection, and radiation.
- Students will be able to solve simple transient heat and mass transfer problems with methods such as lumped capacitance, Heisler charts, 1st term approximation, exact numerical solutions, etc.
- Students will understand and be able to use Fick's Law.
- Students will be able to formulate and solve differential energy balances for conduction within a single phase.
- Students will understand heat/mass transfer analogies including their limitations.
- Students will understand convective heat transfer and use of heat transfer coefficients for laminar and turbulent flows, internal and external flows, fully developed flow, flow with entry effects, and forced and free convection.
- Students will be able to analyze systems containing multiple resistances to heat transfer.
- Students will be able to do preliminary size calculations on shell-and-tube heat exchangers using the log-mean-temperature-difference (LMTD) method.
- Students will demonstrate effective reading of technical material.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to solve simple problems where heat and mass transfer are coupled.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will be able to calculate and use overall heat transfer coefficients in designing heat exchangers.
- Students will understand practical considerations of heat exchangers including types of heat exchangers, materials of construction, and fouling.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to do preliminary size calculations on shell-and-tube heat exchangers using the effectiveness-NTU method.

CH EN 378 : Science of Engineering Materials. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CHEM 351

DESCRIPTION: Fundamental principles of solid materials and their properties and behavior in engineering applications of metals, polymers, ceramics, and glasses.

Course Outcomes

- Students will be able to read liquid-solid mixture phase diagrams involving liquid-solid and solid-solid equilibria and solid solubility and construct mass balances from them using the lever rule, tie lines, etc.
- Students will understand the relationship of molecular interactions, including potential energy and intermolecular forces, to the properties and behaviors of materials.
- Students will understand crystal structure including nomenclature, packing, and defects.
- Students will understand mechanical behavior of materials including elastic, plastic, viscous, glass, surface, and stress/strain phenomena and how they are affected by molecular structure and/or microstructure.
- Students will understand the physical/chemical behaviors of metals, ceramics, and polymers including effects of molecular weight, crystallinity, crystallite size defects, surface energy, heat-treating, and corrosion.
- Students will understand the electronic behaviors of metals, semiconductors, and insulators.
- Students will be able to match the physical and chemical characteristics of a material to process conditions/variables in order to evaluate its suitability for use with the process.
- Students will demonstrate effective interpretation of graphical data.
- Students will demonstrate an ability to solve engineering problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will demonstrate effective reading of technical material.

CH EN 386 : Chemical Reaction Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 373 & MATH 303; or CH EN 373 & MATH 334; or concurrent enrollment.

DESCRIPTION: Fundamental principles and equations of chemical kinetics and reactor design.

Course Outcomes

- Students will be exposed to the fundamentals of heterogeneous catalytic, and non-catalytic systems including potentially limiting mass-transfer and reaction resistances.
- Students will be able to determine rate expressions by analyzing reactor data including integral and differential analysis on constant- and variable-volume systems.
- Students will understand the relationship between forward and reverse rates and chemical equilibrium.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will demonstrate an ability to solve engineering problems.
- Students will understand the kinetics of competing reactions and their influence on product yield and selectivity.
- Students will be able to design systems of multiple isothermal reactors.
- Students will be able to develop rate expressions from elementary step mechanisms using steady-state and quasi-equilibrium approximations.
- Students will be able to solve numerical problems using advanced math software.
- Students will be able to select and size isothermal reactors for series and/or parallel systems of reactions.
- Students will be able to size and do performance calculations on single, isothermal plug-flow, CSTR, and batch reactors for a single homogeneous or heterogeneous reaction given either rate data or a rate expression.
- Students will understand fundamentals of kinetics including definitions of rate and forms of rate expressions and relationships between moles, concentration, extent of reaction and conversion.
- Students will demonstrate effective interpretation of graphical data.
- Students will understand the effects of mass and heat transfer, particularly pore diffusion, on heterogeneous catalytic systems.
- Students will understand practical considerations of reactor design including materials of construction, mixing, heat transfer, and economics.
- Students will demonstrate effective reading of technical material.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will be able to derive batch, CSTR, and PFR performance equations from general material balances.
- Students will be able to select and size non-isothermal reactors.
- Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

CH EN 391 : Career Skills. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Admission to professional program.

DESCRIPTION: Professional, communication, and lifelong learning skills. Field trip to chemical process facility.

Course Outcomes

- Students will be able to write an effective personal resume.
- Students will be able to use appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.
- Students will understand the importance of a well-written resume in obtaining professional employment.
- Students will be able to give effective, well organized oral presentations of technical material in both business and engineering formats including the handling of questions and the use of appropriate visual

aids.
- Students will be dedicated to and prepared for a life time of learning.
- Students will develop a sense of professional community with students, faculty, and others.
- Students will learn about chemical processes, units, and corresponding equipment through industrial speakers and a field trip.
- Students will demonstrate experience and ability in interviewing skills.
- Students will demonstrate effective reading of technical material.
- Students will gain a familiarity with the chemical engineering field, career options, and potential job functions, and be aware of contemporary issues that may have an impact on professional activities, through student presentations and a field trip

CH EN 436 : Process Control and Dynamics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 376 & CH EN 386

DESCRIPTION: Process systems, associated control systems, and instrumentation. Use of Laplace transforms and complex variables.

Course Outcomes
- Students will learn about chemical processes, units, and corresponding equipment related to process control.
- Students will be able to set up and solve simple transient material balances.
- Students will be able to set up and solve simple transient energy balances.
- Students will demonstrate familiarity with process control terminology and understand the following control strategies: feed-back control, feed-forward control, and cascade control; as well as the difference between linear and nonlinear systems.
- Students will be able to write and solve ODE's that describe the transient behavior of simple systems.
- Students will be able to fit data from step or pulse tests to linear models.
- Students will understand the concept of a transfer function in classical control and be able to use transfer functions (Laplace domain) to approximate the behavior of control loops and their components.
- Students will be able to predict the closed-loop behavior and evaluate the stability of simple control loops.
- Students will understand and be able to use tuning relationships for PID controllers.
- Students will be able to use block diagrams to help determine system response characteristics.
- Demonstrate familiarity with equipment for measurement and control of process variables.
- Students will demonstrate familiarity and experience with the application of process control principles on an industrial control system.
- Students will demonstrate familiarity and experience with process control equipment.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to use a process simulator to conduct process control.
- Students will demonstrate an ability to solve engineering problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will understand the principles involved in selecting a control valve.
- Students will be able to tune a single feedback control loop.
- Students will be able to design a simple feedback loop to control process equipment.
- Students will be able to perform preliminary valve sizing and understand the interaction of the valve with other process components.
- Students will understand the concepts involved in multiple single loops in applications like simple distillation column control.
- Students will demonstrate effective reading of technical material.

CH EN 451 : Chemical Engineering Plant Design and Process Synthesis. (4:4:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 391 & CH EN 436 & CH EN 476

DESCRIPTION: Design of chemical engineering machinery; plants and/or processes requiring application of unit operations; chemical process principles; economic analysis. Synthesis and optimization of chemical processes.

NOTE: College Lecture attendance required.

Course Outcomes
- Students will perform a capstone design and demonstrate their familiarity with chemical processes, units, and corresponding equipment.
- Students will gain appreciation and respect for other disciplines and a knowledge of how chemical engineering relates to other disciplines through the capstone design problem.
- Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.
- Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to use a process simulator to develop process flow diagrams.
- Students will be able to use a process simulator to design single unit operations including separation columns and reactors.
- Students will be able to use commercial process simulation software for process development.
- Students will be able to use appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and

cause-effect relationships.
- Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will be dedicated to safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations; understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will incorporate applicable safety and environmental considerations as part of a capstone design project.
- Students will be dedicated to environmentally responsible engineering; demonstrate knowledge of pertinent environmental laws and regulations; understand and have a basic knowledge of how environmental considerations, including green engineering strategies, are incorporated into engineering problem solving.
- Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).
- Students will be able to give effective, well organized oral presentations of technical material in both business and engineering formats including the handling of questions and the use of appropriate visual aids.
- Students will be able to write effective, well organized technical reports, including formal engineering reports and short letter reports.
- Students will practice good teamwork principles.
- Students will demonstrate experience working together in teams.
- Students will be able to select and size isothermal reactors for series and/or parallel systems of reactions.
- Students will understand practical considerations of reactor design including materials of construction, mixing, heat transfer, and economics.
- Students will be able to size and estimate the capital costs of heat exchangers.
- Students will be able to select pumps, turbines, and valves for a specific application.
- Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and/or packed columns (e.g., height of column, packing material, column diameter, flooding velocity).
- Students will understand the implications of nonideal phase behavior and the practical constraints of pressure, temperature, and available utilities on distillation column design.
- Students will understand the interaction of valves with other process components.
- Students will be able to perform design (sizing) calculations for turbines and compressors (e.g., involving delta H, delta S, work, heat, efficiencies).
- Students will understand design hierarchy rationale and be able to apply it to the design of a process.
- Students will understand safety constraints and be able to use HAZOPS and fault-tree analyses in process design.
- Students will understand environmental, social, political, ethical, health and safety, manufacturability, and sustainability constraints and be able to incorporate these into process synthesis.
- Students will be able to design multiple unit processes and be able to optimize them with respect to energy efficiency and economics.

CH EN 475 : Unit Operations Laboratory 1. (2:1:6)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CH EN 376 & CH EN 391 & ENGL 316

RECOMMENDED: Stat 201.

DESCRIPTION: Experimental verification of unit operations design principles; data collection and reduction; report preparation.

Course Outcomes

- Students will gain hands on experience with chemical processes, units, and corresponding equipment through lab experiments
- Students will understand and be able to describe the physical significance of key dimensionless quantities including Re.
- Students will understand qualitatively conduction, forced and free convection, and radiation and have experience with one or more modes during experiments.
- Students will be able to analyze systems containing multiple resistances to heat transfer during laboratory experiments.
- Students will understand convective heat transfer and be able to use heat transfer coefficients as they relate to the UO Laboratory experiments.
- Students will demonstrate familiarity and experience with the measurement of process variables (e.g., P, T, flow rate, conc.) using manual and/or electronic devices and computers.
- Students will demonstrate knowledge of basic laboratory techniques.
- Students will be able to use the scientific method and problem solving strategies, as well as statistical methods, to design, carry out, and analyze experiments in order to solve engineering problems.
- Students will demonstrate familiarity and experience with the application of process control principles on an industrial control system.
- Students will demonstrate familiarity and experience with chemical process equipment.
- Students will demonstrate an understanding of basic engineering statistics in their laboratory reports
- Students will demonstrate effective interpretation of graphical data.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems in the areas of heat transfer, fluid flow, and thermodynamics.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and practice safe laboratory and chemicals-handling principles.
- Students will be able to give effective, well organized oral presentations including the handling of questions and the use of appropriate visual aids.
- Students will be able to write effective, well organized technical reports, including formal engineering reports and short letter reports.
- Students will practice good teamwork principles.
- Students will be able to do performance calculations on heat exchangers from experimental data and demonstrate abilities or understanding in one or more of the following aspects: heat exchanger sizing,

heat exchanger design, fouling, utilization of overall heat transfer coefficients, types of heat exchangers, and materials of construction.
- Students will be able to design or analyze flow systems involving one or more of the following aspects: pipes, valves, fittings, pumps, flow meters, Newtonian fluids, non-Newtonian fluids, laminar flow, and turbulent flow.
- Students will demonstrate effective reading of technical material.

CH EN 476 : Separations. (3:3:0)

WHEN TAUGHT: Fall
PREREQUISITE: CH EN 373 & CH EN 376
DESCRIPTION: Stage operations, distillation, extraction, and absorption; design applications.
NOTE: College Lecture attendance required.

Course Outcomes

- Students will be able to solve steady-state material and energy balances as they relate to operating lines and multi-stage separation units.
- Students will be able to read mixture phase diagrams (solid solubility, liquid-liquid, VLE) and construct mass balances from them using the lever rule, tie lines, etc.
- Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates across phase boundaries.
- Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.
- Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to use a process simulator to design separation columns.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will have an overall understanding of basic separation techniques used in industry, the principles upon which they are based, and their limitations and assets.
- Students will be able to set up and solve single-stage flash calculations.
- Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and packed columns (e.g., height of column, packing material, column diameter, flooding velocity).
- Students will be able to find the number of stages required for liquid-liquid extraction from ternary phase diagrams.
- Students will be able to solve binary batch distillation design problems with and without rectifying stages.
- Students should understand the implications of non-ideal phase behavior (e.g., azeotropes and partial miscibility) and the practical constraints of pressure, temperature, and available utilities on distillation column design.
- Students will demonstrate effective reading of technical material.

CH EN 477 : Unit Operations Laboratory 2. (2:1:6)

WHEN TAUGHT: Winter; Spring
PREREQUISITE: CH EN 386 & CH EN 475 & CH EN 476
DESCRIPTION: Experimental verification of unit operations design principles; data collection and reduction; report preparation.

Course Outcomes

- Students will gain hands on experience with chemical processes, units, and corresponding equipment through lab experiments
- Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates for both external and internal flows and across phase boundaries.
- Students will understand fundamentals of kinetics including definitions of rate and forms of rate expressions during laboratory experiments.
- Students will demonstrate familiarity and experience with the measurement of process variables (e.g., P, T, flow rate, conc.) using manual and/or electronic devices and computers.
- Students will demonstrate knowledge of basic laboratory techniques.
- Students will be able to use the scientific method and problem solving strategies, as well as statistical methods, to design, carry out, and analyze experiments in order to solve engineering problems.
- Students will demonstrate familiarity and experience with chemical process equipment.
- Students will demonstrate an understanding of basic engineering statistics in their laboratory reports
- Students will be able to determine rate expressions by analyzing reactor data including integral and differential analysis on constant- and/or variable-volume systems in laboratory experiments.
- Students will demonstrate effective interpretation of graphical data.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems in the areas of kinetics and separations.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to obtain and evaluate appropriate informational/data from databases, hand books, correlations, experiments, literature, etc.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and practice safe laboratory and chemicals-handling principles.
- Students will be able to give effective, well organized oral presentations including the handling of questions and the use of appropriate visual aids.

- Students will be able to write effective, well organized technical reports, including formal engineering reports and short letter reports.
- Students will practice good teamwork principles.
- Students will be able to size and do performance calculations on single, isothermal plug-flow, CSTR, or batch reactors for a single homogeneous or heterogeneous reaction from experimental data.
- Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and/or packed columns (e.g., height of column, packing material, column diameter, flooding velocity).
- Students will demonstrate effective reading of technical material.

5. Complete the following supporting courses:

BIO 100 : Principles of Biology. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Introductory course for general education students.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

CHEM 351 : Organic Chemistry. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: CHEM 105; or CHEM 111
DESCRIPTION: Chemical bonds and molecular structure, conformation and configuration, functional classes, reactions and mechanisms, syntheses.
NOTE: Primarily for majors in chemical engineering and the biological sciences.

Course Outcomes
- Recognize functional group classes commonly encountered in organic chemistry and name representative molecules from each class using IUPAC rules for organic nomenclature.
- Predict structure and reactivity of alkanes, alkenes, alkynes, aromatic hydrocarbons, alcohols, ethers, epoxides, and alkylhalides based on such factors as carbon atom hybridization, bond length, bond strength, and bond polarity.
- Recognize and provide curved arrow mechanisms for the following types of organic reactions: additions, substitutions, and eliminations.
- Predict the energetically preferred conformation for straight-chain and branched alkanes, and for substituted cycloalkanes.
- Determine R and S configurations for chiral molecules and distinguish between enantiomers, diastereomers, meso compounds, and conformational isomers.
- Interpret 1H NMR, 13C NMR, IR, UV, and mass spectra and use these data to determine the structure of organic molecules.
- Predict the relative energies of reactive intermediates such as radicals, carbocations, and carbanions, based on structural considerations such as orbital hybridization, hyperconjugation, and resonance stabilization.

CHEM 352 : Organic Chemistry. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: CHEM 351; or CHEM 351M
DESCRIPTION: Continuation of Chem 351.

Course Outcomes
- Predict structure and reactivity of aldehydes, ketones, carboxylic acids, esters, anhydrides, amides, b-ketocarbonyl containing compounds, amines, and phenols.
- Recognize and provide curved arrow mechanisms for the following types of organic reactions: electrophilic & nucleophilic aromatic substitution, nucleophilic carbonyl addition, nucleophilic acyl substitution, carbonyl condensation, [4 2] cycloaddition, and substitution ato a carbonyl.
- Recognize and predict the reactivity of the following reactive species and/or reactive intermediates: Grignard reagents, Wittig reagents, organolithiums, diorganocuprates, enols, enolates, aryl diazonium ions, and benzynes.
- Recognize and predict the structure and reactivity of the following classes of biologically important organic molecules: carbohydrates, amino acids, proteins, and lipids.

CHEM 467 : Physical Chemistry for Engineers. (3:3:0)

WHEN TAUGHT: Fall
PREREQUISITE: CHEM 351 & MATH 302 & PHSCS 121; Ch En 263.
DESCRIPTION: Quantum mechanics, atomic and molecular structure, spectroscopy, computational methods, statistical mechanics, thermodynamics and equilibria, states of matter, kinetic-molecular theory, kinetics.
NOTE: For chemical engineering majors and other interested students in fields of engineering and physical science.

Course Outcomes
- understand the fundamentals of classical thermodynamics, quantum mechanics, reaction kinetics, and statistical mechanics, including foundational principles, key mathematical relationships and derivations, at a deeper, more rigorous level than Chem 111H and 112.
- be able to relate atomic/molecular properties and interactions to bulk properties and vice versa.
- be able to interpret atomic and molecular spectra in terms of quantum mechanical models.
- be able to describe the kinetics of chemical reactions in terms of molecular mechanisms and empirical rate laws.
- be able to apply the laws of thermodynamics to physical and chemical processes.
- be able to analyze and interpret experimental data to draw conclusions about chemical processes from a

wide range of disciplines, including chemistry, biology, engineering and geology.
- be able to develop and use models, both conceptual and mathematical, of physical and chemical phenomena and understand the limitations of these models.

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

STAT 201 : Statistics for Engineers and Scientists. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 112; or MATH 119

DESCRIPTION: The scientific method; probability, random variables, common discrete and continuous random variables, central limit theorem; confidence intervals and hypothesis testing; completely randomized experiments; factorial experiments.

Course Outcomes

- Compute numerial and graphics summary statistics and explain the difference between populations given the summaries (numerical or graphical)
- Apply fundamentals of set theory and basic set operations to simple problems
- Distinguish between counting techniques (permutations, combinations) and compute the number of possible combinations for simple problems
- Solve simple problems using axioms of probability, conditional probability, independence, and Bayes' theorem
- Compute probabilities, expected values, and variances using the PDF of a discrete and a continuous univariate random variable
- Understand the definition of a sampling distribution, identify the mean, variance, and shape of the sampling distribution given the population information, and explain the application and importance of the Central Limit Theorem
- Understand the basics of experimental design, including the definition of the experimental unit, response, variable, factor(s), and level(s) of a basic experiment, and the role of randomization and

replication to permit causal inference
- Compute the confidence interval for μ from a random sample and make the correct decision about an experiment when given a confidence interval
- Compute the test statistic and p-value for H0 : μ = μ0 from a random sample
- Make the correct decision when given the p-value for a hypothesis test and compute the ANOVA table for the data from a completely randomized design
- Compute pairwise confidence intervals on the difference in means (Fisher, Bonferroni) to understand a significant overall F-test from a completely randomized design
- Compute the ANOVA table for data from a two factor experiment
- Explain a statistically significant interaction
- Perform a two factor (or 2^3) experiment (in a group), compute the ANOVA table from the observed data, and write a technical report of the results of the experiment with appropriate graphics of significant effects or interactions

6. Complete technical electives (12 hours minimum) satisfying the following requirements:
   - Complete 2 hours of chemistry laboratory:

CHEM 353 : Organic Chemistry Laboratory--Nonmajors. (1-2:0:6)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Chem 352 or concurrent enrollment (preferred).

DESCRIPTION: Physical and chemical properties, isolation and purification, characterization, syntheses.

NOTE: For predentistry, premedicine, and other majors who do not intend to take Chem 455.

Course Outcomes
- Perform a broad range of traditional organic reactions at the micro scale including: nucleophilic carbonyl additions, hydroboration, nucleophilic acyl substitution, electrophilic aromatic substitution, [4 2] cycloaddition, and photochemical alkene isomerization.
- Implement fundamental organic chemistry techniques for carrying out basic experiments, and purifying products, at the micro scale including: extraction, distillation, recrystalization, column chromatography, and TLC.
- Make correct conclusions about the outcome of experiments after collecting basic physical data, and after providing unambiguous interpretation of the necessary spectra.

CHEM 464 : Physical Chemistry Laboratory 1. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: Chem 463 or 467 or 468 or concurrent enrollment.

DESCRIPTION: Experiments related to physical chemistry: thermodynamics and equilibria, phase transitions, kinetic-molecular theory, kinetics; computer manipulation of data, report preparation.

NOTE: May be taken before, after, or concurrent (preferred) with Chem 465.

Course Outcomes
- Collect quantitative data using a variety of instruments, including calorimeters and spectrometers
- Fit collected data to mathematical models and extract molecular and bulk parameters
- Prepare and present clear graphs and tables, showing data from experiments
- Write clear lab reports in standard scientific journal format
- Prepare and give high quality oral presentations

CHEM 465 : Physical Chemistry Laboratory 2. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: Chem 462 or 467 or 468 or concurrent enrollment.

DESCRIPTION: Experiments related to physical chemistry: quantum mechanics, group theory, atomic and molecular structure, spectroscopy, computational methods, statistical mechanics; computer manipulation of data, report preparation.

NOTE: May be taken before, after, or concurrent (preferred) with Chem 464.

Course Outcomes
- Collect quantitative spectroscopic data using a variety of instruments, including FT-IR, UV/Vis
- Fit collected data to physical chemical mathematical models and extract molecular parameters
- Perform molecular computations on the molecules in laboratory experiments
- Prepare and present clear graphs and tables, showing data from experiments
- Write clear lab reports in standard scientific journal format

   - Complete 6 hours of approved advanced Engineering course work. In general, these courses are 300-level or above from any of the following departments: Chemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, Mechanical Engineering, or the School of Technology. For details and exceptions, see the department webpage.
   - Complete 4 hours of approved advanced course work from an engineering, math, science, or business (EMSB) department. In general, these courses are 300-level or above from any of the following colleges: College of Engineering & Technology, College of Physical and Mathematical Sciences, College of Life Sciences, and the Marriott School of Management. For details and exceptions, see the department webpage.
   - At least one of the 10 engineering/EMSB hours must be from a course involving a significant learning experience in creativity and/or innovation. Such courses are those that teach concepts and require a project in which innovation or creativity is demonstrated. These courses include Ch En 199R, 400, 498R, Chem 497R,

and other similar courses from EMSB departments that are approved by the student's advisor.

- Ch En 498R, Ch En 199R, and Eng T 497R may count toward either the Engineering elective or the EMSB elective; however, no more than 3 hours of Ch En 498R, Ch En 199R, and Eng T 497R may be applied to the program. One hour of mentored learning (research) credit from other engineering departments may count toward the Engineering or EMSB elective (e.g., Me En 495R). One hour of mentored learning (research) credit from a science department may count toward only the EMSB requirement (e.g., Chem 497R). If one hour of mentored learning from outside the department is applied to the technical elective requirement, then only 2 hours of Ch En 498R, Ch En 199R, and Eng T 497R may be applied to the requirement.

7. Pass a basic compentency exam (L3 Exam) administered by the Chemical Engineering Department (see the department for details.)

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

CH EN 170 : Introduction to Chemical Engineering. (2:2:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CHEM 105; or CHEM 111

DESCRIPTION: Principles of chemical processes and analyses with spreadsheets and graphics. Applying chemical engineering to current problems.

NOTE: The prerequisites may be taken concurrent with the course. Check with the department.

Course Outcomes

- Students will gain a knowledge of the major through the course material.
- Students will be introduced to chemical processes, units, and corresponding equipment.
- Students will gain a familiarity with the chemical engineering field, career options, and potential job functions, and be aware of contemporary issues that may have an impact on professional activities, through lectures and solving homework problems.
- Students will gain appreciation and respect for other disciplines and a knowledge of how chemical engineering relates to other disciplines through faculty lectures and homework problems.
- Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems.
- Students will be introduced to the solution of steady-state, overall, material and energy balances.
- Students will be introduced to the mechanical energy balance equation to solve fluid flow problems both with and without friction.
- Students will be introduced to conduction, forced and free convection, and radiation.
- Students will be introduced to the fundamentals of kinetics including definitions of rate and forms of rate expressions.
- Students will be introduced to the first law of thermodynamics for closed and open systems.
- Students will be introduced to process control terminology and feed-back and feed-forward control systems.
- Students will be introduced to the effective interpretation of graphical data.
- Students will be introduced to a spreadsheet package to perform engineering calculations.
- Students will be introduced to engineering problems and their solutions.
- Students will be introduced to a problem solving strategy to define and solve engineering problems.
- Students will be introduced to critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be introduced to the notions of rationalizing units, making order of magnitude estimates, assessing reasonableness of solutions, and selecting appropriate levels of solution sophistication.
- Students will be introduced to how environmental considerations are incorporated into engineering problem solving.
- Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).
- Students will practice good teamwork principles.
- Students will demonstrate experience working together in teams.
- Students will be introduced to performance calculations on CSTR reactors.
- Students will be introduced to preliminary size and performance calculations on shell-and-tube heat exchangers.
- Students will be introduced to practical considerations of heat exchangers including types of heat exchangers, materials of construction, and fouling.
- Students will be introduced to the design of flow systems involving pumps for Newtonian fluids.
- Students will be introduced to environmental, social, political, ethical, health and safety, manufacturability, and sustainability constraints in process synthesis.
- Students will be introduced to costs in capital ventures (e.g., capital vs operating costs, salvage value, equipment costing).
- Students will develop a sense of professional community with students by working in teams.
- Students will be introduced to the effective reading of technical material.

CH EN 191 : Preprofessional Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Presentations by faculty, advisors, and industrial representatives.

NOTE: College Lecture attendance required.

Course Outcomes

- Students will gain a knowledge of the major and required curriculum through lectures.
- Students will gain a familiarity with the chemical engineering field, career options, and potential job functions, and be aware of contemporary issues that may have an impact on professional activities, through presentations by faculty and guest lecturers.

Students will demonstrate a sense of the importance of life-long learning.
- Students will learn to take responsibility for their own learning experience at BYU by maintaining disciplined study habits.
- Students will understand the importance of a well-written resume in obtaining professional employment.

CH EN 199R : Academic Internship. (.5-3:ARR:ARR)

PREREQUISITE: Consent of department internship coordinator.

DESCRIPTION: Work experience evaluated by supervisor and posted on student's transcript.

Course Outcomes
- Student acquires professional experiences in the discipline.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

200-Level Courses

CH EN 263 : Computational Tools for Chemical Engineers. (2:2:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CH EN 170 & MATH 113; or concurrent enrollment.

DESCRIPTION: Use of spreadsheets, advanced equation-solving packages, and structured languages to solve engineering problems. Introduction to chemical process principles.

NOTE: College Lecture attendance required.

Course Outcomes
- Students will demonstrate an understanding of fundamental mathematics (including calculus, linear and nonlinear simultaneous equation solving, etc.) by using computer tools to solve problems.
- Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems while using an equation solver like Mathcad.
- Students will be able to use a spreadsheet package to perform engineering calculations which include some of the following: economic analysis, processing and analysis of data, graphical analysis and presentation, etc.
- Students will be able to solve numerical and symbolic problems using advanced math software (e.g. Mathcad).
- Students will be able to write program structures, and understand when programming is most appropriate.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to convert problem solving strategies to procedural algorithms.
- Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

CH EN 273 : Chemical Process Principles. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: CHEM 106 & CH EN 263; or CHEM 112 & CH EN 263; or concurrent enrollment.

DESCRIPTION: Material and energy balances.

NOTE: College Lecture attendance required.

Course Outcomes
- Students will learn about chemical processes, units, and corresponding equipment
- Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems both by hand and with an equation solver.
- Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.
- Students will be able to set up and solve simple transient material balances.
- Students will be able to use a degree-of-freedom approach to assist in the solution of material and energy balances.
- Students will be able to read pure component and mixture phase diagrams (e.g. psychrometric chart, solid solubility, liquid-liquid, VLE) and construct mass balances from them using the lever rule, tie lines, etc.
- Students will understand the phase behavior of pure substances in relationship to the variables T, P, and density (including vapor pressure, critical point, freezing line, triple point, etc.).
- Students will be able to use the mechanical energy balance equation to solve fluid flow problems both with and without friction.
- Students will be able to solve simple fluid statics problems (e.g., manometers, fluid head, etc.)
- Students will be introduced to the first law of thermodynamics for closed and open systems.
- Students will be able to apply Raoult's law to solve VLE problems including bubble point, dew point, and flash calculations.
- Students will understand and be able to use the extent of reaction in material balances
- Students will be introduced to equations of state and corresponding states correlations.
- Students will be introduced to the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.
- Students will be introduced to process variables (e.g., P, T, flow rate, conc.) and their measurement.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to solve numerical and symbolic problems using advanced math software (e.g. Mathcad).
- Students will be introduced to the use of appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to use a problem solving strategy to define and solve engineering problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.
- Students will be introduced to the notions of rationalizing units, making order of magnitude estimates, assessing reasonableness of solutions, and selecting appropriate levels of solution sophistication.
- Students will be introduced to how safety considerations are incorporated into engineering problem solving.
- Students will be introduced to how environmental considerations are incorporated into engineering problem solving.

- Students will practice good teamwork principles.
- Students will demonstrate experience working together in teams.
- Students will be introduced to calculations involving work in turbines, compressors, and pumps.
- Students will be introduced to the AIChE code of ethics.
- Students will demonstrate effective reading of technical material.

300-Level Courses

CH EN 311 : Chemical Engineering and Society. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 273 & ENG T 231

DESCRIPTION: Responsibility of chemical engineers in society relative to ethics, leadership, safety, environment, and energy.

Course Outcomes

- Students will demonstrate effective interpretation of graphical data.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will pass the HAZCOM test.
- Students will be dedicated to safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations; understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will be dedicated to environmentally responsible engineering; demonstrate knowledge of pertinent environmental laws and regulations; understand and have a basic knowledge of how environmental considerations, including green engineering strategies, are incorporated into engineering problem solving.
- Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).
- Students will understand teamwork principles including: recognition of team members' strengths and weaknesses; importance of effective communication skills; recognition of unique contributions of team members; and the need to facilitate team members' development.
- Students will demonstrate experience working together in teams.
- Students will understand safety constraints and be able to use hazard evaluation tools (e.g., HAZOP, fault-tree).
- Students will understand and commit to practice gospel standards as a basis for sound ethical behavior.
- Students will understand and commit to practice the AIChE code and other professional codes of ethics.
- Students will incorporate an engineering and a gospel-centered problem solving approach to the resolution of ethical dilemmas.
- Students will develop a sense of professional community with students by working in teams.
- Students will understand and strive to develop the qualities of a good leader whose public and private lives are consistent.
- Students will demonstrate effective reading of technical material.

CH EN 373 : Chemical Engineering Thermodynamics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 273 & CHEM 467

RECOMMENDED: Chem 461.

DESCRIPTION: First and second laws of thermodynamics as applied to behavior of real fluids; physical and chemical equilibrium.

NOTE: College Lecture attendance required.

Course Outcomes

- Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.
- Students will be able to read mixture phase diagrams (liquid-liquid and VLE) and construct mass balances from them using the lever rule, tie lines, etc.
- Students will be able to set up and solve simple transient energy balances.
- Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.
- Students will demonstrate an ability to solve engineering problems.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to use equations of state and corresponding states correlations in the determination of properties.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to perform energy conversion calculations for Rankine power and compression refrigeration cycles.
- Students will be able to set up and solve single-stage flash calculations.
- Students will understand the phase behavior of pure substances in relationship to the variables T, P, and density (including vapor pressure, critical point, freezing line, triple point, etc.)
- Students will understand the concept of entropy and the second law of thermodynamics and be able to apply the second law to closed and open systems.
- Students will understand the fundamental principles of chemical reaction equilibria including extent of reaction, equilibrium constant and its temperature-dependence, equilibrium conversion.
- Students will be able to use modern property databases to assist in problem solving.
- Students will be able to apply the first law of thermodynamics to closed and open systems (including energy, work, and heat transformations in process units such as tanks, turbines, compressors, valves, etc.).
- Students will be able to perform design (sizing) calculations for turbines and compressors (e.g., involving delta H, delta S, work, heat, efficiencies).
- Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will demonstrate effective reading of technical material.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat

of combustion, and heat of formation.

CH EN 374 : Fluid Mechanics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 273 & CH EN 311 & MATH 302; or CH EN 273 & CH EN 311 & MATH 314; or concurrent enrollment; admission to professional program.

DESCRIPTION: Basic mass, momentum, and energy relations of fluid flow; design of fluid-handling systems and equipment.

NOTE: College Lecture attendance required.

Course Outcomes

- Students will understand mechanical behavior of materials including elastic, viscous, surface, and stress phenomena as it pertains to fluid flow applications.
- Students will be able to use the mechanical energy balance equation to solve fluid flow problems both with and without friction.
- Students will understand and be able to describe the physical significance of key dimensionless quantities including Re and f.
- Students will be able to solve simple fluid statics problems.
- Students will be able to determine velocity profiles for steady-state, laminar flow in simple geometries for Newtonian and power-law fluids.
- Students will understand the significance of steady-state, integral and differential mass, energy, and momentum balances in one dimension.
- Students will understand and be able to use advanced fluid mechanical concepts including boundary-layer theory, creeping flow, non-Newtonian flow, rheology, and turbulent flow.
- Students will understand qualitatively how external flow around objects affects drag and will be able to calculate drag forces and terminal velocities.
- Students will understand basic concepts relating to compressible flow, including Mach numbers, shock waves, and choked flow.
- Students will demonstrate effective interpretation of graphical data.
- Students will demonstrate an ability to solve engineering problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will be able to design flow systems involving pipes, valves, fittings, and pumps for Newtonian fluids.
- Students will be able to select, based on performance characteristics and operational constraints, the appropriate kind of pumps (positive displacement, radial, axial, etc.), turbines (impulse, Francis, Kaplan, etc), and valves for a given application.
- Students will be able to design flow systems involving pipes and pumps for power-law fluids.
- Students will be familiar with the use of computational fluid dynamics as a tool for solving fluid flow in complex geometries.
- Students will demonstrate effective reading of technical material.

CH EN 376 : Heat and Mass Transfer. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 374

DESCRIPTION: Heat and mass transfer, including conduction, convection, radiation, diffusion; steady and unsteady state systems; transport analogies; design applications.

Course Outcomes

- Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates for both external and internal flows and across phase boundaries.
- Students will understand radiative heat transfer including blackbody radiation and Kirchoffï¿½s law, and be able to solve radiative problems involving view factors and radiative exchange between surfaces.
- Students will learn about chemical processes, units, and corresponding equipment related to heat and mass transfer
- Students will understand qualitatively conduction, forced and free convection, and radiation.
- Students will be able to solve simple transient heat and mass transfer problems with methods such as lumped capacitance, Heisler charts, 1st term approximation, exact numerical solutions, etc.
- Students will understand and be able to use Fick's Law.
- Students will be able to formulate and solve differential energy balances for conduction within a single phase.
- Students will understand heat/mass transfer analogies including their limitations.
- Students will understand convective heat transfer and use of heat transfer coefficients for laminar and turbulent flows, internal and external flows, fully developed flow, flow with entry effects, and forced and free convection.
- Students will be able to analyze systems containing multiple resistances to heat transfer.
- Students will be able to do preliminary size calculations on shell-and-tube heat exchangers using the log-mean-temperature-difference (LMTD) method.
- Students will demonstrate effective reading of technical material.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to solve simple problems where heat and mass transfer are coupled.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will be able to calculate and use overall heat transfer coefficients in designing heat exchangers.
- Students will understand practical considerations of heat exchangers including types of heat exchangers, materials of construction, and fouling.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to do preliminary size calculations on shell-and-tube heat exchangers using the

effectiveness-NTU method.

CH EN 378 : Science of Engineering Materials. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CHEM 351

DESCRIPTION: Fundamental principles of solid materials and their properties and behavior in engineering applications of metals, polymers, ceramics, and glasses.

Course Outcomes

- Students will be able to read liquid-solid mixture phase diagrams involving liquid-solid and solid-solid equilibria and solid solubility and construct mass balances from them using the lever rule, tie lines, etc.
- Students will understand the relationship of molecular interactions, including potential energy and intermolecular forces, to the properties and behaviors of materials.
- Students will understand crystal structure including nomenclature, packing, and defects.
- Students will understand mechanical behavior of materials including elastic, plastic, viscous, glass, surface, and stress/strain phenomena and how they are affected by molecular structure and/or microstructure.
- Students will understand the physical/chemical behaviors of metals, ceramics, and polymers including effects of molecular weight, crystallinity, crystallite size defects, surface energy, heat-treating, and corrosion.
- Students will understand the electronic behaviors of metals, semiconductors, and insulators.
- Students will be able to match the physical and chemical characteristics of a material to process conditions/variables in order to evaluate its suitability for use with the process.
- Students will demonstrate effective interpretation of graphical data.
- Students will demonstrate an ability to solve engineering problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will demonstrate effective reading of technical material.

CH EN 386 : Chemical Reaction Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 373 & MATH 303; or CH EN 373 & MATH 334; or concurrent enrollment.

DESCRIPTION: Fundamental principles and equations of chemical kinetics and reactor design.

Course Outcomes

- Students will be exposed to the fundamentals of heterogeneous catalytic, and non-catalytic systems including potentially limiting mass-transfer and reaction resistances.
- Students will be able to determine rate expressions by analyzing reactor data including integral and differential analysis on constant- and variable-volume systems.
- Students will understand the relationship between forward and reverse rates and chemical equilibrium.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will demonstrate an ability to solve engineering problems.
- Students will understand the kinetics of competing reactions and their influence on product yield and selectivity.
- Students will be able to design systems of multiple isothermal reactors.
- Students will be able to develop rate expressions from elementary step mechanisms using steady-state and quasi-equilibrium approximations.
- Students will be able to solve numerical problems using advanced math software.
- Students will be able to select and size isothermal reactors for series and/or parallel systems of reactions.
- Students will be able to size and do performance calculations on single, isothermal plug-flow, CSTR, and batch reactors for a single homogeneous or heterogeneous reaction given either rate data or a rate expression.
- Students will understand fundamentals of kinetics including definitions of rate and forms of rate expressions and relationships between moles, concentration, extent of reaction and conversion.
- Students will demonstrate effective interpretation of graphical data.
- Students will understand the effects of mass and heat transfer, particularly pore diffusion, on heterogeneous catalytic systems.
- Students will understand practical considerations of reactor design including materials of construction, mixing, heat transfer, and economics.
- Students will demonstrate effective reading of technical material.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will be able to derive batch, CSTR, and PFR performance equations from general material balances.
- Students will be able to select and size non-isothermal reactors.
- Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

CH EN 391 : Career Skills. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Admission to professional program.

DESCRIPTION: Professional, communication, and lifelong learning skills. Field trip to chemical process facility.

Course Outcomes

- Students will be able to write an effective personal resume.
- Students will be able to use appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.
- Students will understand the importance of a well-written resume in obtaining professional employment.
- Students will be able to give effective, well organized oral presentations of technical material in both business and engineering formats including the handling of questions and the use of appropriate visual aids.
- Students will be dedicated to and prepared for a life time of learning.
- Students will develop a sense of professional community with students, faculty, and others.
- Students will learn about chemical processes, units, and corresponding equipment through industrial speakers

and a field trip.
- Students will demonstrate experience and ability in interviewing skills.
- Students will demonstrate effective reading of technical material.
- Students will gain a familiarity with the chemical engineering field, career options, and potential job functions, and be aware of contemporary issues that may have an impact on professional activities, through student presentations and a field trip

400-Level Courses

CH EN 400 : Creative Skills in Chemical Engineering. (1:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Applications in creativity and technical knowledge from prior course work to solution of relevant, open-ended problems.

Course Outcomes
There are no course outcomes available

CH EN 410 : Principles of Reservoir Engineering. (3:3:0)

WHEN TAUGHT: Winter Contact Department

PREREQUISITE: CH EN 373 & CH EN 374

DESCRIPTION: Reservoir engineering principles including a review of rock and fluid properties, material balance in oil and gas reservoirs, fluid flow in porous media, and hydrocarbon production.

Course Outcomes
- Calculate values of initial oil and gas in place
- Understand the displacement processes in reservoirs
- Estimate future production from oil and gas reservoirs under primary production
- Use fluid flow equations to calculate pressure drops and flow rates of oil and gas in porous media
- Perform a history match on actual production data and predict future production rates
- Screen reservoirs for enhanced oil recovery processes

CH EN 412 : Introductory Nuclear Engineering. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: CHEM 106 & MATH 303; or CHEM 112 & MATH 303; or equivalent.

DESCRIPTION: Principles and application of nuclear reactor design.

Course Outcomes
- At the end of this course, each student should have competent andwell-supported command of the following:I. Nuclear physicsa. Particle and Atom Physicsb. Mass and Energyc. Radioactive Decay Processesd. Interactions of Particles and Radiation with Matter
- Reactor Design and Safetya. Fundamentals of Fission Reactions and Fuelsb. Generation I-IV designs, with distinguishing safety and securityfeaturesc. Reactor Types (fast, breeder, thermal, other)d. Quantitative Approximations for Temperature and Heat Releasee. Reactor Control
- Fuel and waste managementa. Regulationsb. Fuel and Waste Processingc. Accident Histories and Root CausesIV. Career Opportunities in Nuclear Engineering

CH EN 433 : Energy Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 311

DESCRIPTION: Science and engineering of energy production including fossil fuels, nuclear, and renewable. Meeting the challenges of future energy needs of the U.S. and the world.

Course Outcomes
- Explain the history of energy use, the energy supply problems thathave existed in the past, that exist today, and the potential for problemsin the future.
- Describe current, conventional sources of energy, their availability, and current cost.
- Describe alternate sources of energy, their technical feasibility,and relative cost.
- Explain the technical working principals of major energy processingsystems (turbines, boilers, engines, fuel cells, solar conversion, etc
- Appreciate of the role of energy in our society, and how it affects life-style.
- Evaluate his or her own energy use patterns, and to develop ways tominimize the impact of personal energy usage.
- Understand current and potential future energy career opportunities.

CH EN 436 : Process Control and Dynamics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 376 & CH EN 386

DESCRIPTION: Process systems, associated control systems, and instrumentation. Use of Laplace transforms and complex variables.

Course Outcomes
- Students will learn about chemical processes, units, and corresponding equipment related to process control.
- Students will be able to set up and solve simple transient material balances.
- Students will be able to set up and solve simple transient energy balances.
- Students will demonstrate familiarity with process control terminology and understand the following control strategies: feed-back control, feed-forward control, and cascade control; as well as the difference between linear and nonlinear systems.
- Students will be able to write and solve ODE's that describe the transient behavior of simple systems.
- Students will be able to fit data from step or pulse tests to linear models.

- Students will understand the concept of a transfer function in classical control and be able to use transfer functions (Laplace domain) to approximate the behavior of control loops and their components.
- Students will be able to predict the closed-loop behavior and evaluate the stability of simple control loops.
- Students will understand and be able to use tuning relationships for PID controllers.
- Students will be able to use block diagrams to help determine system response characteristics.
- Demonstrate familiarity with equipment for measurement and control of process variables.
- Students will demonstrate familiarity and experience with the application of process control principles on an industrial control system.
- Students will demonstrate familiarity and experience with process control equipment.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to use a process simulator to conduct process control.
- Students will demonstrate an ability to solve engineering problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will understand the principles involved in selecting a control valve.
- Students will be able to tune a single feedback control loop.
- Students will be able to design a simple feedback loop to control process equipment.
- Students will be able to perform preliminary valve sizing and understand the interaction of the valve with other process components.
- Students will understand the concepts involved in multiple single loops in applications like simple distillation column control.
- Students will demonstrate effective reading of technical material.

CH EN 451 : Chemical Engineering Plant Design and Process Synthesis. (4:4:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 391 & CH EN 436 & CH EN 476

DESCRIPTION: Design of chemical engineering machinery; plants and/or processes requiring application of unit operations; chemical process principles; economic analysis. Synthesis and optimization of chemical processes.

NOTE: College Lecture attendance required.

Course Outcomes

- Students will perform a capstone design and demonstrate their familiarity with chemical processes, units, and corresponding equipment.
- Students will gain appreciation and respect for other disciplines and a knowledge of how chemical engineering relates to other disciplines through the capstone design problem.
- Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.
- Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to use a process simulator to develop process flow diagrams.
- Students will be able to use a process simulator to design single unit operations including separation columns and reactors.
- Students will be able to use commercial process simulation software for process development.
- Students will be able to use appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will be dedicated to safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations; understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will incorporate applicable safety and environmental considerations as part of a capstone design project.
- Students will be dedicated to environmentally responsible engineering; demonstrate knowledge of pertinent environmental laws and regulations; understand and have a basic knowledge of how environmental considerations, including green engineering strategies, are incorporated into engineering problem solving.
- Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).
- Students will be able to give effective, well organized oral presentations of technical material in both business and engineering formats including the handling of questions and the use of appropriate visual aids.
- Students will be able to write effective, well organized technical reports, including formal engineering reports and short letter reports.
- Students will practice good teamwork principles.
- Students will demonstrate experience working together in teams.
- Students will be able to select and size isothermal reactors for series and/or parallel systems of reactions.
- Students will understand practical considerations of reactor design including materials of construction, mixing, heat transfer, and economics.
- Students will be able to size and estimate the capital costs of heat exchangers.
- Students will be able to select pumps, turbines, and valves for a specific application.
- Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and/or packed columns (e.g., height of column, packing material, column diameter, flooding velocity).
- Students will understand the implications of nonideal phase behavior and the practical constraints of pressure, temperature, and available utilities on distillation column design.
- Students will understand the interaction of valves with other process components.
- Students will be able to perform design (sizing) calculations for turbines and compressors (e.g., involving delta H, delta S, work, heat, efficiencies).

Students will understand design hierarchy rationale and be able to apply it to the design of a process.
- Students will understand safety constraints and be able to use HAZOPS and fault-tree analyses in process design.
- Students will understand environmental, social, political, ethical, health and safety, manufacturability, and sustainability constraints and be able to incorporate these into process synthesis.
- Students will be able to design multiple unit processes and be able to optimize them with respect to energy efficiency and economics.

CH EN 475 : Unit Operations Laboratory 1. (2:1:6)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CH EN 376 & CH EN 391 & ENGL 316

RECOMMENDED: Stat 201.

DESCRIPTION: Experimental verification of unit operations design principles; data collection and reduction; report preparation.

Course Outcomes

- Students will gain hands on experience with chemical processes, units, and corresponding equipment through lab experiments
- Students will understand and be able to describe the physical significance of key dimensionless quantities including Re.
- Students will understand qualitatively conduction, forced and free convection, and radiation and have experience with one or more modes during experiments.
- Students will be able to analyze systems containing multiple resistances to heat transfer during laboratory experiments.
- Students will understand convective heat transfer and be able to use heat transfer coefficients as they relate to the UO Laboratory experiments.
- Students will demonstrate familiarity and experience with the measurement of process variables (e.g., P, T, flow rate, conc.) using manual and/or electronic devices and computers.
- Students will demonstrate knowledge of basic laboratory techniques.
- Students will be able to use the scientific method and problem solving strategies, as well as statistical methods, to design, carry out, and analyze experiments in order to solve engineering problems.
- Students will demonstrate familiarity and experience with the application of process control principles on an industrial control system.
- Students will demonstrate familiarity and experience with chemical process equipment.
- Students will demonstrate an understanding of basic engineering statistics in their laboratory reports
- Students will demonstrate effective interpretation of graphical data.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems in the areas of heat transfer, fluid flow, and thermodynamics.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and practice safe laboratory and chemicals-handling principles.
- Students will be able to give effective, well organized oral presentations including the handling of questions and the use of appropriate visual aids.
- Students will be able to write effective, well organized technical reports, including formal engineering reports and short letter reports.
- Students will practice good teamwork principles.
- Students will be able to do performance calculations on heat exchangers from experimental data and demonstrate abilities or understanding in one or more of the following aspects: heat exchanger sizing, heat exchanger design, fouling, utilization of overall heat transfer coefficients, types of heat exchangers, and materials of construction.
- Students will be able to design or analyze flow systems involving one or more of the following aspects: pipes, valves, fittings, pumps, flow meters, Newtonian fluids, non-Newtonian fluids, laminar flow, and turbulent flow.
- Students will demonstrate effective reading of technical material.

CH EN 476 : Separations. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 373 & CH EN 376

DESCRIPTION: Stage operations, distillation, extraction, and absorption; design applications.

NOTE: College Lecture attendance required.

Course Outcomes

- Students will be able to solve steady-state material and energy balances as they relate to operating lines and multi-stage separation units.
- Students will be able to read mixture phase diagrams (solid solubility, liquid-liquid, VLE) and construct mass balances from them using the lever rule, tie lines, etc.
- Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates across phase boundaries.
- Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.
- Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.
- Students will demonstrate effective interpretation of graphical data.
- Students will be able to use a process simulator to design separation columns.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.
- Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.
- Students will have an overall understanding of basic separation techniques used in industry, the principles upon

which they are based, and their limitations and assets.
- Students will be able to set up and solve single-stage flash calculations.
- Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and packed columns (e.g., height of column, packing material, column diameter, flooding velocity).
- Students will be able to find the number of stages required for liquid-liquid extraction from ternary phase diagrams.
- Students will be able to solve binary batch distillation design problems with and without rectifying stages.
- Students should understand the implications of non-ideal phase behavior (e.g., azeotropes and partial miscibility) and the practical constraints of pressure, temperature, and available utilities on distillation column design.
- Students will demonstrate effective reading of technical material.

CH EN 477 : Unit Operations Laboratory 2. (2:1:6)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: CH EN 386 & CH EN 475 & CH EN 476

DESCRIPTION: Experimental verification of unit operations design principles; data collection and reduction; report preparation.

Course Outcomes
- Students will gain hands on experience with chemical processes, units, and corresponding equipment through lab experiments
- Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates for both external and internal flows and across phase boundaries.
- Students will understand fundamentals of kinetics including definitions of rate and forms of rate expressions during laboratory experiments.
- Students will demonstrate familiarity and experience with the measurement of process variables (e.g., P, T, flow rate, conc.) using manual and/or electronic devices and computers.
- Students will demonstrate knowledge of basic laboratory techniques.
- Students will be able to use the scientific method and problem solving strategies, as well as statistical methods, to design, carry out, and analyze experiments in order to solve engineering problems.
- Students will demonstrate familiarity and experience with chemical process equipment.
- Students will demonstrate an understanding of basic engineering statistics in their laboratory reports
- Students will be able to determine rate expressions by analyzing reactor data including integral and differential analysis on constant- and/or variable-volume systems in laboratory experiments.
- Students will demonstrate effective interpretation of graphical data.
- Students will demonstrate an ability to solve engineering problems.
- Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems in the areas of kinetics and separations.
- Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.
- Students will be able to obtain and evaluate appropriate informational/data from databases, hand books, correlations, experiments, literature, etc.
- Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.
- Students will understand and practice safe laboratory and chemicals-handling principles.
- Students will be able to give effective, well organized oral presentations including the handling of questions and the use of appropriate visual aids.
- Students will be able to write effective, well organized technical reports, including formal engineering reports and short letter reports.
- Students will practice good teamwork principles.
- Students will be able to size and do performance calculations on single, isothermal plug-flow, CSTR, or batch reactors for a single homogeneous or heterogeneous reaction from experimental data.
- Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and/or packed columns (e.g., height of column, packing material, column diameter, flooding velocity).
- Students will demonstrate effective reading of technical material.

CH EN 493R : Special Topics--Undergraduate. (.5-3:3:ARR)

PREREQUISITE: Instructor's consent.

DESCRIPTION: Classroom study based on student and faculty interest.

Course Outcomes
- Students will gain a broad understanding of engineering fundamentals and practices.

CH EN 498R : Undergraduate Research. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

DESCRIPTION: Final report required; 2 hours maximum allowed for degree credit.

Course Outcomes
- Students will perform fundamental research on specialized topics in a mentored learing enviroment.

500-Level Graduate Courses (available to advanced undergraduates)

CH EN 513 : Molecular Modeling. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: CH EN 373; or CHEM 463; or concurrent enrollment.

DESCRIPTION: Fundamentals of quantum mechanics, statistical mechanics, and molecular-level modeling. Basics of computational chemistry and simulations using deterministic and stochastic methods (molecular dynamics and Monte Carlo) to calculate thermodynamic and transport properties of fluids and fluid mixtures.

Course Outcomes
There are no course outcomes available

CH EN 518 : Biomedical Engineering Principles. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CH EN 374 & CH EN 376; or equivalent.

DESCRIPTION: Application of chemical engineering principles to model physiologic systems and to solve medical problems.

Course Outcomes

- Students will be able to formulate total-body mass balances including the major incoming and outgoing components for the human body.
- Students will be able to discuss the transport characteristics of biological membranes in terms of permeability and to estimate the ion flux, electrochemical potential, or chemical species concentrations associated with a particular environment.
- Students will be able to discuss the factors important to the effectiveness of a neuroprosthetic device.
- Students will be able to describe and to numerically predict major aspects of the humancirculatory system and the behavior of blood in physiologic and man-made flow systems.
- Students will be able to analyze the mechanical behavior of physiological tissue and biomaterials in terms of stress-strain behavior, viscoelasticity, and motion.
- Students will be able to describe the general classes of biomaterials and how they address requirements in various biomedical applications.
- Students will be able to describe the basic processes of tissue engineering and the associated cell growth and transport issues.
- Students will be able to describe the major types of medical imaging and the advantages and disadvantages of each.
- Students will be able to describe several common strategies used in biosensors and to explain the need for such sensors.
- Students will be able to formulate the equations to describe the time behavior of a chemical species for given physiological model, transport, and reaction assumptions.
- Students will be able to describe several medical circumstances for which drug delivery systems would be advantageous and to formulate the equations to describe the release of a drug into a patient under such circumstances.
- Students will be able to describe the clinical requirements for hemodialysis and to mathematically estimate the rate of removal of metabolic products by normal kidneys and during hemodialysis.
- Students will be able to mathematically estimate the transfer of oxygen and carbon dioxide in the lungs and in artificial oxygenators.
- Students will be able to discuss the foundational principles of bioethics and the legal and sociological factors that affect their implementation.

CH EN 519 : Biochemical Engineering. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: CH EN 374 & CH EN 386; or concurrent enrollment.

DESCRIPTION: Applying chemical engineering principles to biochemical systems.

Course Outcomes
There are no course outcomes available

CH EN 528 : Industrial Catalytic Processes. (2:2:0)

WHEN TAUGHT: Spring Contact Department

PREREQUISITE: CH EN 386

DESCRIPTION: Fundamentals of catalytic chemistry and materials; applications to important industrial catalytic processes. Includes catalyst materials and preparation, catalyst characterization, fixed-bed reactor design, and catalyst deactivation.

Course Outcomes

- Students will learn about key industrial catalytic processes in the production of chemicals, refining of petroleum, and control of the environment.
- Students will learn the key aspects of the process chemistry, kinetics, mechanisms, catalyst deactivation, reactor design and process design of 13 globally-significant catalytic processes.
- Students will apply principles of catalysis to derivation of rate expressions and reactor design calculations for a few processes.

CH EN 531 : Thermodynamics of Multicomponent Systems. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 373; or CHEM 463; or concurrent enrollment.

DESCRIPTION: Fundamental concepts and applications in first and second laws, equilibrium and stability, phase equilibrium, and homogeneous and heterogeneous chemical equilibrium.

Course Outcomes

- Perform 1st & 2nd analysis of heat and work interactions for open systems.Calculate process variables for pure fluids using equations of state, departure functions, and corresponding states.
- Calculate properties of pure fluids (e.g., vapor pressure, molar volumes, etc.) using correlations and equations of state. Calculate the properties of mixtures using ideal mixing properties and excess properties. Show relationships between pure-fluid properties (e.g., Clapeyron Equation) and determine partial molar enthalpies, volumes, and entropies from experimental data and from equations for excess Gibbs energy.
- Write down the basic equations for vapor-liquid equilibrium using the gamma and phi methods. Find vapor-liquid equilibrium phase compositions, dew points, and bubble points for binary systems with ideal gas phase using the method. Calculate, at a given temperature, pressure, and feed composition, liquid and vapor compositions and amounts vaporized using the gamma and phi methods. Calculate liquid-liquid compositions using excess Gibbs energy equations. Calculate solid-liquid solubilities.
- Know and use the relationship among heats of formation, absolute entropy and Gibbs energy of formation. Know and use the relationship between Gibbs energy of formation and the equilibrium constant. Calculate the equilibrium distribution of reacting ideal gas mixtures. Calculate equilibrium compositions and temperature for

a given heat interaction (e.g., adiabatic, isothermal, or given heat leak) for a given feed compostion, pressure, and initial temperature and real fluids. Find the equilibrium distribution for complex reactions.

CH EN 533 : Transport Phenomena. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 376 & MATH 303; or CH EN 376 & MATH 447; ChEn 476 or concurrent enrollment.

RECOMMENDED: Math 447.

DESCRIPTION: Transport mechanisms and coefficients and fundamental field equations for momentum, heat, and mass transport, with application to system design.

Course Outcomes

- Derive the equations of change from conservation principles for a one-dimensional system.Derive the equations of change from conservation principles for an arbitrary curvilinear coordinate system.
- Apply the principles of dimensional analysis to the equations of change to generate terms containing dimensionless parameters such as Re, Pr, Sc, Gr, and Pe.For a given engineering problem, determine which terms in the equations of change are most significant in controlling the velocity, temperature, and concentration distributions.
- Mathematically interpret transport equations that are expressed using vector and tensor notation.Manipulate and generate solutions to equations using vector and tensor notation
- Generate analytic solutions to the equations of change when there is one independent variable, including unidirectional flow of an incompressible fluid with combined convection and diffusion.Demonstrate the principles for solving the equations of change for an incompressible fluid with two independent variables (two spatial, or time and one spatial).
- Solve simple interfacial transport problems with either heat, mass, or momentum transfer, including the use of Cf, Nu, and Sh.Solve interfacial transport problems with combined heat, mass, and momentum transfer; make “blowing factor” corrections to heat and mass transfer when the net-mass-transfer rate is high.
- Estimate viscosity, thermal conductivity, and mutual diffusivity from simple theories such as corresponding states and Chapman-Enskog.Explain the molecular origins of observed transport properties and predict qualitatively the transport performance of newly encountered materials.
- Qualitatively explain the origins and nature of turbulence.
- Describe the rationale and use of the Stefan-Maxwell equation for multicomponent mass transfer.
- Analyze the viability of proposed solutions to engineering problems in terms of transport processes.Apply knowledge of transport processes to generate new solutions to engineering problems.

CH EN 535 : Kinetics and Catalysis. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CH EN 386

DESCRIPTION: Theories and principles of chemical kinetics, including heterogeneous catalysis and reactor design.

Course Outcomes

- Define reaction rate; use extent of reaction for defining species concentrations.(a) General properties of rate function & five empirical rules; and (b) purposes of studying kinetics.
- (a) Define elementary step and its rate. (b) Estimate pre-exponential factors from transition-state theory for homogeneous reactions.(a) collision and transition-state theories; and (b) BEBO theory; properties and calculations of partition functions. Estimate pre-exponential factors from TST for surface-phase species.
- Derive a rate expression from a sequence of elementary steps for a homogeneous chain reaction or a heterogeneous catalytic reaction.(a) Applicability and limitations of kinetic tools, including SSA, LCA, RDS, and MASI; open/closed sequences.
- (a) Derive Langmuir adsorption isotherms; (b) calculate BET surface area from N2 adsorption in a solid; (c) calculate dispersion of supported metal catalysts from uptake data.(a) Molecular processes involved in adsorption/desorption of molecules on a solid surface; (b) information available from a full-range isotherm.
- (a) Derive rate expressions for Langmuir-Hinshelwood, Eley-Rideal, and two-site mechanisms of surface reactions; (b) fit rate data to a LH rate expression to determine values of the kinetic constants and specify acceptable statistical measures of the goodness of fit.(a) Principles and guidelines for experimental design and collecting rate data; (b) methods for fitting rate data to empirical and theoretically based rate models; (c) the microkinetics approach to modeling reaction kinetics.
- Calculate concentration and temperature gradients in film and pellet, % resistances for heat/mass transport and reaction, combined and effective diffusivities, and isothermal/-nonisothermal effectiveness factors.(a) Mechanisms of and fundamental equations for heat/mass transport processes during reaction in a solid, porous catalyst; (b) criteria for heat/mass transfer and pore-diffusional disguises.
- Set-up and solve energy, mass, and momentum balances for a 1D adiabatic or heat-exchange packed-bed reactor, incorporating film mass transfer and pore diffusional resistances and effects of gaseous expansion, to obtain catalyst requirements, axial temperature profile, and pressure drop.3D, unsteady-state equations for conservation of mass, energy, and momentum and simplification to 1D, steady-state reaction.

CH EN 541 : Computer Design Methods. (3:3:0)

PREREQUISITE: CH EN 376 & MATH 303; or CH EN 376 & MATH 334; or equivalent.

DESCRIPTION: Computer-aided design and numerical methods of chemical engineering processes.

Course Outcomes

- Students will apply computational techniques to solve a wide range of nerical problems arising in Chemical Engineering
- Students will become proficient in numerical computer programming.
- Students will learn theory, algorithms, implementation, and analysis of output for numerical methods including the following:Round off and truncation errorsStability and convergence criteriaDirect and iterative solution of linear systems of equationsSolution of nonlinear algebraic systems of equationsSolution of linear and nonlinear systems of initial and boundary value ordinary differential equationsClassification and characteristics of partial differential equationsSolution of elliptic, parabolic, and hyperbolic partial differential equations using finite difference and finite volume methodsNumerical integration and interpolation of functions

CH EN 578 : Polymer Science and Engineering. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.; Spring Odd Yrs.

PREREQUISITE: CH EN 378; or equivalent.

DESCRIPTION: Foundation science and theory of polymer chemistry and physics and their implications in engineering applications. Topics include polymerization chemistry, structure-property relationships, polymer physics, and transport properties.

Course Outcomes

- Students can name polymers and identify the monomers from which the polymers are built.
- Students recognize the roles that polymer configuration and conformation have upon polymer physical and chemical properties.
- Students can describe the mechanisms of chain polymerizations, and can predict reaction rates and polymer chain lengths.
- Students can describle the mechanisms of step polymerizations, and can predict reaction rates and polymer chain lengths.
- Based on tabulated mechanical properties, students can design polymer structures to sustain engineering loads, and can predict deformations under load.
- Students can name various manufacturing processes and can do simple formulation of manufacturing processes to build things from polymers.
- Students recognize the principles of polymer recycling and can select appropriate recycle or reuse methods to balance economics and environmental responsibility.
- Students can analyze industrial scale polymerization processes and evaluate the advantages and disadvantages of various processes.
- For a given scenario or application, students can propose various polymers that meet the requirements, identify the monomers required to make the polymers, and design the industrial polymerization and manufacturing processes to produce the desired object for the application.

CH EN 593R : Special Topics - Intermediate. (1-3:ARR:ARR)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Instructor's consent.

DESCRIPTION: Special topics for advanced undergraduate students and for graduate students.

Course Outcomes

- Students will develop knowledge and skills about topics addressed at the appropriate level but not regularly taught as part of the department curriculum

Graduate Courses

For 600- and 700-level courses, see the BYU 2013–2014 Graduate Catalog.

Professors

Baxter, Larry Lin
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1983
PhD, Brigham Young University, 1989

Fletcher, Thomas Harvey
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1979
MS, Brigham Young University, 1980
PhD, Brigham Young University, 1983

Harb, John N.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1983
MS, University of Illinois, Chicago, 1985
PhD, Uiversity of Illinois, Urbana, 1988

Lewis, Randy
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1989
PhD, Massachusetts Institute of Technology, 1995

Pitt, William G.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1983
PhD, Uiversity of Wisconsin, Madison, 1987

Wilding, Wade Vincent
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
PhD, Rice University, 1985

Associate Professors

Argyle, Morris D.
COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1990

PhD, University of California, Berkeley, 2003

Hecker, William C.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1974
MS, Brigham Young University, 1975
PhD, University of California, Berkeley, 1982

Knotts, Thomas Allen

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 2001
PhD, University of Wisconsin, Madison, 2006

Wheeler, Dean Richard

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Associate Professor
DEGREES: PhD, University of California, Berkeley, 2002

Assistant Professors

Bundy, Bradley C.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2004
MS, Stanford University, 2006
PhD, Stanford University, 2009

Cook, Alonzo D.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 1989
MS, Brigham Young University, 1991
PhD, Massachusetts Institute of Technology, 1996

Hendengren, John D.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Assistant Professor
DEGREES: BS, Brigham Young University, 2001
MS, Brigham Young University, 2002
PhD, University of Texas at Austin, 2005

Lignell, David O.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Chemical Engineering
RANK: Assistant Professor
DEGREES: BS, University of Utah, 2001
PhD, University of Utah, 2008

Admission to Degree Program

The degree program in the Department of Civil and Environmental Engineering is open enrollment.

The Discipline

The BYU Department of Civil and Environmental Engineering prepares students for professional involvement in structural, water resources, environmental, geotechnical (soils), and transportation engineering.

Structural engineers analyze and design buildings, bridges, and other structures. The engineer applies principles of physics, mathematics, and engineering to develop efficient yet safe designs. Sophisticated computer models are used in these analyses. Materials used by structural engineers include steel, aluminum, concrete, masonry, wood, and composites.

Water resource and environmental engineers design pipeline systems, water treatment plants, dams, flood control structures, waste disposal sites, and environmental restoration projects. Computer modeling and analyses are used in design and to forecast storm runoff, flooding, and movement of contaminants in surface and subsurface waters. Environmental engineers evaluate and reduce pollutants from natural, human, agricultural, and industrial sources to preserve the beauty and quality of air, land, and water.

Geotechnical engineers design structures composed of or located within earth materials, including foundations for buildings and bridges, retaining walls, earth dams, highway embankments, tunnels, and liners for landfills. Field and laboratory tests on soil and rock, along with empirical and computer models, are used to assure safety and economy in design.

Traffic and transportation engineers apply scientific principles to the planning, design, construction, operation, and management of transportation systems, including highways, airports, and mass transit facilities. Transportation engineers are responsible for the safe, rapid, comfortable, convenient, economical, and environmentally compatible movement of people and goods. Computer models and simulations are frequently used by traffic engineers for geometric design and for planning, operating, and managing transportation networks, including intermodal systems.

Department Mission Statement

The mission of the Department of Civil and Environmental Engineering is to produce graduates who possess technical competence in their chosen specialty area of civil engineering, integrity, and a commitment to the principles of the gospel of Jesus Christ, that will prepare them to serve and contribute as innovators, professional engineers, and leaders in the global community.

Program Educational Objectives

The undergraduate program in civil engineering has the following educational objectives:

1. Develop innovative engineers who competently apply recognized technical methods to meet human needs for water, shelter, and transportation.
2. Develop leaders with global awareness who hold paramount the safety, health, and welfare of the public while sustaining and protecting the environment.
3. Develop citizens with moral character and commitment to the gospel of Jesus Christ who provide life-long service to the public, church, and professional community.

Expected Learning Outcomes

These objectives are intended to develop the following outcomes in students graduating from the civil engineering program:

1. An ability to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry, and geology.
2. An ability to design and conduct civil engineering experiments, as well as to analyze and interpret data.
3. An ability to design a system, component, or process in more than one civil engineering context to meet desired needs within multiple realistic constraints.
4. An ability to lead and function on multidisciplinary teams.
5. An ability to identify, formulate, and solve engineering problems.
6. An understanding of professional and ethical responsibility, and their relationship with faith.
7. An ability to communicate effectively.
8. The broad education necessary to understand sustainability—the impact of engineering solutions in a societal, environmental,

and economic context.
9. A recognition of the need for, and an ability to engage in life-long learning, professional licensure, and service.
10. A knowledge of contemporary issues including globalization.
11. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
12. An ability to explain basic concepts in management, business, and public policy.
13. An ability to apply knowledge of geotechnical engineering.
14. An ability to apply knowledge of structural engineering.
15. An ability to apply knowledge of transportation engineering.
16. An ability to apply knowledge of water resources engineering.

Career Opportunities

Civil engineers are employed in industry, private consulting, and government. Industries employing many civil and environmental engineers include construction, transportation, aerospace, petroleum, and mining. Many civil engineers enter private consulting practices, and many eventually establish their own firms. The yellow-page directories for major cities generally list many civil, structural, environmental, geotechnical, and transportation engineering firms.

Civil engineers are also employed by national, state, and local governments. Most cities and counties have engineering departments staffed largely by civil engineers. Departments of transportation, environmental protection agencies, the Army Corps of Engineers, and the Bureau of Reclamation hire many civil engineers.

Civil engineering may be used as a preprofessional program for careers in architecture, law, and business.

Because civil engineers design structures that affect public health and safety, licensure as a Professional Engineer is required for most positions. A necessary prerequisite for licensure is graduation from an accredited engineering program. The civil engineering program is fully accredited by the Accreditation Board for Engineering and Technology (ABET).

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Civil Engineering (Program Outcomes)

Students should see the department for help or information concerning the undergraduate program.

Graduate Programs and Degrees

MS in Civil Engineering
PhD in Civil Engineering

For more information see the BYU 2013–2014 Graduate Catalog.

General Information

Students are strongly encouraged to consult with the department regarding their course scheduling.

Qualified students from junior colleges with adequate preengineering programs can normally complete the BS degree in two additional years. Students who transfer into the department from other universities or from other departments at BYU will be placed in the civil engineering program according to an evaluation of completed work. Prospective transfer students should contact the department as soon as possible so that any variations can be accommodated with a minimum loss of time.

A maximum of 9 credit hours with D grades are allowed in the Department of Civil and Environmental Engineering classes. Clearance for graduation will be denied until D credits are reduced to 9 hours or less.

Integrated Master's Program

Although abundant professional employment is available with a bachelor's degree, professional opportunities are markedly improved by completing a master's degree.

During the junior year of the civil engineering curriculum, those who desire to obtain a master's degree in civil engineering (MS) may enter the integrated master's program. In this program students may work toward both the bachelor's and master's degrees concurrently.

Applicants to the integrated program must have a cumulative GPA of 2.5 or higher for the last 60 credit hours of upper-division (300-400 level) courses. All credit to be counted toward the master's degree must carry a cumulative GPA of 3.0 or better. When students are within 30 credit hours of completing the graduate degree, they must also apply for and be admitted to graduate school.

Professional Engineer Registration

The Department of Civil and Environmental Engineering encourages graduates to become registered Professional Engineers. General qualifications for becoming registered are explained in the Ira A. Fulton College of Engineering and Technology section of this catalog. This status is vital to engineering practice in the public sector and to much consulting work. The civil engineering program prepares graduates to successfully complete the Fundamentals of Engineering (FE) examination, an important step in becoming registered. Students who wish to strengthen their preparation for the FE exam should select the required engineering courses with this need in mind.

Awards

The department has the following privately endowed awards: the Russell J Berrett Scholarship, the Joseph Layne Black Scholarship, the W Don and Kaye Budge ASCE Scholarship, the Caleb Tanner Water Resources Scholarship, The Jerry Christiansen Scholarship, the Nancy and Doug Ferrell Scholarship, the D Allan Firmage Scholarship, the Dean K Fuhriman Scholarship, the King and Diane Husein Professorship, the Ramesh Khona Scholarship, the Marvin E Larson Scholarship, the Billy and Marian Nichols Scholarship, The Pavement and Materials Endowed Mentorship, the H Burke Peterson Scholarship, the Ralph and Betty Rollins Scholarship, the John and Bobbie Tanner Scholarship, the Lee and Connie Wimmer Scholarship, and the T Leslie Youd Family Fellowship. In addition, the department has the following private annual awards: the BES CE Class of 1967 Scholarship, the ES² Scholarship, The D Allan Firmage Undergraduate Scholarship, the Earl and Beth Hurst Scholarship, the Keller and Associates Scholarship, and the URS Corporation/Washington Division Scholarship.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following courses:

CE EN 100A : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Activities of civil engineering; principles and methods involved in solving civil engineering problems.

NOTE: College Lecture attendance required.

Course Outcomes

- 1(i) Begin to understand the process required to become a professional engineer
- 2(i) Begin to understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- Begin to learn how to work in teams on civil engineering related projects that benefit the community.
- 4(f) Begin to understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 100B : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Winter

DESCRIPTION: Activities of civil engineering; principles and methods involved in solving civil engineering problems.

NOTE: College Lecture attendance required.

Course Outcomes

- 5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers
- 2(i) Begin to understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Begin to learn how to work in teams in civil engineering related projects that benefit the community
- 4(f) Begin to understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 101 : Introduction to Civil and Environmental Engineering. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to what civil and environmental engineering is all about. Careers in the profession. Courses and curriculum of the major. Freshman projects and teamwork.

Course Outcomes

- 1(d) Participate on a student team to complete assigned tasks.
- 2(i) Discover and digest information from the internet, the literature, and interviews about assigned civil engineering subjects.

CE EN 103 : Engineering Mechanics--Statics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Math 112; or 111 and 119; or concurrent enrollment.

DESCRIPTION: Concepts of mechanics: force systems in equilibrium, resultants, friction, centroids, utilization of vector algebra, simple trusses, shear and bending moment diagrams, moments of inertia.

Course Outcomes

- Be able to manipulate basic engineering units in both the International and US Customary Systems of Units in engineering analysis and be able to convert between the two.
- Be able to perform basic vector operations using standard vector notation.
- Be able to conceptualize and draw a conventional free-body diagram which identifies and applies all

known and unknown forces.
- Understand the nature of forces(s) and their manipulation in engineering analysis, including moments, couples, transmissibility and resultants.
- Understand the conditions for equilibrium for both a particle and a rigid body.
- Be able to determine the axial forces in the members of a statically determinant truss.
- Be able to calculate the center of gravity for 2 and 3 dimensional rigid bodies.
- Be able to both calculate and draw diagrams for the internal shear forces and bending moments in straight, statically determinant beams.
- Understand the nature of friction and be able to solve problems involving friction and shear on horizontal and inclined planes.
- Be able to use calculus to compute centroids of lines, areas and volumes.
- Demonstrate competence in basic engineering analysis.

CE EN 112 : Engineering Drafting with CAD Applications. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Civil engineering or technology education major status

DESCRIPTION: Structural and component drafting, emphasizing computer-automated (CAD) systems. Concepts include applied and descriptive geometry, multiview representation, sectional views, dimensional practices, and axonometric sketching.

Course Outcomes
- An understanding of fundamental drafting concepts and manual drafting techniques
- An understanding of CAD-based drafting techniques
- An ability and skills for preparing technical drawings manually and by using AutoCAD
- An ability to work in a team to complete a term project and produce a technical report
- An ability to communicate with team members and produce an effective, well organized oral presentation
- An understanding of Building Information Modeling (BIM) and its application in engineering
- An ability to use BIM software to develop structural models for analysis
- An ability to present structural data in a collaborative environment

CE EN 113 : Engineering Measurements. (3:2:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: MATH 111

DESCRIPTION: Measurement of horizontal and vertical distances and angles to locate engineering projects including profiles, plane and topographical mapping, site layout, and earthwork. Introduction to GIS and mapping for surveying projects.

Course Outcomes
- Make order of magnitude estimates, assess reasonableness of solutions, and report appropriate levels of numerical accuracy
- Understand basic coordinate geometry functions and how they are used in surveying to reduce field measurements to useable quantities for design and analysis
- Make accurate horizontal and vertical angle and horizontal and vertical distance measurements
- Operate a total station and make plans for their use in engineering projects
- Close a horizontal traverse by computing distances, azimuths, bearings, accuracy, latitudes and departures and their accompanying adjustments to produce accurate coordinate locations
- Operate Global Positioning System (GPS) devices for mapping purposes
- Understand the concepts between geographic and projected coordinate systems and the relationship of locally surveyed information to these global systems
- Use basic functions of a Geographic Information System (GIS) to develop appropriately scaled and referenced maps of their surveyed data
- Take measurements for and develop a topographic map
- Design and layout horizontal and vertical alignments of highways

CE EN 200A : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CE EN 100A & CE EN 100B & CE EN 101

DESCRIPTION: Activities of civil engineering; principles and methods involved in solving civil engineering problems.

NOTE: College Lecture attendance required.

Course Outcomes
- 1(i) Continue developing an understanding of the process required to become a professional engineer
- 2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and begin leanring how to lead teams in civil engineering related projects that benefit the community
- 4(f) Continue developing an understanding of ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 200B : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CE EN 100A & CE EN 100B & CE EN 101

DESCRIPTION: Activities of civil engineering; principles and methods involved in solving civil engineering problems.

NOTE: College Lecture attendance required.

Course Outcomes

- 1(i) Continue developing an understanding of the process required to become a professional engineer
- 2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and begin learning how to lead teams in civil engineering related projects that benefit the community
- 4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 203 : Engineering Mechanics--Mechanics of Materials. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CE EN 103

DESCRIPTION: Fundamental concepts of elastic stress and strain, including transformations and stress-strain relations; beam/column theories (axial, flexure, torsion, and shear loads and deformations); shear and bending moment relationships; column stability; and cylindrical and spherical pressure vessels.

Course Outcomes

- Students will be able to calculate and transform axial stress (e.g., Mohr's Circle), shear stress, bearing stress, thermal stress, bending stress, and combined stress.
- Students will be able to calculate strain, transform strain (e.g., Mohr's Circle), apply stress-strain relations (e.g., Hooke's Law), and solve statically indeterminate problems.
- Students will be able to analyze deflections due to axial, torsion, bending, and shear loads, and manipulate relations between shear and bending moment.
- Students will be able to design beams and columns to carry specified axial, flexure, and shear loads, and predict their deformation and elastic stability (i.e., buckling).
- Students will be able to predict stresses in pressure vessels.

CE EN 204 : Engineering Mechanic--Dynamics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: CE EN 103

DESCRIPTION: Concepts of dynamics applied to particles, systems of particles, rigid bodies, vibration systems, and nonrigid particles systems.

Course Outcomes

- 1 (a) Understand the kinematics of particles and be able to perform rectilinear and curvilinear analysis of particle motion described in appropriate coordinate systems.
- 2 (a) Understand Newton's Laws of Motion and be able to write and solve the equations of motion for particles and systems of particles in appropriate coordinate systems.
- 3 (e) Understand the principles of Work and Energy and Impulse and Momentum as they apply to particles and systems of particles and be able to solve problems appropriate thereto.
- 4 (e) Be able to determine the motion of rigid bodies in translation and rotation about a fixed axis and to understand the principles associate with general plane motion.
- 5 (e) Be able to apply the principles of Force and Acceleration, Work and Energy, and Impulse and Momentum to rigid bodies and to solve problems appropriate thereto.
- 6 (e) Understand the basic concepts of one-degree-of-freedom vibration and to solve simiple problems related to such motion.

CE EN 270 : Computational Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Math 113 or concurrent enrollment.

DESCRIPTION: Computational techniques for solving civil engineering problems.

Course Outcomes

- Be able to utilize computer science concepts such as how information is stored in a computer in a digital format to calculate data size and data transfer rates.
- Be able to utilize the full range of IT resources available to students in the BYU College of Engineering and Technology.
- Be able to design and edit web pages in HTML format.
- Be able to create sophisticated and professsional Microsoft Powerpoint presentations, including use of themes and animation.
- Be able to use Microsoft Word to develop complex, lengthy technical documents, utilizing advanced features such as cross referencing and auto-generated tables of contents and figures.
- Be able to use the basic and advanced features in Microsoft Excel including formulas, relative vs. absolute referencing, naming cells, vlookup, IF function, validation, custom formatting, array formulas, charts, goal seek, and the Solver add-on to solve civil engineering problems.
- Be able to record and use macros to automate frequently-used tasks in Excel or to explore what VB code is associated with the task.
- Be able to reference cells and ranges in VB to either extract information from cells or write information to cells.
- Be able to add controls to a spreadsheet and associate those controls with VB code.
- Be able to use the MsgBox and InputBox objects in VB to present information to users or to prompt for input.
- Be able to use objects in VB programming, including properties and methods and be able to explore and research new object classes when necessary.
- Be able to use IF statements and conditional expressions to control the flow of logic in VB code.
- Be able to use each of the looping strategies in VB to encode iterative programming logic.
- Be able to allocate and use arrays in visual basic to process vectors, matrices, tables, and lists of data.
- Be able to use the debugging utilities in VB to identify and correct logical errors in your code.
- Be able to design and code custom functions in VB that can be called from Excel formulas or from other places in your VB code.
- Be able to develop custom subs to perform specific tasks in VB or modify subs created by recorded

macros to make the macros powerful or applicable in a variety of applications.
- Be able to trap on a variety of different types of events and execute VB code in response to those events.
- Be able to utilize the VB string functions in order to manipulate text.
- Be able to create custom forms and associate those forms with an excel workbook.

CE EN 300A : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall
PREREQUISITE: CE EN 200A & CE EN 200B
DESCRIPTION: Technical and professional activities in civil engineering.
NOTE: College Lecture attendance required.

Course Outcomes
- (i) Continue developing an understanding of the process required to become a professional engineer
- 2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and continue learning how to lead teams in civil engineering related projects that benefit the community
- 4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 300B : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Winter
PREREQUISITE: CE EN 200A & CE EN 200B
DESCRIPTION: Technical and professional activities in civil engineering.
NOTE: College Lecture attendance required.

Course Outcomes
- 1(i) Continue developing an understanding of the process required to become a professional engineer
- 2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and continue learning how to lead teams in civil engineering related projects that benefit the community
- 4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 304 : Civil Engineering Materials: Metals, Woods, and Composites. (1.5:2:3)

PREREQUISITE: CE EN 203 & CE EN 270 & STAT 201
DESCRIPTION: Molecular basis and mechanical behavior of civil engineering structural materials; failure theories; laboratory testing.

Course Outcomes
- Be able to extract basic material properties of wood, aluminum and steel from simple mechanical tests.
- Observe and understand the failure mechanisms of isotropic and orthotropic materials.
- Understand basic characteristics of fiber-reinforced plastic composite materials.
- Be able to apply the maximum normal stress, maximum shear stress, and octahedral shear stress failure theories.

CE EN 306 : Civil Engineering Materials: Concrete, Masonry, and Asphalt. (1.5:2:3)

PREREQUISITE: CE EN 203 & CE EN 270 & STAT 201; Eng T 231 or concurrent enrollment.
DESCRIPTION: Composition, engineering behavior, and construction of concrete, masonry, and asphalt; laboratory testing.

Course Outcomes
- Understand properties, behavior, and use of aggregates.
- Understand manufacturing, properties, behavior, and use of portland cement.
- Understand production, properties, placement, behavior, and use of portland cement concrete.
- Understand production, properties, placement, behavior, and use of masonry units.
- Understand manufacturing, properties, behavior, and use of asphalt cement.
- Understand production, properties, placement, behavior, and use of asphalt concrete.
- Be able to perform selected laboratory test procedures on aggregate-based materials.
- Be able to analyze and interpret experimental laboratory test data.
- Be able to prepare professional technical reports documenting laboratory investigations of material properties.

CE EN 321 : Structural Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: CE EN 203 & CE EN 270; or concurrent enrollment.
DESCRIPTION: Methods of statics. Influence line diagrams. Method of virtual work. Plastic hinge analysis. Flexibility (force) method, stiffness (displacement) method, and moment distribution method for analysis of indeterminate beams, trusses, and frames. Introduction to computer structural analysis.

Course Outcomes
- 1(a) Apply Newton's Laws of force equilibrium to determine axial forces, shear forces, and bending moments in statically determinate beams, trusses, frames, arches, and cables.
- 2(a) Apply calculus and the principle of virtual work to determine displacements in statically determinate

beams, trusses, and frames.
- 3(e) Use appropriate assumptions to perform approximate analysis and plastic hinge analysis of statically indeterminate beams and frames.
- 4(e) Critically place live loads on beams, trusses, and frames using influence line diagrams.
- 5(e) Identify symmetry, antisymmetry, degrees of indeterminacy, and degrees of freedom in beams, trusses, and frames.
- 6(n) Define basic structural engineering terminology.
- 7(n) Analyze statically indeterminate beams, trusses, and frames by the flexibility method.
- 8(n) Analyze beams, trusses, and frames by the stiffness method.
- 9(n) Analyze beams and frames by moment distribution.
- 10(n) Analyze beams, trusses, and frames with commercial structural analysis software.

CE EN 332 : Hydraulics and Fluid Flow Theory. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CEEn 204, 270, Eng T 231; or concurrent enrollment.

DESCRIPTION: Fluid properties, fluid statics and dynamics, viscous flow, boundary layers, concepts of pipe and open-channel flow.

Course Outcomes
- 1(p) Be able to setup, perform, evaluate and report on several elementary hydraulic experiments, including: static pressure force, impulse forces from a fluid jet, energy losses in pipe flow, minor energy losses in pipe systems, and flow over weirs in open channels.
- 2(a) Be able to perform basic calculations for static pressures and forces in fluids.
- 3(a) Understand conservation of mass, energy, and momentum principles as applied to fluid flow situations, and be able to apply them to flow analysis problems.
- 4(e) Understand the concepts of drag and lift and be able to apply both to solve introductory problems of forces and dynamics.
- 5(e) Understand alternate standard approaches and formulas, and be able to analyze and design pressure pipe systems.
- 6(p) Understand standard approach and formulas, and be able to analyze and design open-channel flow systems.
- 7(p) Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for situations involving fluid pumping.

CE EN 341 : Elementary Soil Mechanics. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CE EN 203 & CE EN 270; CE En 332 or concurrent enrollment. Geol 330 or concurrent enrollment.

DESCRIPTION: Determination of stresses in soils, soil strength, consolidation, and settlement. Applications in fluid flow, lateral earth pressure, bearing pressure, and slope stability.

Course Outcomes
- 2. (g) Communicate results of geotechnical tests effectively and explain their meaning in a clear and concise manner.
- 1. (b) Perform basic laboratory tests on soils including seive analysi, Atterberg limits, compaction, direct shear, triaxial shear and consolidation. Be able to perform the basic calculations associated wtih laboratory tests on soils.
- 3. (m) Perform fundamental calculations and analyses including weight-volumen relationships and soil classification. Understand influence of soi structure and mineralogy on soil behavior.
- 4. (m) Understand basic principles of flow through porous media including Darcy's law, the equation of continuity, seepage forces and flow nets.
- 5. (m) Understand how stresses are transferred through soils. Compute both geostatic stress (total stress, effective stress, and pore pressures) and induced stresses due to point, line and area loads.
- 6. (m) Understand basic consolidation theory. Compute the amoun of settlement and the time required for settlement under a given load.
- 7. (m) Understand shear strength principles including Mohr-Coloumb failure criterion. Perform basic caluclations related to shear strength analyis.
- 8. (m) Analyze lateral earth pressures under at-rest, active and passive conditions.
- 9. (m) Perform bearing capacity analysis for spread footings of various shapes. Understand how bearing capacity equations are used in foundation design.

CE EN 351 : Environmental Engineering. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CHEM 105

DESCRIPTION: Environmental concerns, problems, and evaluation methodology; pollution control and engineering management approaches; material balance and separations; reactor design.

Course Outcomes
- Be able to setup and solve material balance calculations for environmental engineering problems.
- Understand zero, first, and second order reactions equations and be able to solve simple problems using these concepts. Understand half-life and doubling time and how it applies to reactor design.
- Understand and solve problems using mixed-batch, plug-flow, and completely mixed mixing models. Solve simple design problems for mix-batch, plug-flow, and completly mixed flow reactors.
- Understand and solve simple problems of energy balance. This will include units of meausre, conversion, energy equivalance, and power production.
- Understand the concept of an ecosystem. This includes material and energy flows.
- Understand basic water quality measures: dissolved oxygen, oxygen demand, solids, nitrogen, and bacteria measurements. Be introduced to water quality standards for drinking water, effluents, and surface waters.
- Understand and solve basic engineering problems related to water treatment processes including softening, coagulation and floculation, settling, filtration, and disinfection.
- Understand and solve basic engineering problems related to waste water treatment. This will include understanding the basic unit operations: preliminary and primary treatment, secondary treatment, tertiary treatment, and sludge treatment and disposal. Understand and be able to solve basic

engineering problems related to activated sludge systems, including reactor design and solids separation.
- Understand the basic processes and issues related to air quality, this includes major air pollutants, sources of air pollution, and air quality standards.
- Understand the basic issues and regulations related to hazardous and radioactive waste. This includes legal definitions and approaches.

CE EN 361 : Introduction to Transportation Engineering. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CE En 113, 270, Eng T 231, Stat 201; or concurrent enrollment.

DESCRIPTION: Transportation system characteristics, traffic engineering and operaton, transportation planning, geometric design, pavement design, transportation safety, freight, public transport, sustainable transportation.

Course Outcomes
- 1(o) An understanding of the history of the development of transportation in the United States and that the transportation modes and networks available in a community significantly influence the way the community develop.
- 2(h) An ability to approach transportation problems, especially traffic congestion on highways, from a systems point of view, as an interaction between land use and transportation systems, not just as the problem related to highways. This competency is all inclusive, including public transportation, freight, and sustainability.
- 3(b) An ability to conduct activities to measure traffic stream characteristics (volume, speed, and density) and an ability to analyze field data to estimate values for traffic stream parameters, including hypothesis tests.
- 4(b) An ability to build a standard traffic flow model (based on the Greenshields Model) to fit observed traffic data and an understanding of the randomness of traffic flow characteristics.
- 5(b) An understanding of the concept of level of service (LOS) and capacity and an ability to evaluate the performance of basic roadway segments using standard procedures based on this concept.
- 6(o) An understanding of the four steps in the traditional travel demand modeling process, the two-way relationship between land use and transportation, and how the travel demand modeling fits into the transportation-planning process.
- 7(b) An understanding of the highway safety improvement program and an ability to determine standard safety evaluation parameters.
- 8(b) An understanding of the dynamic interaction of the driver, roadway, and vehicle, and an ability to evaluate and design roadway sections for safe stopping sight distance.
- 9(b) An ability to determine key dimensions of horizontal and vertical alignments of roadway sections using safe stopping sight distance and the concept of superelevation and an ability to calculate the appropriate distance for passing/no-passing zones for a rural two-lane road.
- 10(c) An ability to determine when an intersection warrants the installation of a traffic signal, an ability to design signal settings for intersections so that drivers will not face a dilemma zone, and an understanding that congestion and associated delays are societal costs.
- 11(c) An understanding of pavement structures and their characteristics and an ability to design bituminous pavements using the AASHTO method that requires knowledge of traffic engineering, pavement material characteristics, and economics.
- 12(o) An understanding of rail transit service in a corridor with respect to station spacing and vehicle capabilities, an ability to calculate changes in transit ridership in response to changes in fare or service (elasticity) and an ability to measure and compare the performance of public transportation operations.
- 13(o) An understanding of the role of freight movement in the economy and an ability to explain why certain commodities tend to move on specific transport modes.
- 14(h) An ability to describe what sustainable transportation is and how it can be supported, and an ability to explain the impacts of traffic congestion on a corridor or in a community.
- 15(d) An ability to lead and function on multidisciplinary teams and (g) An ability to communicate in a team environment and an ability to compose professional documents in a clear, concise, and effective manner.

CE EN 400A : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE EN 300A & CE EN 300B

DESCRIPTION: Technical and professional activities in civil engineering.

NOTE: College Lecture attendance required.

Course Outcomes
- 1(i) Understand the process required to become a professional engineer
- 2(i) Understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and lead teams in civil engineering related projects that benefit the community
- 4(f) Understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 400B : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 300A & CE EN 300B

DESCRIPTION: Technical and professional activities in civil engineering.

NOTE: College Lecture attendance required.

Course Outcomes
- 1(i) Understand the process required to become a professional engineer
- 2(i) Understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and lead teams in civil engineering related projects that benefit the community
- 4(f) Understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

- 5(j) Understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers.

Note: Students must be enrolled in seminar each semester from the time the major is declared until graduation, beginning with 100A/B and continuing through 400A/B. Transfer students, or students joining the major from another department, should start with 100 A/B and then see the Dept. Undergraduate Advisor for future placement.

2. Complete one course from the following:

CE EN 421 : Structural Steel Design. (3:3:0)

WHEN TAUGHT: Winter; Spring Odd Yrs.

PREREQUISITE: CE EN 304 & CE EN 321

DESCRIPTION: Compression and tension of steel members, beams, and beam-columns. Elastic and inelastic lateral-torsional buckling. Structural fasteners. Emphasizes LFRD.

Course Outcomes
- 1(n) Students will understand the theory behind, and have a working familiarity of, the AISC specification.
- 2(c) Students will be able to design steel tension members.
- 3(c) Students will be able to design steel compression members.
- 4(n) Students will be able to design steel beams and composite beams.
- 5(n) Students will be able to design steel beam-columns.
- 6(n) Students will be able to design concentrically loaded bolted and welded connections.
- 7(l) Students will be able to explain some concepts in business management and public policy.

CE EN 424 : Reinforced Concrete Design. (3:3:0)

WHEN TAUGHT: Fall; Spring Even Yrs.

PREREQUISITE: CE EN 304 & CE EN 306 & CE EN 321

DESCRIPTION: Theory and design of reinforced concrete, including columns, beams, slabs, and footings; elastic and ultimate-strength methods of analysis.

Course Outcomes
- 424.1 (n) - Be able to design reinforced concrete beams subjected to transverse loading.
- 424.2 (n) - Be able to design reinforced concrete one way slabs subjected to transverse loading.
- 424.3 (n) - Be able to design reinforced concrete short columns subjected to axial and flexural loading.
- 424.4 (n) - Be able to design reinforced concrete spread square footings subjected to axial loadings.
- 424.5 (c) - Be able to design a simple reinforced concrete structural system.
- 424.6 (c) - Have a working familiarity with the ACI code.
- 424.7 (l) - Be able to communicate in a team environment.

3. Complete one course from the following:

CE EN 431 : Hydrology. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: CE EN 332

DESCRIPTION: Waters of the earth, their occurrence, circulation, and distribution. Relationships among precipitation, evaporation, infiltration, transpiration, groundwater, and stream runoff.

Course Outcomes
- 1(p). Understand and apply climatological principles relating to the hydrologic cycle and its occurrence and interaction with the biosphere of the earth.
- 2(p). Understand and solve problems for precipitation/runoff situations; including generation of the flow rates at desired points in a watershed.
- 3(c). Design and make calculations of flowrate hydrographs, reservoir storage, and water demand relationships in a stream.
- 4(p). Understand and be able to make calculations related to groundwater flow, well flow analysis and design, and drainage of saturated soils.
- 5(l). Design and apply statistical methods to generate hydrologic intensity and frequency distributions.

CE EN 433 : Hydraulic Engineering. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CE EN 332

DESCRIPTION: Application of fluid mechanics principles to analysis and design of hydraulic structures and systems.

Course Outcomes
- 1(p). Apply energy and momentum principles to fluid flow situations, and be able to solve problems for forces in static and moving fluids.
- 2(p). Apply standard energy approaches and formulas, and be able to solve for and design pressure pipe systems.
- 3(p). Apply standard aproaches and formulas, and be able to solve for and design open-channel flow systems.
- 4(l). Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for pressurizing situations.
- 5(c). Generate and apply the analytical and design approaches to common water facilities such as culverts, spillways, pipe networks, sewer systems, canals, and scour and sediment transport.

4. Complete one course from the following:

CE EN 471A : Civil Engineering Practice. (1:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: 12 credit hours from CE En 304, 306, 321, 332, 341, 351, 361; or concurrent enrollment.

DESCRIPTION: Cash-flow diagrams. Present worth and annual payments comparison of engineering alternatives. Sustainability of engineering projects in terms of environmental, social, and economic impact (triple-bottom-line). Teamwork and leadership development. Response to a request for proposal (RFP) to develop a culminating design project.

Course Outcomes

There are no course outcomes available

CE EN 471B : Civil Engineering Practice. (1:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: 12 credit hours from CE En 304, 306, 321, 332, 341, 351, 361; or concurrent enrollment.

DESCRIPTION: Cash-flow diagrams. Present worth and annual payments comparison of engineering alternatives. Sustainability of engineering projects in terms of environmental, social, and economic impact (triple-bottom-line). Teamwork and leadership development. Economic, political, and cultural impact of globalization on civil engineering in the USA and other countries. Research and triple-bottom-line evaluation of specific civil engineering projects throughout the world.

Course Outcomes

- 1(h) Perform a triple bottom line analysis of a civil engineering project by evaluating social, environmental, and economic impact.
- 2(i) Learn about an existing civil engineering project by gathering and organizing information from published literature and the internet.
- 3(j) Understand the changing roles of the USA and another country in the modern world in both contemporary society and civil engineering.
- 4(l) Explain the time value of money, construct cash-flow diagrams, and perform present worth or annual payments analysis of alternatives.

5. Complete one of the following options:

Either

MATH 302 : Mathematics for Engineering 1. (4:4:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Math 113.

DESCRIPTION: Multivariable calculus, linear algebra, and numerical methods.

Course Outcomes

- This course is designed to give students from the College of Engineering and Technology the mathematics background necessary to succeed in their chosen field. For more detailed information, please visit the department wiki for this course at Math 302 Wiki.

MATH 303 : Mathematics for Engineering 2. (4:4:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MATH 302

DESCRIPTION: ODEs, Laplace transforms, Fourier series, PDEs.

Course Outcomes

- This course is designed to give students from the College of Engineering and Technology the mathematics background necessary to succeed in their chosen field. For a more detailed course description, visit Math 303 Wiki.

Or

MATH 313 : Elementary Linear Algebra. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 112.

RECOMMENDED: Math 290.

DESCRIPTION: Linear systems, matrices, vectors and vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and eigenvectors.

Course Outcomes

- This course is aimed at majors in mathematics, the physical sciences, engineering, and other students interested in applications of mathematics to their disciplines. Linear algebra is used more than any other form of advanced mathematics in industry and science. A key idea is the mathematical modeling of a problem via systems of linear equations. For more detailed information visit the Math 313 Wiki page.

: Honors Elementary Linear Algebra. (3:3:1)

Course Outcomes

MATH 314 : Calculus of Several Variables. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 313.

DESCRIPTION: Partial differentiation, the Jacobian matrix, and integral theorems of vector calculus.

Course Outcomes

- This course is aimed at students majoring in mathematical and physical sciences, and engineering, and students minoring in mathematics or mathematical education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed manipulative skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus of several variables extends the concepts of limit, integral, and derivative from one dimension to higher dimensional settings and is therefore fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information visit the Math 314 Wiki page.

MATH 334 : Ordinary Differential Equations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 113 and Math 313.

DESCRIPTION: Methods and theory of ordinary differential equations.

Course Outcomes

There are no course outcomes available

6. Complete the following supporting courses:

CHEM 105 : General College Chemistry. (4:5:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 110 (or equivalent) or concurrent enrollment.

DESCRIPTION: Atomic and molecular structure including bonding and periodic properties of the elements; reaction energetics, electrochemistry, acids and bases, inorganic and organic chemistry.

NOTE: Primarily for students in engineering and biological sciences. Three lectures and two recitation sections per week.

Course Outcomes

- Students will demonstrate a familiarity with the basic vocabulary and concepts of chemistry.
- Students will demonstrate a qualitative and basic quantitative understanding of the fundamental chemical laws which govern the material substances in our universe and which express how one variable in nature depends on another.
- Students will demonstrate the ability to manipulate quantitative descriptors of natural phenomena expressed both in the form of equations and of proportionalities, and solve chemistry problems using these skills.
- A successful Chemistry 105 students describes chemical phenomenon by first focusing on properties of the elements at the atomic level. Chemistry 105 students will gain a knowledge base of reactivity patterns of elements and compounds.
- Chemistry 105 students will be able to use their chemistry experience, knowledge, and skills to better understand and work in their own field of study.

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.

- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

GEOL 330 : Geology for Engineers. (3:2:2)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Geological processes and materials bearing on engineering practices. Field trips.

Course Outcomes

- 1. Learn the basic mineral types, how they form, and how they differ structurally.2. Understand how minerals are put together to form rocks.3. Learn the names and how to recognize the basic sedimentary, igneous, and metamorphic rock types.4. Understand the structural and engineering aspects of these materials.
- 1. Understand the basic atmospheric and hydrologic systems and how they affect the Earth's rocks.2. Learn how man has influenced these systems and what the possible future outcomes of this influence might be.
- 1. Learn the basic workings of the Earth's tectonic system and the evidences that support the plate tectonic theory.2. Understand how to interpret geologic structures and rocks in terms of the tectonic system.3. Understand geological hazards and engineering concerns related to the operation of the tectonic system.
- 1. Understand the nature of fossil fuel resources, their origin, and the magnitude of reserves of coal, oil, natural gas, etc.2. Understand the nature of metallic resources, including their origin, distribution across the globe, and the magnitude of reserves.3. Appreciate the environmental consequences of fossil fuel and metallic resource extraction.4. Become aware of the major hazards posed by earthquakes, volcanic eruptions, and their attendant phenomena.5. Understand the fundamental processes that regulate the climate, as well as the role of human activity in climate change.

MATH 112 : Calculus 1. (4:5:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

MATH 113 : Calculus 2. (4:5:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 112.

DESCRIPTION: Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 2 develops techniques of integration, applications of integration, infinite sequences and series, parametric curves, polar coordinates, and conic sections. This course contributes to all the expected learning outcomes of the Mathematics BS. For a more detailed course description, visit the Math 113 Wiki page.

PHSCS 123 : Introduction to Waves, Optics, and Thermodynamics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Phscs 121 or equivalent. Calculus.

DESCRIPTION: Waves, thermal physics, optics, special relativity, and introduction to modern physics. Weekly lab.

Course Outcomes

- Solve problems and answer conceptual questions using the basics of fluid statics and dynamics, including Bernoulli's principle and Pascal's law.
- Answer conceptual questions and calculate changes in temperature, pressure, entropy and volume for quasistatic ideal gas processes and be able to determine work done and efficiency for gas engines, heat pumps, and refrigerators. Determine heat flow and temperatures in systems in steady state.
- Solve problems and answer conceptual questions involving waves, using concepts such as wave speed, wavelength, frequency, superposition, beats, and resonance. Solve wave interference problems.
- Find the location and magnification of images in single- and multiple-lens/mirror systems by calculation and by ray tracing, and be able to work general problems in optics using Snell's law and specular reflection.
- (Section 1) Solve problems and answer conceptual questions in basic modern physics including special relativity, and quantum mechanics and nuclear physics.
- (Section 2) Solve more advanced problems and answer conceptual questions in wave analysis, including calculating group and phases velocities, solving for Fourier coefficients of periodic functions, and frequencies of notes in the equal temperament musical scale. Solve problems in special relativity.

STAT 201 : Statistics for Engineers and Scientists. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 112; or MATH 119

DESCRIPTION: The scientific method; probability, random variables, common discrete and continuous random variables, central limit theorem; confidence intervals and hypothesis testing; completely randomized experiments; factorial experiments.

Course Outcomes

- Compute numerial and graphics summary statistics and explain the difference between populations given the summaries (numerical or graphical)
- Apply fundamentals of set theory and basic set operations to simple problems
- Distinguish between counting techniques (permutations, combinations) and compute the number of possible combinations for simple problems
- Solve simple problems using axioms of probability, conditional probability, independence, and Bayes' theorem
- Compute probabilities, expected values, and variances using the PDF of a discrete and a continuous univariate random variable
- Understand the definition of a sampling distribution, identify the mean, variance, and shape of the sampling distribution given the population information, and explain the application and importance of the Central Limit Theorem
- Understand the basics of experimental design, including the definition of the experimental unit, response, variable, factor(s), and level(s) of a basic experiment, and the role of randomization and replication to permit causal inference
- Compute the confidence interval for μ from a random sample and make the correct decision about an experiment when given a confidence interval
- Compute the test statistic and p-value for H0 : μ = μ0 from a random sample
- Make the correct decision when given the p-value for a hypothesis test and compute the ANOVA table for the data from a completely randomized design
- Compute pairwise confidence intervals on the difference in means (Fisher, Bonferroni) to understand a significant overall F-test from a completely randomized design
- Compute the ANOVA table for data from a two factor experiment
- Explain a statistically significant interaction
- Perform a two factor (or 2^3) experiment (in a group), compute the ANOVA table from the observed data, and write a technical report of the results of the experiment with appropriate graphics of significant effects or interactions

7. Complete 4 technical elective courses from the following (note: a course taken as a major requirement course may not double count as a technical elective course):

CE EN 414 : Engineering Applications of GIS. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Senior status.

DESCRIPTION: Introduction to GIS concepts. Data acquisition and GIS database formulation. Applications of GIS to civil engineering.

Course Outcomes

- Integrate topics from various civil engineering disciplines to solve realistic problems
- Obtain and evaluate appropriate input information from databases, handbooks, correlation, experiments and literature
- Know where to locate, and how to prepare geographic datasets for use in a GIS
- Use GIS tools for spatial analysis, understanding and design of engineering systems
- Produce professional maps and technical reports from geographic data for use in written and oral presentations
- Customize, or use customized scripts to solve engineering-specific problems with GIS
- Compose professional documents in a clear, concise, and effective manner

CE EN 421 : Structural Steel Design. (3:3:0)

WHEN TAUGHT: Winter; Spring Odd Yrs.

PREREQUISITE: CE EN 304 & CE EN 321

DESCRIPTION: Compression and tension of steel members, beams, and beam-columns. Elastic and inelastic lateral-torsional buckling. Structural fasteners. Emphasizes LFRD.

Course Outcomes

- 1(n) Students will understand the theory behind, and have a working familiarity of, the AISC specification.

- 2(c) Students will be able to design steel tension members.
- 3(c) Students will be able to design steel compression members.
- 4(n) Students will be able to design steel beams and composite beams.
- 5(n) Students will be able to design steel beam-columns.
- 6(n) Students will be able to design concentrically loaded bolted and welded connections.
- 7(l) Students will be able to explain some concepts in business management and public policy.

Or

CE EN 424 : Reinforced Concrete Design. (3:3:0)

WHEN TAUGHT: Fall; Spring Even Yrs.

PREREQUISITE: CE EN 304 & CE EN 306 & CE EN 321

DESCRIPTION: Theory and design of reinforced concrete, including columns, beams, slabs, and footings; elastic and ultimate-strength methods of analysis.

Course Outcomes
- 424.1 (n) - Be able to design reinforced concrete beams subjected to transverse loading.
- 424.2 (n) - Be able to design reinforced concrete one way slabs subjected to transverse loading.
- 424.3 (n) - Be able to design reinforced concrete short columns subjected to axial and flexural loading.
- 424.4 (n) - Be able to design reinforced concrete spread square footings subjected to axial loadings.
- 424.5 (c) - Be able to design a simple reinforced concrete structural system.
- 424.6 (c) - Have a working familiarity with the ACI code.
- 424.7 (l) - Be able to communicate in a team environment.

CE EN 427 : International Megastructures. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: CE EN 421 & CE EN 471B; or CE EN 424 & CE EN 471B; Instructor's consent.

DESCRIPTION: Skyscraper analysis and design. Introduction to analysis and design of suspension, cable-stayed, arch, and prestressed girder bridges. Economic, social, and environmental design criteria for megastructures. International experience to study megastructures in China or elsewhere. Interaction with professionals.

Course Outcomes
- 1(g) Identify and present innovative ideas in the design/construction/use of remarkable megastructures.
- 2(c) Design preliminary member sizes for a skyscraper and megabridges with realistic loads and constraints.
- 3(h) Propose and model a sustainable design for a tall building to be built at a particular site.
- 4(d) Participate on a student design team and interact with design professionals.
- 5(j) Experience the culture, land, and megastructures of China.

CE EN 431 : Hydrology. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: CE EN 332

DESCRIPTION: Waters of the earth, their occurrence, circulation, and distribution. Relationships among precipitation, evaporation, infiltration, transpiration, groundwater, and stream runoff.

Course Outcomes
- 1(p). Understand and apply climatological principles relating to the hydrologic cycle and its occurrence and interaction with the biosphere of the earth.
- 2(p). Understand and solve problems for precipitation/runoff situations; including generation of the flow rates at desired points in a watershed.
- 3(c). Design and make calculations of flowrate hydrographs, reservoir storage, and water demand relationships in a stream.
- 4(p). Understand and be able to make calculations related to groundwater flow, well flow analysis and design, and drainage of saturated soils.
- 5(l). Design and apply statistical methods to generate hydrologic intensity and frequency distributions.

Or

CE EN 433 : Hydraulic Engineering. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CE EN 332

DESCRIPTION: Application of fluid mechanics principles to analysis and design of hydraulic structures and systems.

Course Outcomes
- 1(p). Apply energy and momentum principles to fluid flow situations, and be able to solve problems for forces in static and moving fluids.
- 2(p). Apply standard energy approaches and formulas, and be able to solve for and design pressure pipe systems.
- 3(p). Apply standard aproaches and formulas, and be able to solve for and design open-channel flow systems.
- 4(l). Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for pressurizing situations.
- 5(c). Generate and apply the analytical and design approaches to common water facilities such as culverts, spillways, pipe networks, sewer systems, canals, and scour and sediment transport.

CE EN 439 : Latin America Study Abroad in Water Resources. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 431; or CE EN 433; CE En 471B or concurrent enrollment. Instructor's consent.

DESCRIPTION: BYU students team with engineers and engineering students from Latin American countries such as Mexico and the Dominican Republic to work on water resources projects of consequence. Collaboration with Latin American teams occurs electronically through the semester with 7-10 day culminating visit to the country assigned.

Course Outcomes
There are no course outcomes available

CE EN 461 : Geometric Design of Highways. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 113 & CE EN 361

DESCRIPTION: Designing visual aspects of highways: highway classification, design controls and criteria, design elements, vertical and horizontal alignment, cross section, intersections, interchanges, capacity analysis.

Course Outcomes
- 1 (o) An ability to apply to highway geometric design the knowledge that critical components of the traffic system – drivers, vehicles, roads and highways, physical environment, and traffic control devises – interact to form traffic streams.
- 2 (e) An ability to apply the concept of capacity and level of service to performance evaluation, design, and planning of freeways, two-lane two-way highways, urban streets, and intersections.
- 3 (k) An ability to reason and use mathematical models for highway capacity and level of service estimation included in the Highway Capacity Manual.
- 4 (k) An ability to use the Highway Capacity Software for performance evaluation, designing, and planning of freeways, two-lane two-way highways, urban streets, and intersections.
- 5 (k) An ability to apply the concepts behind highway geometric design to the highway geometric design of a location assigned for the term project.
- 6 (k) An ability to use proper tables and figures in A Policy on Geometric Design of Highways and Streets in Geometric Design of Highways and Streets to assignment problems, exams, and a term project design.
- 7 (k) An ability to use Autodesk Civil 3D to design a highway and an intersection for the location assigned in the term project, including importing digital design data, triangulating the terrain data, creating profile, designing vertical and horizontal alignments, preparing a cross section assembly, and creating a corridor and an intersection.
- 8 (g) An ability to prepare a technical report summarizing the tasks that the team members have done in the design of a highway and an intersection assigned for the term project.
- 9 (g) An ability to prepare a presentation file summarizing the tasks the team members have done in the design a highway and an intersection assigned for the term project AND present it as a team.
- 10 (o) An ability to use professionally terms pertaining to highway geometric design in assignments, exams, and a term project.

CE EN 472 : Civil Engineering Design. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 471A

DESCRIPTION: Civil engineering culminating design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints.

Course Outcomes
- 1(c). Understand and apply conception, formulation, analysis and search for solutions to civil engineering design problems. Be able to integrate topics from various civil engineering disciplines to solve problems with multiple realistic constraints.
- 2(d). Be able to communicate in a team environment. Be able work effectively in groups through presentations and written documents.
- 3(g). Understand basic principles of personal communication including conversational and interviewing skills. Be able to compose effective professional documents and make well-organized oral presentations.
- 4(h). Understand how civil engineering problems may be affected by cultural, societal, political and environmental concerns. Understand basic concepts of engineering economic analyses.

CE EN 500 : (CE En-Me En) Design and Materials Applications. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Me En 372 or CE En 321 or equivalent.

DESCRIPTION: Applied and residual stress; materials selection; static, impact, and fatigue strength; fatigue damage; surface treatments; elastic deflection and stability--all as applied to mechanical design.

Course Outcomes
- Understand how materials selection in design can be based on a variety of materials properties.
- Understand effects of materials structure and properties on design and choices for static, impact, fatigue, elastic, and anelastic behavior.
- Be familiar with important techniques used to modify enfineering properties of a boad range of materials, such as metals, polymers, ceramics, composites, and biomaterials.
- Understand the necessary analysis to design for various material failure mechanisms.

CE EN 501 : (CEEn-MeEn) Stress Analysis and Design of Mechanical Structures. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Stress analysis and deflection of structures; general bending and torsion with computer applications to mechanical and aerospace structure design.

Course Outcomes
- Calculate the deflection of and stress in multi-material beams under force, moment, or temperature loads.
- Understand the principles of stress and strain, including principle stress and strain, in general three-dimensional structures.
- Calculate the deflections and stress in torsion bars of arbirary cross section.
- Calculate the deflections and stress in beams in unsymmetric bending.

CE EN 503 : (CE En-Me En) Plasticity and Fracture. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 203 & ME EN 250 & MATH 303; Senior standing or instructor's consent.

DESCRIPTION: Tensor algebra; stress and deformation tensors; relationships between dislocation slip, yielding, plastic constitutive behavior, and microstructure development; cracks and linear elastic fracture mechanics.

Course Outcomes
- Identify and describe the influence of crystal structure and material defects on tensile and fracture properties.
- Describe the effects of a stress concentration as well as its influence on the fracture and fatigue life of a structural member.
- Describe the principles of the Griffith Crack Criteria and its application to brittle materials, and its extension to ductile materials.
- Describe the Failure Design Philosophy and apply it to materials selection in an engineering application.
- Predict the life of a structural member of known material properties given the loading conditions and a known flaw size.
- Describe the impact of various microstructure features on tensile, fracture and fatigue properties.
- Select an appropriate material class given functional requirements, fatigue and fracture.

CE EN 504 : (CE En-Me En) Computer Structural Analysis and Optimization. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Linear algebra; CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Matrix stiffness method for 1D, 2D, and 3D skeletal structure classes. Implementing the matrix stiffness method as a computer program. Nonlinear second-order structural analysis. Structural optimization techniques including stress-ratio method, gradient-based methods, and genetic algorithms.

Course Outcomes
- 1) Construct global and local member stiffness matrices and force vectors for any skeletal class and any distributed loading.
- 2) Construct structure matrices and vectors for both force and support displacement loads exploiting symmetry/antisymmetry and deformation assumptions.
- 3) Construct member displacement vectors and free-body diagrams for any skeletal class.
- 4) Write down the basic organization and calling structure of a structural analysis program, and complete the pseudo-code for structure level routines.
- 5) Derive first/second order equilibrium/compatibility equations, buckling loads/displacements, and structure elastic/geometric stiffness matrices for small trusses and single-member frames.
- 6) Determine the number of FLOPS and perform the calculations for matrix-vector operations including triangularization, backsubstitution, Newton-Raphson iteration, and inverse iteration.
- 7) Determine the number of FLOPS and perform the calculations for stress ratio optimization and exhaustive search, and construct design space plots if possible.
- 8) Determine the number of FLOPS and perform the calculations for finite difference / virtual work sensitivity analysis, Kuhn-Tucker condition evaluation, and optimality criteria algorithm.
- 9) Determine the number of FLOPS and perform the calculations for genetic algorithms with penalty/segregation fitness, tournament/roulette selection, point/uniform/blend crossover, dynamic mutation, and ranking/scoring/maximin fitness.
- 10) Prepare input for linear analysis, nonlinear pushover analysis, gradient-based size optimization, and genetic-based size/shape/topology optimization programs for plane frames.

CE EN 505 : Portland Cement Concrete Mixture Design and Analysis. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 306 or equivalent.

DESCRIPTION: Properties and testing of freshly mixed and hardened concrete and constituent materials; concrete mixture design and analysis; concrete construction practices; laboratory experimentation.

Course Outcomes
- Characterize properties of concrete materials.
- Design concrete mixtures.
- Measure properties of fresh concrete.
- Measure properties of hardened concrete.
- Understand proper concrete construction practices.
- Understand mechanisms of concrete deterioration.

CE EN 506 : (CE En-Me En) Continuum Mechanics and Finite Elements. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Equilibrium, constitutive, and compatibility equations; closed-form solutions from elasticity; finite element theory, programming, and usage; membrane, axisymmetric, and solid elements.

Application to heat transfer, fluid mechanics, and seepage.

Course Outcomes

- 1) Derive mass/momentum/energy equilibrium equations and constitutive equations for isotropic Hookean solids and Newtonian fluids, and specialize them to get Navier/Stokes/Laplace equations.
- 2) Calculate stress traction, normal/shear stresses, principal stresses, and stress failure criteria for a given state of stress, and calculate displacements and strains for a given state of deformation.
- 3) Transform equations between expanded, matrix, and indicial notation, and between rectangular and cylindrical coordinates.
- 4) Degenerate 3D elasticity equations for 2D problem classes and Saint-Venant torsion using appropriate assumptions, and derive biharmonic or Laplace equations.
- 5) State the problem class, boundary conditions, and method of solution for classical elasticity problems and seismic wave problems.
- 6) Calculate displacements and stresses from given elasticity closed-form solutions including general solution to I-sections under torsion with or without warping restraint.
- 7) Construct the weighted integral to obtain formulas for element stiffness matrix and force vector given the governing differential equations of a problem class.
- 8) Calculate the system stiffness matrix, force vector, and displacement vector for a particular problem, and calculate element results.
- 9) Construct Lagrange/serendipity/triangle shape functions in terms of natural coordinates, and use isoparametric transformations and Gaussian quadrature to evaluate element stiffness.
- 10) Execute a finite element program and assess results on a patch test and on problems with known closed form solutions.

CE EN 508 : (CE En-Me En) Structural Vibrations. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Dynamic analysis of single degree-of-freedom, discrete multi-degree-of-freedom, and continuous systems. Applications include aerospace, civil structures, and mechanical components.

Course Outcomes

- 1. Students will be able to determine the response of single-degree-of-freedom (SDOF) systems in free and forced vibration, with and without damping.
- 2. Students will be able to determine the response of multi-degree-of-freedom and continuous systems in free and forced vibration, with and without damping.
- 3. Students will be able to apply the theory of structural vibrations to problems in Civil or Mechanical Engineering.

CE EN 521 : Seismic-Resistant Steel Buildings. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 421 or equivalent.

DESCRIPTION: Background and development of UBC seismic provisions; design of ductile braced frames and steel moment resisting frames; design of diaphragms and collectors.

Course Outcomes

- 1. Students will understand lateral load paths in buildings and be able to compute forces in diaphragms, collectors, and frames.
- 2. Students will understand the theory behind modern seismic provisions for buildings.
- 3. Students will be able to appropriately size and detail members in special moment resisting frames (SMRFs), special concentrically braced frames (SCBFs), and buckling-restrained braced frames (BRBFs).
- 4. Students will know how to use modern analysis tools to analyze buildings under earthquake loading.

CE EN 523 : (CE En-Me En) Aircraft Structures. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 304 or Me En 250 or equivalent. CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Requirements, objectives, loads, materials, and tools for design of airframe structures; static behavior of thin-wall structures; durability and damage tolerance; certification and testing. Airframe component team design project.

Course Outcomes

- Students will understand and be able to apply industry philosophies and critical criteria that drive the design and govern the certification of aircraft structures.
- Students will be able to analyze the in-plane (compression, shear, stability) and out-of-plane (bending, torsion, transverse shear) behavior (stresses, deflections, margins of safety) of structural elements (beams, columns, thin plates, open and closed sections, etc.) prevalent in aircraft.
- Students will understand important issues required for certification of aircraft structures (regulations, loads, fatigue, damage tolerance).

CE EN 525 : Bridge Structures. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE EN 421 & CE EN 424; or equivalent.

DESCRIPTION: Design of composite, continuous beam, and girder bridges, including piers, abutments, floor systems, and bearings; field trips to observe bridge construction and fabrication.

Course Outcomes

- Explain the world's history of bridges.
- Explain the USA's surface transportation law.
- Explain the USA's Code of Federal Regulations applicability to bridges.
- Explain the USA's bridge design philosophy.

Explain the USA's bridge design specifications.
- Explain the loads that a bridge sustains and how they are distributed.
- Explain the elements of a bridge and how they are constructed.
- Explain current innovation in bridge design and construction.
- Read and understand bridge project contract documents including plans, specifications, and estimates.
- Design a bridge's structure type, width, span, and vertical clearance.
- Design a bridge's reinforced concrete deck.
- Design a bridge's prestressed conrete girders.
- Design a bridge's welded-steel plate girders.

CE EN 528 : Masonry Design. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: CE En 424 or equivalent.

DESCRIPTION: Introduction to analysis, design, and construction of masonry structures. Compressive, tensile, flexural, and shear behavior of masonry structural components.

Course Outcomes
- Be able to design masonry beams subjected to transverse loading
- Be able to design masonry columns, piers, and walls for axial and flexural loading
- Be able to specify anchorage requirements and design bolt connections
- Have a working familiarity with the building code requirements and specifications for masonry structures

CE EN 529 : Timber Design. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: CE EN 304 & CE EN 321 & CE EN 421; or equivalents.

DESCRIPTION: Timber species, composition, and grades; design of beams, straight and tapered glue-lam girders, columns, connections, trusses, shear walls, and structural systems.

Course Outcomes
- Be able to design timber beams subjected to transverse loading
- Be able to design timber tension and compression members subjected to axial and flexural loading
- Be able to design vertical and horizontal diaphragms subjected to in plane and out of plane loading
- Be able to design simple connections with nails, staples, bolts, and lag screws
- Have a working familiarity with the National Design Specification for Wood Construction

CE EN 531 : Principles of Hydrologic Modeling (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 431 or equivalent.

DESCRIPTION: Advanced hydrologic and hydraulic principles with an emphasis on modeling for the purpose of planning and designing draining, flood control, and other water resource facilities.

Course Outcomes
- Apply fundamental principles of hydrology in hydrologic and hydraulic models
- Know how to apply different hydrologic modeling formulation to solve design and analysis problems
- Know where to find digital and other data resources required for hydrologic model development
- Understand the limitations and uses of traditional lumped parameter models as well as more advanced physics based models
- Interpret and describe hydrologic modeling results in written reports
- Work together with teammates to develop hydrologic models
- Learn modern engineering software tools like the Watershed Modeling System (WMS) that process digital data and prepare model inputs

CE EN 535 : Hydraulic Design of Channels and Control Structures. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 433 or equivalent.

DESCRIPTION: Design of water conveyance channels and control structures, including siphons, chutes, weirs, flumes, dams, spillways, and outlet works.

Course Outcomes
- Students will be able to solve problems requiring fundamental and more advanced mathematical theories.
- Students will be able to design basic hydraulic structures including cost estimates and environmental impacts.
- Students will prepare professional-level quality reports.

CE EN 540 : Geo-Environmental Engineering. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.; Winter Even Yrs.

PREREQUISITE: CE En 341 and 351; or equivalents. CE En 471A or 471 B or concurrent enrollment or instructor's consent.

DESCRIPTION: Hazardous waste statutes and regulations; introduction to hazardous waste treatment, storage, disposal, and monitoring techniques. Geotechnical aspects of environmental engineering. Topics include municipal and hazardous solid waste landfill design and characterization and remediation techniques for contaminated soil and groundwater.

Course Outcomes
- Be able to produce a preliminary design of a landfill. This inlcudes understanding regulations, chemical fate and transport, geotechnical design methods, and project planning issues.

- Be able to communicate the design and design decisions to a non-specialist but technical audiance. This will include communicating the reasons for basic assumptions and why they were made.

CE EN 542 : Foundation Engineering. (3:3:0)

WHEN TAUGHT: Winter; Spring Even Yrs.

PREREQUISITE: CE En 341 or equivalent.

DESCRIPTION: Soil investigation, bearing capacity and settlement, design of spread footings, combined footings, mat foundations, pile foundations, and drilled shafts.

Course Outcomes

- 1. Estimate the settlement within a compressible soil layer due to applied loads from fill, embankent and buildings
- 2. Estimate the time-settlement relationships for soils due to applied loads. Use design approaches for accelerating consolidation rate (e.g. wick drains and surcharging)
- 3. Determine the allowable soil bearing pressure for spread footings on saturated clays and sand giving consideration to shear failure and settlement
- 4. Design square and rectangular reinforced concrete footings
- 5. Design combined reinforced concrete foundatiosn using both conventional approaches and elastic methods (beam on an elastic foundation).
- 6. Design reinforced concrete mat foundations using both the conventional method and elastic methods (e.g. finite element models)
- 7. Estimate the single pile capacity and group pile capacity for piles in sand and clay
- 8. Estimate the settlement of a pile group in saturated clay
- 9. Compute the capacity of drilled shafts in clay and sand. Understand critical components of construction that influence capacity.
- 10. Characterize a subsurface profile using insitu techniques and determine the most suitable foundation type to support a given structure.

CE EN 544 : Seepage and Slope Stability Analysis. (3:3:0)

PREREQUISITE: CE En 341 or equivalent.

DESCRIPTION: Seepage and slope stability analysis of earth dams, levees, excavations, embankments, and natural slopes; construction dewatering, numerical methods, shear strength of soils, limit equilibrium method.

Course Outcomes

- Be able to apply Darcy's law to solve basic problems related to flow through porous media.
- Understand the governing equations for 2D and 3D groundwater flow, including what simplifying assumptions are used in the derivation of the equations.
- Be able to create and interpret graphical solutions (flow nets) to the governing equations.
- Be able to apply analytical solutions to the governing equations, including well equations.
- Be able to apply analytical solutions to construction dewatering problems.
- Understand the finite difference solution and be able to create finite difference solutions in Excel.
- Understand how the finite element method works and how the finite element equations are formulated.
- Be able to apply finite element software to solve complex seepage analysis problems.
- Understand the basic concepts of the limit equilibrium method of slope stability.
- Be able to apply slope stability charts for simple problems.
- Be able to apply slope stability software (such as UTEXAS) for common slope stablility problems.
- Be able to solve special cases of slope stability including, reinforced slopes, rapid drawdown, and seismic conditions.

CE EN 545 : Geotechnical Analysis of Earthquake Phenomena. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 321, 341; or equivalents.

DESCRIPTION: Earthquake magnitude and intensity; design ground motions, elementary dynamics of structures; response spectra; building code provisions; liquefaction and ground failure.

Course Outcomes

- 1. Understand the origin of earthquakes and the nature of seismic waves; characterize faults and seismic sources; quantify the "size" of an earthquake in terms of magnitude and intensity; quantify earthquake ground motions in terms of engineering parameters.
- 2. Use attenuation relationships to predict ground motions; perform deterministic and probabilistic seismic hazard analyses
- 3. Determine the dynamic response of single-degree-of-freedom structures subject to base shaking; understand, develop and apply response spectra
- 4. Perform site response analyses; understand the effect of different soil types on ground response and damping
- 5. Understand the philosophy and general seismic design provisions found in design codes developed/distributed as part of the National Earthquake Hazard Reduction Program (NEHRP) and the International Building Code (IBC)
- 6. Understand the mechanism associated with liquefaction and ground failure; perform liquefaction triggering, lateral spread, and settlement analyses.
- 7. Evaluate seismic slope stability and deformation; estimate seismic earth pressures

CE EN 547 : Groundwater Modeling. (3:3:0)

PREREQUISITE: CEEn 341 or equivalent.

DESCRIPTION: Computer simulation of groundwater flow systems; modeling theory, numerical methods, data management, boundary conditions, calibration, and stochastic analysis.

Course Outcomes

- Be able to apply Darcy's law to solve basic problems related to flow through porous media.
- Understand the governing equations for 2D and 3D groundwater flow, including what simplifying assumptions are used in the derivation of the equations.

- Be able to develop conceptual models of groundwater flow systems, including properly formulated boundary conditions.
- Understand the basic structure and organization of the MODFLOW model.
- Be able to select the appropriate MODFLOW packages for a particular problem and develop the package input.
- Understand issues related to MODFLOW solvers and be able to solve common instability issues.
- Be able to apply GIS data to develop regional groundwater simulations with MODFLOW.
- Be able to calibrate groundwater models using both manual approaches and automated tools such as the PEST code.
- Be able to analyze flow directions using particle tracking.
- Be able to perform stochastic simulations and analyze uncertainty.
- Be able to perform transient simulations.
- Be able to do basic groundwater analysis tasks in ArcGIS.

CE EN 551 : Water Treatment Facilities Design. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 351 or equivalent.

DESCRIPTION: Evaluation, selection, and design of water treatment facilities.

Course Outcomes

- Understand the concepts and theories governing water treatment unit operation and process design and operation
- Design water treatment unit operations and processes
- Setup, perform, and evaluate experiments necessary to design water treatment processes
- Communicate effectively through the preparation of reports and technical papers.
- Read and understand water treatment related technical literature

CE EN 555 : Environmental Chemistry. (3:2:4)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 351 or equivalent.

DESCRIPTION: Chemical theory and calculation supporting analysis of major organic and inorganic constituents in environmental engineering, focusing on theoretical understanding of the chemical processes.

Course Outcomes

- Understand and solve basic physical chemistry problems involving ReDox, Gas Law, and actvity.
- Be able to setup and solve the mathmatical formulations of equilibrium concepts for dilute aquatic systems
- Understand the basic concepts and be able to setup problems to use standard chemical speciation programs for dilute aquatic solutions.
- Be exposed to and experiance field sampling and analysis methods. Be able to communicate the results and analysis.

CE EN 562 : Traffic Engineering: Characteristics and Operations. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 361 or equivalent.

DESCRIPTION: Traffic stream characteristics, traffic flow theory, traffic control devices, capacity and level of service, warrants, signal timing and optimization, signal coordination.

Course Outcomes

- 1 (o) An understanding of types of traffic control devices and their meanings and the importance of communication between traffic engineer and driver.
- 2 (o) An understanding three fundamental traffic flow characteristics (speed, density and flow rate) and the relationships among them.
- 3 (b) An ability to conduct descriptive statistics on traffic flow characteristics data and to conduct a means test on two samples or conduct a chi-square test to evaluate a hypothesis on an underlying distribution.
- 4 (o) An ability to measure in the field, or at a remote station, and reduce raw traffic flow characteristics data for subsequent statistical analyses or modeling.
- 5 (b) An ability to conduct different types of volume studies and analyze their characteristics such as peaking and seasonal changes and an ability to estimate demand for and capacity of the facility under study.
- 6 (b) An understanding of the difference between space mean speed and time mean speed and ability to conduct speed, travel time, and signalized intersection delay studies study.
- 7 (o) An understanding of the importance of safety on highways and of the way highway crash data are collected and stored for statistical analyses and an ability to analyze crash data to identify statistically “hot spots” that require further evaluations and to conduct statistical analyses to evaluate the effectiveness of crash countermeasures on reduction of crashes.
- 8 (c) An understanding of basic concepts of capacity and level of service used for analyzing the performance of uninterrupted flow highway facilities.
- 9 (c) An ability to conduct capacity and level of service analysis for basic freeway and multilane highways, both manually and using the Highway Capacity Software and to evaluate the performance of such segments and determine possible improvements required for maintaining or improving the conditions of such segments.
- 10 (c) An understanding of the concepts of capacity and level of service for complex ramp area traffic flow and an ability to conduct capacity and level of service analysis for such facilities both manually and using the Highway Capacity Software.
- 11 (o) An understanding of the functions of signing and marking and their use on freeways and rural highways.
- 12 (c) An understanding of the hierarchy of intersection control (Basic rules of the road, Yield and stop control, and Signals) and an ability to perform a signal warrant analysis using the method found in the MUTCD.
- 13 (c) An understanding of basic principles of intersection signalization including: Discharge headways, saturation flow rates, and lost times; Allocation of time and the critical-lane concept; The concept of left-turn equivalency; and Delay as a measure of service quality, and an ability to determine these

values given data of prevailing conditions.
- 14 (c) An understanding of the key steps involved in signal design and timing including: Development of a safe and effective phase plan and sequence; Determination of vehicular signal needs; and Determination of pedestrian signal needs, and an ability to going through these steps to design and timing of pretimed signals.
- 15 (c) An understanding of the fundamental concept of actuated signals and the mechanism of changing green time allocation to all approaches depending on approach traffic demand and an ability to design phase sequences and timing signal indications manually and using signal timing software programs.
- 16 (c) An understanding of the concept of analyzing capacity and level of service using the models presented in the Highway Capacity Manual 2010 and an ability to carry out the computations presented in the HCM manually and using the Highway Capacity Software 2010.
- 17 (h) An understanding of the concept of coordinating multiple signals on arterials and in a network by manipulating offsets of signals and an ability to determine optimal offsets, optimal phase sequence, and optimal green time allocation and an ability to coordinate multiple signals on arterials manually (simples systems) and using a signal optimization software program.
- 18 (g) An ability to express technical ideas in a written format and an ability to compose professional documents in a clear, concise, and effective manner

CE EN 563 : Pavement Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 306 and 341 and 361; or equivalents. CE En 471A or 471B or concurrent enrollment.

DESCRIPTION: Design, construction, evaluation, maintenance, and rehabilitation of flexible and rigid pavements; influence of traffic and environmental factors; mechanistic analysis of pavement structures using computer software.

Course Outcomes
- Understand concepts of pavement performance
- Characterize traffic loads for pavement design and analysis
- Characterize strength and durability of pavement materials
- Understand and account for climatic factors in pavement design and analysis
- Understand pavement construction procedures
- Design flexible and rigid pavements using standard methods
- Understand mechanisms of pavement deterioration and identify distress types
- Provide pavement condition assessments
- Recommend pavement preservation techniques
- Conduct mechanistic analyses of pavement structures using computer software

CE EN 565 : Urban Transportation Planning. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CEEn 361 or instructor's consent.

DESCRIPTION: Urban transportation planning and decision making, intermodal transportation, land-use transportation interrelationships, transportation demand modeling, site impact analysis, sustainable transportation; livable cities.

Course Outcomes
- Learn and understand the four steps of urban transportation demand forecasting including: 1) trip generation, 2) trip distribution, 3) mode choice, and 4) trip assignment.
- Be able to identify and understand the difference between “urban transportation planning” and “site planning.”
- Be familiar with travel demand management (TDM) measures.
- Read Transportation for Livable Cities and become familiar with issues affecting the direction of our transportation facilities.
- Learn how to communicate transportation planning ideas effectively and write a technical paper on a transportation planning topic.
- Become familiar with the demand forecasting process using QRSII and GNE software.

CE EN 570 : (CE En-Me En) Computer-Aided Engineering Software Development. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Me En 373 or C programming.

DESCRIPTION: Programming methods for the development of engineering software. Data structures, architecture, libraries, and graphical user interfaces, with applications to CAD systems.

Course Outcomes
- Ability to develop complex algorithms.
- Ability to convert algorithms into a commonly used computer language.
- Ability to create interactive scientific visualizations of complex data.
- Ability to create graphical user interfaces that facilitate ease of use.

CE EN 572 : (CE En-Me En) Computer-Aided Geometric Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Proficiency in C programming.

DESCRIPTION: Mathematical theory of free-form curves and surfaces and solid geometric modeling. Bezier and B-spline curve and surface theory, parametric and implicit forms, intersection algorithms, topics in computer algebra, and free-form deformation. Several programming projects.

Course Outcomes
- Understand the theory, properties, and algorithms for Bezier curves: de Casteljau algorithm, degree elevation, hodographs, curve intersection algorithms, convex hull property, variationa diminishing property, rational Bezier curves, explicit Bezier curves.
- Understand polar form, the de Boor algorithm, the Boehm algorithm, knot intervals.

- Understand tensor product Bezier and B-Spline surfaces, including the de Casteljau algorithm, partial derivatives, parametric continuity, tesselation.

CE EN 575 : (CE En-Me En) Optimization Techniques in Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 302; C, C++, or similar computer language.

DESCRIPTION: Application of computer optimization techniques to constrained engineering design. Theory and application of unconstrained and constrained nonlinear algorithms. Genetic algorithms. Robust design methods.

Course Outcomes

- Define and use optimization terminology and concepts, including concepts of analysis space and design space.
- Apply optimization methods to engineering problems, including developing a model, defining an optimization problem, applying optimization methods, exploring the solution and interpreting results.
- Understand and apply unconstrained optimization theory for continuous problems, including the necessary and sufficient conditions and steepest descent, Newton's method, conjugate gradient and quasi-Newton methods. Understand basic theorems of quasi-Newton methods.
- Understand and apply discrete optimization algorithms, including branch and bound, exhaustive search and simulated annealing.
- Develop and apply Genetic algorithms.
- Understand and apply constrained optimization theory for continuous problems, including the Kuhn-Tucker conditions and generalized reduced gradient and sequential quadratic programming methods.
- Apply optimization techniques to determine a robust design.
- Have some familiarity with optimization software.

CE EN 594R : Selected Problems in Civil and Environmental Engineering. (1-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

Course Outcomes

There are no course outcomes available

Note: At least 1 of the 4 technical elective courses must be a culminating design experience:

CE EN 427 : International Megastructures. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: CE EN 421 & CE EN 471B; or CE EN 424 & CE EN 471B; Instructor's consent.

DESCRIPTION: Skyscraper analysis and design. Introduction to analysis and design of suspension, cable-stayed, arch, and prestressed girder bridges. Economic, social, and environmental design criteria for megastructures. International experience to study megastructures in China or elsewhere. Interaction with professionals.

Course Outcomes

- 1(g) Identify and present innovative ideas in the design/construction/use of remarkable megastructures.
- 2(c) Design preliminary member sizes for a skyscraper and megabridges with realistic loads and constraints.
- 3(h) Propose and model a sustainable design for a tall building to be built at a particular site.
- 4(d) Participate on a student design team and interact with design professionals.
- 5(j) Experience the culture, land, and megastructures of China.

CE EN 439 : Latin America Study Abroad in Water Resources. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 431; or CE EN 433; CE En 471B or concurrent enrollment. Instructor's consent.

DESCRIPTION: BYU students team with engineers and engineering students from Latin American countries such as Mexico and the Dominican Republic to work on water resources projects of consequence. Collaboration with Latin American teams occurs electronically through the semester with 7-10 day culminating visit to the country assigned.

Course Outcomes

There are no course outcomes available

CE EN 472 : Civil Engineering Design. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 471A

DESCRIPTION: Civil engineering culminating design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints.

Course Outcomes

- 1(c). Understand and apply conception, formulation, analysis and search for solutions to civil engineering design problems. Be able to integrate topics from various civil engineering disciplines to solve problems with multiple realistic constraints.
- 2(d). Be able to communicate in a team environment. Be able work effectively in groups through presentations and written documents.
- 3(g). Understand basic principles of personal communication including conversational and interviewing skills. Be able to compose effective professional documents and make well-

organized oral presentations.
- 4(h). Understand how civil engineering problems may be affected by cultural, societal, political and environmental concerns. Understand basic concepts of engineering economic analyses.

CE EN 540 : Geo-Environmental Engineering. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.; Winter Even Yrs.

PREREQUISITE: CE En 341 and 351; or equivalents. CE En 471A or 471 B or concurrent enrollment or instructor's consent.

DESCRIPTION: Hazardous waste statutes and regulations; introduction to hazardous waste treatment, storage, disposal, and monitoring techniques. Geotechnical aspects of environmental engineering. Topics include municipal and hazardous solid waste landfill design and characterization and remediation techniques for contaminated soil and groundwater.

Course Outcomes
- Be able to produce a preliminary design of a landfill. This inlcudes understanding regulations, chemical fate and transport, geotechnical design methods, and project planning issues.
- Be able to communicate the design and design decisions to a non-specialist but technical audiance. This will include communicating the reasons for basic assumptions and why they were made.

CE EN 563 : Pavement Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 306 and 341 and 361; or equivalents. CE En 471A or 471B or concurrent enrollment.

DESCRIPTION: Design, construction, evaluation, maintenance, and rehabilitation of flexible and rigid pavements; influence of traffic and environmental factors; mechanistic analysis of pavement structures using computer software.

Course Outcomes
- Understand concepts of pavement performance
- Characterize traffic loads for pavement design and analysis
- Characterize strength and durability of pavement materials
- Understand and account for climatic factors in pavement design and analysis
- Understand pavement construction procedures
- Design flexible and rigid pavements using standard methods
- Understand mechanisms of pavement deterioration and identify distress types
- Provide pavement condition assessments
- Recommend pavement preservation techniques
- Conduct mechanistic analyses of pavement structures using computer software

Note: 1 of the 4 technical elective courses may come from:

ENG T 497R : Global Engineering Outreach Projects. (.5-3:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Engineering or technology major enrolled in upper-division major courses; instructor's consent.

DESCRIPTION: Humanitarian-based engineering and technology project development involving multi-disciplinary teams.

Course Outcomes
- Gain experience in the design process that includes innovative problem solving skills applied to the design and implementation of global projects in developing regions of the world in the context of real needs, constraints, and opportunities.
- Demonstrate an appreciation for global aspects of engineering, including social and technical constraints related to design and the importance of sustainability.
- Demonstrate effective teamwork and leadership skills and an appreciation for other disciplines both within and outside of engineering as they work together on interdisciplinary teams.
- Demonstrate effective oral and written communication skills in the reporting of work, particularly to entities or individuals in countries in which projects are implemented.
- Gain experience in how to be involved in social innovation as they progress through their careers.

ME EN 321 : Thermodynamics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 113; Concurrent enrollment in Math 303 or 334.

DESCRIPTION: Fundamentals of thermal energy and work; principle of state, conservation of mass, conservation of energy, increase of entropy principle; application to thermal and mechanical processes.

Course Outcomes
- 1. Engineering Math – Each student can apply the mathematical principles required to develop and solve mathematical models – consisting of both algebraic and differential equations – that are based on the energy and entropy equations and to evaluate the properties used in these equations.
- 2. Thermodynamic Systems – Each student can select an appropriate system (control mass or control volume) and identify the heat, work and mass flow interactions occurring between the system and its surroundings in order to build thermodynamic models and analyze thermodynamic systems and processes.
- 3. Thermodynamic Properties and State – Each student can use thermodynamic properties and the state postulate in order to fix the state of a thermodynamic system. Each student can

distinguish between point functions (thermodynamic properties) and path functions (heat, work and entropy generation) in order to describe thermodynamic processes. Each student can use phase diagrams in order to illustrate isobaric, isometric, isothermal, isentropic, isenthalpic or other thermodynamic processes.

- 4. Obtaining Thermodynamic Property Values – Each student can properly characterize a thermodynamic system as either an ideal gas, an incompressible substance or a saturated liquid-vapor mixture in order to identify appropriate property relationships. Each student can use equations of state, charts or tables in order to obtain values of thermodynamic properties.
- 5. Conservation of Mass and Energy – Each student can implement the principle of conservation of mass and conservation of energy in order to build models of open and closed thermodynamic systems undergoing transient and steady processes.
- 6. Principle of Increasing Entropy - Each student can identify irreversibilities in order to determine whether a process may be approximated as reversible. Each student understands the increase of entropy principle, and can use the entropy equation in order to model open and closed systems undergoing transient and steady processes.
- 7. Classical Analysis of Engineering Devices and Processes – Each student can describe the hardware, the operation, the purpose, and the approximations typically used to build thermodynamic models of common engineering devices and processes. Examples of common engineering devices are turbines, compressors, pumps, nozzles, diffusers, valves and heat exchangers. Examples of common processes are restrained compression, restrained expansion, and the charging and discharging of a tank.
- 8. Each student can list the processes and devices that comprise the ideal Otto, Diesel and Brayton gas power cycles and the ideal Rankine steam power cycle. Each student can build thermodynamic models in order to analyze and evaluate these cycles and to draw conclusions regarding the performance of these cycles.
- 9. Each student can list the processes that comprise the ideal refrigeration cycles and can build thermodynamic models of these cycles in order to analyze, evaluate and draw conclusions regarding their performance.

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

CE EN 100A : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Activities of civil engineering; principles and methods involved in solving civil engineering problems.

NOTE: College Lecture attendance required.

Course Outcomes

- 1(i) Begin to understand the process required to become a professional engineer
- 2(i) Begin to understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- Begin to learn how to work in teams on civil engineering related projects that benefit the community.
- 4(f) Begin to understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 100B : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Winter

DESCRIPTION: Activities of civil engineering; principles and methods involved in solving civil engineering problems.

NOTE: College Lecture attendance required.

Course Outcomes

- 5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers
- 2(i) Begin to understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Begin to learn how to work in teams in civil engineering related projects that benefit the community
- 4(f) Begin to understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 101 : Introduction to Civil and Environmental Engineering. (1:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to what civil and environmental engineering is all about. Careers in the profession. Courses and curriculum of the major. Freshman projects and teamwork.

Course Outcomes

- 1(d) Participate on a student team to complete assigned tasks.
- 2(i) Discover and digest information from the internet, the literature, and interviews about assigned civil engineering subjects.

CE EN 103 : Engineering Mechanics--Statics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Math 112; or 111 and 119; or concurrent enrollment.

DESCRIPTION: Concepts of mechanics: force systems in equilibrium, resultants, friction, centroids, utilization of vector algebra, simple trusses, shear and bending moment diagrams, moments of inertia.

Course Outcomes

- Be able to manipulate basic engineering units in both the International and US Customary Systems of Units in engineering analysis and be able to convert between the two.
- Be able to perform basic vector operations using standard vector notation.
- Be able to conceptualize and draw a conventional free-body diagram which identifies and applies all known and unknown forces.
- Understand the nature of forces(s) and their manipulation in engineering analysis, including moments, couples, transmissibility and resultants.
- Understand the conditions for equilibrium for both a particle and a rigid body.

- Be able to determine the axial forces in the members of a statically determinant truss.
- Be able to calculate the center of gravity for 2 and 3 dimensional rigid bodies.
- Be able to both calculate and draw diagrams for the internal shear forces and bending moments in straight, statically determinant beams.
- Understand the nature of friction and be able to solve problems involving friction and shear on horizontal and inclined planes.
- Be able to use calculus to compute centroids of lines, areas and volumes.
- Demonstrate competence in basic engineering analysis.

CE EN 112 : Engineering Drafting with CAD Applications. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Civil engineering or technology education major status

DESCRIPTION: Structural and component drafting, emphasizing computer-automated (CAD) systems. Concepts include applied and descriptive geometry, multiview representation, sectional views, dimensional practices, and axonometric sketching.

Course Outcomes

- An understanding of fundamental drafting concepts and manual drafting techniques
- An understanding of CAD-based drafting techniques
- An ability and skills for preparing technical drawings manually and by using AutoCAD
- An ability to work in a team to complete a term project and produce a technical report
- An ability to communicate with team members and produce an effective, well organized oral presentation
- An understanding of Building Information Modeling (BIM) and its application in engineering
- An ability to use BIM software to develop structural models for analysis
- An ability to present structural data in a collaborative environment

CE EN 113 : Engineering Measurements. (3:2:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: MATH 111

DESCRIPTION: Measurement of horizontal and vertical distances and angles to locate engineering projects including profiles, plane and topographical mapping, site layout, and earthwork. Introduction to GIS and mapping for surveying projects.

Course Outcomes

- Make order of magnitude estimates, assess reasonableness of solutions, and report appropriate levels of numerical accuracy
- Understand basic coordinate geometry functions and how they are used in surveying to reduce field measurements to useable quantities for design and analysis
- Make accurate horizontal and vertical angle and horizontal and vertical distance measurements
- Operate a total station and make plans for their use in engineering projects
- Close a horizontal traverse by computing distances, azimuths, bearings, accuracy, latitudes and departures and their accompanying adjustments to produce accurate coordinate locations
- Operate Global Positioning System (GPS) devices for mapping purposes
- Understand the concepts between geographic and projected coordinate systems and the relationship of locally surveyed information to these global systems
- Use basic functions of a Geographic Information System (GIS) to develop appropriately scaled and referenced maps of their surveyed data
- Take measurements for and develop a topographic map
- Design and layout horizontal and vertical alignments of highways

CE EN 199R : Academic Internship. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Work experience evaluated by supervisor and posted on student's transcript.

Course Outcomes

- Student acquires professional experiences in the discipline.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

200-Level Courses

CE EN 200A : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CE EN 100A & CE EN 100B & CE EN 101

DESCRIPTION: Activities of civil engineering; principles and methods involved in solving civil engineering problems.

NOTE: College Lecture attendance required.

Course Outcomes

- 1(i) Continue developing an understanding of the process required to become a professional engineer
- 2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and begin leanring how to lead teams in civil engineering related projects that benefit the community
- 4(f) Continue developing an understanding of ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 200B : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CE EN 100A & CE EN 100B & CE EN 101

DESCRIPTION: Activities of civil engineering; principles and methods involved in solving civil engineering problems.

NOTE: College Lecture attendance required.

Course Outcomes

- 1(i) Continue developing an understanding of the process required to become a professional engineer
- 2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and begin learning how to lead teams in civil engineering related projects that benefit the community
- 4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 203 : Engineering Mechanics--Mechanics of Materials. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CE EN 103

DESCRIPTION: Fundamental concepts of elastic stress and strain, including transformations and stress-strain relations; beam/column theories (axial, flexure, torsion, and shear loads and deformations); shear and bending moment relationships; column stability; and cylindrical and spherical pressure vessels.

Course Outcomes

- Students will be able to calculate and transform axial stress (e.g., Mohr's Circle), shear stress, bearing stress, thermal stress, bending stress, and combined stress.
- Students will be able to calculate strain, transform strain (e.g., Mohr's Circle), apply stress-strain relations (e.g., Hooke's Law), and solve statically indeterminate problems.
- Students will be able to analyze deflections due to axial, torsion, bending, and shear loads, and manipulate relations between shear and bending moment.
- Students will be able to design beams and columns to carry specified axial, flexure, and shear loads, and predict their deformation and elastic stability (i.e., buckling).
- Students will be able to predict stresses in pressure vessels.

CE EN 204 : Engineering Mechanic--Dynamics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: CE EN 103

DESCRIPTION: Concepts of dynamics applied to particles, systems of particles, rigid bodies, vibration systems, and nonrigid particles systems.

Course Outcomes

- 1 (a) Understand the kinematics of particles and be able to perform rectilinear and curvilinear analysis of particle motion described in appropriate coordinate systems.
- 2 (a) Understand Newton's Laws of Motion and be able to write and solve the equations of motion for particles and systems of particles in appropriate coordinate systems.
- 3 (e) Understand the principles of Work and Energy and Impulse and Momentum as they apply to particles and systems of particles and be able to solve problems appropriate thereto.
- 4 (e) Be able to determine the motion of rigid bodies in translation and rotation about a fixed axis and to understand the principles associate with general plane motion.
- 5 (e) Be able to apply the principles of Force and Acceleration, Work and Energy, and Impulse and Momentum to rigid bodies and to solve problems appropriate thereto.
- 6 (e) Understand the basic concepts of one-degree-of-freedom vibration and to solve simiple problems related to such motion.

CE EN 270 : Computational Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Math 113 or concurrent enrollment.

DESCRIPTION: Computational techniques for solving civil engineering problems.

Course Outcomes

- Be able to utilize computer science concepts such as how information is stored in a computer in a digital format to calculate data size and data transfer rates.
- Be able to utilize the full range of IT resources available to students in the BYU College of Engineering and Technology.
- Be able to design and edit web pages in HTML format.
- Be able to create sophisticated and professsional Microsoft Powerpoint presentations, including use of themes and animation.
- Be able to use Microsoft Word to develop complex, lengthy technical documents, utilizing advanced features such as cross referencing and auto-generated tables of contents and figures.
- Be able to use the basic and advanced features in Microsoft Excel including formulas, relative vs. absolute referencing, naming cells, vlookup, IF function, validation, custom formatting, array formulas, charts, goal seek, and the Solver add-on to solve civil engineering problems.
- Be able to record and use macros to automate frequently-used tasks in Excel or to explore what VB code is associated with the task.
- Be able to reference cells and ranges in VB to either extract information from cells or write information to cells.
- Be able to add controls to a spreadsheet and associate those controls with VB code.
- Be able to use the MsgBox and InputBox objects in VB to present information to users or to prompt for input.
- Be able to use objects in VB programming, including properties and methods and be able to explore and research new object classes when necessary.
- Be able to use IF statements and conditional expressions to control the flow of logic in VB code.
- Be able to use each of the looping strategies in VB to encode iterative programming logic.
- Be able to allocate and use arrays in visual basic to process vectors, matrices, tables, and lists of data.
- Be able to use the debugging utilities in VB to identify and correct logical errors in your code.
- Be able to design and code custom functions in VB that can be called from Excel formulas or from other places

in your VB code.
- Be able to develop custom subs to perform specific tasks in VB or modify subs created by recorded macros to make the macros powerful or applicable in a variety of applications.
- Be able to trap on a variety of different types of events and execute VB code in response to those events.
- Be able to utilize the VB string functions in order to manipulate text.
- Be able to create custom forms and associate those forms with an excel workbook.

300-Level Courses

CE EN 300A : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE EN 200A & CE EN 200B

DESCRIPTION: Technical and professional activities in civil engineering.

NOTE: College Lecture attendance required.

Course Outcomes
- (i) Continue developing an understanding of the process required to become a professional engineer
- 2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and continue learning how to lead teams in civil engineering related projects that benefit the community
- 4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 300B : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 200A & CE EN 200B

DESCRIPTION: Technical and professional activities in civil engineering.

NOTE: College Lecture attendance required.

Course Outcomes
- 1(i) Continue developing an understanding of the process required to become a professional engineer
- 2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and continue learning how to lead teams in civil engineering related projects that benefit the community
- 4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 304 : Civil Engineering Materials: Metals, Woods, and Composites. (1.5:2:3)

PREREQUISITE: CE EN 203 & CE EN 270 & STAT 201

DESCRIPTION: Molecular basis and mechanical behavior of civil engineering structural materials; failure theories; laboratory testing.

Course Outcomes
- Be able to extract basic material properties of wood, aluminum and steel from simple mechanical tests.
- Observe and understand the failure mechanisms of isotropic and orthotropic materials.
- Understand basic characteristics of fiber-reinforced plastic composite materials.
- Be able to apply the maximum normal stress, maximum shear stress, and octahedral shear stress failure theories.

CE EN 306 : Civil Engineering Materials: Concrete, Masonry, and Asphalt. (1.5:2:3)

PREREQUISITE: CE EN 203 & CE EN 270 & STAT 201; Eng T 231 or concurrent enrollment.

DESCRIPTION: Composition, engineering behavior, and construction of concrete, masonry, and asphalt; laboratory testing.

Course Outcomes
- Understand properties, behavior, and use of aggregates.
- Understand manufacturing, properties, behavior, and use of portland cement.
- Understand production, properties, placement, behavior, and use of portland cement concrete.
- Understand production, properties, placement, behavior, and use of masonry units.
- Understand manufacturing, properties, behavior, and use of asphalt cement.
- Understand production, properties, placement, behavior, and use of asphalt concrete.
- Be able to perform selected laboratory test procedures on aggregate-based materials.
- Be able to analyze and interpret experimental laboratory test data.
- Be able to prepare professional technical reports documenting laboratory investigations of material properties.

CE EN 321 : Structural Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CE EN 203 & CE EN 270; or concurrent enrollment.

DESCRIPTION: Methods of statics. Influence line diagrams. Method of virtual work. Plastic hinge analysis. Flexibility (force) method, stiffness (displacement) method, and moment distribution method for analysis of indeterminate beams, trusses, and frames. Introduction to computer structural analysis.

Course Outcomes
- 1(a) Apply Newton's Laws of force equilibrium to determine axial forces, shear forces, and bending moments in statically determinate beams, trusses, frames, arches, and cables.
- 2(a) Apply calculus and the principle of virtual work to determine displacements in statically determinate

beams, trusses, and frames.
- 3(e) Use appropriate assumptions to perform approximate analysis and plastic hinge analysis of statically indeterminate beams and frames.
- 4(e) Critically place live loads on beams, trusses, and frames using influence line diagrams.
- 5(e) Identify symmetry, antisymmetry, degrees of indeterminacy, and degrees of freedom in beams, trusses, and frames.
- 6(n) Define basic structural engineering terminology.
- 7(n) Analyze statically indeterminate beams, trusses, and frames by the flexibility method.
- 8(n) Analyze beams, trusses, and frames by the stiffness method.
- 9(n) Analyze beams and frames by moment distribution.
- 10(n) Analyze beams, trusses, and frames with commercial structural analysis software.

CE EN 332 : Hydraulics and Fluid Flow Theory. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CEEn 204, 270, Eng T 231; or concurrent enrollment.

DESCRIPTION: Fluid properties, fluid statics and dynamics, viscous flow, boundary layers, concepts of pipe and open-channel flow.

Course Outcomes
- 1(p) Be able to setup, perform, evaluate and report on several elementary hydraulic experiments, including: static pressure force, impulse forces from a fluid jet, energy losses in pipe flow, minor energy losses in pipe systems, and flow over weirs in open channels.
- 2(a) Be able to perform basic calculations for static pressures and forces in fluids.
- 3(a) Understand conservation of mass, energy, and momentum principles as applied to fluid flow situations, and be able to apply them to flow analysis problems.
- 4(e) Understand the concepts of drag and lift and be able to apply both to solve introductory problems of forces and dynamics.
- 5(e) Understand alternate standard approaches and formulas, and be able to analyze and design pressure pipe systems.
- 6(p) Understand standard approach and formulas, and be able to analyze and design open-channel flow systems.
- 7(p) Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for situations involving fluid pumping.

CE EN 341 : Elementary Soil Mechanics. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CE EN 203 & CE EN 270; CE En 332 or concurrent enrollment. Geol 330 or concurrent enrollment.

DESCRIPTION: Determination of stresses in soils, soil strength, consolidation, and settlement. Applications in fluid flow, lateral earth pressure, bearing pressure, and slope stability.

Course Outcomes
- 2. (g) Communicate results of geotechnical tests effectively and explain their meaning in a clear and concise manner.
- 1. (b) Perform basic laboratory tests on soils including seive analysi, Atterberg limits, compaction, direct shear, triaxial shear and consolidation. Be able to perform the basic calculations associated wtih laboratory tests on soils.
- 3. (m) Perform fundamental calculations and analyses including weight-volumen relationships and soil classification. Understand influence of soi structure and mineralogy on soil behavior.
- 4. (m) Understand basic principles of flow through porous media including Darcy's law, the equation of continuity, seepage forces and flow nets.
- 5. (m) Understand how stresses are transferred through soils. Compute both geostatic stress (total stress, effective stress, and pore pressures) and induced stresses due to point, line and area loads.
- 6. (m) Understand basic consolidation theory. Compute the amoun of settlement and the time required for settlement under a given load.
- 7. (m) Understand shear strength principles including Mohr-Coloumb failure criterion. Perform basic caluclations related to shear strength analyis.
- 8. (m) Analyze lateral earth pressures under at-rest, active and passive conditions.
- 9. (m) Perform bearing capacity analysis for spread footings of various shapes. Understand how bearing capacity equations are used in foundation design.

CE EN 351 : Environmental Engineering. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CHEM 105

DESCRIPTION: Environmental concerns, problems, and evaluation methodology; pollution control and engineering management approaches; material balance and separations; reactor design.

Course Outcomes
- Be able to setup and solve material balance calculations for environmental engineering problems.
- Understand zero, first, and second order reactions equations and be able to solve simple problems using these concepts. Understand half-life and doubling time and how it applies to reactor design.
- Understand and solve problems using mixed-batch, plug-flow, and completely mixed mixing models. Solve simple design problems for mix-batch, plug-flow, and completly mixed flow reactors.
- Understand and solve simple problems of energy balance. This will include units of meausre, conversion, energy equivalance, and power production.
- Understand the concept of an ecosystem. This includes material and energy flows.
- Understand basic water quality measures: dissolved oxygen, oxygen demand, solids, nitrogen, and bacteria measurements. Be introduced to water quality standards for drinking water, effluents, and surface waters.
- Understand and solve basic engineering problems related to water treatment processes including softening, coagulation and floculation, settling, filtration, and disinfection.
- Understand and solve basic engineering problems related to waste water treatment. This will include understanding the basic unit operations: preliminary and primary treatment, secondary treatment, tertiary treatment, and sludge treatment and disposal. Understand and be able to solve basic engineering problems related to activated sludge systems, including reactor design and solids separation.
- Understand the basic processes and issues related to air quality, this includes major air pollutants, sources of air pollution, and air quality standards.

- Understand the basic issues and regulations related to hazardous and radioactive waste. This includes legal definitions and approaches.

CE EN 361 : Introduction to Transportation Engineering. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CE En 113, 270, Eng T 231, Stat 201; or concurrent enrollment.

DESCRIPTION: Transportation system characteristics, traffic engineering and operaton, transportation planning, geometric design, pavement design, transportation safety, freight, public transport, sustainable transportation.

Course Outcomes

- 1(o) An understanding of the history of the development of transportation in the United States and that the transportation modes and networks available in a community significantly influence the way the community develop.
- 2(h) An ability to approach transportation problems, especially traffic congestion on highways, from a systems point of view, as an interaction between land use and transportation systems, not just as the problem related to highways. This competency is all inclusive, including public transportation, freight, and sustainability.
- 3(b) An ability to conduct activities to measure traffic stream characteristics (volume, speed, and density) and an ability to analyze field data to estimate values for traffic stream parameters, including hypothesis tests.
- 4(b) An ability to build a standard traffic flow model (based on the Greenshields Model) to fit observed traffic data and an understanding of the randomness of traffic flow characteristics.
- 5(b) An understanding of the concept of level of service (LOS) and capacity and an ability to evaluate the performance of basic roadway segments using standard procedures based on this concept.
- 6(o) An understanding of the four steps in the traditional travel demand modeling process, the two-way relationship between land use and transportation, and how the travel demand modeling fits into the transportation-planning process.
- 7(b) An understanding of the highway safety improvement program and an ability to determine standard safety evaluation parameters.
- 8(b) An understanding of the dynamic interaction of the driver, roadway, and vehicle, and an ability to evaluate and design roadway sections for safe stopping sight distance.
- 9(b) An ability to determine key dimensions of horizontal and vertical alignments of roadway sections using safe stopping sight distance and the concept of superelevation and an ability to calculate the appropriate distance for passing/no-passing zones for a rural two-lane road.
- 10(c) An ability to determine when an intersection warrants the installation of a traffic signal, an ability to design signal settings for intersections so that drivers will not face a dilemma zone, and an understanding that congestion and associated delays are societal costs.
- 11(c) An understanding of pavement structures and their characteristics and an ability to design bituminous pavements using the AASHTO method that requires knowledge of traffic engineering, pavement material characteristics, and economics.
- 12(o) An understanding of rail transit service in a corridor with respect to station spacing and vehicle capabilities, an ability to calculate changes in transit ridership in response to changes in fare or service (elasticity) and an ability to measure and compare the performance of public transportation operations.
- 13(o) An understanding of the role of freight movement in the economy and an ability to explain why certain commodities tend to move on specific transport modes.
- 14(h) An ability to describe what sustainable transportation is and how it can be supported, and an ability to explain the impacts of traffic congestion on a corridor or in a community.
- 15(d) An ability to lead and function on multidisciplinary teams and (g) An ability to communicate in a team environment and an ability to compose professional documents in a clear, concise, and effective manner.

400-Level Courses

CE EN 400C : Civil and Environmental Engineering Online Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Instructor's consent.

DESCRIPTION: Technical and professional activities in civil engineering. Available online.

NOTE: College Lecture attendance required.

Course Outcomes

- Develop an understanding of professional and ethical responsibility, and their relationship with faith.
- Develop an ability to lead and function on multidisciplinary teams.
- Develop a recognition of the need for, and an ability to engage in life-long learning, professional licensure, and service.

CE EN 400B : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 300A & CE EN 300B

DESCRIPTION: Technical and professional activities in civil engineering.

NOTE: College Lecture attendance required.

Course Outcomes

- 1(i) Understand the process required to become a professional engineer
- 2(i) Understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and lead teams in civil engineering related projects that benefit the community
- 4(f) Understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers.

CE EN 400A : Civil and Environmental Engineering Seminar. (.5:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE EN 300A & CE EN 300B

DESCRIPTION: Technical and professional activities in civil engineering.

NOTE: College Lecture attendance required.

Course Outcomes

- 1(i) Understand the process required to become a professional engineer
- 2(i) Understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers
- 3(d) Work in and lead teams in civil engineering related projects that benefit the community
- 4(f) Understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.
- 5(j) Understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE EN 414 : Engineering Applications of GIS. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Senior status.

DESCRIPTION: Introduction to GIS concepts. Data acquisition and GIS database formulation. Applications of GIS to civil engineering.

Course Outcomes

- Integrate topics from various civil engineering disciplines to solve realistic problems
- Obtain and evaluate appropriate input information from databases, handbooks, correlation, experiments and literature
- Know where to locate, and how to prepare geographic datasets for use in a GIS
- Use GIS tools for spatial analysis, understanding and design of engineering systems
- Produce professional maps and technical reports from geographic data for use in written and oral presentations
- Customize, or use customized scripts to solve engineering-specific problems with GIS
- Compose professional documents in a clear, concise, and effective manner

CE EN 421 : Structural Steel Design. (3:3:0)

WHEN TAUGHT: Winter; Spring Odd Yrs.

PREREQUISITE: CE EN 304 & CE EN 321

DESCRIPTION: Compression and tension of steel members, beams, and beam-columns. Elastic and inelastic lateral-torsional buckling. Structural fasteners. Emphasizes LFRD.

Course Outcomes

- 1(n) Students will understand the theory behind, and have a working familiarity of, the AISC specification.
- 2(c) Students will be able to design steel tension members.
- 3(c) Students will be able to design steel compression members.
- 4(n) Students will be able to design steel beams and composite beams.
- 5(n) Students will be able to design steel beam-columns.
- 6(n) Students will be able to design concentrically loaded bolted and welded connections.
- 7(l) Students will be able to explain some concepts in business management and public policy.

CE EN 424 : Reinforced Concrete Design. (3:3:0)

WHEN TAUGHT: Fall; Spring Even Yrs.

PREREQUISITE: CE EN 304 & CE EN 306 & CE EN 321

DESCRIPTION: Theory and design of reinforced concrete, including columns, beams, slabs, and footings; elastic and ultimate-strength methods of analysis.

Course Outcomes

- 424.1 (n) - Be able to design reinforced concrete beams subjected to transverse loading.
- 424.2 (n) - Be able to design reinforced concrete one way slabs subjected to transverse loading.
- 424.3 (n) - Be able to design reinforced concrete short columns subjected to axial and flexural loading.
- 424.4 (n) - Be able to design reinforced concrete spread square footings subjected to axial loadings.
- 424.5 (c) - Be able to design a simple reinforced concrete structural system.
- 424.6 (c) - Have a working familiarity with the ACI code.
- 424.7 (l) - Be able to communicate in a team environment.

CE EN 427 : International Megastructures. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: CE EN 421 & CE EN 471B; or CE EN 424 & CE EN 471B; Instructor's consent.

DESCRIPTION: Skyscraper analysis and design. Introduction to analysis and design of suspension, cable-stayed, arch, and prestressed girder bridges. Economic, social, and environmental design criteria for megastructures. International experience to study megastructures in China or elsewhere. Interaction with professionals.

Course Outcomes

- 1(g) Identify and present innovative ideas in the design/construction/use of remarkable megastructures.
- 2(c) Design preliminary member sizes for a skyscraper and megabridges with realistic loads and constraints.
- 3(h) Propose and model a sustainable design for a tall building to be built at a particular site.
- 4(d) Participate on a student design team and interact with design professionals.
- 5(j) Experience the culture, land, and megastructures of China.

CE EN 431 : Hydrology. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: CE EN 332

DESCRIPTION: Waters of the earth, their occurrence, circulation, and distribution. Relationships among precipitation, evaporation, infiltration, transpiration, groundwater, and stream runoff.

Course Outcomes

- 1(p). Understand and apply climatological principles relating to the hydrologic cycle and its occurrence and interaction with the biosphere of the earth.

- 2(p). Understand and solve problems for precipitation/runoff situations; including generation of the flow rates at desired points in a watershed.
- 3(c). Design and make calculations of flowrate hydrographs, reservoir storage, and water demand relationships in a stream.
- 4(p). Understand and be able to make calculations related to groundwater flow, well flow analysis and design, and drainage of saturated soils.
- 5(l). Design and apply statistical methods to generate hydrologic intensity and frequency distributions.

CE EN 433 : Hydraulic Engineering. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: CE EN 332

DESCRIPTION: Application of fluid mechanics principles to analysis and design of hydraulic structures and systems.

Course Outcomes

- 1(p). Apply energy and momentum principles to fluid flow situations, and be able to solve problems for forces in static and moving fluids.
- 2(p). Apply standard energy approaches and formulas, and be able to solve for and design pressure pipe systems.
- 3(p). Apply standard aproaches and formulas, and be able to solve for and design open-channel flow systems.
- 4(l). Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for pressurizing situations.
- 5(c). Generate and apply the analytical and design approaches to common water facilities such as culverts, spillways, pipe networks, sewer systems, canals, and scour and sediment transport.

CE EN 439 : Latin America Study Abroad in Water Resources. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 431; or CE EN 433; CE En 471B or concurrent enrollment. Instructor's consent.

DESCRIPTION: BYU students team with engineers and engineering students from Latin American countries such as Mexico and the Dominican Republic to work on water resources projects of consequence. Collaboration with Latin American teams occurs electronically through the semester with 7-10 day culminating visit to the country assigned.

Course Outcomes

There are no course outcomes available

CE EN 461 : Geometric Design of Highways. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 113 & CE EN 361

DESCRIPTION: Designing visual aspects of highways: highway classification, design controls and criteria, design elements, vertical and horizontal alignment, cross section, intersections, interchanges, capacity analysis.

Course Outcomes

- 1 (o) An ability to apply to highway geometric design the knowledge that critical components of the traffic system – drivers, vehicles, roads and highways, physical environment, and traffic control devises – interact to form traffic streams.
- 2 (e) An ability to apply the concept of capacity and level of service to performance evaluation, design, and planning of freeways, two-lane two-way highways, urban streets, and intersections.
- 3 (k) An ability to reason and use mathematical models for highway capacity and level of service estimation included in the Highway Capacity Manual.
- 4 (k) An ability to use the Highway Capacity Software for performance evaluation, designing, and planning of freeways, two-lane two-way highways, urban streets, and intersections.
- 5 (k) An ability to apply the concepts behind highway geometric design to the highway geometric design of a location assigned for the term project.
- 6 (k) An ability to use proper tables and figures in A Policy on Geometric Design of Highways and Streets in Geometric Design of Highways and Streets to assignment problems, exams, and a term project design.
- 7 (k) An ability to use Autodesk Civil 3D to design a highway and an intersection for the location assigned in the term project, including importing digital design data, triangulating the terrain data, creating profile, designing vertical and horizontal alignments, preparing a cross section assembly, and creating a corridor and an intersection.
- 8 (g) An ability to prepare a technical report summarizing the tasks that the team members have done in the design of a highway and an intersection assigned for the term project.
- 9 (g) An ability to prepare a presentation file summarizing the tasks the team members have done in the design a highway and an intersection assigned for the term project AND present it as a team.
- 10 (o) An ability to use professionally terms pertaining to highway geometric design in assignments, exams, and a term project.

CE EN 471A : Civil Engineering Practice. (1:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: 12 credit hours from CE En 304, 306, 321, 332, 341, 351, 361; or concurrent enrollment.

DESCRIPTION: Cash-flow diagrams. Present worth and annual payments comparison of engineering alternatives. Sustainability of engineering projects in terms of environmental, social, and economic impact (triple-bottom-line). Teamwork and leadership development. Response to a request for proposal (RFP) to develop a culminating design project.

Course Outcomes

There are no course outcomes available

CE EN 471B : Civil Engineering Practice. (1:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: 12 credit hours from CE En 304, 306, 321, 332, 341, 351, 361; or concurrent enrollment.

DESCRIPTION: Cash-flow diagrams. Present worth and annual payments comparison of engineering alternatives. Sustainability of engineering projects in terms of environmental, social, and economic impact (triple-bottom-line). Teamwork and leadership development. Economic, political, and cultural impact of globalization on civil engineering in the USA and other countries. Research and triple-bottom-line evaluation of specific civil engineering projects throughout the world.

Course Outcomes
- 1(h) Perform a triple bottom line analysis of a civil engineering project by evaluating social, environmental, and economic impact.
- 2(i) Learn about an existing civil engineering project by gathering and organizing information from published literature and the internet.
- 3(j) Understand the changing roles of the USA and another country in the modern world in both contemporary society and civil engineering.
- 4(l) Explain the time value of money, construct cash-flow diagrams, and perform present worth or annual payments analysis of alternatives.

CE EN 472 : Civil Engineering Design. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 471A

DESCRIPTION: Civil engineering culminating design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints.

Course Outcomes
- 1(c). Understand and apply conception, formulation, analysis and search for solutions to civil engineering design problems. Be able to integrate topics from various civil engineering disciplines to solve problems with multiple realistic constraints.
- 2(d). Be able to communicate in a team environment. Be able work effectively in groups through presentations and written documents.
- 3(g). Understand basic principles of personal communication including conversational and interviewing skills. Be able to compose effective professional documents and make well-organized oral presentations.
- 4(h). Understand how civil engineering problems may be affected by cultural, societal, political and environmental concerns. Understand basic concepts of engineering economic analyses.

CE EN 493R : Civil and Environmental Engineering Practicum. (1-18:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

Course Outcomes
- An ability to identify, formulate, and solve engineering problems
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

CE EN 498R : Directed Studies in Civil and Environmental Engineering. (1-18:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Instructor's consent.

Course Outcomes
- An ability to identify, formulate, and solve engineering problems
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

500-Level Graduate Courses (available to advanced undergraduates)

CE EN 500 : (CE En-Me En) Design and Materials Applications. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Me En 372 or CE En 321 or equivalent.

DESCRIPTION: Applied and residual stress; materials selection; static, impact, and fatigue strength; fatigue damage; surface treatments; elastic deflection and stability--all as applied to mechanical design.

Course Outcomes
- Understand how materials selection in design can be based on a variety of materials properties.
- Understand effects of materials structure and properties on design and choices for static, impact, fatigue, elastic, and anelastic behavior.
- Be familiar with important techniques used to modify enfineering properties of a boad range of materials, such as metals, polymers, ceramics, composites, and biomaterials.
- Understand the necessary analysis to design for various material failure mechanisms.

CE EN 501 : (CEEn-MeEn) Stress Analysis and Design of Mechanical Structures. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Stress analysis and deflection of structures; general bending and torsion with computer applications to mechanical and aerospace structure design.

Course Outcomes
- Calculate the deflection of and stress in multi-material beams under force, moment, or temperature loads.
- Understand the principles of stress and strain, including principle stress and strain, in general three-dimensional structures.
- Calculate the deflections and stress in torsion bars of arbirary cross section.
- Calculate the deflections and stress in beams in unsymmetric bending.

CE EN 503 : (CE En-Me En) Plasticity and Fracture. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 203 & ME EN 250 & MATH 303; Senior standing or instructor's consent.

DESCRIPTION: Tensor algebra; stress and deformation tensors; relationships between dislocation slip, yielding, plastic constitutive behavior, and microstructure development; cracks and linear elastic fracture mechanics.

Course Outcomes

- Identify and describe the influence of crystal structure and material defects on tensile and fracture properties.
- Describe the effects of a stress concentration as well as its influence on the fracture and fatigue life of a structural member.
- Describe the principles of the Griffith Crack Criteria and its application to brittle materials, and its extension to ductile materials.
- Describe the Failure Design Philosophy and apply it to materials selection in an engineering application.
- Predict the life of a structural member of known material properties given the loading conditions and a known flaw size.
- Describe the impact of various microstructure features on tensile, fracture and fatigue properties.
- Select an appropriate material class given functional requirements, fatigue and fracture.

CE EN 504 : (CE En-Me En) Computer Structural Analysis and Optimization. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Linear algebra; CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Matrix stiffness method for 1D, 2D, and 3D skeletal structure classes. Implementing the matrix stiffness method as a computer program. Nonlinear second-order structural analysis. Structural optimization techniques including stress-ratio method, gradient-based methods, and genetic algorithms.

Course Outcomes

- 1) Construct global and local member stiffness matrices and force vectors for any skeletal class and any distributed loading.
- 2) Construct structure matrices and vectors for both force and support displacement loads exploiting symmetry/antisymmetry and deformation assumptions.
- 3) Construct member displacement vectors and free-body diagrams for any skeletal class.
- 4) Write down the basic organization and calling structure of a structural analysis program, and complete the pseudo-code for structure level routines.
- 5) Derive first/second order equilibrium/compatibility equations, buckling loads/displacements, and structure elastic/geometric stiffness matrices for small trusses and single-member frames.
- 6) Determine the number of FLOPS and perform the calculations for matrix-vector operations including triangularization, backsubstitution, Newton-Raphson iteration, and inverse iteration.
- 7) Determine the number of FLOPS and perform the calculations for stress ratio optimization and exhaustive search, and construct design space plots if possible.
- 8) Determine the number of FLOPS and perform the calculations for finite difference / virtual work sensitivity analysis, Kuhn-Tucker condition evaluation, and optimality criteria algorithm.
- 9) Determine the number of FLOPS and perform the calculations for genetic algorithms with penalty/segregation fitness, tournament/roulette selection, point/uniform/blend crossover, dynamic mutation, and ranking/scoring/maximin fitness.
- 10) Prepare input for linear analysis, nonlinear pushover analysis, gradient-based size optimization, and genetic-based size/shape/topology optimization programs for plane frames.

CE EN 505 : Portland Cement Concrete Mixture Design and Analysis. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 306 or equivalent.

DESCRIPTION: Properties and testing of freshly mixed and hardened concrete and constituent materials; concrete mixture design and analysis; concrete construction practices; laboratory experimentation.

Course Outcomes

- Characterize properties of concrete materials.
- Design concrete mixtures.
- Measure properties of fresh concrete.
- Measure properties of hardened concrete.
- Understand proper concrete construction practices.
- Understand mechanisms of concrete deterioration.

CE EN 506 : (CE En-Me En) Continuum Mechanics and Finite Elements. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Equilibrium, constitutive, and compatibility equations; closed-form solutions from elasticity; finite element theory, programming, and usage; membrane, axisymmetric, and solid elements. Application to heat transfer, fluid mechanics, and seepage.

Course Outcomes

- 1) Derive mass/momentum/energy equilibrium equations and constitutive equations for isotropic Hookean solids and Newtonian fluids, and specialize them to get Navier/Stokes/Laplace equations.
- 2) Calculate stress traction, normal/shear stresses, principal stresses, and stress failure criteria for a given state of stress, and calculate displacements and strains for a given state of deformation.
- 3) Transform equations between expanded, matrix, and indicial notation, and between rectangular and cylindrical coordinates.
- 4) Degenerate 3D elasticity equations for 2D problem classes and Saint-Venant torsion using appropriate assumptions, and derive biharmonic or Laplace equations.
- 5) State the problem class, boundary conditions, and method of solution for classical elasticity problems and seismic wave problems.

- 6) Calculate displacements and stresses from given elasticity closed-form solutions including general solution to I-sections under torsion with or without warping restraint.
- 7) Construct the weighted integral to obtain formulas for element stiffness matrix and force vector given the governing differential equations of a problem class.
- 8) Calculate the system stiffness matrix, force vector, and displacement vector for a particular problem, and calculate element results.
- 9) Construct Lagrange/serendipity/triangle shape functions in terms of natural coordinates, and use isoparametric transformations and Gaussian quadrature to evaluate element stiffness.
- 10) Execute a finite element program and assess results on a patch test and on problems with known closed form solutions.

CE EN 508 : (CE En-Me En) Structural Vibrations. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Dynamic analysis of single degree-of-freedom, discrete multi-degree-of-freedom, and continuous systems. Applications include aerospace, civil structures, and mechanical components.

Course Outcomes

- 1. Students will be able to determine the response of single-degree-of-freedom (SDOF) systems in free and forced vibration, with and without damping.
- 2. Students will be able to determine the response of multi-degree-of-freedom and continuous systems in free and forced vibration, with and without damping.
- 3. Students will be able to apply the theory of structural vibrations to problems in Civil or Mechanical Engineering.

CE EN 521 : Seismic-Resistant Steel Buildings. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 421 or equivalent.

DESCRIPTION: Background and development of UBC seismic provisions; design of ductile braced frames and steel moment resisting frames; design of diaphragms and collectors.

Course Outcomes

- 1. Students will understand lateral load paths in buildings and be able to compute forces in diaphragms, collectors, and frames.
- 2. Students will understand the theory behind modern seismic provisions for buildings.
- 3. Students will be able to appropriately size and detail members in special moment resisting frames (SMRFs), special concentrically braced frames (SCBFs), and buckling-restrained braced frames (BRBFs).
- 4. Students will know how to use modern analysis tools to analyze buildings under earthquake loading.

CE EN 523 : (CE En-Me En) Aircraft Structures. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 304 or Me En 250 or equivalent. CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Requirements, objectives, loads, materials, and tools for design of airframe structures; static behavior of thin-wall structures; durability and damage tolerance; certification and testing. Airframe component team design project.

Course Outcomes

- Students will understand and be able to apply industry philosophies and critical criteria that drive the design and govern the certification of aircraft structures.
- Students will be able to analyze the in-plane (compression, shear, stability) and out-of-plane (bending, torsion, transverse shear) behavior (stresses, deflections, margins of safety) of structural elements (beams, columns, thin plates, open and closed sections, etc.) prevalent in aircraft.
- Students will understand important issues required for certification of aircraft structures (regulations, loads, fatigue, damage tolerance).

CE EN 525 : Bridge Structures. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE EN 421 & CE EN 424; or equivalent.

DESCRIPTION: Design of composite, continuous beam, and girder bridges, including piers, abutments, floor systems, and bearings; field trips to observe bridge construction and fabrication.

Course Outcomes

- Explain the world's history of bridges.
- Explain the USA's surface transportation law.
- Explain the USA's Code of Federal Regulations applicability to bridges.
- Explain the USA's bridge design philosophy.
- Explain the USA's bridge design specifications.
- Explain the loads that a bridge sustains and how they are distributed.
- Explain the elements of a bridge and how they are constructed.
- Explain current innovation in bridge design and construction.
- Read and understand bridge project contract documents including plans, specifications, and estimates.
- Design a bridge's structure type, width, span, and vertical clearance.
- Design a bridge's reinforced concrete deck.
- Design a bridge's prestressed conrete girders.
- Design a bridge's welded-steel plate girders.

CE EN 528 : Masonry Design. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: CE En 424 or equivalent.

DESCRIPTION: Introduction to analysis, design, and construction of masonry structures. Compressive, tensile, flexural, and shear behavior of masonry structural components.

Course Outcomes

- Be able to design masonry beams subjected to transverse loading
- Be able to design masonry columns, piers, and walls for axial and flexural loading
- Be able to specify anchorage requirements and design bolt connections
- Have a working familiarity with the building code requirements and specifications for masonry structures

CE EN 529 : Timber Design. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: CE EN 304 & CE EN 321 & CE EN 421; or equivalents.

DESCRIPTION: Timber species, composition, and grades; design of beams, straight and tapered glue-lam girders, columns, connections, trusses, shear walls, and structural systems.

Course Outcomes

- Be able to design timber beams subjected to transverse loading
- Be able to design timber tension and compression members subjected to axial and flexural loading
- Be able to design vertical and horizontal diaphragms subjected to in plane and out of plane loading
- Be able to design simple connections with nails, staples, bolts, and lag screws
- Have a working familiarity with the National Design Specification for Wood Construction

CE EN 531 : Principles of Hydrologic Modeling (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 431 or equivalent.

DESCRIPTION: Advanced hydrologic and hydraulic principles with an emphasis on modeling for the purpose of planning and designing draining, flood control, and other water resource facilities.

Course Outcomes

- Apply fundamental principles of hydrology in hydrologic and hydraulic models
- Know how to apply different hydrologic modeling formulation to solve design and analysis problems
- Know where to find digital and other data resources required for hydrologic model development
- Understand the limitations and uses of traditional lumped parameter models as well as more advanced physics based models
- Interpret and describe hydrologic modeling results in written reports
- Work together with teammates to develop hydrologic models
- Learn modern engineering software tools like the Watershed Modeling System (WMS) that process digital data and prepare model inputs

CE EN 535 : Hydraulic Design of Channels and Control Structures. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 433 or equivalent.

DESCRIPTION: Design of water conveyance channels and control structures, including siphons, chutes, weirs, flumes, dams, spillways, and outlet works.

Course Outcomes

- Students will be able to solve problems requiring fundamental and more advanced mathematical theories.
- Students will be able to design basic hydraulic structures including cost estimates and environmental impacts.
- Students will prepare professional-level quality reports.

CE EN 540 : Geo-Environmental Engineering. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.; Winter Even Yrs.

PREREQUISITE: CE En 341 and 351; or equivalents. CE En 471A or 471 B or concurrent enrollment or instructor's consent.

DESCRIPTION: Hazardous waste statutes and regulations; introduction to hazardous waste treatment, storage, disposal, and monitoring techniques. Geotechnical aspects of environmental engineering. Topics include municipal and hazardous solid waste landfill design and characterization and remediation techniques for contaminated soil and groundwater.

Course Outcomes

- Be able to produce a preliminary design of a landfill. This inlcudes understanding regulations, chemical fate and transport, geotechnical design methods, and project planning issues.
- Be able to communicate the design and design decisions to a non-specialist but technical audiance. This will include communicating the reasons for basic assumptions and why they were made.

CE EN 542 : Foundation Engineering. (3:3:0)

WHEN TAUGHT: Winter; Spring Even Yrs.

PREREQUISITE: CE En 341 or equivalent.

DESCRIPTION: Soil investigation, bearing capacity and settlement, design of spread footings, combined footings, mat foundations, pile foundations, and drilled shafts.

Course Outcomes

- 1. Estimate the settlement within a compressible soil layer due to applied loads from fill, embankent and buildings
- 2. Estimate the time-settlement relationships for soils due to applied loads. Use design approaches for accelerating consolidation rate (e.g. wick drains and surcharging)
- 3. Determine the allowable soil bearing pressure for spread footings on saturated clays and sand giving

consideration to shear failure and settlement
- 4. Design square and rectangular reinforced concrete footings
- 5. Design combined reinforced concrete foundatiosn using both conventional approaches and elastic methods (beam on an elastic foundation).
- 6. Design reinforced concrete mat foundations using both the conventional method and elastic methods (e.g. finite element models)
- 7. Estimate the single pile capacity and group pile capacity for piles in sand and clay
- 8. Estimate the settlement of a pile group in saturated clay
- 9. Compute the capacity of drilled shafts in clay and sand. Understand critical components of construction that influence capacity.
- 10. Characterize a subsurface profile using insitu techniques and determine the most suitable foundation type to support a given structure.

CE EN 544 : Seepage and Slope Stability Analysis. (3:3:0)

PREREQUISITE: CE En 341 or equivalent.

DESCRIPTION: Seepage and slope stability analysis of earth dams, levees, excavations, embankments, and natural slopes; construction dewatering, numerical methods, shear strength of soils, limit equilibrium method.

Course Outcomes
- Be able to apply Darcy's law to solve basic problems related to flow through porous media.
- Understand the governing equations for 2D and 3D groundwater flow, including what simplifying assumptions are used in the derivation of the equations.
- Be able to create and interpret graphical solutions (flow nets) to the governing equations.
- Be able to apply analytical solutions to the governing equations, including well equations.
- Be able to apply analytical solutions to construction dewatering problems.
- Understand the finite difference solution and be able to create finite difference solutions in Excel.
- Understand how the finite element method works and how the finite element equations are formulated.
- Be able to apply finite element software to solve complex seepage analysis problems.
- Understand the basic concepts of the limit equilibrium method of slope stability.
- Be able to apply slope stability charts for simple problems.
- Be able to apply slope stability software (such as UTEXAS) for common slope stablility problems.
- Be able to solve special cases of slope stability including, reinforced slopes, rapid drawdown, and seismic conditions.

CE EN 545 : Geotechnical Analysis of Earthquake Phenomena. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE En 321, 341; or equivalents.

DESCRIPTION: Earthquake magnitude and intensity; design ground motions, elementary dynamics of structures; response spectra; building code provisions; liquefaction and ground failure.

Course Outcomes
- 1. Understand the origin of earthquakes and the nature of seismic waves; characterize faults and seismic sources; quantify the "size" of an earthquake in terms of magnitude and intensity; quantify earthquake ground motions in terms of engineering parameters.
- 2. Use attenuation relationships to predict ground motions; perform deterministic and probabilistic seismic hazard analyses
- 3. Determine the dynamic response of single-degree-of-freedom structures subject to base shaking; understand, develop and apply response spectra
- 4. Perform site response analyses; understand the effect of different soil types on ground response and damping
- 5. Understand the philosophy and general seismic design provisions found in design codes developed/distributed as part of the National Earthquake Hazard Reduction Program (NEHRP) and the International Building Code (IBC)
- 6. Understand the mechanism associated with liquefaction and ground failure; perform liquefaction triggering, lateral spread, and settlement analyses.
- 7. Evaluate seismic slope stability and deformation; estimate seismic earth pressures

CE EN 547 : Groundwater Modeling. (3:3:0)

PREREQUISITE: CEEn 341 or equivalent.

DESCRIPTION: Computer simulation of groundwater flow systems; modeling theory, numerical methods, data management, boundary conditions, calibration, and stochastic analysis.

Course Outcomes
- Be able to apply Darcy's law to solve basic problems related to flow through porous media.
- Understand the governing equations for 2D and 3D groundwater flow, including what simplifying assumptions are used in the derivation of the equations.
- Be able to develop conceptual models of groundwater flow systems, including properly formulated boundary conditions.
- Understand the basic structure and organization of the MODFLOW model.
- Be able to select the appropriate MODFLOW packages for a particular problem and develop the package input.
- Understand issues related to MODFLOW solvers and be able to solve common instability issues.
- Be able to apply GIS data to develop regional groundwater simulations with MODFLOW.
- Be able to calibrate groundwater models using both manual approaches and automated tools such as the PEST code.
- Be able to analyze flow directions using particle tracking.
- Be able to perform stochastic simulations and analyze uncertainty.
- Be able to perform transient simulations.
- Be able to do basic groundwater analysis tasks in ArcGIS.

CE EN 551 : Water Treatment Facilities Design. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 351 or equivalent.

DESCRIPTION: Evaluation, selection, and design of water treatment facilities.

Course Outcomes

- Understand the concepts and theories governing water treatment unit operation and process design and operation
- Design water treatment unit operations and processes
- Setup, perform, and evaluate experiments necessary to design water treatment processes
- Communicate effectively through the preparation of reports and technical papers.
- Read and understand water treatment related technical literature

CE EN 555 : Environmental Chemistry. (3:2:4)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 351 or equivalent.

DESCRIPTION: Chemical theory and calculation supporting analysis of major organic and inorganic constituents in environmental engineering, focusing on theoretical understanding of the chemical processes.

Course Outcomes

- Understand and solve basic physical chemistry problems involving ReDox, Gas Law, and actvity.
- Be able to setup and solve the mathmatical formulations of equilibrium concepts for dilute aquatic systems
- Understand the basic concepts and be able to setup problems to use standard chemical speciation programs for dilute aquatic solutions.
- Be exposed to and experiance field sampling and analysis methods. Be able to communicate the results and analysis.

CE EN 562 : Traffic Engineering: Characteristics and Operations. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 361 or equivalent.

DESCRIPTION: Traffic stream characteristics, traffic flow theory, traffic control devices, capacity and level of service, warrants, signal timing and optimization, signal coordination.

Course Outcomes

- 1 (o) An understanding of types of traffic control devices and their meanings and the importance of communication between traffic engineer and driver.
- 2 (o) An understanding three fundamental traffic flow characteristics (speed, density and flow rate) and the relationships among them.
- 3 (b) An ability to conduct descriptive statistics on traffic flow characteristics data and to conduct a means test on two samples or conduct a chi-square test to evaluate a hypothesis on an underlying distribution.
- 4 (o) An ability to measure in the field, or at a remote station, and reduce raw traffic flow characteristics data for subsequent statistical analyses or modeling.
- 5 (b) An ability to conduct different types of volume studies and analyze their characteristics such as peaking and seasonal changes and an ability to estimate demand for and capacity of the facility under study.
- 6 (b) An understanding of the difference between space mean speed and time mean speed and ability to conduct speed, travel time, and signalized intersection delay studies study.
- 7 (o) An understanding of the importance of safety on highways and of the way highway crash data are collected and stored for statistical analyses and an ability to analyze crash data to identify statistically “hot spots” that require further evaluations and to conduct statistical analyses to evaluate the effectiveness of crash countermeasures on reduction of crashes.
- 8 (c) An understanding of basic concepts of capacity and level of service used for analyzing the performance of uninterrupted flow highway facilities.
- 9 (c) An ability to conduct capacity and level of service analysis for basic freeway and multilane highways, both manually and using the Highway Capacity Software and to evaluate the performance of such segments and determine possible improvements required for maintaining or improving the conditions of such segments.
- 10 (c) An understanding of the concepts of capacity and level of service for complex ramp area traffic flow and an ability to conduct capacity and level of service analysis for such facilities both manually and using the Highway Capacity Software.
- 11 (o) An understanding of the functions of signing and marking and their use on freeways and rural highways.
- 12 (c) An understanding of the hierarchy of intersection control (Basic rules of the road, Yield and stop control, and Signals) and an ability to perform a signal warrant analysis using the method found in the MUTCD.
- 13 (c) An understanding of basic principles of intersection signalization including: Discharge headways, saturation flow rates, and lost times; Allocation of time and the critical-lane concept; The concept of left-turn equivalency; and Delay as a measure of service quality, and an ability to determine these values given data of prevailing conditions.
- 14 (c) An understanding of the key steps involved in signal design and timing including: Development of a safe and effective phase plan and sequence; Determination of vehicular signal needs; and Determination of pedestrian signal needs, and an ability to going through these steps to design and timing of pretimed signals.
- 15 (c) An understanding of the fundamental concept of actuated signals and the mechanism of changing green time allocation to all approaches depending on approach traffic demand and an ability to design phase sequences and timing signal indications manually and using signal timing software programs.
- 16 (c) An understanding of the concept of analyzing capacity and level of service using the models presented in the Highway Capacity Manual 2010 and an ability to carry out the computations presented in the HCM manually and using the Highway Capacity Software 2010.
- 17 (h) An understanding of the concept of coordinating multiple signals on arterials and in a network by manipulating offsets of signals and an ability to determine optimal offsets, optimal phase sequence, and optimal green time allocation and an ability to coordinate multiple signals on arterials manually (simples systems) and using a signal optimization software program.
- 18 (g) An ability to express technical ideas in a written format and an ability to compose professional documents in a clear, concise, and effective manner

CE EN 563 : Pavement Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE En 306 and 341 and 361; or equivalents. CE En 471A or 471B or concurrent enrollment.

DESCRIPTION: Design, construction, evaluation, maintenance, and rehabilitation of flexible and rigid pavements; influence of traffic and environmental factors; mechanistic analysis of pavement structures using computer software.

Course Outcomes

- Understand concepts of pavement performance
- Characterize traffic loads for pavement design and analysis
- Characterize strength and durability of pavement materials
- Understand and account for climatic factors in pavement design and analysis
- Understand pavement construction procedures
- Design flexible and rigid pavements using standard methods
- Understand mechanisms of pavement deterioration and identify distress types
- Provide pavement condition assessments
- Recommend pavement preservation techniques
- Conduct mechanistic analyses of pavement structures using computer software

CE EN 565 : Urban Transportation Planning. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CEEn 361 or instructor's consent.

DESCRIPTION: Urban transportation planning and decision making, intermodal transportation, land-use transportation interrelationships, transportation demand modeling, site impact analysis, sustainable transportation; livable cities.

Course Outcomes

- Learn and understand the four steps of urban transportation demand forecasting including: 1) trip generation, 2) trip distribution, 3) mode choice, and 4) trip assignment.
- Be able to identify and understand the difference between “urban transportation planning” and “site planning.”
- Be familiar with travel demand management (TDM) measures.
- Read Transportation for Livable Cities and become familiar with issues affecting the direction of our transportation facilities.
- Learn how to communicate transportation planning ideas effectively and write a technical paper on a transportation planning topic.
- Become familiar with the demand forecasting process using QRSII and GNE software.

CE EN 570 : (CE En-Me En) Computer-Aided Engineering Software Development. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Me En 373 or C programming.

DESCRIPTION: Programming methods for the development of engineering software. Data structures, architecture, libraries, and graphical user interfaces, with applications to CAD systems.

Course Outcomes

- Ability to develop complex algorithms.
- Ability to convert algorithms into a commonly used computer language.
- Ability to create interactive scientific visualizations of complex data.
- Ability to create graphical user interfaces that facilitate ease of use.

CE EN 572 : (CE En-Me En) Computer-Aided Geometric Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: Proficiency in C programming.

DESCRIPTION: Mathematical theory of free-form curves and surfaces and solid geometric modeling. Bezier and B-spline curve and surface theory, parametric and implicit forms, intersection algorithms, topics in computer algebra, and free-form deformation. Several programming projects.

Course Outcomes

- Understand the theory, properties, and algorithms for Bezier curves: de Casteljau algorithm, degree elevation, hodographs, curve intersection algorithms, convex hull property, variationa diminishing property, rational Bezier curves, explicit Bezier curves.
- Understand polar form, the de Boor algorithm, the Boehm algorithm, knot intervals.
- Understand tensor product Bezier and B-Spline surfaces, including the de Casteljau algorithm, partial derivatives, parametric continuity, tesselation.

CE EN 575 : (CE En-Me En) Optimization Techniques in Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 302; C, C++, or similar computer language.

DESCRIPTION: Application of computer optimization techniques to constrained engineering design. Theory and application of unconstrained and constrained nonlinear algorithms. Genetic algorithms. Robust design methods.

Course Outcomes

- Define and use optimization terminology and concepts, including concepts of analysis space and design space.
- Apply optimization methods to engineering problems, including developing a model, defining an optimization problem, applying optimization methods, exploring the solution and interpreting results.
- Understand and apply unconstrained optimization theory for continuous problems, including the necessary and sufficient conditions and steepest descent, Newton's method, conjugate gradient and quasi-Newton methods. Understand basic theorems of quasi-Newton methods.
- Understand and apply discrete optimization algorithms, including branch and bound, exhaustive search and simulated annealing.
- Develop and apply Genetic algorithms.
- Understand and apply constrained optimization theory for continuous problems, including the Kuhn-Tucker conditions and generalized reduced gradient and sequential quadratic programming methods.
- Apply optimization techniques to determine a robust design.
- Have some familiarity with optimization software.

CE EN 594R : Selected Problems in Civil and Environmental Engineering. (1-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

Course Outcomes
There are no course outcomes available

Graduate Courses

For 600- and 700-level courses, see the BYU 2013–2014 Graduate Catalog.

BS, University of Utah, 1978
MS, University of California, Berkeley, 1979
PhD, University of California, Berkeley, 1982

Hotchkiss, Rollin H.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1976
MS, Utah State University, 1979
PhD, University of Minnesota, 1989

Jensen, David W.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1980
MS, Massachusetts Institute of Technology, 1981
PhD, Massachusetts Institute of Technology, 1986

Jones, Norman L.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1986
MS, University of Texas, Austin, 1988
PhD, University of Texas, Austin, 1990

Miller, A. Woodruff

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BES, Brigham Young University, 1969
MS, Stanford University, 1970
ENG, Stanford University, 1972
PhD, Stanford University, 1975

Nelson, Everett James

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1989
MS, Brigham Young University, 1990
PhD, Brigham Young University, 1994

Rollins, Kyle

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor

DEGREES: BS, Brigham Young University, 1982
PhD, University of California, Berkeley, 1987

Saito, Mitsuru

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Professor
DEGREES: BS, Brigham Young University, 1981
MS, University of Virginia, 1983
PhD, Purdue University, West Lafayette, 1988

Associate Professors

Ames, Daniel P.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Utah State University, 1996
MS, Utah State University, 1998
PhD, Utah State University, 2002

Borup, Michael Brett

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Humboldt State University, 1980
MS, Utah State University, 1983
PhD, Clemson University, 1985

Fonseca, Fernando S.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1987
MS, Brigham Young University, 1988
PhD, University of Illinois, Urbana, 1997

Guthrie, William Spencer

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Utah State University, 1998
MS, Texas A&M University, 1999
PhD, Texas A&M University, 2002

Richards, Paul William

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 2000
MS, University of California, San Diego, 2003
PhD, University of California, San Diego, 2004

Schultz, Grant George

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1994
MS, Brigham Young University, 1995
PhD, Texas A&M University, 2003

Williams, Gustavious Paul

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Associate Professor
DEGREES: BS, Brigham Young University, 1987
PhD, Northwestern University, 1994

Assistant Professors

Franke, Kevin William

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Assistant Professor
DEGREES: BS, Utah State University, 2004
MS, University of Washington, 2005
PhD, Brigham Young University, 2011

Scott, Michael A.

COLLEGE: Ira A. Fulton College of Engineering and Technology
DEPARTMENT: Civil and Environmental Engineering
RANK: Assistant Professor

Admission to Degree Program

The degree programs in the Department of Electrical and Computer Engineering are open enrollment.

The Discipline

Electrical and computer engineers study phenomena, devices, and systems for information processing, communication, and systems control. These studies, grounded primarily in physics and mathematics, have enabled engineers to develop the innovative new technologies for information acquisition, processing, storage, and communication that have made possible our contemporary Age of Information.

Examples of systems developed by electrical and computer engineers include radio, television, radar, satellite communication systems, cellular telephones, laptop computers, fiber-optic communications devices, global and local computer networks, robotic systems, control systems, fax machines, medical image processing, computer modems, lasers, pagers, computer vision, programmable calculators, VLSI chips, computer-aided design tools, and medical instruments.

Although it is the goal of engineering to produce useful objects, electrical and computer engineers typically play a limited role in construction, assembly, or mass production. Instead, they focus on design, analysis, and the development of the underlying theory and knowledge applied in the design process.

Many engineers are involved in designing and developing products, but other electrical and computer engineers may choose to work in product marketing, project management, system calibration and maintenance, product testing, or other areas related to electronic systems.

Computer programming skills and the ability to use advanced design and simulation software packages are vital in electrical as well as computer engineering. As part of their training, electrical engineers become familiar with a variety of programming languages and software environments. This experience is closely coupled to real-world applications.

Career Opportunities

Electrical and computer engineers are among the most actively recruited students graduating from a four-year program. Baccalaureate engineers typically start their careers as members of project teams with one or more of the following responsibilities: designing digital, analog, or opto-electronic circuits; creating or testing application-specific software; testing components or systems; or providing technical support for sales. Later on, many engineers find themselves pursuing managerial careers, starting their own companies, or even managing entrepreneurial funds. Top graduates are also well received by medical schools, law schools, and professional and management programs.

The BS curriculum for both the electrical engineering and computer engineering degrees is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc. (ABET).

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Computer Engineering (Program Outcomes)
BS in Electrical Engineering (Program Outcomes)

Students should see their college advisement center for help or information concerning the undergraduate programs.

Graduate Programs and Degrees

MS in Electrical and Computer Engineering
PhD in Electrical and Computer Engineering

For more information see the BYU 2013–2014 Graduate Catalog.

General Information

Students are strongly encouraged to seek advisement early in their studies to ensure effective course scheduling. Contact the college advisement center (264 CB) or the department (459 CB). Students should enroll in EC En 191 in their first year of study at BYU.

In both undergraduate degree programs offered in the department, students are required to pass prerequisite courses in the major with a grade of C– or better before taking follow-on courses.

Professional Registration. The Electrical and Computer Engineering Department provides the option for graduates to become registered professional engineers. General qualifications for becoming registered are explained in the Ira A. Fulton College of Engineering and Technology section of this catalog. This status is vital to engineering practice in the public sector and to much consulting work. The basic electrical and computer engineering program outlined in this department prepares graduates to successfully complete the Fundamentals of Engineering (FE) examination. Students who wish to become registered as professional engineers are advised to discuss this matter with an advisor from the department soon after admission to the professional program.

Learning Outcomes

1. **Fundamentals:** An ability to apply knowledge of mathematics (differential, integral, and multivariate calculus; linear algebra; complex variables; differential equations; discrete math; and probability), science (Newtonian mechanics; electricity and magnetism; and introductory chemistry), computer fundamentals (programming languages; computer organization; and software/hardware interfaces), and engineering science (signals and systems, electromagnetics, and electronic devices).
2. **Experiments and data analysis:** An ability to design and conduct experiments, as well as to analyze and interpret data.
3. **System design:** An ability to design a system component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. **Teamwork:** An ability to function on multi-disciplinary teams.
5. **Leadership:** An understanding of principles of leadership and project management.
6. **Engineering problems:** An ability to identify, formulate, and solve engineering problems.
7. **Ethics:** An understanding of professional and ethical responsibility.
8. **Communication skills:** An ability to communicate effectively.
9. **Broad education:** The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
10. **Lifelong learning:** A recognition of the need for, and an ability to engage in life-long learning.
11. **Contemporary issues:** A knowledge of contemporary issues.
12. **Techniques, skills, and tools:** An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following prerequisite courses:

MATH 112 : Calculus 1. (4:5:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

MATH 113 : Calculus 2. (4:5:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 112.
DESCRIPTION: Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 2 develops techniques of integration, applications of integration, infinite sequences and series, parametric curves, polar coordinates, and conic sections. This course contributes to all the expected learning outcomes of the Mathematics BS. For a more detailed course description, visit the Math 113 Wiki page.

PHSCS 121 : Introduction to Newtonian Mechanics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Calculus or concurrent enrollment.

DESCRIPTION: Linear, circular, and projectile motion; their prediction from forces and torques. Conservation of energy and momentum. Weekly lab.

Course Outcomes

- Convert quantities from one set of units to another and use a reasonable number of significant digits when expressing answers.
- Compute a particle's classical translational motion in one or two dimensions, including circular motion, both in Cartesian coordinates and in polar coordinates.
- Use the ideas of energy, work, power, linear momentum, and angular momentum to arrive at conclusions about the motion of a system, including the motion of satellites and the planets.
- Use Newton's Second Law to calculate the motion of objects, including those in simple harmonic motion, as well as the forces and torques acting on systems in equilibrium.
- Demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strenghts and weaknesses of this process

PHSCS 220 : Introduction to Electricity and Magnetism. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: MATH 113; Phscs 121 or equivalent.

DESCRIPTION: Electricity and magnetism. Weekly lab.

Course Outcomes

There are no course outcomes available

2. Complete the following supporting courses:

CHEM 105 : General College Chemistry. (4:5:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 110 (or equivalent) or concurrent enrollment.

DESCRIPTION: Atomic and molecular structure including bonding and periodic properties of the elements; reaction energetics, electrochemistry, acids and bases, inorganic and organic chemistry.

NOTE: Primarily for students in engineering and biological sciences. Three lectures and two recitation sections per week.

Course Outcomes

- Students will demonstrate a familiarity with the basic vocabulary and concepts of chemistry.
- Students will demonstrate a qualitative and basic quantitative understanding of the fundamental chemical laws which govern the material substances in our universe and which express how one variable in nature depends on another.
- Students will demonstrate the ability to manipulate quantitative descriptors of natural phenomena expressed both in the form of equations and of proportionalities, and solve chemistry problems using these skills.
- A successful Chemistry 105 students describes chemical phenomenon by first focusing on properties of the elements at the atomic level. Chemistry 105 students will gain a knowledge base of reactivity patterns of elements and compounds.
- Chemistry 105 students will be able to use their chemistry experience, knowledge, and skills to better understand and work in their own field of study.

Or

CHEM 111 : Principles of Chemistry. (4:3:3)

OFFERED: Honors also.

WHEN TAUGHT: Fall

PREREQUISITE: Math 110 or equivalent.

RECOMMENDED: High school chemistry, physics, and introductory calculus or concurrent enrollment in Math 112.

DESCRIPTION: Stoichiometry, kinetic-molecular theory, thermodynamics, states of matter, solutions and equilibria, electrochemistry, structure and bonding, chemical reactions, kinetics.

NOTE: Tutorial included.

Course Outcomes

- Students will demonstrate the ability to use valence shell and molecular orbital models of bonding to predict molecular shapes, reactivity, and spectroscopic properties.
- Students will be able to apply the kinetic theory of gases, including properties of ideal gases and interactions that lead to non-ideal behavior, to predict gas behavior with varied temperature, pressure and volume.
- Students will demonstrate the ability to use core concepts of chemical thermodynamics, with emphasis on the first and second laws, to predict physical changes and reaction outcomes based on Gibbs energies.
- Students will be able to apply concepts of the quantum mechanical nature of light and matter to explain observations that originally led to the development of atomic theory.

: Honors Principles of Chemistry.

Course Outcomes

C S 142 : Introduction to Computer Programming. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Knowledge of algebra.

DESCRIPTION: Introduction to object-oriented program design and development. Principles of algorithm formulation and implementation.

Course Outcomes

- Use the rudiments of the environment and the resources available to help them program (editors, basic computer architecture, compilers, libraries, reference manuals, on-line help).Develop programs from an English description.Write programs on their own, independent of "hand holding" by a TA or an instructor (typically a dozen or so).Understand and use the basic programming constructs: types (built in types, basic provided types including arrays and strings, type construction), values (constants,variables, assignment statements, and expressions), control structures (sequential flow, conditional statements, and loops), and I/O (basic output to the screen and input from the keyboard, and file I/O).Understand and use objects (value representation, applicable operations, hidden implementations).Implement basic recursive algorithms.Describe and use the basic ideas of some of the more advanced programming constructs,including exceptions, inheritance, and polymorphism.
- AbstractionDebugging and Assurance of CorrectnessProgram Development (analysis, specification, design, implementation, testing)

C S 235 : Data Structures and Algorithms. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: C S 142

DESCRIPTION: Fundamental data structures and algorithms of computer science; basic algorithm analysis; recursion; sorting and searching; lists, stacks, queues, trees, hashing; object-oriented data abstraction.

Course Outcomes

- Use the fundamental data types of computing (lists, stacks, queues, priority queues, sets, maps, trees, etc.).
- Understand the major techniques for implementing the fundamental data types (linked lists, binary search trees, hashing, heaps, etc.) and implement several of them.
- Properly use and select data structures from language-provided data-structure libraries.
- Apply basic algorithm analysis.
- Understand how recursion works and write programs using recursion to solve problems.
- Make informed decisions about which sorting and searching algorithms to use in specific circumstances.
- Write programs that require ~500 lines of code.

C S 236 : Discrete Structures. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: C S 235

DESCRIPTION: Introduction to grammars and parsing; predicate and propositional logic; proof techniques; sets, functions, relations, relational data model; graphs and graph algorithms.

Course Outcomes

- Understand and be conversant with basic discrete mathematical structures (finite state machines, regular expressions, grammars, propositional calculus, proof techniques, predicate calculus, sets, relations, functions, graphs).Write complex programs by using mathematical concepts as the basis for solving programming problems (finite state machines for lexical analysis; grammars for parsing; propositional and predicate calculus for logic programming; sets and algebras for relational databases; algebras, graphs, and topological sorting for optimizing datalog query processing).Incrementally build sophisticated programs by a systematic design process based on discrete mathematics.Design a solution for a programming problem and justify the design as one that is maintainable and extendable by other programmers who understand and are conversant with discrete mathematical structures.
- Demonstrate ability to build large programs by writing and integrating code from a diverse spectrum of program components.

C S 240 : Advanced Programming Concepts. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: C S 236

DESCRIPTION: Advanced software development with an object-oriented focus. Development and testing of several 1500 to 2000 line modules from formal specifications. UNIX and C++ environment.

Course Outcomes

- a. Use coding, testing, and debugging strategies. b. Follow basic object-oriented design concepts.
- Write programs in an Object Oriented programming language using inheritance, polymorphism and class hierarchies.
- Use the Linux programming environment to execute basic commands and to run the compiler, linker, debugger, memory checker, and profiler.
- Demonstrate the aptitude and work ethic necessary to succeed in computer science.

ENGL 312 : Persuasive Writing. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Expository and persuasive writing focusing on practical reasons for evaluating audiences, generating and structuring an argument, and making stylistic decisions. Library research paper.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including creating and/or finding ideas,

evidence, and data to write about; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Create an appropriate ethos in both writing and speaking.
- Analyze the parts of an argument; evaluate them in terms of the intended audience; and generate a reasonable argument for a specific audience.Anticipate and effectively respond to audience objections and counterarguments.

Or

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: First-year writing, junior or senior status.
DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.
NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes
- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

MATH 313 : Elementary Linear Algebra. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 112.
RECOMMENDED: Math 290.
DESCRIPTION: Linear systems, matrices, vectors and vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and eigenvectors.

Course Outcomes
- This course is aimed at majors in mathematics, the physical sciences, engineering, and other students interested in applications of mathematics to their disciplines. Linear algebra is used more than any other form of advanced mathematics in industry and science. A key idea is the mathematical modeling of a problem via systems of linear equations. For more detailed information visit the Math 313 Wiki page.

: Honors Elementary Linear Algebra. (3:3:1)

Course Outcomes

MATH 334 : Ordinary Differential Equations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 113 and Math 313.

DESCRIPTION: Methods and theory of ordinary differential equations.

Course Outcomes

There are no course outcomes available

3. Complete the following:

EC EN 191 : New Student Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of electrical and computer engineering with group and individual design projects.

Course Outcomes
- Understand the discipline of electrical and computer engineering and its many roles in the modern technological world.

EC EN 220 : Fundamentals of Digital Systems. (3:3:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 142 or concurrent enrollment.

DESCRIPTION: Digital logic: theory, design, and implementation of combinational and sequential logic. Laboratory experience in construction of digital logic circuits.

Course Outcomes
- Ability to design, minimize, and analyze a combinational network
- Ability to design and analyze a sequential network.
- Ability to design and test a digital system that includes I/O, state machines and combinational networks.
- Ability to design major components of a simple microprocessor.
- Ability to use schematic capture tools.

EC EN 240 : Circuit Analysis and Laboratory. (4:3:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 113 & PHSCS 220; Average of B or better in completed Math and Physics courses, or advisor approval.

DESCRIPTION: Analysis of electric circuits including transients, sinusoidal steady-state, and power. Includes labs.

NOTE: Fee.

Course Outcomes
- Application of complex variables to AC steady state circuit analysis.???
- Application of algebra, linear algebra, and circuit equivalencies to DC circuit analysis.???
- Application of differential equations to transient analysis of RC and RL circuits.???
- Application of algebra, linear algebra, and circuit equivalencies to AC circuit analysis.???
- Ability to design, analyze, and demonstrate a working integrated stereo audio amplifier system.
- Ability to use oscilloscopes, function generators, and DC power supplies in an applied design/debug environment.

EC EN 320 : Digital System Design. (4:3:3)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 220 & EC EN 240

DESCRIPTION: Advanced digital design, including hardware description languages, electrical properties of digital circuits, synchronous and asynchronous circuits, computer arithmetic, and interfacing to external circuitry.

Course Outcomes
- Ability to describe a digital system in VHDL.
- Ability to simulate and debug a digital system described in VHDL.
- Ability to read and interpret a data sheet.
- Ability to implement logic using an FPGA.
- Ability to synchronize asynchronous inputs into a synchronous system and analyze the MTBF.

EC EN 330 : Introduction to Embedded System Programming. (4:3:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C S 235 & EC EN 220

DESCRIPTION: Understanding the hardware-software interface in an embedded system. Using C and assembly language in device-driver design. Software interfacing to peripherals. Performance and memory issues. Hardware interrupt programming.

Course Outcomes
- Ability to read and interpret device specifications
- Ability to write efficient interrupt service routines
- Ability to write software to communicate with peripherals
- Ability to understand basic microprocessor architecture
- Ability to organize software in a complex embedded application
- Ability to write a user manual for an embedded application

EC EN 340 : Electronic Circuit Design 1. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240

DESCRIPTION: Analysis and design of electronic circuits with an emphasis on amplifier gain and frequency response.

Course Outcomes
- Ability to apply electronic device models to the solution of a circuit problem.???
- Ability to relate circuit theory to practice.???
- Ability to understand and develop circuit designs in a professional manner.â ¨
- Ability to document engineering/experimental results and to write summary reports.
- Ability to use specialized circuit analysis techniques including approximate equivalent circuits.â ¨
- Ability to use oscilloscopes, function generators, and DC power supplies.
- Ability to use Spice

EC EN 370 : (EC En - Math 431) Probability Theory. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: MATH 313

DESCRIPTION: Axiomatic probability theory, conditional probability, discrete / continuous random variables, expectation, conditional expectation, moments, functions of random variables, multivariate distributions, laws of large numbers, central limit theorem.

Course Outcomes
- A basic understanding of probabilistic reasoning and the foundations of probability theory: sample spaces, event algebras, classical probability, and Kolmogorov's axioms.
- An understanding of random variables, distribution functions, probability mass functions, and probability density functions, including the uniform, binomial, Poisson, exponential, and Gaussian distributions.
- An understanding of multivariate distributions, independence, conditioning, and functions of random variables, including the ability to compute expectations, moments, and correlation functions.
- An understanding of characteristic functions and their relationship to linear transformations and independence.
- An understanding of convergence concepts, including the central limit theorem and the law of large numbers.
- The ability to apply probability theory to the analysis of engineering systems.

EC EN 380 : Signals and Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240 & MATH 334

DESCRIPTION: Time and frequency domain analysis of discrete or continuous systems subjected to periodic or nonperiodic input signals.

Course Outcomes
- Application of integral calculus, differential equations, complex variables, to transform analysis of a continuous-time LTI system.
- Application of integral calculus, differential equations, complex variables, to transform analysis of a discrete-time LTI system.
- Application of integral calculus to solve continuous-time convolution problems.
- Application of discrete math to solve discrete-time convolution problems.
- Ability to use Matlab or similar tools to analyze, model, simulate, and experiment with linear systems.
- Ability to interpret and synthesize signals and systems in both the time and frequency domains.
- Ability to recognize the mathematical properties of signals and systems including linearity, time invariance, causality, stability, etc.
- An understanding of the consequences and principles associated with digitally sampling and reconstructing analog signals.

EC EN 390 : Junior Team Design Project. (3:1.0:6)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 330 & EC EN 340 & EC EN 380

DESCRIPTION: Culminating design experience based on skills learned in junior-level courses. Students works in teams to plan, design, and test a project based on the integration of components built in other classes.

Course Outcomes
- Ability to complete a significant culminating design that draws upon the knowledge gained in prerequisite and concurrently enrolled course.
- Ability to assign and accept leadership responsibilities on a team.
- Ability to define, understand, and participate in team decision making processes.

Ability to take high level, customer requirements, identify from them the specifications a solution must meet, and formulate those specifications as an engineering problem.
- Ability to combine new technology with custom built components
- Ability to apply safety issues to engineering hardware.

EC EN 391 : Junior Seminar. (.5:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240 & ENG T 231

DESCRIPTION: Seminars and colloquia on current topics in electrical and computer engineering, as well as ethics, contemporary issues, and life-long learning.

NOTE: Attendance and some writing are required.

Course Outcomes
- An understanding of professional ethics.
- Ability to use the library, internet, etc. to learn about recent developments in a particular technical field.
- Knowledge of recent developments in a particular technical field.

EC EN 490 : Team Design Project. (4:2:6)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EC EN 340 & EC EN 380; selected 400-level EC En courses, depending on project.

DESCRIPTION: Culminating design experience based on skills learned in advanced technical courses. Students work in teams to plan, design, test, and demonstrate a major project.

Course Outcomes
- Ability to define, understand, and participate in team decision making processes.
- Ability to produce and maintain the necessary control documents on a design team.
- Ability to establish and follow ground rules governing team behavior.
- Ability to give an oral presentation describing a technical design.
- Ability to understand the expectations from other members on a team.
- Ability to assign and accept leadership responsibilities on a team.
- Ability to understand the different skill sets each team member brings to a team.
- Ability to understand the expectations (regarding participation) of each team member.
- Ability to complete a significant culminating design that draws upon the knowledge gained in prerequisite courses.
- Ability to give an oral presentation describing team progress during a design review.
- An understanding of the principles of leadership and project management.
- Ability to produce a written report describing a technical design.
- Ability to take high level, customer requirements, identify from them the specifications a solution must meet, and formulate those specifications as an engineering problem.
- Ability to maintain a team portfolio documenting the design process.
- Ability to read, interpret, and use published design standards as a part of the design process.

4. Complete at least 16 hours from the following advanced technical program and technical electives:
   - Complete at least two of the following courses:

EC EN 425 : Real-Time Operating Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 324; or EC EN 330

DESCRIPTION: Hardware/software interface, real-time kernel internals, implementation of high-level language constructs, issues in real-time application software development.

Course Outcomes
- Ability to apply C and assembly programming languages and knowledge of the hardware/software interface to the design and implementation of a real-time kernel.
- Ability to design and implement a real-time application.
- Ability to design and implement a real-time kernel.
- Ability to use C programs, compilers, and debuggers in the design and implementation of real-time application software.
- Ability to write interrupt service routines.
- Ability to use a real-time operating system as a tool in the development of real-time application software.

EC EN 427 : Embedded Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 320 & EC EN 324; or EC EN 320 & EC EN 330

DESCRIPTION: Interfacing digital hardware components to an embedded system processor. Developing the hardware-software interface. Developing application software. Using C and assembly language in device-driver design, monitor-debugger, and real-time kernel. Lab.

Course Outcomes
- Ability to design a bus-based digital I/O device.
- System design project integrating custom bus-based digital I/O device.
- Ability to interface to a processor or I/O bus.
- Ability to read and interpret device specifications (data sheets) in order to integrate a device within a microprocessor based system.
- Ability to use DMA for a high-bandwidth I/O device.

EC EN 451 : Introduction to Digital VLSI Circuits. (4:3:5)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 320 & EC EN 340

DESCRIPTION: Design of very large-scale integrated circuits for digital systems. CAD tools used extensively to simulate the design and create and verify mask circuits.

Course Outcomes
- Ability to analyze CMOS circuits.
- Ability to translate digital logic to CMOS circuits to achieve desired behavior and performance requirements.
- Ability to perform CMOS layout.
- Ability to use eCAD tools for CMOS design.
- Ability to characterize timing and noise in CMOS circuits.

- Complete remaining course hours selected from the following:
  1. Additional courses listed in item 4a above or other 400-level electrical and computer engineering courses, not including 490 or 493R.

  2. Any of the following:

C S 340 : Software Design and Testing. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: C S 240

DESCRIPTION: Principles of software design, design patterns, design representation, refactoring. Principles of software quality assurance and testing. Development and testing tools.

Course Outcomes
- Articulate the principles of effective software design.
- Know when and how to apply various design patterns.
- Demonstrate how to effectively document and communicate software designs.
- Understand what quality assurance is, know how to build quality into software using review techniques, and demonstrate quality evaluation through testing.
- Use a variety of software development tools, including IDEs, automation tools, static analysis tools, source code control systems, unit testing tools, and documentation tools.
- Work effectively in a group to produce quality software using 1-5 above.

C S 345 : Operating Systems Design. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: C S 124 & C S 240

DESCRIPTION: Principles and concepts of operating systems design and the implementation of an operating system.

Course Outcomes
- Describe the basic components of an operating system and their role in implementations for general purpose, real-time, and embedded applications.
- Define the concepts of processes, threads, asynchronous signals and competitive system resource allocation.
- Show how a shell works.
- Explain what multi-tasking is and outline standard scheduling algorithms for multi-tasking.
- Discuss mutual exclusion principles and their use in concurrent programming, including semaphore construction and resource allocation.
- Give an overview of system memory management.
- Explain how file systems are implemented.
- Discuss the features and strengths of various contemporary operating systems.
- Implement a functional, pre-emptive, multi-tasking operating system written in C, including a shell, scheduler, file manager, memory manager, and synchronization components.

C S 360 : Internet Programming. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 240

DESCRIPTION: Internet application programming, including sockets, threads, CGI, database, e-commerce, Web services.

Course Outcomes
- Design and implement a variety of client-server and web applications.
- Analyze the performance of a web server, write convincingly to support your conclusions and give an oral report to describe your findings.
- Implement a web server using processes, semaphores, threads, sockets and signals.
- Use a set of web programming languages to implement an application.
- Use security to protect their web application.

C S 428 : Software Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: C S 340

DESCRIPTION: Analysis, design, implementation, and testing of significant software systems.

Course Outcomes
- Demonstrate the ability to work in a group on a significant project

Demonstrate practices that result in quality software
- Demonstrate an understanding of how ethics impact software development

C S 431 : Algorithmic Languages and Compilers. (3:3:0)

WHEN TAUGHT: Winter, Contact Department

PREREQUISITE: C S 340

DESCRIPTION: Formal description of algorithmic languages and techniques used in their compilation: semantics, ambiguities, procedures, replication, iteration, recursion.

Course Outcomes
- Implement a fully functional compiler for a subset of the Java language that targets an embedded microprocess.
- Apply patterns and common data structures to compiler constructrion including tree traversal, graph algorithms, and proof systems.
- Students are able to synthesis algorithms and techniques from compiler constructor to other problem domains.
- Students have a sound mental model of how an abstract high level language is systematically transformed into a low-level machine langauge or byte code. Students are able to use that understanding to write better application code.

C S 452 : Database Modeling Concepts. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: C S 240

DESCRIPTION: Database models: relational, deductive, object-oriented. Integrity constraints, query languages, database design.

Course Outcomes
- Be able to use a variety of commercial query languages (SQL, XQuery, SPARQL), both stand-alone and embeded in high-level programming languages. Know how relational algebra and relational calculus provide a basis for commercial query languages.
- Understand performance issues and optimization strategies. This includes query rewriting, secondary storage characteristics, and access strategies.
- Be able to design and develop relational database applications. This includes conceptual modeling and normalization theory.
- Be familiar with some of the current challenges facing database professionals.

C S 455 : Computer Graphics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Odd Yrs.

PREREQUISITE: C S 340 & MATH 313

DESCRIPTION: Interactive computer graphics systems programming and architecture.

Course Outcomes
- Students will be proficient in basic computer graphics algorithms such as modeling, trnasformations and rendering.Students will design and code solutions to several programming problems in graphics using algorithms and data structures.In addition, sutudents will use these techniques to program a large semester project.

C S 456 : Introduction to User Interface Software. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: C S 256 & C S 355; or C S 301R & C S 355

DESCRIPTION: Introduction to software architectures and techniques for graphical user interfaces. Input devices, windowing systems, event-driven programming, interactive geometry.

Course Outcomes
- Understand and apply the following:Multiple mechanisms for receiving information from people and presenting information to people.The geometry of basic shapes and how to use the geometry to solve basic interaction problems.Algorithms for user interface layout management.Models for specifying and evaluating user input dialogs.

C S 460 : Computer Communications and Networking. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: C S 360

DESCRIPTION: Introduction to data communications and computer networking. Communications fundamentals, computer networks, software, architecture, telecommunications, regulation, standards.

Course Outcomes
- Understand the principles of the Internet architecture
- Understand how the Internet works, from the transport layer down to the physical layer
- Gain hands-on experience with implementing and simulating transport, routing, and MAC protocols, leading to a deeper understanding of these critical Internet components
- Be capable of reading and understanding research papers in the area of computer networking
- Demonstrate the ability to effectively conduct, describe and report on an experimental research project in the area of computer networking

C S 462 : Large-Scale Distributed System Design. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: C S 340 & C S 360

DESCRIPTION: Designing and implementing client-server enterprise applications. Web servers, application servers, database connectivity, remote procedure calls, transactions, messaging, directory, naming services, threads, security, data formats.

Course Outcomes
- Enterprise Web application development

C S 465 : Computer Security. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: C S 360 or concurrent enrollment.

DESCRIPTION: Introduction to computer security fundamentals: confidentiality, integrity, authentication, and access control. Secret key and public key cryptography, network security protocols, viruses, and fire walls.

Course Outcomes
- Implement a cryptographic algorithm from a standards specification.
- Demonstrate how attackers compromise real-world systems, and then show how to prevent these attacks.

C S 470 : Introduction to Artificial Intelligence. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C S 312 & MATH 313 & STAT 121; or instructor's consent.

DESCRIPTION: Introduction to core areas of artifical intelligence; intelligent agents, problem solving and search, knowledge-based systems and inference, planning, uncertainty, learning, and perception.

Course Outcomes
- from business, medicine, robotics, gaming, and machine learning
- Does it require basic control?Does it involve uncertain reasoning?Does it have a simple goal, sophisticated utility, or multiple attributes?Does it require sequential choice or planning?How may decision makers are involved?
- What is the internal representation?What performance criteria are relevant?What is the nature of the environment?What are the actuators?What are the sensors?What are the agent's utilities?How is uncertainty represented?
- Uninformed, informed, constraint-satisfaction, hill-climbing, and stochastic (e.g., genetic algorithms) searchMarkov provesses, Bayes rule, Bayes nets, Hidden Markov Models, Grid Filters, and Kalman FiltersExpected utility theoryMulti-attribute utility theorySequential choice under uncertainty: value and policy iterationMinimax solutions from game theory: alpha-beta pruning
- Determine whether your solution is correctExpress the quality of your solutionValue the need to communicate your solution to others

C S 478 : Tools for Machine Learning and Data Mining. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 312 & MATH 313 & STAT 121

DESCRIPTION: Machine learning and data mining models and other mechanisms allowing computers to learn and find knowledge from data.

Course Outcomes
- Take your computer to school
- You will be able to recognize when machine learning and data mining tools are applicable.
- You will be able to plan and execute successful machine learning and data mining projects, including selecting an adequate process for your specific task and avoiding the main data mining pitfalls.

C S 484 : Parallel Processing. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: C S 360

DESCRIPTION: Theoretical and practical study of parallel processing including multi-core, fine-grained, and clustered architectures, parallel programming languages, and parallel algorithms.

Course Outcomes
- Use multiple processors to solve a problem faster
- Understand the metrics that are used to evaluate effective applications.

EC EN 360 : Electromagnetic Fields and Waves. (4:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 314 & MATH 334 & EC EN 240

DESCRIPTION: Analysis of transmission lines and electromagnetic waves including the development and application of Maxwell's equations.

Course Outcomes

- Application of differential equations to wave propagation.
- Application of integral multivariate calculus to solve for electromagnetic fields.
- Application of complex variables to phasor solutions of wave equations.
- Ability to analyze the interaction of electromagnetic fields with structures and materials.

MATH 314 : Calculus of Several Variables. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 313.

DESCRIPTION: Partial differentiation, the Jacobian matrix, and integral theorems of vector calculus.

Course Outcomes

- This course is aimed at students majoring in mathematical and physical sciences, and engineering, and students minoring in mathematics or mathematical education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed manipulative skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus of several variables extends the concepts of limit, integral, and derivative from one dimension to higher dimensional settings and is therefore fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information visit the Math 314 Wiki page.

3. 500-level EC En or Computer Science courses.
4. Other courses as approved by the department.

Note: Contact the Electrical and Computer Engineering Department for current information about added and/or deleted courses, as well as information about when courses are offered.

*Hours include courses that may fulfill university core requirements.

Learning Outcomes

1. **Fundamentals:** An ability to apply knowledge of mathematics (differential, integral, and multivariate calculus; linear algebra; complex variables; differential equations; discrete math; and probability), science (Newtonian mechanics; electricity and magnetism; and introductory chemistry), computer fundamentals (programming languages; computer organization; and software/hardware interfaces), and engineering science (signals and systems, electromagnetics, and electronic devices).
2. **Experiments and data analysis:** An ability to design and conduct experiments, as well as to analyze and interpret data.
3. **System design:** An ability to design a system component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. **Teamwork:** An ability to function on multi-disciplinary teams.
5. **Leadership:** An understanding of principles of leadership and project management.
6. **Engineering problems:** An ability to identify, formulate, and solve engineering problems.
7. **Ethics:** An understanding of professional and ethical responsibility.
8. **Communication skills:** An ability to communicate effectively.
9. **Broad education:** The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
10. **Lifelong learning:** A recognition of the need for, and an ability to engage in life-long learning.
11. **Contemporary issues:** A knowledge of contemporary issues.
12. **Techniques, skills, and tools:** An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following prerequisite courses:

MATH 112 : Calculus 1. (4:5:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

MATH 113 : Calculus 2. (4:5:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 112.
DESCRIPTION: Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 2 develops techniques of integration, applications of integration, infinite sequences and series, parametric curves, polar coordinates, and conic sections. This course contributes to all the expected learning outcomes of the Mathematics BS. For a more detailed course description, visit the Math 113 Wiki page.

PHSCS 121 : Introduction to Newtonian Mechanics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Calculus or concurrent enrollment.

DESCRIPTION: Linear, circular, and projectile motion; their prediction from forces and torques. Conservation of energy and momentum. Weekly lab.

Course Outcomes

- Convert quantities from one set of units to another and use a reasonable number of significant digits when expressing answers.
- Compute a particle's classical translational motion in one or two dimensions, including circular motion, both in Cartesian coordinates and in polar coordinates.
- Use the ideas of energy, work, power, linear momentum, and angular momentum to arrive at conclusions about the motion of a system, including the motion of satellites and the planets.
- Use Newton's Second Law to calculate the motion of objects, including those in simple harmonic motion, as well as the forces and torques acting on systems in equilibrium.
- Demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strenghts and weaknesses of this process

PHSCS 220 : Introduction to Electricity and Magnetism. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: MATH 113; Phscs 121 or equivalent.

DESCRIPTION: Electricity and magnetism. Weekly lab.

Course Outcomes

There are no course outcomes available

2. Complete the following supporting courses:

CHEM 105 : General College Chemistry. (4:5:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 110 (or equivalent) or concurrent enrollment.

DESCRIPTION: Atomic and molecular structure including bonding and periodic properties of the elements; reaction energetics, electrochemistry, acids and bases, inorganic and organic chemistry.

NOTE: Primarily for students in engineering and biological sciences. Three lectures and two recitation sections per week.

Course Outcomes

- Students will demonstrate a familiarity with the basic vocabulary and concepts of chemistry.
- Students will demonstrate a qualitative and basic quantitative understanding of the fundamental chemical laws which govern the material substances in our universe and which express how one variable in nature depends on another.
- Students will demonstrate the ability to manipulate quantitative descriptors of natural phenomena expressed both in the form of equations and of proportionalities, and solve chemistry problems using these skills.
- A successful Chemistry 105 students describes chemical phenomenon by first focusing on properties of the elements at the atomic level. Chemistry 105 students will gain a knowledge base of reactivity patterns of elements and compounds.
- Chemistry 105 students will be able to use their chemistry experience, knowledge, and skills to better understand and work in their own field of study.

Or

CHEM 111 : Principles of Chemistry. (4:3:3)

OFFERED: Honors also.

WHEN TAUGHT: Fall

PREREQUISITE: Math 110 or equivalent.

RECOMMENDED: High school chemistry, physics, and introductory calculus or concurrent enrollment in Math 112.

DESCRIPTION: Stoichiometry, kinetic-molecular theory, thermodynamics, states of matter, solutions and equilibria, electrochemistry, structure and bonding, chemical reactions, kinetics.

NOTE: Tutorial included.

Course Outcomes

- Students will demonstrate the ability to use valence shell and molecular orbital models of bonding to predict molecular shapes, reactivity, and spectroscopic properties.
- Students will be able to apply the kinetic theory of gases, including properties of ideal gases and interactions that lead to non-ideal behavior, to predict gas behavior with varied temperature, pressure and volume.
- Students will demonstrate the ability to use core concepts of chemical thermodynamics, with emphasis on the first and second laws, to predict physical changes and reaction outcomes based on Gibbs energies.
- Students will be able to apply concepts of the quantum mechanical nature of light and matter to explain observations that originally led to the development of atomic theory.

: Honors Principles of Chemistry.

Course Outcomes

C S 142 : Introduction to Computer Programming. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Knowledge of algebra.

DESCRIPTION: Introduction to object-oriented program design and development. Principles of algorithm formulation and implementation.

Course Outcomes

- Use the rudiments of the environment and the resources available to help them program (editors, basic computer architecture, compilers, libraries, reference manuals, on-line help).Develop programs from an English description.Write programs on their own, independent of "hand holding" by a TA or an instructor (typically a dozen or so).Understand and use the basic programming constructs: types (built in types, basic provided types including arrays and strings, type construction), values (constants,variables, assignment statements, and expressions), control structures (sequential flow, conditional statements, and loops), and I/O (basic output to the screen and input from the keyboard, and file I/O).Understand and use objects (value representation, applicable operations, hidden implementations).Implement basic recursive algorithms.Describe and use the basic ideas of some of the more advanced programming constructs,including exceptions, inheritance, and polymorphism.
- AbstractionDebugging and Assurance of CorrectnessProgram Development (analysis, specification, design, implementation, testing)

C S 235 : Data Structures and Algorithms. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: C S 142

DESCRIPTION: Fundamental data structures and algorithms of computer science; basic algorithm analysis; recursion; sorting and searching; lists, stacks, queues, trees, hashing; object-oriented data abstraction.

Course Outcomes

- Use the fundamental data types of computing (lists, stacks, queues, priority queues, sets, maps, trees, etc.).
- Understand the major techniques for implementing the fundamental data types (linked lists, binary search trees, hashing, heaps, etc.) and implement several of them.
- Properly use and select data structures from language-provided data-structure libraries.
- Apply basic algorithm analysis.
- Understand how recursion works and write programs using recursion to solve problems.
- Make informed decisions about which sorting and searching algorithms to use in specific circumstances.
- Write programs that require ~500 lines of code.

ENGL 312 : Persuasive Writing. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Expository and persuasive writing focusing on practical reasons for evaluating audiences, generating and structuring an argument, and making stylistic decisions. Library research paper.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including creating and/or finding ideas, evidence, and data to write about; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Create an appropriate ethos in both writing and speaking.
- Analyze the parts of an argument; evaluate them in terms of the intended audience; and generate a reasonable argument for a specific audience.Anticipate and effectively respond to audience objections and counterarguments.

Or

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an

appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

MATH 313 : Elementary Linear Algebra. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 112.

RECOMMENDED: Math 290.

DESCRIPTION: Linear systems, matrices, vectors and vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and eigenvectors.

Course Outcomes
- This course is aimed at majors in mathematics, the physical sciences, engineering, and other students interested in applications of mathematics to their disciplines. Linear algebra is used more than any other form of advanced mathematics in industry and science. A key idea is the mathematical modeling of a problem via systems of linear equations. For more detailed information visit the Math 313 Wiki page.

: Honors Elementary Linear Algebra. (3:3:1)

Course Outcomes

MATH 314 : Calculus of Several Variables. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 313.

DESCRIPTION: Partial differentiation, the Jacobian matrix, and integral theorems of vector calculus.

Course Outcomes
- This course is aimed at students majoring in mathematical and physical sciences, and engineering, and students minoring in mathematics or mathematical education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed manipulative skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus of several variables extends the concepts of limit, integral, and derivative from one dimension to higher dimensional settings and is therefore fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information visit the Math 314 Wiki page.

MATH 334 : Ordinary Differential Equations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Math 113 and Math 313.

DESCRIPTION: Methods and theory of ordinary differential equations.

Course Outcomes
There are no course outcomes available

3. Complete the following:

EC EN 191 : New Student Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of electrical and computer engineering with group and individual design projects.

Course Outcomes
- Understand the discipline of electrical and computer engineering and its many roles in the modern technological world.

EC EN 220 : Fundamentals of Digital Systems. (3:3:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 142 or concurrent enrollment.

DESCRIPTION: Digital logic: theory, design, and implementation of combinational and sequential logic. Laboratory experience in construction of digital logic circuits.

Course Outcomes
- Ability to design, minimize, and analyze a combinational network
- Ability to design and analyze a sequential network.
- Ability to design and test a digital system that includes I/O, state machines and combinational networks.
- Ability to design major components of a simple microprocessor.
- Ability to use schematic capture tools.

EC EN 240 : Circuit Analysis and Laboratory. (4:3:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 113 & PHSCS 220; Average of B or better in completed Math and Physics courses, or advisor approval.

DESCRIPTION: Analysis of electric circuits including transients, sinusoidal steady-state, and power. Includes labs.

NOTE: Fee.

Course Outcomes
- Application of complex variables to AC steady state circuit analysis.???
- Application of algebra, linear algebra, and circuit equivalencies to DC circuit analysis.???
- Application of differential equations to transient analysis of RC and RL circuits.???
- Application of algebra, linear algebra, and circuit equivalencies to AC circuit analysis.???
- Ability to design, analyze, and demonstrate a working integrated stereo audio amplifier system.
- Ability to use oscilloscopes, function generators, and DC power supplies in an applied design/debug environment.

EC EN 330 : Introduction to Embedded System Programming. (4:3:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C S 235 & EC EN 220

DESCRIPTION: Understanding the hardware-software interface in an embedded system. Using C and assembly language in device-driver design. Software interfacing to peripherals. Performance and memory issues. Hardware interrupt programming.

Course Outcomes
- Ability to read and interpret device specifications
- Ability to write efficient interrupt service routines
- Ability to write software to communicate with peripherals
- Ability to understand basic microprocessor architecture
- Ability to organize software in a complex embedded application
- Ability to write a user manual for an embedded application

EC EN 340 : Electronic Circuit Design 1. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240

DESCRIPTION: Analysis and design of electronic circuits with an emphasis on amplifier gain and frequency response.

Course Outcomes
- Ability to apply electronic device models to the solution of a circuit problem.???
- Ability to relate circuit theory to practice.???
- Ability to understand and develop circuit designs in a professional manner.â ¨
- Ability to document engineering/experimental results and to write summary reports.
- Ability to use specialized circuit analysis techniques including approximate equivalent circuits.â ¨
- Ability to use oscilloscopes, function generators, and DC power supplies.
- Ability to use Spice

EC EN 360 : Electromagnetic Fields and Waves. (4:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 314 & MATH 334 & EC EN 240

DESCRIPTION: Analysis of transmission lines and electromagnetic waves including the development and application of Maxwell's equations.

Course Outcomes

- Application of differential equations to wave propagation.
- Application of integral multivariate calculus to solve for electromagnetic fields.
- Application of complex variables to phasor solutions of wave equations.
- Ability to analyze the interaction of electromagnetic fields with structures and materials.

EC EN 370 : (EC En - Math 431) Probability Theory. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: MATH 313

DESCRIPTION: Axiomatic probability theory, conditional probability, discrete / continuous random variables, expectation, conditional expectation, moments, functions of random variables, multivariate distributions, laws of large numbers, central limit theorem.

Course Outcomes

- A basic understanding of probabilistic reasoning and the foundations of probability theory: sample spaces, event algebras, classical probability, and Kolmogorov's axioms.
- An understanding of random variables, distribution functions, probability mass functions, and probability density functions, including the uniform, binomial, Poisson, exponential, and Gaussian distributions.
- An understanding of multivariate distributions, independence, conditioning, and functions of random variables, including the ability to compute expectations, moments, and correlation functions.
- An understanding of characteristic functions and their relationship to linear transformations and independence.
- An understanding of convergence concepts, including the central limit theorem and the law of large numbers.
- The ability to apply probability theory to the analysis of engineering systems.

EC EN 380 : Signals and Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240 & MATH 334

DESCRIPTION: Time and frequency domain analysis of discrete or continuous systems subjected to periodic or nonperiodic input signals.

Course Outcomes

- Application of integral calculus, differential equations, complex variables, to transform analysis of a continuous-time LTI system.
- Application of integral calculus, differential equations, complex variables, to transform analysis of a discrete-time LTI system.
- Application of integral calculus to solve continuous-time convolution problems.
- Application of discrete math to solve discrete-time convolution problems.
- Ability to use Matlab or similar tools to analyze, model, simulate, and experiment with linear systems.
- Ability to interpret and synthesize signals and systems in both the time and frequency domains.
- Ability to recognize the mathematical properties of signals and systems including linearity, time invariance, causality, stability, etc.
- An understanding of the consequences and principles associated with digitally sampling and reconstructing analog signals.

EC EN 390 : Junior Team Design Project. (3:1.0:6)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 330 & EC EN 340 & EC EN 380

DESCRIPTION: Culminating design experience based on skills learned in junior-level courses. Students works in teams to plan, design, and test a project based on the integration of components built in other classes.

Course Outcomes

- Ability to complete a significant culminating design that draws upon the knowledge gained in prerequisite and concurrently enrolled course.
- Ability to assign and accept leadership responsibilities on a team.
- Ability to define, understand, and participate in team decision making processes.
- Ability to take high level, customer requirements, identify from them the specifications a solution must meet, and formulate those specifications as an engineering problem.
- Ability to combine new technology with custom built components
- Ability to apply safety issues to engineering hardware.

EC EN 391 : Junior Seminar. (.5:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240 & ENG T 231

DESCRIPTION: Seminars and colloquia on current topics in electrical and computer engineering, as well as ethics, contemporary issues, and life-long learning.

NOTE: Attendance and some writing are required.

Course Outcomes

- An understanding of professional ethics.
- Ability to use the library, internet, etc. to learn about recent developments in a particular technical field.
- Knowledge of recent developments in a particular technical field.

EC EN 490 : Team Design Project. (4:2:6)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EC EN 340 & EC EN 380; selected 400-level EC En courses, depending on project.
DESCRIPTION: Culminating design experience based on skills learned in advanced technical courses. Students work in teams to plan, design, test, and demonstrate a major project.

Course Outcomes
- Ability to define, understand, and participate in team decision making processes.
- Ability to produce and maintain the necessary control documents on a design team.
- Ability to establish and follow ground rules governing team behavior.
- Ability to give an oral presentation describing a technical design.
- Ability to understand the expectations from other members on a team.
- Ability to assign and accept leadership responsibilities on a team.
- Ability to understand the different skill sets each team member brings to a team.
- Ability to understand the expectations (regarding participation) of each team member.
- Ability to complete a significant culminating design that draws upon the knowledge gained in prerequisite courses.
- Ability to give an oral presentation describing team progress during a design review.
- An understanding of the principles of leadership and project management.
- Ability to produce a written report describing a technical design.
- Ability to take high level, customer requirements, identify from them the specifications a solution must meet, and formulate those specifications as an engineering problem.
- Ability to maintain a team portfolio documenting the design process.
- Ability to read, interpret, and use published design standards as a part of the design process.

4. Complete at least 20 hours from the following advanced technical program and technical electives:
   - Complete 12 hours from the following:

EC EN 443 : Communication and Power Circuits. (4:3:3)

WHEN TAUGHT: Winter
PREREQUISITE: EC EN 340
DESCRIPTION: Introduction to amplitude modulation, frequency modulation, and phase modulation circuits. Modulators, mixers, detectors, and the phase-locked loop. Power amplifier stage and orcillator design.

Course Outcomes
- Ability to use differential calculus for circuit optimization.
- Ability to apply probability theory to noisy circuits.
- Ability to conduct lab experiments with electronic communication circuits.
- Ability to design mixers, modulators, and power stages.
- Ability to write lab reports.
- Ability to use Spice.

EC EN 445 : Introduction to Mixed-Signal VLSI. (4:3:3)

WHEN TAUGHT: Fall
PREREQUISITE: EC EN 340
DESCRIPTION: VLSI circuit design emphasizing mixed-signal circuits such as D/A and A/D converters, phase-locked loops, S/H circuits. Associated laboratory provides layout-design experience.

Course Outcomes
- An understanding of modern VLSI processes and how this processing relates to circuit performance.
- Ability to conduct lab experiments with A/D and D/A converters.
- Ability to design a mixed-signal IC in CMOS including ADC or DAC chips
- Ability to write lab reports.
- Ability to work with design, verification, and CAD tools
- Ability to use Spice including advanced features.

EC EN 450 : Introduction to Semiconductor Devices. (3:3:1)

WHEN TAUGHT: Winter
PREREQUISITE: EC EN 340
DESCRIPTION: Physics of electronic and optical solid state devices; includes semiconductor materials, bipolar and FET device physics and modeling, optical properties of semiconductors, and lasers.

Course Outcomes
- Application of basic physical processes to model p-n junctions.
- Application of differential equations to charge transport in semiconducting material.
- Application of the physical properties of device building blocks (pn junctions, metal semiconductor interfaces, MOS structures) to model MOSFET operation.
- Application of basic microfabrication processes to design semiconductor device fabrication process flows.

EC EN 452 : Experiments in Integrated Circuit Development. (1:0:3)

WHEN TAUGHT: Winter
PREREQUISITE: ECEn 450 or concurrent enrollment.
DESCRIPTION: Measurements of key silicon properties and fabrication of integrated circuits.

Course Outcomes
- Ability to analyze and interpret data measured from fabricated devices.
- Ability to design processes for fabrication of MOSFET devices.
- Ability to use modern microelectronics fabrication equipment.

EC EN 462 : Electromagnetic Radiation and Propagation. (2:3:1)

PREREQUISITE: EC EN 360

DESCRIPTION: Electromagnetic and optical theory including guided wave theory, modes, propagation in materials, radiation analysis, antenna analysis, and aperture diffraction.

Course Outcomes

- Application of vector differential and integral equation methods to EM analysis.
- Ability to analyze wave propagation in materials and guiding structures.
- Ability to model electromagnetic fields and systems using numerical algorithms and interpret results physically.

EC EN 464 : Wireless Communication Circuits. (2:3:1)

PREREQUISITE: ECEn 462 or instructor's consent.

DESCRIPTION: Analysis, design, and fabrication of RF/microwave passive circuit structures, amplifiers, oscillators, and mixers. System concepts, including stability, gain, and noise figure.

Course Outcomes

- Ability to function in groups to design and test microwave systems.
- Facility with microwave passive and active structures.
- Ability to simulate microwave systems and components.

EC EN 466 : Introduction to Optical Engineering. (2:3:1)

PREREQUISITE: EC EN 462

DESCRIPTION: Introduces principles and practices of optical engineering including optical communications system and components.

Course Outcomes

- Application of differential equations to solve metallic and dielectric waveguide problems.
- Application of integral calculus to solve diffraction problems.
- Application of linear algebra to find propagation characteristics in anisotropic media.
- Ability to apply modern optical test equipment to measure optical communication system parameters.

EC EN 483 : (EC En-Me En 431) Design of Control Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 380; or ME EN 335

DESCRIPTION: Classical frequency response and time domain design of control systems. State-variable control and computer simulation of control systems.

Course Outcomes

- The ability to develop (nonlinear) mathematical models of complex dynamic systems.
- The ability to simplify those models into linear transfer function and state space representations.
- The ability to develop design specifications for physical systems with sensing and actuation limits.
- The ability to design PID controllers for systems described by linear time-invariant models.
- The ability to use loopshaping techniques to design frequency domain controllers for systems described by linear time-invariant models.
- The ability to design observer-based controllers for systems described by linear time-invariant models.

EC EN 485 : Introduction to Digital Communication Theory. (4:3:3)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 370 & EC EN 380

DESCRIPTION: Analysis and design of digital communications systems in AWGN: signal space concepts, modulation, matched filter and correlation detection, synchronization, performance. Computer-based design exercises.

Course Outcomes

- An understanding of the relationship between the Fourier transform of continuous-time signal and the DTFT of its samples.
- Application of linear algebra in describing digital modulation using the constellation representation.
- Application of probability and statistics to bit error rate analysis of digital communication systems.
- Ability to design the parameters of a PLL loop filter to meet given performance specifications.
- Ability to apply matched filter techniques to detection.
- Ability to simulate digital communication systems using Simulink and Matlab.

EC EN 487 : Introduction to Discrete-Time Signal Processing. (4:3:3)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 370 & EC EN 380

DESCRIPTION: Digital signal processing, fast Fourier transforms, digital filter design, spectrum analysis. Applications in speech processing, SONAR, communications, etc.

Course Outcomes

- Ability to apply principles of probablity theory for analysis and numerical estimation of power spectral densities.
- Ability to use basic DSP functions and algorithms (i.e., FIR filters, IIR filters, polyphase systems,

windows, FFTs, etc.) to formulate and solve engineering problems.
- Ability to perform experiments with real-world signals and DSP systems, including discrete-time filters, spectrum analyzer, acoustic direction finding, etc.
- Ability to use software tools such as Matlab (R) to design, implement, and debug DSP functions.
- Application of integral calculus, discrete math, and complex variables, and transform theory to discrete-time signal processing.

- Complete remaining course hours selected from the following:
  1. Additional courses listed in item 4a above.
  2. Any of the following:

C S 236 : Discrete Structures. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: C S 235

DESCRIPTION: Introduction to grammars and parsing; predicate and propositional logic; proof techniques; sets, functions, relations, relational data model; graphs and graph algorithms.

Course Outcomes
- Understand and be conversant with basic discrete mathematical structures (finite state machines, regular expressions, grammars, propositional calculus, proof techniques, predicate calculus, sets, relations, functions, graphs).Write complex programs by using mathematical concepts as the basis for solving programming problems (finite state machines for lexical analysis; grammars for parsing; propositional and predicate calculus for logic programming; sets and algebras for relational databases; algebras, graphs, and topological sorting for optimizing datalog query processing).Incrementally build sophisticated programs by a systematic design process based on discrete mathematics.Design a solution for a programming problem and justify the design as one that is maintainable and extendable by other programmers who understand and are conversant with discrete mathematical structures.
- Demonstrate ability to build large programs by writing and integrating code from a diverse spectrum of program components.

C S 240 : Advanced Programming Concepts. (4:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: C S 236

DESCRIPTION: Advanced software development with an object-oriented focus. Development and testing of several 1500 to 2000 line modules from formal specifications. UNIX and C++ environment.

Course Outcomes
- a. Use coding, testing, and debugging strategies. b. Follow basic object-oriented design concepts.
- Write programs in an Object Oriented programming language using inheritance, polymorphism and class hierarchies.
- Use the Linux programming environment to execute basic commands and to run the compiler, linker, debugger, memory checker, and profiler.
- Demonstrate the aptitude and work ethic necessary to succeed in computer science.

C S 340 : Software Design and Testing. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: C S 240

DESCRIPTION: Principles of software design, design patterns, design representation, refactoring. Principles of software quality assurance and testing. Development and testing tools.

Course Outcomes
- Articulate the principles of effective software design.
- Know when and how to apply various design patterns.
- Demonstrate how to effectively document and communicate software designs.
- Understand what quality assurance is, know how to build quality into software using review techniques, and demonstrate quality evaluation through testing.
- Use a variety of software development tools, including IDEs, automation tools, static analysis tools, source code control systems, unit testing tools, and documentation tools.
- Work effectively in a group to produce quality software using 1-5 above.

C S 345 : Operating Systems Design. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: C S 124 & C S 240

DESCRIPTION: Principles and concepts of operating systems design and the implementation of an operating system.

Course Outcomes
- Describe the basic components of an operating system and their role in implementations for general purpose, real-time, and embedded applications.
- Define the concepts of processes, threads, asynchronous signals and competitive system resource allocation.
- Show how a shell works.
- Explain what multi-tasking is and outline standard scheduling algorithms for multi-tasking.

- Discuss mutual exclusion principles and their use in concurrent programming, including semaphore construction and resource allocation.
- Give an overview of system memory management.
- Explain how file systems are implemented.
- Discuss the features and strengths of various contemporary operating systems.
- Implement a functional, pre-emptive, multi-tasking operating system written in C, including a shell, scheduler, file manager, memory manager, and synchronization components.

C S 360 : Internet Programming. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 240

DESCRIPTION: Internet application programming, including sockets, threads, CGI, database, e-commerce, Web services.

Course Outcomes

- Design and implement a variety of client-server and web applications.
- Analyze the performance of a web server, write convincingly to support your conclusions and give an oral report to describe your findings.
- Implement a web server using processes, semaphores, threads, sockets and signals.
- Use a set of web programming languages to implement an application.
- Use security to protect their web application.

C S 428 : Software Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: C S 340

DESCRIPTION: Analysis, design, implementation, and testing of significant software systems.

Course Outcomes

- Demonstrate the ability to work in a group on a significant project
- Demonstrate practices that result in quality software
- Demonstrate an understanding of how ethics impact software development

C S 431 : Algorithmic Languages and Compilers. (3:3:0)

WHEN TAUGHT: Winter, Contact Department

PREREQUISITE: C S 340

DESCRIPTION: Formal description of algorithmic languages and techniques used in their compilation: semantics, ambiguities, procedures, replication, iteration, recursion.

Course Outcomes

- Implement a fully functional compiler for a subset of the Java language that targets an embedded microprocess.
- Apply patterns and common data structures to compiler constructrion including tree traversal, graph algorithms, and proof systems.
- Students are able to synthesis algorithms and techniques from compiler constructor to other problem domains.
- Students have a sound mental model of how an abstract high level language is systematically transformed into a low-level machine langauge or byte code. Students are able to use that understanding to write better application code.

C S 452 : Database Modeling Concepts. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: C S 240

DESCRIPTION: Database models: relational, deductive, object-oriented. Integrity constraints, query languages, database design.

Course Outcomes

- Be able to use a variety of commercial query languages (SQL, XQuery, SPARQL), both stand-alone and embeded in high-level programming languages. Know how relational algebra and relational calculus provide a basis for commercial query languages.
- Understand performance issues and optimization strategies. This includes query rewriting, secondary storage characteristics, and access strategies.
- Be able to design and develop relational database applications. This includes conceptual modeling and normalization theory.
- Be familiar with some of the current challenges facing database professionals.

C S 455 : Computer Graphics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Odd Yrs.

PREREQUISITE: C S 340 & MATH 313

DESCRIPTION: Interactive computer graphics systems programming and architecture.

Course Outcomes

- Students will be proficient in basic computer graphics algorithms such as modeling, trnasformations and rendering.Students will design and code solutions to several programming problems in graphics using algorithms and data structures.In addition, sutudents will use these techniques to program a large semester project.

C S 456 : Introduction to User Interface Software. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: C S 256 & C S 355; or C S 301R & C S 355

DESCRIPTION: Introduction to software architectures and techniques for graphical user interfaces. Input devices, windowing systems, event-driven programming, interactive geometry.

Course Outcomes

- Understand and apply the following:Multiple mechanisms for receiving information from people and presenting information to people.The geometry of basic shapes and how to use the geometry to solve basic interaction problems.Algorithms for user interface layout management.Models for specifying and evaluating user input dialogs.

C S 460 : Computer Communications and Networking. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: C S 360

DESCRIPTION: Introduction to data communications and computer networking. Communications fundamentals, computer networks, software, architecture, telecommunications, regulation, standards.

Course Outcomes

- Understand the principles of the Internet architecture
- Understand how the Internet works, from the transport layer down to the physical layer
- Gain hands-on experience with implementing and simulating transport, routing, and MAC protocols, leading to a deeper understanding of these critical Internet components
- Be capable of reading and understanding research papers in the area of computer networking
- Demonstrate the ability to effectively conduct, describe and report on an experimental research project in the area of computer networking

C S 462 : Large-Scale Distributed System Design. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: C S 340 & C S 360

DESCRIPTION: Designing and implementing client-server enterprise applications. Web servers, application servers, database connectivity, remote procedure calls, transactions, messaging, directory, naming services, threads, security, data formats.

Course Outcomes

- Enterprise Web application development

C S 465 : Computer Security. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: C S 360 or concurrent enrollment.

DESCRIPTION: Introduction to computer security fundamentals: confidentiality, integrity, authentication, and access control. Secret key and public key cryptography, network security protocols, viruses, and fire walls.

Course Outcomes

- Implement a cryptographic algorithm from a standards specification.
- Demonstrate how attackers compromise real-world systems, and then show how to prevent these attacks.

C S 470 : Introduction to Artificial Intelligence. (3:3:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C S 312 & MATH 313 & STAT 121; or instructor's consent.

DESCRIPTION: Introduction to core areas of artifical intelligence; intelligent agents, problem solving and search, knowledge-based systems and inference, planning, uncertainty, learning, and perception.

Course Outcomes

- from business, medicine, robotics, gaming, and machine learning
- Does it require basic control?Does it involve uncertain reasoning?Does it have a simple goal, sophisticated utility, or multiple attributes?Does it require sequential choice or planning?How may decision makers are involved?
- What is the internal representation?What performance criteria are relevant?What is the nature of the environment?What are the actuators?What are the sensors?What are the agent's utilities?How is uncertainty represented?
- Uninformed, informed, constraint-satisfaction, hill-climbing, and stochastic (e.g., genetic algorithms) searchMarkov provesses, Bayes rule, Bayes nets, Hidden Markov Models, Grid Filters, and Kalman FiltersExpected utility theoryMulti-attribute utility theorySequential choice under uncertainty: value and policy iterationMinimax solutions from game theory: alpha-beta pruning
- Determine whether your solution is correctExpress the quality of your solutionValue the need to communicate your solution to others

C S 478 : Tools for Machine Learning and Data Mining. (3:3:0)

WHEN Fall; Winter

TAUGHT:
PREREQUISITE: C S 312 & MATH 313 & STAT 121
DESCRIPTION: Machine learning and data mining models and other mechanisms allowing computers to learn and find knowledge from data.

Course Outcomes
- Take your computer to school
- You will be able to recognize when machine learning and data mining tools are applicable.
- You will be able to plan and execute successful machine learning and data mining projects, including selecting an adequate process for your specific task and avoiding the main data mining pitfalls.

EC EN 320 : Digital System Design. (4:3:3)

WHEN TAUGHT: Winter
PREREQUISITE: EC EN 220 & EC EN 240
DESCRIPTION: Advanced digital design, including hardware description languages, electrical properties of digital circuits, synchronous and asynchronous circuits, computer arithmetic, and interfacing to external circuitry.

Course Outcomes
- Ability to describe a digital system in VHDL.
- Ability to simulate and debug a digital system described in VHDL.
- Ability to read and interpret a data sheet.
- Ability to implement logic using an FPGA.
- Ability to synchronize asynchronous inputs into a synchronous system and analyze the MTBF.

EC EN 425 : Real-Time Operating Systems. (4:3:3)

WHEN TAUGHT: Fall
PREREQUISITE: EC EN 324; or EC EN 330
DESCRIPTION: Hardware/software interface, real-time kernel internals, implementation of high-level language constructs, issues in real-time application software development.

Course Outcomes
- Ability to apply C and assembly programming languages and knowledge of the hardware/software interface to the design and implementation of a real-time kernel.
- Ability to design and implement a real-time application.
- Ability to design and implement a real-time kernel.
- Ability to use C programs, compilers, and debuggers in the design and implementation of real-time application software.
- Ability to write interrupt service routines.
- Ability to use a real-time operating system as a tool in the development of real-time application software.

EC EN 427 : Embedded Systems. (4:3:3)

WHEN TAUGHT: Fall
PREREQUISITE: EC EN 320 & EC EN 324; or EC EN 320 & EC EN 330
DESCRIPTION: Interfacing digital hardware components to an embedded system processor. Developing the hardware-software interface. Developing application software. Using C and assembly language in device-driver design, monitor-debugger, and real-time kernel. Lab.

Course Outcomes
- Ability to design a bus-based digital I/O device.
- System design project integrating custom bus-based digital I/O device.
- Ability to interface to a processor or I/O bus.
- Ability to read and interpret device specifications (data sheets) in order to integrate a device within a microprocessor based system.
- Ability to use DMA for a high-bandwidth I/O device.

EC EN 451 : Introduction to Digital VLSI Circuits. (4:3:5)

WHEN TAUGHT: Winter
PREREQUISITE: EC EN 320 & EC EN 340
DESCRIPTION: Design of very large-scale integrated circuits for digital systems. CAD tools used extensively to simulate the design and create and verify mask circuits.

Course Outcomes
- Ability to analyze CMOS circuits.
- Ability to translate digital logic to CMOS circuits to achieve desired behavior and performance requirements.
- Ability to perform CMOS layout.
- Ability to use eCAD tools for CMOS design.
- Ability to characterize timing and noise in CMOS circuits.

MATH 341 : Theory of Analysis 1. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: Math 113 and Math 290.

DESCRIPTION: Rigorous treatment of calculus of a single real variable: topology, order, completeness of real numbers; continuity, differentiability, integrability, and convergence of functions.

Course Outcomes
- The main purpose of this course is to provide students with an understanding of the real number system and of real-valued functions of a single real variable, with the focus being on the theoretical and logical foundations of single-variable calculus. A secondary purpose of this course is to reinforce students' prior training in discovering and writing valid mathematical proofs.For more detailed information visit the Math 341 Wiki.

MATH 342 : Theory of Analysis 2. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MATH 313 & MATH 341

DESCRIPTION: Rigorous treatment of calculus of several real variables; metric spaces, geometry and topology of Euclidean space, differentiation implicity function theorem, integration on sets and manifolds.

Course Outcomes
- Math 342 is the multivariable sequel to Math 341. Itprovides a rigorous treatment of multivariable calculus. Unlike the case with Math 341, Math 342 students are not required to have had an introductory course in the subject matter, so Math 342 needs to treat both computation and theory in some depth.For more detailed information visit the Math 342 Wiki entry.

MATH 352 : Introduction to Complex Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MATH 290; Math 341 or concurrent enrollment.

DESCRIPTION: Complex algebra, analytic functions, integration in the complex plane, infinite series, theory of residues, conformal mapping.

Course Outcomes
- This course is aimed at graduates majoring in mathematical and physical sciences and engineering. In addition to being an important branch of mathematics in its own right, complex analysis is an important tool for differential equations (ordinary and partial), algebraic geometry and number theory. Thus it is a core requirement for all mathematics majors. It contributes to all the expected learning outcomes of the Mathematics BS degree.For more detailed information visit the Math 352 Wiki page.
- Students will master complex numbers, limits, analytic functions, elementary functions in the complex plane, contour integrals, Taylor series, Laurent series, isolated singularities, residue theory and applications, and conformal mappings.

MATH 355 : Graph Theory. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: MATH 313

DESCRIPTION: Maps, graphs and digraphs, coloring problems, applications.

Course Outcomes
- Graphs, trees, pathes and cycles, connectedness, chromatic number, planarity conditions, genus of a graph, the Five Color Theorem. Students should also be aware of Kuratowsky's Theorem, and the Four Color Theorem. If there is time, it is good to do the proof of Kuratowski's Theorem. For more detailed information visit the Math 355 Wiki page.

MATH 371 : Abstract Algebra 1. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 290 & MATH 313

DESCRIPTION: Groups, group homomorphisms, rings, ideals, and polynomials.

Course Outcomes
- This course is aimed at undergraduate mathematics and mathematics education majors. It is a first course in abstract algebra. In addition to being an important branch of mathematics in its own right, abstract algebra is now an essential tool in number theory, geometry, topology, and, to a lesser extent, analysis. Thus it is a core requirement for all mathematics majors. Outside of mathematics, algebra also has applications in cryptography, coding theory, quantum chemistry, and physics. For more detailed information visit the Math 371 Wiki page.

MATH 372 : Abstract Algebra 2. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MATH 371

DESCRIPTION: Fields, Galois theory, solvability of polynomials by radicals.

Course Outcomes
- Students should achieve mastery of the topics listed in the minimal learning outcomes on the Math 372 Wiki page. This means that they should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the below concepts, related to, but

not identical to, statements proven by the text or instructor.

MATH 411 : Numerical Methods. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 334

DESCRIPTION: Iterative solvers for linear systems, eigenvalue, eigenvector approximations, numerical solutions to nonlinear systems, numerical techniques for initial and boundary value problems, elementary solvers for PDEs.

Course Outcomes

- Students should be able to describe, derive, and implement the numerical methods listed on the Math 411 Wiki page. They should be able to explain the advantages and disadvantages of each method. They should understand error analysis and be able to make practical decisions based on the outcomes of that analysis.

MATH 447 : Introduction to Partial Differential Equations. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 303; or MATH 314 & MATH 334

DESCRIPTION: Boundary value problems; transform methods; Fourier series; Bessel functions; Legendre polynomials.

Course Outcomes

- The main purpose of this course is to teach students how to solve the canonical linear second-order partial differential equations on simple domains. Secondarily, students should be introduced to the theory concerning the validity of such solutions.For more detailed information visit the Math 447 Wiki page.

MATH 450 : Combinatorics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 371

DESCRIPTION: Permutations, combinations, recurrence relations, applications.

Course Outcomes

- Permutations and combinations basics, including the Pigeonhole Principle, binomial coefficients and the Binomial Theorem, Stirling's Approximation, Inclusion/exclusion, Generating functions and recurrence relations (rational functions), Groups, permutations and counting problems -- Polya's Theorem. For more detailed information visit the Math 450 Wiki page.

MATH 487 : Number Theory. (3:3:0)

WHEN TAUGHT: Fall; Summer

PREREQUISITE: MATH 371

DESCRIPTION: Foundations; congruences; quadratic reciprocity; unique factorization, prime distribution or Diophantine equations.

Course Outcomes

- Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the below concepts, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 487 Wiki page.

PHSCS 222 : Modern Physics. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: PHSCS 123 & PHSCS 220; Phscs 121 or equivalent.

DESCRIPTION: Quantum physics, atoms, molecules, condensed matter, nuclei, elementary particles, and selected topics in contemporary physics.

Course Outcomes

- Demonstrate their understanding of the fundamental postulates and principles of special relativity and quantum mechanics.
- Apply the principles of quantum mechanics to predict the results of measurements in simple systems such as a free particle, simple potential wells, and central potentials.
- Solve problems and answer conceptual questions applying the principles of quantum mechanics and special relativity to topics in modern physics such as atomic physics, molecular physics, the physics of solids, statistical physics, nuclear physics, radioactivity, and particle physics.

3. 500-level EC En, C S, or Math courses.
4. Other engineering, mathematics, physics, or computer science courses as specified or courses as approved by the Electrical and Computer Engineering Department.

Note: Contact the Electrical and Computer Engineering Department for current information about added and/or deleted courses, as well as information about when courses are offered.

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

EC EN 191 : New Student Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of electrical and computer engineering with group and individual design projects.

Course Outcomes

- Understand the discipline of electrical and computer engineering and its many roles in the modern technological world.

EC EN 199R : Academic Internship. (.5-3:ARR:ARR)

PREREQUISITE: Department chair's and internship coordinator's consent.

DESCRIPTION: Work experience evaluated by supervisor and posted on student's transcript.

Course Outcomes

- Student acquires professional experiences in the discipline.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

200-Level Courses

EC EN 220 : Fundamentals of Digital Systems. (3:3:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 142 or concurrent enrollment.

DESCRIPTION: Digital logic: theory, design, and implementation of combinational and sequential logic. Laboratory experience in construction of digital logic circuits.

Course Outcomes

- Ability to design, minimize, and analyze a combinational network
- Ability to design and analyze a sequential network.
- Ability to design and test a digital system that includes I/O, state machines and combinational networks.
- Ability to design major components of a simple microprocessor.
- Ability to use schematic capture tools.

EC EN 240 : Circuit Analysis and Laboratory. (4:3:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 113 & PHSCS 220; Average of B or better in completed Math and Physics courses, or advisor approval.

DESCRIPTION: Analysis of electric circuits including transients, sinusoidal steady-state, and power. Includes labs.

NOTE: Fee.

Course Outcomes

- Application of complex variables to AC steady state circuit analysis.???
- Application of algebra, linear algebra, and circuit equivalencies to DC circuit analysis.???
- Application of differential equations to transient analysis of RC and RL circuits.???
- Application of algebra, linear algebra, and circuit equivalencies to AC circuit analysis.???
- Ability to design, analyze, and demonstrate a working integrated stereo audio amplifier system.
- Ability to use oscilloscopes, function generators, and DC power supplies in an applied design/debug environment.

300-Level Courses

EC EN 301 : Elements of Electrical Engineering. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: PHSCS 220 & MATH 303; or PHSCS 220 & MATH 334

DESCRIPTION: Linear electric circuits, computer organization, and logic circuits for nonmajors.
NOTE: Fee.

Course Outcomes
- Understand and apply basic principles of electronic circuits.

EC EN 320 : Digital System Design. (4:3:3)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 220 & EC EN 240

DESCRIPTION: Advanced digital design, including hardware description languages, electrical properties of digital circuits, synchronous and asynchronous circuits, computer arithmetic, and interfacing to external circuitry.

Course Outcomes
- Ability to describe a digital system in VHDL.
- Ability to simulate and debug a digital system described in VHDL.
- Ability to read and interpret a data sheet.
- Ability to implement logic using an FPGA.
- Ability to synchronize asynchronous inputs into a synchronous system and analyze the MTBF.

EC EN 324 : Computer Systems. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: EC EN 220 & C S 235

DESCRIPTION: Machine-level representations of programs and data, processor architecture, program performance optimizaton, memory hierarchies, virtual memory, linking, exceptions.

Course Outcomes
- Ability to understand and optimize programs from the assembly code output by the compiler.
- Ability to modify a CPU design to add instructions and to improve the overall efficiency of pipelined execution.
- Ability to design and verify software that exploits a buffer-overflow security flaw in example code.
- Ability to use a C compiler, a disassembler, a debugger, and CPU emulators to develop, debug, test, analyze, and optimize programs.

EC EN 330 : Introduction to Embedded System Programming. (4:3:3)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C S 235 & EC EN 220

DESCRIPTION: Understanding the hardware-software interface in an embedded system. Using C and assembly language in device-driver design. Software interfacing to peripherals. Performance and memory issues. Hardware interrupt programming.

Course Outcomes
- Ability to read and interpret device specifications
- Ability to write efficient interrupt service routines
- Ability to write software to communicate with peripherals
- Ability to understand basic microprocessor architecture
- Ability to organize software in a complex embedded application
- Ability to write a user manual for an embedded application

EC EN 340 : Electronic Circuit Design 1. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240

DESCRIPTION: Analysis and design of electronic circuits with an emphasis on amplifier gain and frequency response.

Course Outcomes
- Ability to apply electronic device models to the solution of a circuit problem.???
- Ability to relate circuit theory to practice.???
- Ability to understand and develop circuit designs in a professional manner.â ¨
- Ability to document engineering/experimental results and to write summary reports.
- Ability to use specialized circuit analysis techniques including approximate equivalent circuits.â ¨
- Ability to use oscilloscopes, function generators, and DC power supplies.
- Ability to use Spice

EC EN 360 : Electromagnetic Fields and Waves. (4:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 314 & MATH 334 & EC EN 240

DESCRIPTION: Analysis of transmission lines and electromagnetic waves including the development and application of Maxwell's equations.

Course Outcomes
- Application of differential equations to wave propagation.
- Application of integral multivariate calculus to solve for electromagnetic fields.
- Application of complex variables to phasor solutions of wave equations.
- Ability to analyze the interaction of electromagnetic fields with structures and materials.

EC EN 370 : (EC En - Math 431) Probability Theory. (3:3:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: MATH 313

DESCRIPTION: Axiomatic probability theory, conditional probability, discrete / continuous random variables, expectation, conditional expectation, moments, functions of random variables, multivariate distributions, laws of large numbers, central limit theorem.

Course Outcomes

- A basic understanding of probabilistic reasoning and the foundations of probability theory: sample spaces, event algebras, classical probability, and Kolmogorov's axioms.
- An understanding of random variables, distribution functions, probability mass functions, and probability density functions, including the uniform, binomial, Poisson, exponential, and Gaussian distributions.
- An understanding of multivariate distributions, independence, conditioning, and functions of random variables, including the ability to compute expectations, moments, and correlation functions.
- An understanding of characteristic functions and their relationship to linear transformations and independence.
- An understanding of convergence concepts, including the central limit theorem and the law of large numbers.
- The ability to apply probability theory to the analysis of engineering systems.

EC EN 380 : Signals and Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240 & MATH 334

DESCRIPTION: Time and frequency domain analysis of discrete or continuous systems subjected to periodic or nonperiodic input signals.

Course Outcomes

- Application of integral calculus, differential equations, complex variables, to transform analysis of a continuous-time LTI system.
- Application of integral calculus, differential equations, complex variables, to transform analysis of a discrete-time LTI system.
- Application of integral calculus to solve continuous-time convolution problems.
- Application of discrete math to solve discrete-time convolution problems.
- Ability to use Matlab or similar tools to analyze, model, simulate, and experiment with linear systems.
- Ability to interpret and synthesize signals and systems in both the time and frequency domains.
- Ability to recognize the mathematical properties of signals and systems including linearity, time invariance, causality, stability, etc.
- An understanding of the consequences and principles associated with digitally sampling and reconstructing analog signals.

EC EN 390 : Junior Team Design Project. (3:1.0:6)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 330 & EC EN 340 & EC EN 380

DESCRIPTION: Culminating design experience based on skills learned in junior-level courses. Students works in teams to plan, design, and test a project based on the integration of components built in other classes.

Course Outcomes

- Ability to complete a significant culminating design that draws upon the knowledge gained in prerequisite and concurrently enrolled course.
- Ability to assign and accept leadership responsibilities on a team.
- Ability to define, understand, and participate in team decision making processes.
- Ability to take high level, customer requirements, identify from them the specifications a solution must meet, and formulate those specifications as an engineering problem.
- Ability to combine new technology with custom built components
- Ability to apply safety issues to engineering hardware.

EC EN 391 : Junior Seminar. (.5:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 240 & ENG T 231

DESCRIPTION: Seminars and colloquia on current topics in electrical and computer engineering, as well as ethics, contemporary issues, and life-long learning.

NOTE: Attendance and some writing are required.

Course Outcomes

- An understanding of professional ethics.
- Ability to use the library, internet, etc. to learn about recent developments in a particular technical field.
- Knowledge of recent developments in a particular technical field.

400-Level Courses

EC EN 425 : Real-Time Operating Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 324; or EC EN 330

DESCRIPTION: Hardware/software interface, real-time kernel internals, implementation of high-level language constructs, issues in real-time application software development.

Course Outcomes

- Ability to apply C and assembly programming languages and knowledge of the hardware/software interface to the design and implementation of a real-time kernel.
- Ability to design and implement a real-time application.
- Ability to design and implement a real-time kernel.
- Ability to use C programs, compilers, and debuggers in the design and implementation of real-time application

software.
- Ability to write interrupt service routines.
- Ability to use a real-time operating system as a tool in the development of real-time application software.

EC EN 427 : Embedded Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 320 & EC EN 324; or EC EN 320 & EC EN 330

DESCRIPTION: Interfacing digital hardware components to an embedded system processor. Developing the hardware-software interface. Developing application software. Using C and assembly language in device-driver design, monitor-debugger, and real-time kernel. Lab.

Course Outcomes
- Ability to design a bus-based digital I/O device.
- System design project integrating custom bus-based digital I/O device.
- Ability to interface to a processor or I/O bus.
- Ability to read and interpret device specifications (data sheets) in order to integrate a device within a microprocessor based system.
- Ability to use DMA for a high-bandwidth I/O device.

EC EN 443 : Communication and Power Circuits. (4:3:3)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 340

DESCRIPTION: Introduction to amplitude modulation, frequency modulation, and phase modulation circuits. Modulators, mixers, detectors, and the phase-locked loop. Power amplifier stage and orcillator design.

Course Outcomes
- Ability to use differential calculus for circuit optimization.
- Ability to apply probability theory to noisy circuits.
- Ability to conduct lab experiments with electronic communication circuits.
- Ability to design mixers, modulators, and power stages.
- Ability to write lab reports.
- Ability to use Spice.

EC EN 445 : Introduction to Mixed-Signal VLSI. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 340

DESCRIPTION: VLSI circuit design emphasizing mixed-signal circuits such as D/A and A/D converters, phase-locked loops, S/H circuits. Associated laboratory provides layout-design experience.

Course Outcomes
- An understanding of modern VLSI processes and how this processing relates to circuit performance.
- Ability to conduct lab experiments with A/D and D/A converters.
- Ability to design a mixed-signal IC in CMOS including ADC or DAC chips
- Ability to write lab reports.
- Ability to work with design, verification, and CAD tools
- Ability to use Spice including advanced features.

EC EN 450 : Introduction to Semiconductor Devices. (3:3:1)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 340

DESCRIPTION: Physics of electronic and optical solid state devices; includes semiconductor materials, bipolar and FET device physics and modeling, optical properties of semiconductors, and lasers.

Course Outcomes
- Application of basic physical processes to model p-n junctions.
- Application of differential equations to charge transport in semiconducting material.
- Application of the physical properties of device building blocks (pn junctions, metal semiconductor interfaces, MOS structures) to model MOSFET operation.
- Application of basic microfabrication processes to design semiconductor device fabrication process flows.

EC EN 451 : Introduction to Digital VLSI Circuits. (4:3:5)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 320 & EC EN 340

DESCRIPTION: Design of very large-scale integrated circuits for digital systems. CAD tools used extensively to simulate the design and create and verify mask circuits.

Course Outcomes
- Ability to analyze CMOS circuits.
- Ability to translate digital logic to CMOS circuits to achieve desired behavior and performance requirements.
- Ability to perform CMOS layout.
- Ability to use eCAD tools for CMOS design.
- Ability to characterize timing and noise in CMOS circuits.

EC EN 452 : Experiments in Integrated Circuit Development. (1:0:3)

WHEN TAUGHT: Winter

PREREQUISITE: ECEn 450 or concurrent enrollment.

DESCRIPTION: Measurements of key silicon properties and fabrication of integrated circuits.

Course Outcomes
- Ability to analyze and interpret data measured from fabricated devices.
- Ability to design processes for fabrication of MOSFET devices.
- Ability to use modern microelectronics fabrication equipment.

EC EN 455 : VLSI Testing. (1:0:3)

PREREQUISITE: EC EN 451; or EC EN 445

DESCRIPTION: Testing of ICs designed previous semester in ECEn 451 or ECEn 445. Topics in VLSI-testable circuit designs.

Course Outcomes
No outcomes are available at this time.

EC EN 462 : Electromagnetic Radiation and Propagation. (2:3:1)

PREREQUISITE: EC EN 360

DESCRIPTION: Electromagnetic and optical theory including guided wave theory, modes, propagation in materials, radiation analysis, antenna analysis, and aperture diffraction.

Course Outcomes
- Application of vector differential and integral equation methods to EM analysis.
- Ability to analyze wave propagation in materials and guiding structures.
- Ability to model electromagnetic fields and systems using numerical algorithms and interpret results physically.

EC EN 464 : Wireless Communication Circuits. (2:3:1)

PREREQUISITE: ECEn 462 or instructor's consent.

DESCRIPTION: Analysis, design, and fabrication of RF/microwave passive circuit structures, amplifiers, oscillators, and mixers. System concepts, including stability, gain, and noise figure.

Course Outcomes
- Ability to function in groups to design and test microwave systems.
- Facility with microwave passive and active structures.
- Ability to simulate microwave systems and components.

EC EN 466 : Introduction to Optical Engineering. (2:3:1)

PREREQUISITE: EC EN 462

DESCRIPTION: Introduces principles and practices of optical engineering including optical communications system and components.

Course Outcomes
- Application of differential equations to solve metallic and dielectric waveguide problems.
- Application of integral calculus to solve diffraction problems.
- Application of linear algebra to find propagation characteristics in anisotropic media.
- Ability to apply modern optical test equipment to measure optical communication system parameters.

EC EN 483 : (EC En-Me En 431) Design of Control Systems. (4:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: EC EN 380; or ME EN 335

DESCRIPTION: Classical frequency response and time domain design of control systems. State-variable control and computer simulation of control systems.

Course Outcomes
- The ability to develop (nonlinear) mathematical models of complex dynamic systems.
- The ability to simplify those models into linear transfer function and state space representations.
- The ability to develop design specifications for physical systems with sensing and actuation limits.
- The ability to design PID controllers for systems described by linear time-invariant models.
- The ability to use loopshaping techniques to design frequency domain controllers for systems described by linear time-invariant models.
- The ability to design observer-based controllers for systems described by linear time-invariant models.

EC EN 485 : Introduction to Digital Communication Theory. (4:3:3)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 370 & EC EN 380

DESCRIPTION: Analysis and design of digital communications systems in AWGN: signal space concepts, modulation, matched filter and correlation detection, synchronization, performance. Computer-based design exercises.

Course Outcomes
- An understanding of the relationship between the Fourier transform of continuous-time signal and the DTFT of its samples.
- Application of linear algebra in describing digital modulation using the constellation representation.
- Application of probability and statistics to bit error rate analysis of digital communication systems.
- Ability to design the parameters of a PLL loop filter to meet given performance specifications.
- Ability to apply matched filter techniques to detection.
- Ability to simulate digital communication systems using Simulink and Matlab.

EC EN 487 : Introduction to Discrete-Time Signal Processing. (4:3:3)

WHEN TAUGHT: Winter

PREREQUISITE: EC EN 370 & EC EN 380

DESCRIPTION: Digital signal processing, fast Fourier transforms, digital filter design, spectrum analysis. Applications in speech processing, SONAR, communications, etc.

Course Outcomes
- Ability to apply principles of probablity theory for analysis and numerical estimation of power spectral densities.
- Ability to use basic DSP functions and algorithms (i.e., FIR filters, IIR filters, polyphase systems, windows, FFTs, etc.) to formulate and solve engineering problems.
- Ability to perform experiments with real-world signals and DSP systems, including discrete-time filters, spectrum analyzer, acoustic direction finding, etc.
- Ability to use software tools such as Matlab (R) to design, implement, and debug DSP functions.
- Application of integral calculus, discrete math, and complex variables, and transform theory to discrete-time signal processing.

EC EN 490 : Team Design Project. (4:2:6)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EC EN 340 & EC EN 380; selected 400-level EC En courses, depending on project.

DESCRIPTION: Culminating design experience based on skills learned in advanced technical courses. Students work in teams to plan, design, test, and demonstrate a major project.

Course Outcomes
- Ability to define, understand, and participate in team decision making processes.
- Ability to produce and maintain the necessary control documents on a design team.
- Ability to establish and follow ground rules governing team behavior.
- Ability to give an oral presentation describing a technical design.
- Ability to understand the expectations from other members on a team.
- Ability to assign and accept leadership responsibilities on a team.
- Ability to understand the different skill sets each team member brings to a team.
- Ability to understand the expectations (regarding participation) of each team member.
- Ability to complete a significant culminating design that draws upon the knowledge gained in prerequisite courses.
- Ability to give an oral presentation describing team progress during a design review.
- An understanding of the principles of leadership and project management.
- Ability to produce a written report describing a technical design.
- Ability to take high level, customer requirements, identify from them the specifications a solution must meet, and formulate those specifications as an engineering problem.
- Ability to maintain a team portfolio documenting the design process.
- Ability to read, interpret, and use published design standards as a part of the design process.

EC EN 493R : Special Topics in Electrical and Computer Engineering. (.5-4:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Topics vary. Recent developments in electrical and computer engineering.

Course Outcomes
- Ability to understand and apply a diverse range of special topics in electrical and computer engineering.

500-Level Graduate Courses (available to advanced undergraduates)

EC EN 521 : Introduction to Algorithm Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: C S 235 and 236 and EC En 324; or equivalents.

DESCRIPTION: Algorithm analysis, data structures, sorting and searching, graph traversal, weighted graph algorithms, combinational search and heuristic methods, dynamic programming, approximation algorithms, designing algorithms.

Course Outcomes
There are no course outcomes available

EC EN 522R : Special Topics in Computer Systems. (.5-3:ARR:ARR)

PREREQUISITE: Instructor's consent.

Course Outcomes
- Understand special topics in computer systems

EC EN 523 : Computer System Reliability. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: EC En 320, 324, 370.

DESCRIPTION: Analysis, modeling, and design of reliable, fault-tolerant computing systems.

Course Outcomes
There are no course outcomes available

EC EN 541 : Active and Passive Filter Design. (3:3:0)

PREREQUISITE: ECEn 340, 380; or equivalents.

DESCRIPTION: Design methods for electronic filters based on passive components, active components, and integrated circuit

components.

Course Outcomes
- Learn the relationship between transfer function pole and zero locations in the Laplace plane and the frequency response of the circuit.
- Learn the form of transfer function to lead to Butterworth, Chebyshev,and linear phase filters.
- Be able to design passive LC filters with prescribed transfer functions.
- Learn how to use active circuits, resistors, and capacitors to create desired filter responses with no inductors.
- Become familiar with the latest integrated circuit active synthesis methods.

EC EN 542R : Special Topics in Electronics. (.5-3:ARR:ARR)

PREREQUISITE: Instructor's consent.

Course Outcomes
- Understand special topics in electronics

EC EN 543 : CMOS Amplifier Design. (3:3:0)

PREREQUISITE: ECEn 443 or 445 or equivalent.

DESCRIPTION: Factors affecting performance of MOS devices in analog applications. Design of MOS amplifiers, buffers, and comparators.

Course Outcomes
- Understand MOSFET operation at an advanced level.
- Learn how to design components used such as current mirrors in CMOS amplifier design.
- Learn the basic op amp configurations.
- Understand the frequency response and stability problems of op amps.
- Learn how to compensate op amps to improve stability.

EC EN 548 : Analog CMOS Circuit Design. (3:3:0)

PREREQUISITE: ECEn 443 or 445 or equivalent.

DESCRIPTION: Design of CMOS comparators, wideband amplifiers, bandgap references; multipliers, PTAT generators, charge-transfer amplifiers, chopper-stabilized amplifiers, and advanced D/A and A/D CMOS architectures.

Course Outcomes
- Learn how to characterize comparators, wideband amplifiers, bandgap references, multipliers, PTAT generators, charge transfer amplifiers, and advanced D/A and A/D circuits.
- Learn how to design comparators, references, charge-transfer amplifiers, and D/A and A/D circuits.
- Understand the differences between the BJT Gilbert multiplier and the CMOS Gilbert-like multiplier.

EC EN 549 : VLSI Communication Circuit Design. (3:3:0)

PREREQUISITE: ECEn 443 or 445 or equivalent.

DESCRIPTION: Frequency synthesizers; low-jitter, voltage-controlled oscillators; high Q circuits; clock regeneration; phase-locked loops; frequency discriminators; and radio-on-a-chip concepts.

Course Outcomes
- Understand the challenges of designing modern wireless circuits such as wireless local area networks, cell phones, Bluetooth, and other systems.
- Learn the various architectures of wireless transceivers suited to MOSFET circuit design.
- Learn the modulation methods and bandwidth requirements for wireless transceivers.
- Understand the technical specifications that characterize modern wireless systems.
- Learn how to implement components of wireless systems using MOSFET integrated circuits.

EC EN 550 : (EC En-Me En) Microelectromechanical Systems (MEMS). (3:3:0)

PREREQUISITE: EC En 450 or Me En 372 or equivalent.

DESCRIPTION: Design, fabrication, and applications of MEMS. Mechanical properties governing their design and reliability and the processing technologies used to fabricate them.

Course Outcomes
- Use mechanics principles to analyze the mechanical performance of microsystems.
- Be familiar with the tools and processes used in micromachining of microelectromechanical systems (MEMS).
- Use principles of physics to analyze and design MEMS, including sensors and actuators.

EC EN 555 : Optoelectronic Devices. (3:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: ECEn 450 or equivalent or instructor's consent.

DESCRIPTION: Design, operation, and fabrication of modern optoelectronic devices, including photodiodes, photovoltaics, LEDs, and lasers.

Course Outcomes
- Use principles of physics to analyze and design the following optoelectronic components – LEDs, lasers, photodiodes, and photovoltaics.
- Be familiar with the tools and processes used in fabricating the following optoelectronic components - LEDs, lasers, photodiodes, and photovoltaics.
- Understand metrics of optoelectronics devices and be able to incorporate them into systems for optimal performance.

EC EN 560 : Electromagnetic Wave Theory. (3:3:0)

PREREQUISITE: EC En 462 or equivalent.

DESCRIPTION: Principles and methods of modern electromagnetic wave theory: anisotropic media, dyadic green functions, Huygen's principle, contour integration methods, asymptotic integration. Applications in radiation and scattering.

Course Outcomes

- Ability to analyze propagation in media.
- Ability to use Green's function to model radiation.
- Ability to apply electromagnetic theorems to boundary value problems.

EC EN 562 : Optical Communication Components and Systems. (3:3:0)

PREREQUISITE: EC En 462, 466; or equivalents.

DESCRIPTION: Fiber-optic communication system components and their operating and performance characteristics.

Course Outcomes

- Learn the fundamental properties of optical fiber channels, sources and detectors.
- Design an optical fiber system while considering the bandwidth, distance required, and expense.
- Examine a topic of current interest in optical systems and make an oral presentation to the class.
- Become familiar with the modern test and evaluation tools for fiber optic systems, including the OTDR Time Domain Reflectometer (OTDR), Optical Spectrum Analyzer (OSA), and Optical Oscilloscopes for eye diagram analysis.

EC EN 563 : Applied Computational Electromagnetics. (3:3:0)

PREREQUISITE: EC En 462 or equivalent.

DESCRIPTION: Current theory and practice in numerically solving Maxwell's equations for antenna and circuit design and radar-scattering prediction.

Course Outcomes

- Ability to implement and apply numerical methods including finite differences, method of moments, and finite element method.

EC EN 564 : Radar and Communication Systems. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: EC En 464 or 485; EC En 360 or 462; or instructor's consent.

DESCRIPTION: Design and performance of radar and communication systems: radar equation ambiguity functions, modulation, signal detection, link budgets, spread spectrum, system design, and performance trade-offs.

Course Outcomes

- Understand the basic concepts in modern surveillance radar and satellite telecommunication systems including the radar ambiguity function, modulation, signal detection, link budgets, spread spectrum, and system design.
- Understand design and system performance tradeoffs for such systems.
- Practice applying system performance and tradeoff techniques for the design of radars and satellite telecommunication systems
- Communicate design and analysis concepts.
- Research practical systems.
- Write original reports about practical radar and satellite systems.

EC EN 568 : Microwave Remote Sensing. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: Instructor's consent.

DESCRIPTION: Emphasis on space-borne remote sensing of the earth's atmosphere, land, and oceans. Primary methods and applications for both active (radar) and passive (radiometry).

Course Outcomes

- Understand design and system performance tradeoffs for microwave sensors.
- Understand and experience applications of remote sensing.
- Practice applying system performance and tradeoff techniques for the design of radars and satellite telecommunication systems.
- Conduct original research in the application of remote sensing.
- Communicate research results.
- Research practical systems.
- Write an original report about a sensor system.

Graduate Courses

For 600- and 700-level courses, see the BYU 2013–2014 Graduate Catalog.

Undergraduate Courses

200-Level Courses

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

ENG T 295R : Engineering Math Refresher. (0:3:0)

DESCRIPTION: Review of basic techniques of algebra, trigonometry, differential calculus, integral calculus, and series and sequences in preparation for engineering mathematics, ordinary differential equations, and multivariable calculus.

Course Outcomes

There are no course outcomes available

400-Level Courses

ENG T 480 : Globalization in Engineering and Technology. (3:3:0)

OFFERED: Study Abroad.

WHEN TAUGHT: Spring

PREREQUISITE: Engineering or technology major enrolled in upper-division major courses; instructor's consent.

DESCRIPTION: Definition of globalization and the driving forces. How globalization is changing the practice of engineering and the development of technology. Study through classroom and industrial site visits.

Course Outcomes

- The students' knowledge of globalization as it relates to the practice of engineering, innovation, manufacturing, and research in their chosen field.
- The students' knowledge of globalization as it affects the environment, international trade and finance, and cultures.
- The students' ability to argue the major points related to globalization (listed in the two points above). In each case, there are multiple views on the subject which they should be familiar with.
- The students' ability to discuss foreign engineers regarding globalization and their companies' activities in the foreign country.

ENG T 497R : Global Engineering Outreach Projects. (.5-3:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Engineering or technology major enrolled in upper-division major courses; instructor's consent.

DESCRIPTION: Humanitarian-based engineering and technology project development involving multi-disciplinary teams.

Course Outcomes

- Gain experience in the design process that includes innovative problem solving skills applied to the design and implementation of global projects in developing regions of the world in the context of real needs, constraints, and opportunities.
- Demonstrate an appreciation for global aspects of engineering, including social and technical constraints related to design and the importance of sustainability.
- Demonstrate effective teamwork and leadership skills and an appreciation for other disciplines both within and outside of engineering as they work together on interdisciplinary teams.
- Demonstrate effective oral and written communication skills in the reporting of work, particularly to entities or individuals in countries in which projects are implemented.
- Gain experience in how to be involved in social innovation as they progress through their careers.

500-Level Graduate Courses (available to advanced undergraduates)

ENG T 595R : Special Topics in Engineering and Technology. (.5-3:ARR:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Special topics in engineering and technology that relate to current research areas or issues related to industry.

Course Outcomes

- Learn and apply concepts and/or prictices in a specialized area.

Admission to Degree Program

The degree program in the Department of Mechanical Engineering carries special enrollment limitations. Please see Professional Program Acceptance below and the college advisement center for specific details.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 of the required 45 credit hours of Mechanical Engineering courses (Me En courses) must be earned in residence on the BYU campus
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

BS in Mechanical Engineering (Program Outcomes)

Students should see their college advisement center for help or information concerning the undergraduate programs.

Graduate Programs and Degrees

MS in Mechanical Engineering
PhD in Mechanical Engineering

For more information see the BYU 2013–2014 Graduate Catalog.

The Discipline

Mechanical engineers work with concepts, ideas, and products that are primarily mechanical or energy related. Mechanical engineering is a broad discipline that prepares a person to contribute in a wide range of fields such as aerospace, computer graphics, power generation, machine tools, petroleum, agricultural and construction equipment, medicine, government, and all types of transportation. A mechanical engineer may work in research, design, analysis, manufacturing, testing, operations, sales, or management. Engineers use critical problem-solving methods and basic principles of mathematics and science to creatively solve problems.

Educational Objectives

The Brigham Young University Department of Mechanical Engineering undergraduate bachelor of science program pursues the following objectives:

1. Teach the fundamental concepts of math, science, and mechanical engineering to produce graduates who demonstrate technical excellence and provide service to their profession, community, family, and church.
2. Instill a desire and ability to learn continuously, both through study and faith, to enable graduates to meet the changing demands of their profession and personal life.
3. Provide practical and open-ended engineering experiences to develop graduates who think independently and demonstrate leadership and creativity.
4. Engage students in activities to produce graduates who communicate and work effectively and ethically with people of diverse backgrounds.

Program Outcomes

To assure that these objectives are reached, the department has articulated twelve outcomes of the BS program. Each student graduating from this program is expected to have:

1. A basic understanding of fundamental physical phenomena and governing principles.
2. The ability to develop and solve mathematical models of fundamental physical phenomena and apply them to predict the behavior of engineering systems.
3. The ability to use engineering principles to design an innovative system, component, or process to meet desired needs.
4. The expertise to plan and conduct an experimental program and evaluate the results.
5. The ability to use modern engineering tools and techniques in engineering practice.
6. An understanding of manufacturing processes and planning.
7. Effective oral and written communication skills.
8. The ability to work with and lead others to accomplish goals.
9. An appreciation of history, philosophy, literature, science, and the fine arts and how they influence the culture and behavior of societies.
10. Personal behavior demonstrating and practicing high moral and ethical standards.
11. The ability to practice engineering in a global environment.
12. A desire for and commitment to lifelong learning and service.

All courses in the curriculum are designed to help achieve these outcomes.

The curriculum in mechanical engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc. (ABET).

Career Opportunities

A bachelor of science degree in mechanical engineering provides widely recognized professional training for careers in industry, government, and other areas. Most industrial companies hire some mechanical engineers. Companies that make mechanical or energy-related products may hire mostly mechanical engineers. As a result, many mechanical engineering positions are available worldwide. Mechanical engineers have job opportunities in companies involved in such areas as aircraft and spacecraft design; manufacturing processes; product safety and reliability; solar energy; electronic equipment packaging and cooling; power plant design; jet, train, truck, and automobile engines; environmental protection; artificial intelligence; robotics; medical and hospital equipment; new material development and applications; and technical writing. Increasing numbers of positions utilize foreign language experience.

A graduate in mechanical engineering is prepared for advanced studies in the field as well as in a variety of other disciplines, including law, medicine, and business administration. Perhaps most important to graduates are the problem-solving strategies and thinking processes acquired in the study of mechanical engineering that help one to succeed in any area of endeavor.

General Information

Any student may choose to major in mechanical engineering and to enroll in all classes in the preprofessional program (items 1 and 2 under BS Mechanical Engineering Major Requirements).

Professional Program Acceptance

Students must be accepted into the professional program before they may take the professional Me En core or technical electives (items 4 and 5 in major requirements). To apply, students must have completed the following five courses at a college or university with an accredited engineering program (neither AP nor concurrent enrollment credit meet this requirement):

1. Phscs 123.
2. One course (the first college course taken) from the mathematics core (item 2 in the major requirements).
3. Me En 172.
4. CE En 103.
5. Me En 191R.

Acceptance is based on the GPA from the courses listed above. The GPA cut-off is determined by fixing the number of students admitted to the program and will vary from year to year. The current limit of students admitted per year is 160 and the GPA cut-off for the past year was 3.45. Both the limit and GPA cut-off are subject to change.

Only one repeat of each course is allowed for purposes of determining professional program acceptance. If a student has taken more than four professional application courses or has repeated any of these courses, only the grades of each of the first four courses taken or the highest grade when a course is retaken will be considered. Transfer students from institutions that do not have accredited engineering programs will be considered for provisional admission for one semester based on transferred courses but will be retained or denied based on four courses taken at BYU. The courses used will be the next four courses on the engineering flow chart following courses 1-4 listed above.

Normal application deadlines are July 1, October 1, and February 1. Applications from transfer students who have been admitted to the university may be considered at other times.

Professional program application forms are available in the college advisement center.

Academic Standards and Continuance

On gaining acceptance into the professional program, students must maintain a minimum university cumulative grade point average of 2.0. No more than 6 credit hours of grades below C– in major courses (including pre-professional and professional program courses) may be applied toward graduation. A professional program course (a required course not included in pre-professional program) may not be retaken more than once.

Program Requirements | View MAP | View Program Outcomes

1. Complete the following basic science core:

BIO 100 : Principles of Biology. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Introductory course for general education students.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

CHEM 105 : General College Chemistry. (4:5:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 110 (or equivalent) or concurrent enrollment.
DESCRIPTION: Atomic and molecular structure including bonding and periodic properties of the elements; reaction energetics, electrochemistry, acids and bases, inorganic and organic chemistry.
NOTE: Primarily for students in engineering and biological sciences. Three lectures and two recitation sections per week.

Course Outcomes

- Students will demonstrate a familiarity with the basic vocabulary and concepts of chemistry.
- Students will demonstrate a qualitative and basic quantitative understanding of the fundamental chemical laws which govern the material substances in our universe and which express how one variable in nature depends on another.
- Students will demonstrate the ability to manipulate quantitative descriptors of natural phenomena expressed both in the form of equations and of proportionalities, and solve chemistry problems using these skills.
- A successful Chemistry 105 students describes chemical phenomenon by first focusing on properties of the elements at the atomic level. Chemistry 105 students will gain a knowledge base of reactivity patterns of elements and compounds.
- Chemistry 105 students will be able to use their chemistry experience, knowledge, and skills to better understand and work in their own field of study.

PHSCS 123 : Introduction to Waves, Optics, and Thermodynamics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Phscs 121 or equivalent. Calculus.
DESCRIPTION: Waves, thermal physics, optics, special relativity, and introduction to modern physics. Weekly lab.

Course Outcomes

- Solve problems and answer conceptual questions using the basics of fluid statics and dynamics, including Bernoulli's principle and Pascal's law.
- Answer conceptual questions and calculate changes in temperature, pressure, entropy and volume for quasistatic ideal gas processes and be able to determine work done and efficiency for gas engines, heat pumps, and refrigerators. Determine heat flow and temperatures in systems in steady state.
- Solve problems and answer conceptual questions involving waves, using concepts such as wave speed, wavelength, frequency, superposition, beats, and resonance. Solve wave interference problems.
- Find the location and magnification of images in single- and multiple-lens/mirror systems by calculation and by ray tracing, and be able to work general problems in optics using Snell's law and specular reflection.
- (Section 1) Solve problems and answer conceptual questions in basic modern physics including special relativity, and quantum mechanics and nuclear physics.
- (Section 2) Solve more advanced problems and answer conceptual questions in wave analysis, including calculating group and phases velocities, solving for Fourier coefficients of periodic functions, and frequencies of notes in the equal temperament musical scale. Solve problems in special relativity.

PHSCS 220 : Introduction to Electricity and Magnetism. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer
PREREQUISITE: MATH 113; Phscs 121 or equivalent.
DESCRIPTION: Electricity and magnetism. Weekly lab.

Course Outcomes
There are no course outcomes available

Note: Students without high school physics should start with Phscs 121.

2. Complete one of the following mathematics core sequences:
   a. MATH 112 : Calculus 1. (4:5:0)
      OFFERED: Honors also.
      WHEN TAUGHT: Fall; Winter; Spring; Summer
      DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

      Course Outcomes
      - This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

      : Honors Calculus 1.

      Course Outcomes

      MATH 113 : Calculus 2. (4:5:0)
      OFFERED: Honors also.
      WHEN TAUGHT: Fall; Winter; Spring; Summer
      PREREQUISITE: Math 112.
      DESCRIPTION: Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

      Course Outcomes
      - This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 2 develops techniques of integration, applications of integration, infinite sequences and series, parametric curves, polar coordinates, and conic sections. This course contributes to all the expected learning outcomes of the Mathematics BS. For a more detailed course description, visit the Math 113 Wiki page.

      MATH 302 : Mathematics for Engineering 1. (4:4:0)
      WHEN TAUGHT: Fall; Winter
      PREREQUISITE: Math 113.
      DESCRIPTION: Multivariable calculus, linear algebra, and numerical methods.

      Course Outcomes
      - This course is designed to give students from the College of Engineering and Technology the mathematics background necessary to succeed in their chosen field. For more detailed information, please visit the department wiki for this course at Math 302 Wiki.

      MATH 303 : Mathematics for Engineering 2. (4:4:0)
      WHEN TAUGHT: Fall; Winter
      PREREQUISITE: MATH 302
      DESCRIPTION: ODEs, Laplace transforms, Fourier series, PDEs.

      Course Outcomes
      - This course is designed to give students from the College of Engineering and Technology the mathematics background necessary to succeed in their chosen field. For a more detailed course description, visit Math 303 Wiki.

   b. MATH 112 : Calculus 1. (4:5:0)
      OFFERED: Honors also.
      WHEN TAUGHT: Fall; Winter; Spring; Summer
      DESCRIPTION: Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

      Course Outcomes
      - This course is designed for students majoring in the mathematical and physical sciences,

engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

: Honors Calculus 1.

Course Outcomes

MATH 113 : Calculus 2. (4:5:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 112.
DESCRIPTION: Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

Course Outcomes

- This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 2 develops techniques of integration, applications of integration, infinite sequences and series, parametric curves, polar coordinates, and conic sections. This course contributes to all the expected learning outcomes of the Mathematics BS. For a more detailed course description, visit the Math 113 Wiki page.

MATH 313 : Elementary Linear Algebra. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 112.
RECOMMENDED: Math 290.
DESCRIPTION: Linear systems, matrices, vectors and vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and eigenvectors.

Course Outcomes

- This course is aimed at majors in mathematics, the physical sciences, engineering, and other students interested in applications of mathematics to their disciplines. Linear algebra is used more than any other form of advanced mathematics in industry and science. A key idea is the mathematical modeling of a problem via systems of linear equations. For more detailed information visit the Math 313 Wiki page.

: Honors Elementary Linear Algebra. (3:3:1)

Course Outcomes

MATH 314 : Calculus of Several Variables. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 313.
DESCRIPTION: Partial differentiation, the Jacobian matrix, and integral theorems of vector calculus.

Course Outcomes

- This course is aimed at students majoring in mathematical and physical sciences, and engineering, and students minoring in mathematics or mathematical education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed manipulative skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus of several variables extends the concepts of limit, integral, and derivative from one dimension to higher dimensional settings and is therefore fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information visit the Math 314 Wiki page.

MATH 334 : Ordinary Differential Equations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 113 and Math 313.
DESCRIPTION: Methods and theory of ordinary differential equations.

Course Outcomes

There are no course outcomes available

3. Complete the following preprofessional engineering courses:

CE EN 103 : Engineering Mechanics--Statics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Math 112; or 111 and 119; or concurrent enrollment.
DESCRIPTION: Concepts of mechanics: force systems in equilibrium, resultants, friction, centroids, utilization of

vector algebra, simple trusses, shear and bending moment diagrams, moments of inertia.

Course Outcomes
- Be able to manipulate basic engineering units in both the International and US Customary Systems of Units in engineering analysis and be able to convert between the two.
- Be able to perform basic vector operations using standard vector notation.
- Be able to conceptualize and draw a conventional free-body diagram which identifies and applies all known and unknown forces.
- Understand the nature of forces(s) and their manipulation in engineering analysis, including moments, couples, transmissibility and resultants.
- Understand the conditions for equilibrium for both a particle and a rigid body.
- Be able to determine the axial forces in the members of a statically determinant truss.
- Be able to calculate the center of gravity for 2 and 3 dimensional rigid bodies.
- Be able to both calculate and draw diagrams for the internal shear forces and bending moments in straight, statically determinant beams.
- Understand the nature of friction and be able to solve problems involving friction and shear on horizontal and inclined planes.
- Be able to use calculus to compute centroids of lines, areas and volumes.
- Demonstrate competence in basic engineering analysis.

CE EN 203 : Engineering Mechanics--Mechanics of Materials. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CE EN 103

DESCRIPTION: Fundamental concepts of elastic stress and strain, including transformations and stress-strain relations; beam/column theories (axial, flexure, torsion, and shear loads and deformations); shear and bending moment relationships; column stability; and cylindrical and spherical pressure vessels.

Course Outcomes
- Students will be able to calculate and transform axial stress (e.g., Mohr's Circle), shear stress, bearing stress, thermal stress, bending stress, and combined stress.
- Students will be able to calculate strain, transform strain (e.g., Mohr's Circle), apply stress-strain relations (e.g., Hooke's Law), and solve statically indeterminate problems.
- Students will be able to analyze deflections due to axial, torsion, bending, and shear loads, and manipulate relations between shear and bending moment.
- Students will be able to design beams and columns to carry specified axial, flexure, and shear loads, and predict their deformation and elastic stability (i.e., buckling).
- Students will be able to predict stresses in pressure vessels.

CE EN 204 : Engineering Mechanic--Dynamics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: CE EN 103

DESCRIPTION: Concepts of dynamics applied to particles, systems of particles, rigid bodies, vibration systems, and nonrigid particles systems.

Course Outcomes
- 1 (a) Understand the kinematics of particles and be able to perform rectilinear and curvilinear analysis of particle motion described in appropriate coordinate systems.
- 2 (a) Understand Newton's Laws of Motion and be able to write and solve the equations of motion for particles and systems of particles in appropriate coordinate systems.
- 3 (e) Understand the principles of Work and Energy and Impulse and Momentum as they apply to particles and systems of particles and be able to solve problems appropriate thereto.
- 4 (e) Be able to determine the motion of rigid bodies in translation and rotation about a fixed axis and to understand the principles associate with general plane motion.
- 5 (e) Be able to apply the principles of Force and Acceleration, Work and Energy, and Impulse and Momentum to rigid bodies and to solve problems appropriate thereto.
- 6 (e) Understand the basic concepts of one-degree-of-freedom vibration and to solve simiple problems related to such motion.

EC EN 301 : Elements of Electrical Engineering. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: PHSCS 220 & MATH 303; or PHSCS 220 & MATH 334

DESCRIPTION: Linear electric circuits, computer organization, and logic circuits for nonmajors.

NOTE: Fee.

Course Outcomes
- Understand and apply basic principles of electronic circuits.

ME EN 172 : Engineering Graphics--Principles and Applications. (3:2:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Engineering and technology major status.

DESCRIPTION: Comprehensive applications of CAD-based national (ANSI) and international (ISO) graphics standards, including coordinate and geometric dimensioning and tolerancing practices, manufacturing, and product verification procedures.

Course Outcomes
- 1. Understand both surface and solid modeling techniques found in a modern commercial CAD package.
- 2. Create a CAD model of basic machine components and assemblies.
- 3. Design and create CAD models of average to complex mechanical components.
- 4. Create, read and understand engineering drawings composed of multiple views with standard

dimensioning and tolerancing nomenclature.
- 5. Create, read and understand engineering drawings that contain geometric dimensioning and tolerancing symbology.
- 6. Understand the approaches and processes used in component and assembly modeling, i.e. top-down and bottom-up design.
- 7. Collaborate with teammates to learn how to apply CAD tools to the modeling projects.
- 8. Learn about design and engineering processes in a global context.

ME EN 191 : New Student Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Topics of special interest to new mechanical engineering majors.

NOTE: Required of all first-semester freshman and transfer students.

Course Outcomes
- 1. Students are aware of the 12 basic outcomes of the mechanical engineering program at BYU.
- 2. Gain a perspective of the many career opportunities and specialties in mechanical engineering.
- 3. Explain what it means to be responsible for one's own education and to be an independent learner, including familiarity with the aims of a BYU education.
- 4. Students are aware that there are design processes that engineers follow to meet needs.
- 5. Students can explain that mechanical engineers are involved with fabricating and manufacturing products.
- 6. Learn the importance of developing good communication skills.
- 7. Become aware that working effectively in teams is a vital skill for an engineer.
- 8. Discuss the role of an internship in developing engineering skills and career goals, including how to search for a job using a number of resources.
- 9. Students are aware that mechanical engineering takes place within the context of society and is driven by factors such as market demands, economics, safety, and societal needs.

4. Complete the following professional mechanical engineering core:

ME EN 250 : Science of Engineering Materials. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CHEM 105

DESCRIPTION: Principles and properties of solid materials and their behavior as applied to engineering.

Course Outcomes
- 1. Describe the functional behaviors of the primary classes of materials (metals, ceramics, polymers, composites).
- 2. Predict material properties based on atomic structure and defects.
- 3. Apply the lever rule to binary phase diagrams.
- 4. Model the stress-strain diagram and describe the mechanisms for altering it for the various classes of materials.
- 5. Describe the kinetics of diffusion and the process of nucleation and growth as they affect transformation products.
- 6. Describe common degradation and failure processes for each basic class of materials.
- 7. Select an appropriate material class given functional requirements.

ME EN 282 : Manufacturing Processes. (3:2:3)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ME EN 250

DESCRIPTION: Common manufacturing processes, including technological limitations and economic considerations. Influence of product design on process selection and manufacturing efficiency.

Course Outcomes
- 1. Demonstrate an understanding of the impact of manufacturing capability on society.
- 2. Recognize and develop a familiarity with a variety of manufacturing processes and how they are classified. Demonstrate understanding of the physical phenomena involved in how various families of manufacturing processes work.
- 3. Identify characteristics and capabilities of various manufacturing processes so that recommendations for process selection plans can be made. Recommend process parameters for various manufacturing processes. Identify materials and/or their properties that would be appropriate for successful use with various manufacturing processes.
- 4. Identify cause and effect relationships for various manufacturing process parameters so that inferences from process data can be made to obtain desired process results.
- 5. Make practical design recommendations to improve the manufacturability of component parts based on manufacturing process knowledge.
- 6. Perform various manufacturing processes with real process equipment in order to begin to develop good engineering, judgment about the capability of various processes, and the development of process plans.
- 7. Work successfully in teams on an assigned design and build project.
- 8. Write professional quality engineering reports on manufacturing processes and projects. Communicate professional quality responses to open-ended manufacturing process questions.

ME EN 312 : Fluid Mechanics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ME EN 321; Concurrent enrollment in Me En 363, 373.

DESCRIPTION: Physics and modeling of fluid flow; fluid statics, dimensional analysis, momentum, internal and external viscous flow, compressible flow, and fluid machinery.

Course Outcomes
- 1. Understand viscosity as a fluid property and be able to compute shear stress involving Newtonian fluids. Understand the different types of fluids and the phenomena of surface tension and cavitation.

- 2. Understand the variation in pressure, and determine pressure at a point in a static gas or liquid. Be able to compute hydrostatic forces on fully and partially submerged surfaces, and be able to determine the location of the center of pressure.
- 3. Understand field variables and be able to evaluate the local, convective, and total acceleration in flowing fluids. Recognize Lagrangian and Eulerian frames of reference.
- 4. Understand pressure distributions normal to, and parallel to, streamlines in flowing fluids. Be able to appropriately apply Bernoulli's principle to fluid dynamic situations and recognize the limitations of this principle.
- 5. Be able to derive the integral form of the conservation of mass principle from the Reynolds Transport Theorem and appropriately apply it to steady and unsteady flow situations with uniform or two-dimensional velocity distributions. Recognize and be able to utilize the differential form of conservation of mass.
- 6. Be able to derive the integral form of the linear momentum principle from the Reynolds Transport Theorem and apply global force/momentum balances for stationary and constant velocity frames of reference with uniform or two-dimensional velocity distributions. Recognize the Navier-Stokes equations and solve them for simplified viscous flows.
- 7. Be able to determine appropriate dimensionless variables for a given dynamical situation. Understand the usefulness in presenting experimental data using dimensional analysis. Predict prototype analysis based on similitude and understand the pitfalls of modeling.
- 8. Understand the mechanical energy equation and be able to apply it to laminar and turbulent flow with minor and major losses through pipe networks.
- 9. Understand and predict velocity distributions and boundary layer growth for flat plate boundary layers with laminar or turbulent flow. Understand flow separation, be able to predict skin friction and pressure drag for laminar and turbulent flows, and describe methods of drag reduction.

ME EN 321 : Thermodynamics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 113; Concurrent enrollment in Math 303 or 334.

DESCRIPTION: Fundamentals of thermal energy and work; principle of state, conservation of mass, conservation of energy, increase of entropy principle; application to thermal and mechanical processes.

Course Outcomes

- 1. Engineering Math – Each student can apply the mathematical principles required to develop and solve mathematical models – consisting of both algebraic and differential equations – that are based on the energy and entropy equations and to evaluate the properties used in these equations.
- 2. Thermodynamic Systems – Each student can select an appropriate system (control mass or control volume) and identify the heat, work and mass flow interactions occurring between the system and its surroundings in order to build thermodynamic models and analyze thermodynamic systems and processes.
- 3. Thermodynamic Properties and State – Each student can use thermodynamic properties and the state postulate in order to fix the state of a thermodynamic system. Each student can distinguish between point functions (thermodynamic properties) and path functions (heat, work and entropy generation) in order to describe thermodynamic processes. Each student can use phase diagrams in order to illustrate isobaric, isometric, isothermal, isentropic, isenthalpic or other thermodynamic processes.
- 4. Obtaining Thermodynamic Property Values – Each student can properly characterize a thermodynamic system as either an ideal gas, an incompressible substance or a saturated liquid-vapor mixture in order to identify appropriate property relationships. Each student can use equations of state, charts or tables in order to obtain values of thermodynamic properties.
- 5. Conservation of Mass and Energy – Each student can implement the principle of conservation of mass and conservation of energy in order to build models of open and closed thermodynamic systems undergoing transient and steady processes.
- 6. Principle of Increasing Entropy - Each student can identify irreversibilities in order to determine whether a process may be approximated as reversible. Each student understands the increase of entropy principle, and can use the entropy equation in order to model open and closed systems undergoing transient and steady processes.
- 7. Classical Analysis of Engineering Devices and Processes – Each student can describe the hardware, the operation, the purpose, and the approximations typically used to build thermodynamic models of common engineering devices and processes. Examples of common engineering devices are turbines, compressors, pumps, nozzles, diffusers, valves and heat exchangers. Examples of common processes are restrained compression, restrained expansion, and the charging and discharging of a tank.
- 8. Each student can list the processes and devices that comprise the ideal Otto, Diesel and Brayton gas power cycles and the ideal Rankine steam power cycle. Each student can build thermodynamic models in order to analyze and evaluate these cycles and to draw conclusions regarding the performance of these cycles.
- 9. Each student can list the processes that comprise the ideal refrigeration cycles and can build thermodynamic models of these cycles in order to analyze, evaluate and draw conclusions regarding their performance.

ME EN 335 : Dynamic System Modeling and Analysis. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ME EN 363 & ME EN 373 & CE EN 204

DESCRIPTION: Formulating mathematical models for mechanical, electrical, fluid, and combined systems; numerical solution of motion equations; first- and second-order systems, frequency response, and transfer functions.

Course Outcomes

- 1. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic mechanical systems, including inertia, compliance, dissipation, and power sources, and obtain equations of motion for linear motion and fixed-axis rotation.
- 2. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic electrical systems, including inductance, capacitance, resistance, power sources and amplifiers.
- 3. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic fluid systems, including inertance, capacitance, resistance, and pumps.
- 4. Students should have a knowledge of fundamental concepts of multi-domain modeling of electromechanical and fluid/mechanical systems and be able to develop lumped element models of

these mixed systems.
- 5. Students should know how to place equations of motion into state variable form, and to develop a simulation for basic non linear and linear systems using Matlab or some other simulation software.
- 6. Students should know how to manipulate a system of linear differential equations to obtain transfer functions and poles.
- 7. Students should know how to interpret poles to define natural frequencies, damping ratios, time constants, and the natural response, step response, and impulse response of a system.
- 8. Students should understand the concept of frequency response. They should understand the relationship between transfer functions and frequency response, and should be able to obtain frequency response plots for their system models using Matlab.

ME EN 340 : Heat Transfer. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ME EN 321

DESCRIPTION: Fundamentals of heat transfer; basics of conduction, convection, and radiation; mass transfer by analogy; heat exchangers; computer applications to practical design and analysis problems.

Course Outcomes

- 1. Conservation Principles – Each student can apply conservation of mass and energy to a control volume or a control surface in order to build models of heat transfer processes and systems.
- 2. Engineering Math – Each student can apply appropriate mathematical techniques in order to solve models built using the basic concepts and fundamental laws of heat transfer.
- 3. Fundamentals of Conduction - Each student can describe the phenomenological origin of Fourier's law and can use it in conjunction with the principle of conservation of energy in order to develop the general heat diffusion equation. Each student can solve one-dimensional, steady-state problems using the heat diffusion equation and appropriate boundary conditions.
- 4. Extended Surfaces - Each student can implement the fundamentals of conduction in order to analyze extended surfaces. Each student can use fin performance parameters in order to evaluate fins or fin arrays.
- 5. Two-dimensional conduction - Each student can describe the analytical and numerical methods commonly used in order to analyze two-dimensional, steady state heat conduction. Each student can use finite difference methods in order to solve two-dimensional, steady state heat transfer problems.
- 6. Transient Conduction - Each student can implement the lumped capacitance method, one-dimensional analytical solutions and transient finite difference methods in order to analyze transient heat transfer problems.
- 7. Fundamentals of Convection - Each student can describe the physical phenomena associated with convection and use non-dimensional parameters to analyze convection heat transfer. Each student can implement Newton's law of cooling in order to calculate local and global convective heat fluxes.
- 8. Methodology for a Convection Analysis - Each student can use empirical correlations in order to analyze external and internal, forced and free convection problems.
- 9. Fundamentals of Radiation - Each student can describe the physical mechanisms involved in radiation heat transfer. Each student can apply models of these mechanisms to obtain radiative fluxes and radiative properties in order perform energy balance on surfaces.
- 10. Radiative Surface Exchange - Each student can calculate total, hemispherical radiative properties of real surfaces from their spectral, directional counterparts and evaluate the radiative heat exchange between surfaces and in diffuse, gray enclosures.

ME EN 363 : Elementary Instrumentation. (3:3:1.5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ENG T 231 & MATH 303 & EC EN 301; or ENG T 231 & MATH 314 & EC EN 301; Concurrent enrollment in Engl 316.

DESCRIPTION: Fundamentals of mechanical measuring systems; sensors, signal conditioning, statistical error analysis, dynamic response, standards.

Course Outcomes

- 1. Students should have a knowledge of fundamental concepts of measurement including accuracy, precision, bias error, random error, DC offset, static sensitivity (DC gain), etc. Students should be able to calibrate (statically) a measurement system.
- 2. Students should understand the concept of time and frequency response as it applies to measurement systems. Students should understand the fundamentals of first- and second-order systems and should be able to characterize the behavior of such systems through the measurement of the time constant, natural frequency, and damping ratio.
- 3. Students should be familiar with the fundamental theory and techniques of data acquisition and signal conditioning. Students should understand the sampling process, how aliasing can occur, and how to prevent aliasing with analog prefilters. Students should be able to use a Wheatstone bridge to condition signals from variable resistance devices. Students should be able to construct basic signal conditioning circuits using op-amps and electrical components (e.g., voltage divider, amplifier, differential amplifier, low-pass filter).
- 4. Through laboratory exercises and projects, students should gain hands-on familiarity with a variety of transducers, such as strain gages, thermocouples, and optical sensors. Students should understand the governing principles of their operation and how they influence their behavior.
- 5. Students should know basic statistical analysis principles that apply to measurement. Students should be able to apply concepts of infinite statistics to characterize large populations of measurement data. Similarly, they should be able to apply concepts of finite statistics to small samples of measurement data. Students should be able to apply least-squares analysis for curve-fitting purposes.
- 6. Students should be able to perform a basic uncertainty analysis for a measurement system. This includes the ability to perform a design-stage uncertainty analysis for a component of a sensor system, the ability to apply root-sum-of-squares methods to estimate uncertainty for multi-component systems, and the ability to determine how uncertainties are propagated in a calculated result.
- 7. Students should gain experience in documenting experimental work. Students should learn how to write a memo report and a full formal report.

ME EN 372 : Mechanical System Design Fundamentals. (3:2:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CE EN 203 & ME EN 282; Concurrent enrollment in Me En 373.

DESCRIPTION: Static and dynamic stress and failure analysis for mechanical systems.

Course Outcomes

- 1. Draw a free body diagram of a structure or machine component. Show the loads and calculate the reactions. Draw shear moment diagrams.
- 2. Calculate stresses in machine components due to combined loadings.
- 3. Estimate the deflection of structural members under combined loading.
- 4. Select an appropriate static failure theory for a brittle or ductile material and apply it to predict failure loads and safety factors for various geometries and loading conditions.
- 5. Analyze the stresses in pressure vessels, press fits, curved beams, bolts, and bolted joints.
- 6. Calculate buckling predictions for statically loaded compression members.
- 7. Construct S-N and Goodman diagrams for cyclically loaded members, calculate mean and alternating stresses and predict safety factors for infinite or finite life.
- 8. Examine failed members and diagnose the cause of failure. Describe the probable loading and governing material behavior.
- 9. Design machine members to prevent static, dynamic or fatigue failure. Integrate several components in a system to meet design requirements.
- 10. Gain experience using commercial FEA software to create models of simple structures and machine components. Solve these models to determine deflections and stresses, and understand how to interpret the results for engineering application.

ME EN 373 : Introduction to Scientific Computing and Computer-Aided Engineering. (3:2:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 113; Concurrent enrollment in Math 302 or 314.

DESCRIPTION: Computer programming for engineers taught in context of solving physical systems using numerical methods. Student will program solutions using the C++ language, spreadsheets, symbolic solvers, etc.

Course Outcomes

- 1. Understand the role of numerical solutions in the engineering process of design and analysis. Understand how integers and real numbers are stored inside the computer. Understand the limitations associated with numerical solutions, including accuracy due to approximations and round-off error.
- 2. Find roots of equations using various modern numerical methods.
- 3. Solve linear systems of equations using Gauss elimination, LU decomposition and/or matrix inversion. Understand the concept of matrix condition number.
- 4. Be able to implement basic curve fitting algorithms, including least-squares regression.
- 5. Implement forward and central difference methods for approximating derivatives; estimate round-off and truncation error
- 6. Implement the trapezoidal rule and Simpson's 1/3 rule for numerical integration.
- 7. Solve simple ordinary differential equations (initial value and boundary value problems) using basic numerical techniques.
- 8. Using C , write programs which use control statements and looping constructs, employ 1D and 2D arrays, call functions, and read and write to data files. Understand classes and pointers at a basic level.
- 9. Use commercially available software packages, including Excel and MATLAB, to perform basic numerical tasks (calculate equations, graph data, perform curve-fitting, solve linear systems of equations, and manipulate matrices).
- 10. Use computer programs to solve simple engineering problems, and write technical memos to explain the procedures and results of laboratory exercises.

ME EN 475 : Integrated Product and Process Design 1. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 363 & ME EN 372 & ME EN 373; or EC EN 340 & EC EN 370 & EC EN 380; or ENG T 231 & MFG 340 & MFG 355; Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering technology, industrial design, or related disciplines with instructor's consent.

DESCRIPTION: Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations. Intellectual property assignment agreement required.

NOTE: MeEn 475 and 476 must be taken in consecutive fall and winter semesters.

Course Outcomes

- 1. Understand the six stages of development through which each product passes.
- 2. Understand how the product information (requirement information and design information) evolves through the stages of development.
- 3. Understand how a purposeful network of design activities is used to cause the product information to evolve.
- 4. Understand how acceptance tests are used to ensure the transferability and quality of the product information throughout the stages of development.
- 5. Understand how product development processes can be customized for specific development projects.
- 6. Develop skills in project planning, idea generation, prototyping, developing engineering models, and engineering reporting and presentations.
- 7. Understand how to work within organizational policies to accomplish important goals.
- 8. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance synergy on a project team.

ME EN 476 : Integrated Product and Process Design 2. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 363 & ME EN 372 & ME EN 373; or EC EN 340 & EC EN 370 & EC EN 380; or ENG T 231 & MFG 340 & MFG 355; Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering technology, industrial design, or related disciplines with instructor's consent.

DESCRIPTION: Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations.

Intellectual property assignment agreement required.

NOTE: MeEn 475 and 476 must be taken in consecutive fall and winter semesters.

Course Outcomes

- 1. Develop skills in product development economics and engineering drawing review and checking.
- 2. Develop and demonstrate basic understanding in at least two Design for X areas, such as Design for Manufacturing and Design for Sustainability.
- 3. Develop and demonstrate basic skills with at least two design tools, such as optimization, design of experiments, and sketching.
- 4. Understand real world applications of development methods from development case studies and product development professionals.
- 5. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance synergy on a project team.
- 6. Apply the understanding and skills from Me En 475 and the other outcomes from Me En 476 while working with a project sponsor in a team setting to produce desirable and transferable product information, through design, building, and acceptance testing.

5. Complete the following supporting courses:

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

STAT 201 : Statistics for Engineers and Scientists. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 112; or MATH 119

DESCRIPTION: The scientific method; probability, random variables, common discrete and continuous random variables, central limit theorem; confidence intervals and hypothesis testing; completely randomized experiments; factorial experiments.

Course Outcomes

- Compute numerial and graphics summary statistics and explain the difference between populations given the summaries (numerical or graphical)
- Apply fundamentals of set theory and basic set operations to simple problems
- Distinguish between counting techniques (permutations, combinations) and compute the number of possible combinations for simple problems
- Solve simple problems using axioms of probability, conditional probability, independence, and Bayes' theorem
- Compute probabilities, expected values, and variances using the PDF of a discrete and a continuous univariate random variable
- Understand the definition of a sampling distribution, identify the mean, variance, and shape of the sampling distribution given the population information, and explain the application and importance of the Central Limit Theorem
- Understand the basics of experimental design, including the definition of the experimental unit, response, variable, factor(s), and level(s) of a basic experiment, and the role of randomization and replication to permit causal inference
- Compute the confidence interval for μ from a random sample and make the correct decision about an experiment when given a confidence interval
- Compute the test statistic and p-value for H0 : μ = μ0 from a random sample
- Make the correct decision when given the p-value for a hypothesis test and compute the ANOVA table for the data from a completely randomized design
- Compute pairwise confidence intervals on the difference in means (Fisher, Bonferroni) to understand a significant overall F-test from a completely randomized design
- Compute the ANOVA table for data from a two factor experiment
- Explain a statistically significant interaction
- Perform a two factor (or 2^3) experiment (in a group), compute the ANOVA table from the observed data, and write a technical report of the results of the experiment with appropriate graphics of significant effects or interactions

6. Complete 15 hours (five courses) of technical electives.

The purpose of these courses is to strengthen the engineering education of the student by a) deepening the student's understanding of engineering and/or science fundamentals, b) helping the student learn to apply engineering fundamentals in specific areas of interest, and/or c) helping the student to develop critical skills related to engineering practice.

The technical electives are normally 400-level or higher mechanical engineering courses, but other courses may be used as long as the following requirements are met:

- At least three courses (9 credit hours) must be in mechanical engineering.
- No courses may be below the 300 level.
- A maximum of 3 credit hours in Me En 497R or other independent project courses may be applied to meet technical elective requirements.
- All courses must be of an acceptable level from mechanical engineering, civil engineering, chemical engineering, computer engineering, electrical engineering, mathematics, statistics, physics, chemistry, or computer science; or be on the approved elective list in the department office. If a student wishes to count a course outside these areas as an elective, approval must be granted *before* the course is taken. Approval is requested by submitting a one-page petition to the department undergraduate committee that lists all of the proposed electives and demonstrates how the proposed exception meets the purposes described above.
- No course used to satisfy other major requirements for graduation may be used as an elective.

- *General Elective Option*

  Complete a total of 15 elective hours from the following:

  1. Complete a minimum of 9 hours from 400- or 500-level mechanical engineering courses.
  2. Complete a maximum of 6 hours of acceptable electives outside of mechanical engineering.

- *Manufacturing Option*

  The Society of Manufacturing Engineers has identified four areas of competency for manufacturing engineering as follows: (1) materials and manufacturing processes; (2) process, assembly and product engineering; (3) manufacturing competitiveness; and (4) manufacturing systems design.

  An option in manufacturing engineering is available. It may be completed by taking the following 15 hours of technical electives:

  1. Complete 3 hours from the following:

     ME EN 585 : Manufacturing Competitiveness: Quality and Productivity. (3:3:0)

     WHEN TAUGHT: Winter Odd Yrs.

     PREREQUISITE: ME EN 282

     DESCRIPTION: Production strategies to improve quality, decrease cost, and increase throughput to create market advantage; effective production management systems; applying quality improvement tools to process data; theory of constraints and lean production.

     Course Outcomes

     - Understand the essential elements for having a productive, profitable factory.
     - Understand the metrics used to quantify the performance of a factory, and be able to assess this performance.
     - Learn how important variability is in reducing quality and productivity, and find ways to minimize variability and its effects.
     - Learn methods of modeling production systems in order to predict probable performance.
     - Understand appropriate use of statistical techniques for identifying special cause and common cause variation in order to respond appropriately.
     - Communicate the basis and justification of a production system improvement project in oral and written form.

MFG 532 : Manufacturing Systems. (3:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: Mfg 480 or instructor's consent.

DESCRIPTION: Analyzing lean manufacturing systems. Numerous examples and case studies from industry demonstrating principles of lean production, inventory management, and lean distribution. Project with a local company to gain confidence with these principles in an industrial setting.

Course Outcomes

- Students will understand and be able to apply principles of lean manufacturing in a production environment.

2. Complete 3 hours from the following:

ME EN 482 : Manufacturing Systems Analysis and Design. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: MeEn 250, 282; or equivalents.

DESCRIPTION: Analysis, synthesis, and control of processing and assembly operations; mathematical modeling of manufacturing processes; systems integration; applying conservation principles to processing and assembly operations.

Course Outcomes

- Students will apply fundamental mathematical models to understand and estimate material behavior in manufacturing processes.
- Students will be able to estimate the force and power (energy/time) requirements to process conventional parts, using modern tools and machines.
- Students will understand the importance of and tools used in electronics manufacturing.
- Students will understand the control processes used in Flexible Manufacturing Centers and Systems.
- Students will be able to select and review technical paper(s) relating to a course subject area, digest relevant course information, and correlate the results with the mathematical models discussed in the course, also rendering good judgment as to whether the paper is useful to modern manufacturing methods.

ME EN 486 : Automation. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Determining appropriate levels of manufacturing automation based on economics and productivity. Elements of automation, including sensors, robots, conveyors, and part feeders.

Course Outcomes

- Students will understand and apply fundamental approaches to the control of automated production processes and be able to understand the limitations of automation in modern factories.
- Each student will select a topic area in advanced automation and demonstrate current specifications/capabilities knowledge of this area, both to the instructor and to the other class students.
- Students will understand automation methodologies and the components and equipment used to control advanced factory processes through advanced on-line labs.
- Students will design and simulate automation processes using a simulation and control system and thus understand the power of simulation in evaluating potential automation solutions to manufacturing problems.

ME EN 537 : Advanced Mechanisms, Robotics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 437; or equivalent.

DESCRIPTION: Kinematics and dynamics of advanced mechanisms, such as robots, with computer simulation of mechanism motion.

Course Outcomes

- Students will learn most common robot applications, terminology, and limitations.
- Students will be exposed to and be able to exercise basic robot design and motion concepts, both mathematically and in practical labs, such as homogeneous transformation used in forward and inverse kinematics, and robot trajectory generation.
- Students will learn how to use a teach pendant and how to program a robot.
- Students will differentiate between joint space and Cartesian space and the mathematical methods used to move from one space to the other.
- Students will compare the kinematics of emerging parallel mechanisms to those of more conventional serial mechanisms.
- Students will apply robot simulation to preliminary design of robot-centered work-cells.

3. Complete 3 hours from the following:

ME EN 452 : Intermediate Materials. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: ME EN 250 & ME EN 372

DESCRIPTION: Mechanical behavior of engineering materials including metals, plastics, ceramics, and composites.

Course Outcomes

- Extract and interpret key features (e.g., Young's modulus, yield strength, tensile strength, and ductility, true stress, true strain) from engineering stress-strain curves.
- Gain a basic understanding of the microstructural basis for properties in crystalline and polymeric materials, and how microstructure may be altered in ways that are advantageous to mechanical design.
- Acquire knowledge of the energetic basis for interaction of dislocations with other dislocations, point defects and precipitate phases, and its exploitation in strain, grain size, solid solution, and precipitate hardening mechanisms.
- Obtain an awareness of the energetic principles of mechanical failure of metals, and its basis in elastic/plastic localization phenomena, and how to protect designs from failure.
- Be able to integrate core competencies 1.-4. to tackle engineering design problems.

ME EN 456 : Composite Material Design. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 250

DESCRIPTION: Macro- and micro-mechanical analysis and design of uni- and multidirectional composite materials.

Course Outcomes

- Develop an understanding of the role of constituents in overall response of composite lamina (micromechanics).
- Develop an understanding of how a set of laminae with different orientations affect the overall laminate properties and response (macromechanics).
- Analyze elastic and strength properties, and elastic response, of orthotropic and anisotropic materials having both continuous and discontinuous reinforcements.
- Use Classical Lamination Theory to assess the role of ply orientation on overall axial, bending and twisting elastic deformation of laminates under applied loads.
- Use failure theories for multiaxial loading to determine if a laminate composite will fail for known loading and use this knowledge to design failure resistant structures.

ME EN 477 : Design for Manufacture and Assembly. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MeEn 282, 372; or equivalent.

DESCRIPTION: Design practice for manufacturing considerations. Surface finish, tolerances, GD&T, and inspection and gaging principles. Application of computer-aided tolerancing and inspection.

Course Outcomes

- Become familiar with common machining and production processes and their capabilities. Specify appropriate dimensional tolerances and surface finish for given applications based on a knowledge of machine capabilities and standard charts.
- Gain familiarity with manufacturing feature control practice using geometric dimensioning and tolerancing principles. Application of GD&T to assemblies.
- Experience with electronic and computer-based inspection equipment. Understand how functional gages are designed and used for inspection and part acceptance.Understand the role of datums in design, production and inspection.
- Apply statistical tolerancing techniques to model stackup in assemblies. Learn techniques for establishing optimum tolerances for each assembly, based on the processes, geometry and materials.
- Learn how to model process variations in 1-D and 2-D assemblies and predict the effect on critical features, product performance, and quality levels.
- Learn how to account for dimensional, GD&T, and kinematic variations in an assembly model, both statistically and worst case.
- Recognize the competing tolerance requirements between production processes, design performance and overall cost.
- Develop an overall perspective of computer applications in design for manufacturing.

ME EN 558 : Metallurgy. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: ME EN 250; or instructor's consent.

DESCRIPTION: Fundamental principles of physical metallurgy and their application to design.

Course Outcomes

- Describe common material characterization techniques and their strengths and limitations.
- Describe the interactions of point and line defects and their effects on mechanical properties.
- Be able to draw, describe and use phase diagrams associated with commonly used engineering materials.
- Describe/model the evolution of microstructure under non-steady state conditions.
- Model non-steady state diffusion in solid materials and predict the difference as a function of time, temperature and species.
- Describe the thermodynamics and prevalence of both homogeneous and heterogeneous nucleation.
- Describe the effect of nucleation and growth kinetics on isothermal transformations.
- Describe the theory behind the different hardening mechanisms of solid materials.

ME EN 584 : Manufacturing Process Machine Design. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: ME EN 372; or equivalent.

DESCRIPTION: Applying machine design principles to manufacturing process machines and tooling;

integrating machine elements; precision machine design. Designing and analyzing the effects of loading, combined stresses, and deflections on machine process capability. Sensors applied to process machines.

Course Outcomes

- Independently learn about a process to make recommendations for changes in the design of a process machine in order to improve the machine's performance capabilities.
- Make recommendations for use of specialized components for the design and development of manufacturing equipment based on sound analysis and good engineering judgment.
- Identify cause and effect relationships between manufacturing process parameters and the machine capabilities that perform these manufacturing processes.
- Recommend the selection of manufacturing process machines to perform various manufacturing processes.
- Do individual research and learning and synergistically, as part of a team, teach what they have learned to others in a professional manner.

4. Complete 3 additional hours from the manufacturing electives list.
5. Complete 3 additional hours from the mechanical engineering general elective list.

When combined with required courses for all mechanical engineering majors related to manufacturing, namely Me En 250, 282, 475/476, and Stat 201, this option provides a strong foundation in manufacturing engineering.

*Hours include courses that may fulfill university core requirements.

100-Level Courses

ME EN 172 : Engineering Graphics--Principles and Applications. (3:2:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Engineering and technology major status.

DESCRIPTION: Comprehensive applications of CAD-based national (ANSI) and international (ISO) graphics standards, including coordinate and geometric dimensioning and tolerancing practices, manufacturing, and product verification procedures.

Course Outcomes

- 1. Understand both surface and solid modeling techniques found in a modern commercial CAD package.
- 2. Create a CAD model of basic machine components and assemblies.
- 3. Design and create CAD models of average to complex mechanical components.
- 4. Create, read and understand engineering drawings composed of multiple views with standard dimensioning and tolerancing nomenclature.
- 5. Create, read and understand engineering drawings that contain geometric dimensioning and tolerancing symbology.
- 6. Understand the approaches and processes used in component and assembly modeling, i.e. top-down and bottom-up design.
- 7. Collaborate with teammates to learn how to apply CAD tools to the modeling projects.
- 8. Learn about design and engineering processes in a global context.

ME EN 191 : New Student Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Topics of special interest to new mechanical engineering majors.

NOTE: Required of all first-semester freshman and transfer students.

Course Outcomes

- 1. Students are aware of the 12 basic outcomes of the mechanical engineering program at BYU.
- 2. Gain a perspective of the many career opportunities and specialties in mechanical engineering.
- 3. Explain what it means to be responsible for one's own education and to be an independent learner, including familiarity with the aims of a BYU education.
- 4. Students are aware that there are design processes that engineers follow to meet needs.
- 5. Students can explain that mechanical engineers are involved with fabricating and manufacturing products.
- 6. Learn the importance of developing good communication skills.
- 7. Become aware that working effectively in teams is a vital skill for an engineer.
- 8. Discuss the role of an internship in developing engineering skills and career goals, including how to search for a job using a number of resources.
- 9. Students are aware that mechanical engineering takes place within the context of society and is driven by factors such as market demands, economics, safety, and societal needs.

ME EN 199R : Academic Internship. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Consent of both department chair and cooperative education coordinator.

DESCRIPTION: Work experience evaluated by supervisor and posted on student's transcript.

Course Outcomes

- Student acquires professional experiences in the discipline.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

200-Level Courses

ME EN 250 : Science of Engineering Materials. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CHEM 105

DESCRIPTION: Principles and properties of solid materials and their behavior as applied to engineering.

Course Outcomes

- 1. Describe the functional behaviors of the primary classes of materials (metals, ceramics, polymers, composites).
- 2. Predict material properties based on atomic structure and defects.
- 3. Apply the lever rule to binary phase diagrams.
- 4. Model the stress-strain diagram and describe the mechanisms for altering it for the various classes of materials.
- 5. Describe the kinetics of diffusion and the process of nucleation and growth as they affect transformation products.
- 6. Describe common degradation and failure processes for each basic class of materials.
- 7. Select an appropriate material class given functional requirements.

ME EN 282 : Manufacturing Processes. (3:2:3)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ME EN 250

DESCRIPTION: Common manufacturing processes, including technological limitations and economic considerations. Influence of product design on process selection and manufacturing efficiency.

Course Outcomes

- 1. Demonstrate an understanding of the impact of manufacturing capability on society.
- 2. Recognize and develop a familiarity with a variety of manufacturing processes and how they are classified. Demonstrate understanding of the physical phenomena involved in how various families of manufacturing processes work.
- 3. Identify characteristics and capabilities of various manufacturing processes so that recommendations for process selection plans can be made. Recommend process parameters for various manufacturing processes. Identify materials and/or their properties that would be appropriate for successful use with various manufacturing processes.
- 4. Identify cause and effect relationships for various manufacturing process parameters so that inferences from process data can be made to obtain desired process results.
- 5. Make practical design recommendations to improve the manufacturability of component parts based on manufacturing process knowledge.
- 6. Perform various manufacturing processes with real process equipment in order to begin to develop good engineering, judgment about the capability of various processes, and the development of process plans.
- 7. Work successfully in teams on an assigned design and build project.
- 8. Write professional quality engineering reports on manufacturing processes and projects. Communicate professional quality responses to open-ended manufacturing process questions.

300-Level Courses

ME EN 312 : Fluid Mechanics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ME EN 321; Concurrent enrollment in Me En 363, 373.

DESCRIPTION: Physics and modeling of fluid flow; fluid statics, dimensional analysis, momentum, internal and external viscous flow, compressible flow, and fluid machinery.

Course Outcomes

- 1. Understand viscosity as a fluid property and be able to compute shear stress involving Newtonian fluids. Understand the different types of fluids and the phenomena of surface tension and cavitation.
- 2. Understand the variation in pressure, and determine pressure at a point in a static gas or liquid. Be able to compute hydrostatic forces on fully and partially submerged surfaces, and be able to determine the location of the center of pressure.
- 3. Understand field variables and be able to evaluate the local, convective, and total acceleration in flowing fluids. Recognize Lagrangian and Eulerian frames of reference.
- 4. Understand pressure distributions normal to, and parallel to, streamlines in flowing fluids. Be able to appropriately apply Bernoulli's principle to fluid dynamic situations and recognize the limitations of this principle.
- 5. Be able to derive the integral form of the conservation of mass principle from the Reynolds Transport Theorem and appropriately apply it to steady and unsteady flow situations with uniform or two-dimensional velocity distributions. Recognize and be able to utilize the differential form of conservation of mass.
- 6. Be able to derive the integral form of the linear momentum principle from the Reynolds Transport Theorem and apply global force/momentum balances for stationary and constant velocity frames of reference with uniform or two-dimensional velocity distributions. Recognize the Navier-Stokes equations and solve them for simplified viscous flows.
- 7. Be able to determine appropriate dimensionless variables for a given dynamical situation. Understand the usefulness in presenting experimental data using dimensional analysis. Predict prototype analysis based on similitude and understand the pitfalls of modeling.
- 8. Understand the mechanical energy equation and be able to apply it to laminar and turbulent flow with minor and major losses through pipe networks.
- 9. Understand and predict velocity distributions and boundary layer growth for flat plate boundary layers with laminar or turbulent flow. Understand flow separation, be able to predict skin friction and pressure drag for laminar and turbulent flows, and describe methods of drag reduction.

ME EN 321 : Thermodynamics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 113; Concurrent enrollment in Math 303 or 334.

DESCRIPTION: Fundamentals of thermal energy and work; principle of state, conservation of mass, conservation of energy, increase of entropy principle; application to thermal and mechanical processes.

Course Outcomes

- 1. Engineering Math – Each student can apply the mathematical principles required to develop and solve mathematical models – consisting of both algebraic and differential equations – that are based on the energy and entropy equations and to evaluate the properties used in these equations.

- 2. Thermodynamic Systems – Each student can select an appropriate system (control mass or control volume) and identify the heat, work and mass flow interactions occurring between the system and its surroundings in order to build thermodynamic models and analyze thermodynamic systems and processes.
- 3. Thermodynamic Properties and State – Each student can use thermodynamic properties and the state postulate in order to fix the state of a thermodynamic system. Each student can distinguish between point functions (thermodynamic properties) and path functions (heat, work and entropy generation) in order to describe thermodynamic processes. Each student can use phase diagrams in order to illustrate isobaric, isometric, isothermal, isentropic, isenthalpic or other thermodynamic processes.
- 4. Obtaining Thermodynamic Property Values – Each student can properly characterize a thermodynamic system as either an ideal gas, an incompressible substance or a saturated liquid-vapor mixture in order to identify appropriate property relationships. Each student can use equations of state, charts or tables in order to obtain values of thermodynamic properties.
- 5. Conservation of Mass and Energy – Each student can implement the principle of conservation of mass and conservation of energy in order to build models of open and closed thermodynamic systems undergoing transient and steady processes.
- 6. Principle of Increasing Entropy - Each student can identify irreversibilities in order to determine whether a process may be approximated as reversible. Each student understands the increase of entropy principle, and can use the entropy equation in order to model open and closed systems undergoing transient and steady processes.
- 7. Classical Analysis of Engineering Devices and Processes – Each student can describe the hardware, the operation, the purpose, and the approximations typically used to build thermodynamic models of common engineering devices and processes. Examples of common engineering devices are turbines, compressors, pumps, nozzles, diffusers, valves and heat exchangers. Examples of common processes are restrained compression, restrained expansion, and the charging and discharging of a tank.
- 8. Each student can list the processes and devices that comprise the ideal Otto, Diesel and Brayton gas power cycles and the ideal Rankine steam power cycle. Each student can build thermodynamic models in order to analyze and evaluate these cycles and to draw conclusions regarding the performance of these cycles.
- 9. Each student can list the processes that comprise the ideal refrigeration cycles and can build thermodynamic models of these cycles in order to analyze, evaluate and draw conclusions regarding their performance.

ME EN 335 : Dynamic System Modeling and Analysis. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: ME EN 363 & ME EN 373 & CE EN 204

DESCRIPTION: Formulating mathematical models for mechanical, electrical, fluid, and combined systems; numerical solution of motion equations; first- and second-order systems, frequency response, and transfer functions.

Course Outcomes

- 1. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic mechanical systems, including inertia, compliance, dissipation, and power sources, and obtain equations of motion for linear motion and fixed-axis rotation.
- 2. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic electrical systems, including inductance, capacitance, resistance, power sources and amplifiers.
- 3. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic fluid systems, including inertance, capacitance, resistance, and pumps.
- 4. Students should have a knowledge of fundamental concepts of multi-domain modeling of electromechanical and fluid/mechanical systems and be able to develop lumped element models of these mixed systems.
- 5. Students should know how to place equations of motion into state variable form, and to develop a simulation for basic non linear and linear systems using Matlab or some other simulation software.
- 6. Students should know how to manipulate a system of linear differential equations to obtain transfer functions and poles.
- 7. Students should know how to interpret poles to define natural frequencies, damping ratios, time constants, and the natural response, step response, and impulse response of a system.
- 8. Students should understand the concept of frequency response. They should understand the relationship between transfer functions and frequency response, and should be able to obtain frequency response plots for their system models using Matlab.

ME EN 340 : Heat Transfer. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ME EN 321

DESCRIPTION: Fundamentals of heat transfer; basics of conduction, convection, and radiation; mass transfer by analogy; heat exchangers; computer applications to practical design and analysis problems.

Course Outcomes

- 1. Conservation Principles – Each student can apply conservation of mass and energy to a control volume or a control surface in order to build models of heat transfer processes and systems.
- 2. Engineering Math – Each student can apply appropriate mathematical techniques in order to solve models built using the basic concepts and fundamental laws of heat transfer.
- 3. Fundamentals of Conduction - Each student can describe the phenomenological origin of Fourier's law and can use it in conjunction with the principle of conservation of energy in order to develop the general heat diffusion equation. Each student can solve one-dimensional, steady-state problems using the heat diffusion equation and appropriate boundary conditions.
- 4. Extended Surfaces - Each student can implement the fundamentals of conduction in order to analyze extended surfaces. Each student can use fin performance parameters in order to evaluate fins or fin arrays.
- 5. Two-dimensional conduction - Each student can describe the analytical and numerical methods commonly used in order to analyze two-dimensional, steady state heat conduction. Each student can use finite difference methods in order to solve two-dimensional, steady state heat transfer problems.
- 6. Transient Conduction - Each student can implement the lumped capacitance method, one-dimensional analytical solutions and transient finite difference methods in order to analyze transient heat transfer problems.
- 7. Fundamentals of Convection - Each student can describe the physical phenomena associated with convection and use non-dimensional parameters to analyze convection heat transfer. Each student can implement Newton's law of cooling in order to calculate local and global convective heat fluxes.
- 8. Methodology for a Convection Analysis - Each student can use empirical correlations in order to analyze external and internal, forced and free convection problems.
- 9. Fundamentals of Radiation - Each student can describe the physical mechanisms involved in radiation heat transfer. Each student can apply models of these mechanisms to obtain radiative fluxes and radiative

properties in order perform energy balance on surfaces.
- 10. Radiative Surface Exchange - Each student can calculate total, hemispherical radiative properties of real surfaces from their spectral, directional counterparts and evaluate the radiative heat exchange between surfaces and in diffuse, gray enclosures.

ME EN 363 : Elementary Instrumentation. (3:3:1.5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: ENG T 231 & MATH 303 & EC EN 301; or ENG T 231 & MATH 314 & EC EN 301; Concurrent enrollment in Engl 316.

DESCRIPTION: Fundamentals of mechanical measuring systems; sensors, signal conditioning, statistical error analysis, dynamic response, standards.

Course Outcomes

- 1. Students should have a knowledge of fundamental concepts of measurement including accuracy, precision, bias error, random error, DC offset, static sensitivity (DC gain), etc. Students should be able to calibrate (statically) a measurement system.
- 2. Students should understand the concept of time and frequency response as it applies to measurement systems. Students should understand the fundamentals of first- and second-order systems and should be able to characterize the behavior of such systems through the measurement of the time constant, natural frequency, and damping ratio.
- 3. Students should be familiar with the fundamental theory and techniques of data acquisition and signal conditioning. Students should understand the sampling process, how aliasing can occur, and how to prevent aliasing with analog prefilters. Students should be able to use a Wheatstone bridge to condition signals from variable resistance devices. Students should be able to construct basic signal conditioning circuits using op-amps and electrical components (e.g., voltage divider, amplifier, differential amplifier, low-pass filter).
- 4. Through laboratory exercises and projects, students should gain hands-on familiarity with a variety of transducers, such as strain gages, thermocouples, and optical sensors. Students should understand the governing principles of their operation and how they influence their behavior.
- 5. Students should know basic statistical analysis principles that apply to measurement. Students should be able to apply concepts of infinite statistics to characterize large populations of measurement data. Similarly, they should be able to apply concepts of finite statistics to small samples of measurement data. Students should be able to apply least-squares analysis for curve-fitting purposes.
- 6. Students should be able to perform a basic uncertainty analysis for a measurement system. This includes the ability to perform a design-stage uncertainty analysis for a component of a sensor system, the ability to apply root-sum-of-squares methods to estimate uncertainty for multi-component systems, and the ability to determine how uncertainties are propagated in a calculated result.
- 7. Students should gain experience in documenting experimental work. Students should learn how to write a memo report and a full formal report.

ME EN 372 : Mechanical System Design Fundamentals. (3:2:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: CE EN 203 & ME EN 282; Concurrent enrollment in Me En 373.

DESCRIPTION: Static and dynamic stress and failure analysis for mechanical systems.

Course Outcomes

- 1. Draw a free body diagram of a structure or machine component. Show the loads and calculate the reactions. Draw shear moment diagrams.
- 2. Calculate stresses in machine components due to combined loadings.
- 3. Estimate the deflection of structural members under combined loading.
- 4. Select an appropriate static failure theory for a brittle or ductile material and apply it to predict failure loads and safety factors for various geometries and loading conditions.
- 5. Analyze the stresses in pressure vessels, press fits, curved beams, bolts, and bolted joints.
- 6. Calculate buckling predictions for statically loaded compression members.
- 7. Construct S-N and Goodman diagrams for cyclically loaded members, calculate mean and alternating stresses and predict safety factors for infinite or finite life.
- 8. Examine failed members and diagnose the cause of failure. Describe the probable loading and governing material behavior.
- 9. Design machine members to prevent static, dynamic or fatigue failure. Integrate several components in a system to meet design requirements.
- 10. Gain experience using commercial FEA software to create models of simple structures and machine components. Solve these models to determine deflections and stresses, and understand how to interpret the results for engineering application.

ME EN 373 : Introduction to Scientific Computing and Computer-Aided Engineering. (3:2:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MATH 113; Concurrent enrollment in Math 302 or 314.

DESCRIPTION: Computer programming for engineers taught in context of solving physical systems using numerical methods. Student will program solutions using the C++ language, spreadsheets, symbolic solvers, etc.

Course Outcomes

- 1. Understand the role of numerical solutions in the engineering process of design and analysis. Understand how integers and real numbers are stored inside the computer. Understand the limitations associated with numerical solutions, including accuracy due to approximations and round-off error.
- 2. Find roots of equations using various modern numerical methods.
- 3. Solve linear systems of equations using Gauss elimination, LU decomposition and/or matrix inversion. Understand the concept of matrix condition number.
- 4. Be able to implement basic curve fitting algorithms, including least-squares regression.
- 5. Implement forward and central difference methods for approximating derivatives; estimate round-off and truncation error
- 6. Implement the trapezoidal rule and Simpson's 1/3 rule for numerical integration.
- 7. Solve simple ordinary differential equations (initial value and boundary value problems) using basic numerical techniques.
- 8. Using C , write programs which use control statements and looping constructs, employ 1D and 2D arrays, call functions, and read and write to data files. Understand classes and pointers at a basic level.
- 9. Use commercially available software packages, including Excel and MATLAB, to perform basic numerical tasks

(calculate equations, graph data, perform curve-fitting, solve linear systems of equations, and manipulate matrices).
- 10. Use computer programs to solve simple engineering problems, and write technical memos to explain the procedures and results of laboratory exercises.

400-Level Courses

ME EN 412 : Applications of Fluid Dynamics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 312

DESCRIPTION: One-dimensional compressible flow, shocks, expansions, nozzles; turbomachinery design and performance; pumps, compressors, fans, and turbines; introduction to CFD with applications.

Course Outcomes
- Students will be able to apply integral analysis methods, conservation of mass, and linear momentum laws to formulate and solve fluid problems.
- Students will be able to formulate and solve introductory incompressible wave phenomena (e.g., phase speed, group speed, wave spectrum, deep and shallow water, etc.)
- Students will be capable of knowing how to set up solutions to compressible flow problems, and be introduced to the basic solutions.
- Students will understand how surface tension affects fluid flows and how it affects the governing equations as a boundary condition.
- Students will learn about empirical methods to solve lift and drag of external flow fields.
- Students will gain a basic understanding of how lift and drag can be calculated numerically.

ME EN 415 : Applied Aerodynamics and Flight Mechanics. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: ME EN 312

DESCRIPTION: Modern applied aerodynamics, including performance, stability, and control of aerospace vehicles.

Course Outcomes
- Aerodynamic design of an airplane.
- Designing an airplane with specific performance requirements.
- Designing an airplane for stable and controlled flight.
- Designing an airplane propulsion system.
- Airplane structural design.

ME EN 422 : Applied Thermodynamics. (3:3:1)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: ME EN 321

DESCRIPTION: Applied engineering thermodynamics including air and steam power cycles, thermodynamic relations, and introduction to combustion and equilibrium chemical reactions.

Course Outcomes
- Evaluation of work potential using exergy concepts.
- Creation of gas and vapor power cycles.
- Creation of refrigeration cycles.
- Application of thermodynamic property relations.
- Evaluation of problems involving gas mixtures.
- Analysis of thermodynamic problems involving chemical reactions.

ME EN 425 : Internal Combustion Engines. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 321

DESCRIPTION: Fundamental operating characteristics of internal combustion engines, spark and compression ignition. Thermodynamic cycle analysis, performance and emissions characterization, and dynamometer testing on CFR and production engines.

Course Outcomes
- A knowledge of internal combustion engine parts and their functionality.
- The ability to calculate industrial standard internal combustion engine performance metrics.
- An understanding of the internal combustion engine cycle and the ability to create and analyze a zero dimensional thermodynamic model.
- Understand the fundamentals of combustion such as flame temperature, flame stoichiometry, and flame speed and how combustion is coupled to engine performance.
- Understand how the major pollutants of internal combustion engines are formed and controlled.

ME EN 426 : Gas Turbine and Jet Engine Design. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 312 & ME EN 321

DESCRIPTION: Design and synthesis of land-based and aircraft gas turbines utilizing fluid flow and thermodynamic fundamentals. Extensive discussion of turbojet, turbofan, and turboprop engines.

Course Outcomes
- Apply basic fluid mechanic and thermodynamic principles to understand how gas turbine engines operate.
- Develop ability to analyze and predict the cycle performance of gas turbine engines.
- Learn the components of gas turbine engines and their purpose. Understand how the performance of individual

components contributes to the overall performance of the engine.
- Learn how to analyze and predict the performance of individual gas turbine engine components
- Develop confidence in knowledge of gas turbine engine principles for application in academia or industry.

ME EN 431 : (Me En-EC En 483) Design of Control Systems. (4:3:3)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: ME EN 335; or EC EN 380

DESCRIPTION: Classical frequency response and time domain design of control systems. State variable control and computer simulation of control systems.

Course Outcomes
- Ability to use the final value theorem to predict steady state behavior.
- Ability to model dynamic systems using differential equations, transfer functions, and state space equations.
- Ability to design feedback systems using frequency domain techniques.
- Ability to design feedback systems using state space techniques.
- Ability to design feedback control systems to meet desired specifications.
- Ability to simulate dynamic systems using Simulink and Matlab.

ME EN 437 : Kinematics. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: CE EN 204

RECOMMENDED: Me En 373.

DESCRIPTION: Relative motion of links in mechanisms; velocities and accelerations of machine parts; rolling contact; cams; synthesis of mechanisms. Includes computer-aided engineering techniques.

Course Outcomes
- 1. Determine the position of mechanisms.
- 2. Analyze the velocity and acceleration of mechanisms.
- 3. Calculate the dynamics of mechanisms.
- 4. Synthesize mechanisms to perform specified tasks.
- 5. Analyze the performance of non-linkage mechanisms such as cams and gears.

ME EN 452 : Intermediate Materials. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: ME EN 250 & ME EN 372

DESCRIPTION: Mechanical behavior of engineering materials including metals, plastics, ceramics, and composites.

Course Outcomes
- Extract and interpret key features (e.g., Young's modulus, yield strength, tensile strength, and ductility, true stress, true strain) from engineering stress-strain curves.
- Gain a basic understanding of the microstructural basis for properties in crystalline and polymeric materials, and how microstructure may be altered in ways that are advantageous to mechanical design.
- Acquire knowledge of the energetic basis for interaction of dislocations with other dislocations, point defects and precipitate phases, and its exploitation in strain, grain size, solid solution, and precipitate hardening mechanisms.
- Obtain an awareness of the energetic principles of mechanical failure of metals, and its basis in elastic/plastic localization phenomena, and how to protect designs from failure.
- Be able to integrate core competencies 1.-4. to tackle engineering design problems.

ME EN 456 : Composite Material Design. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 250

DESCRIPTION: Macro- and micro-mechanical analysis and design of uni- and multidirectional composite materials.

Course Outcomes
- Develop an understanding of the role of constituents in overall response of composite lamina (micromechanics).
- Develop an understanding of how a set of laminae with different orientations affect the overall laminate properties and response (macromechanics).
- Analyze elastic and strength properties, and elastic response, of orthotropic and anisotropic materials having both continuous and discontinuous reinforcements.
- Use Classical Lamination Theory to assess the role of ply orientation on overall axial, bending and twisting elastic deformation of laminates under applied loads.
- Use failure theories for multiaxial loading to determine if a laminate composite will fail for known loading and use this knowledge to design failure resistant structures.

ME EN 471 : Computer-Aided Engineering Applications. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 172 & ME EN 373 & CE EN 204

DESCRIPTION: Application of computer-aided engineering tools to design; 3-D geometry and solid modeling; applying finite element analysis, kinematic analysis, and other software to engineering analysis.

Course Outcomes
- An understanding of Product Lifecycle Management (PLM) methods and techniques for enabling distributed teams to collaborate on a shared design.
- An understanding of the underlying mathematics of topology optimization, its CAx methods, and the role topology optimization plays in conceptual, preliminary and detail product design.
- An understanding of the mathematics of curves, surfaces and solids, and a mastery of both surface and solid modeling techniques found in a modern commercial CAD package.
- The ability to create robust parametric CAD models of mechanical components and assemblies.
- An understanding of the underlying mathematics of Mass Properties, FEA, CFD, animation and motion analysis;

their CAx methods, and the role these methods and applications play in preliminary and detail component and assembly design.
- An understanding of the process for preparing CAD models for Rapid Prototyping.
- Experience practicing team based design engineering.
- An understanding of the following global competencies:a. Experience working in or directing a team of ethnic and cultural diversity.b. Understand cultural influences on product design, manufacture and use.c. Understand how cultural differences affect how engineering tasks are performed.

ME EN 472 : Mechanical Systems Design Applications. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 372

DESCRIPTION: Theory, analysis, and design of mechanical systems and components.

Course Outcomes
- Students will gain an increased understanding of failure prevention.
- Students will gain an increased understanding of finite element analysis tools.
- Students will develop an understanding of basic machine components.
- Students will gain experience in mechanical design, including creating documentation.

ME EN 475 : Integrated Product and Process Design 1. (3:2:3)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 363 & ME EN 372 & ME EN 373; or EC EN 340 & EC EN 370 & EC EN 380; or ENG T 231 & MFG 340 & MFG 355; Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering technology, industrial design, or related disciplines with instructor's consent.

DESCRIPTION: Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations. Intellectual property assignment agreement required.

NOTE: MeEn 475 and 476 must be taken in consecutive fall and winter semesters.

Course Outcomes
- 1. Understand the six stages of development through which each product passes.
- 2. Understand how the product information (requirement information and design information) evolves through the stages of development.
- 3. Understand how a purposeful network of design activities is used to cause the product information to evolve.
- 4. Understand how acceptance tests are used to ensure the transferability and quality of the product information throughout the stages of development.
- 5. Understand how product development processes can be customized for specific development projects.
- 6. Develop skills in project planning, idea generation, prototyping, developing engineering models, and engineering reporting and presentations.
- 7. Understand how to work within organizational policies to accomplish important goals.
- 8. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance synergy on a project team.

ME EN 476 : Integrated Product and Process Design 2. (3:2:3)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 363 & ME EN 372 & ME EN 373; or EC EN 340 & EC EN 370 & EC EN 380; or ENG T 231 & MFG 340 & MFG 355; Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering technology, industrial design, or related disciplines with instructor's consent.

DESCRIPTION: Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations. Intellectual property assignment agreement required.

NOTE: MeEn 475 and 476 must be taken in consecutive fall and winter semesters.

Course Outcomes
- 1. Develop skills in product development economics and engineering drawing review and checking.
- 2. Develop and demonstrate basic understanding in at least two Design for X areas, such as Design for Manufacturing and Design for Sustainability.
- 3. Develop and demonstrate basic skills with at least two design tools, such as optimization, design of experiments, and sketching.
- 4. Understand real world applications of development methods from development case studies and product development professionals.
- 5. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance synergy on a project team.
- 6. Apply the understanding and skills from Me En 475 and the other outcomes from Me En 476 while working with a project sponsor in a team setting to produce desirable and transferable product information, through design, building, and acceptance testing.

ME EN 477 : Design for Manufacture and Assembly. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MeEn 282, 372; or equivalent.

DESCRIPTION: Design practice for manufacturing considerations. Surface finish, tolerances, GD&T, and inspection and gaging principles. Application of computer-aided tolerancing and inspection.

Course Outcomes
- Become familiar with common machining and production processes and their capabilities. Specify appropriate dimensional tolerances and surface finish for given applications based on a knowledge of machine capabilities and standard charts.
- Gain familiarity with manufacturing feature control practice using geometric dimensioning and tolerancing principles. Application of GD&T to assemblies.
- Experience with electronic and computer-based inspection equipment. Understand how functional gages are designed and used for inspection and part acceptance.Understand the role of datums in design, production and

inspection.
- Apply statistical tolerancing techniques to model stackup in assemblies. Learn techniques for establishing optimum tolerances for each assembly, based on the processes, geometry and materials.
- Learn how to model process variations in 1-D and 2-D assemblies and predict the effect on critical features, product performance, and quality levels.
- Learn how to account for dimensional, GD&T, and kinematic variations in an assembly model, both statistically and worst case.
- Recognize the competing tolerance requirements between production processes, design performance and overall cost.
- Develop an overall perspective of computer applications in design for manufacturing.

ME EN 482 : Manufacturing Systems Analysis and Design. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: MeEn 250, 282; or equivalents.

DESCRIPTION: Analysis, synthesis, and control of processing and assembly operations; mathematical modeling of manufacturing processes; systems integration; applying conservation principles to processing and assembly operations.

Course Outcomes
- Students will apply fundamental mathematical models to understand and estimate material behavior in manufacturing processes.
- Students will be able to estimate the force and power (energy/time) requirements to process conventional parts, using modern tools and machines.
- Students will understand the importance of and tools used in electronics manufacturing.
- Students will understand the control processes used in Flexible Manufacturing Centers and Systems.
- Students will be able to select and review technical paper(s) relating to a course subject area, digest relevant course information, and correlate the results with the mathematical models discussed in the course, also rendering good judgment as to whether the paper is useful to modern manufacturing methods.

ME EN 486 : Automation. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Determining appropriate levels of manufacturing automation based on economics and productivity. Elements of automation, including sensors, robots, conveyors, and part feeders.

Course Outcomes
- Students will understand and apply fundamental approaches to the control of automated production processes and be able to understand the limitations of automation in modern factories.
- Each student will select a topic area in advanced automation and demonstrate current specifications/capabilities knowledge of this area, both to the instructor and to the other class students.
- Students will understand automation methodologies and the components and equipment used to control advanced factory processes through advanced on-line labs.
- Students will design and simulate automation processes using a simulation and control system and thus understand the power of simulation in evaluating potential automation solutions to manufacturing problems.

ME EN 495R : Mentored Learning for Undergraduate Coursework in Mechanical Engineering. (.5-6:Arr.:Arr.)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Selected topics in mechanical engineering.

Course Outcomes
There are no course outcomes available

ME EN 497R : Mentored Learning for Undergraduate Projects in Mechanical Engineering. (.5-3::)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Independent learning focused on an engineering project.

Course Outcomes
There are no course outcomes available

ME EN 499R : Honors Thesis. (.5-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

Course Outcomes
- Understand and apply techniques for finding technical papers related to a research topic.
- Analyze and evaluate previous research to identify known and unknown information.
- In conjunction with a faculty member create a research plan that will generate new information or synthesize existing information in such a way as to make a contribution to the defined topic.
- Perform experimental or investigational research on the topic including evaluation, analysis, and synthesis of the information collected through experimental or investigational research.
- Complete a written thesis documenting the learned information including editorial review by faculty and revisions by the student.
- Defend the written thesis to a committee of faculty by oral presentation and examination.

500-Level Graduate Courses (available to advanced undergraduates)

ME EN 500 : (MeEn-CEEn) Design and Materials Applications. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 250; or CE EN 321

RECOMMENDED: Me En 452.

DESCRIPTION: Applied and residual stress; materials selection; static, impact, and fatigue strength; fatigue damage; surface treatments; elastic deflection and stability--all as applied to mechanical design.

Course Outcomes
- Understand how materials selection in design can be based on a variety of materials properties.
- Understand effects of materials structure and properties on design and choices for static, impact, fatigue, elastic, and anelastic behavior.
- Be familiar with important techniques used to modify engineering properties of a broad range of materials, such as metals, polymers, ceramics, composites, and biomaterials.
- Understand the necessary analysis techniques to design for various material failure mechanisms.

ME EN 501 : (MeEn-CEEn) Stress Analysis and Design of Mechanical Structures. (3:3:0)

WHEN TAUGHT: Spring

PREREQUISITE: ME EN 372; or CE EN 321

DESCRIPTION: Stress analysis and deflection of structures; general bending and torsion, with computer applications to mechanical and aerospace structure design.

Course Outcomes
- 1. Calculate the deflections of and stress in multi-material beams under force, moment, or temperature loads.
- 2. Understand the principles of stress and strain, including principal stress and strain, in general three-dimensional structures.
- 3. Calculate the deflections and stress in torsion bars of arbitrary cross section.
- 4. Calculate the deflections and stress in beams in unsymmetric bending.

ME EN 503 : (MeEn-CEEn) Plasticity and Fracture. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 250 & CE EN 203

DESCRIPTION: Tensor algebra; stress and deformation tensors; relationships between dislocation slip, yielding, plastic constitutive behavior, and microstructure development; cracks and linear elastic fracture mechanics.

Course Outcomes
- Identify and describe the influence of crystal structure and material defects on tensile and fracture properties.
- Describe the effects of a stress concentration as well as its influence on the fracture and fatigue life of a structural member.
- Describe the principles of the Griffith Crack Criteria and its application to brittle materials, and its extension to ductile materials.
- Describe the Failure Design Philosophy and apply it to materials selection in an engineering application.
- Predict the life of a structural member of known material properties given the loading conditions and a known flaw size.
- Describe the impact of various microstructure features on tensile, fracture and fatigue properties.
- Select an appropriate material class given functional requirements, fatigue and fracture.

ME EN 504 : (Me En-CE En) Computer Structural Analysis and Optimization. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 372 & MATH 302; or ME EN 372 & MATH 313; or CE EN 321 & MATH 313

DESCRIPTION: Matrix stiffness method for 1D, 2D, and 3D skeletal structure classes. Implementing the matrix stiffness method as a computer program. Nonlinear second-order structural analysis. Structural optimization techniques including stress-ratio method, gradient-based methods, and genetic algorithms.

Course Outcomes
- Construct global and local member stiffness matrices and force vectors for any skeletal class and any distributed loading.
- Construct structure matrices and vectors for both force and support displacement loads exploiting symmetry/antisymmetry and deformation assumptions.
- Construct member displacement vectors and free-body diagrams for any skeletal class.
- Write down the basic organization and calling structure of a structural analysis program, and complete the pseudo-code for structure level routines.
- Derive first/second order equilibrium/compatibility equations, buckling loads/displacements, and structure elastic/geometric stiffness matrices for small trusses and single-member frames.
- Determine the number of FLOPS and perform the calculations for matrix-vector operations including triangularization, backsubstitution, Newton-Raphson iteration, and inverse iteration.
- Determine the number of FLOPS and perform the calculations for stress ratio optimization and exhaustive search, and construct design space plots if possible.
- Determine the number of FLOPS and perform the calculations for finite difference / virtual work sensitivity analysis, Kuhn-Tucker condition evaluation, and optimality criteria algorithm.
- Determine the number of FLOPS and perform the calculations for genetic algorithms with penalty/segregation fitness, tournament/roulette selection, point/uniform/blend crossover, dynamic mutation, and ranking/scoring/maximin fitness.
- Prepare input for linear analysis, nonlinear pushover analysis, gradient-based size optimization, and genetic-based size/shape/topology optimization programs for plane frames.

ME EN 505 : Applied Engineering Math. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: MATH 303; or MATH 334; or equivalent.

DESCRIPTION: Advanced engineering mathematics that builds a foundation for graduate mechanical engineering courses and research. Topics include tensor analysis, vector calculus, and solution methods for partial differential equations.

Course Outcomes
- Use of index or tensor notation in mathematical analysis of the equations that govern continuum mechanics.

Employing separation of variables to the solution of classical (heat, Laplace, and wave equations) PDE's.
- Applying Fourier transforms and series to the solution of PDE's and analysis of data.
- Applying the principle of superposition to PDE's with nonhomogeneities.
- Solution of PDE's in Cartesian and Cylindrical coordinates.

ME EN 506 : (MeEn-CEEn) Continuum Mechanics and Finite Element Analysis. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 372; or CE EN 321; Math 313 or Math 302.

DESCRIPTION: Equilibrium, constitutive, and compatibility equations; closed-form solutions from elasticity; finite element theory, programming, and usage; membrane, axisymmetric, and solid elements. Application to heat transfer, fluid mechanics, and seepage.

Course Outcomes
- Derive mass/momentum/energy equilibrium equations and constitutive equations for isotropic Hookean solids and Newtonian fluids, and specialize them to get Navier/Stokes/Laplace equations.
- Calculate stress traction, normal/shear stresses, principal stresses, and stress failure criteria for a given state of stress, and calculate displacements and strains for a given state of deformation.
- Transform equations between expanded, matrix, and indicial notation, and between rectangular and cylindrical coordinates.
- Degenerate 3D elasticity equations for 2D problem classes and Saint-Venant torsion using appropriate assumptions, and derive biharmonic or Laplace equations.
- State the problem class, boundary conditions, and method of solution for classical elasticity problems and seismic wave problems.
- Calculate displacements and stresses from given elasticity closed-form solutions including general solution to I-sections under torsion with or without warping restraint.
- Construct the weighted integral to obtain formulas for element stiffness matrix and force vector given the governing differential equations of a problem class.
- Calculate the system stiffness matrix, force vector, and displacement vector for a particular problem, and calculate element results.
- Construct Lagrange/serendipity/triangle shape functions in terms of natural coordinates, and use isoparametric transformations and Gaussian quadrature to evaluate element stiffness.
- Execute a finite element program and assess results on a patch test and on problems with known closed form solutions.

ME EN 508 : (Me En-CE En) Structural Vibrations. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CE EN 321; or ME EN 372; CE En 321 or Me En 372 or equivalent.

DESCRIPTION: Dynamic analysis of single degree-of-freedom, discrete multi-degree-of-freedom, and continuous systems. Applications include aerospace, civil structures, and mechanical components.

Course Outcomes
No outcomes are available at this time.

ME EN 510 : Compressible Fluid Flow. (3:3:1.5)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 312; Me En 312 or equivalent.

DESCRIPTION: One-dimensional analysis of compressible flow with area change, friction, heat transfer, shock waves, and combined effects, including experimental methods.

Course Outcomes
- Understand how to start from governing equations and basic principles to solve problems where it is desired to account for compressibility.
- Learn concepts needed to solve and analyze problems that account for compressibility in both internal and external flow applications.
- Understand characteristics of isentropic flow, normal shock waves, oblique shock waves, Prandtl-Meyer flow, Fanno (friction) flow, Rayleigh (heat transfer) flow, and multidimensional flow.
- Discover applications where compressibility is important, how to solve problems, and analyze results.

ME EN 512 : Intermediate Fluid Dynamics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 312; or instructor's consent, Me En 505 previous or concurrent enrollment.

DESCRIPTION: Review of fluid properties, Navier-Stokes equations, exact and similarity solutions, introduction to potential flows, stream functions, lift and drag, boundary layers, vorticity, and turbulence.

Course Outcomes
- Advanced ability to employ Integral Methods for modeling fluid flow phenomena.
- Be able to derive the Navier-Stokes equations from an advanced understanding of fluid kinematics.
- Understand a range of solutions and methods to analyze the Navier-Stokes equations for both simplified and complex flow fields.
- Be able to model specific fluid flow phenomena such as creeping flows, laminar boundary layers, shear layers, jets, and wakes.

ME EN 521 : Intermediate Thermodynamics. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: ME EN 321

RECOMMENDED: Me En 422.

DESCRIPTION: Review of first and second law analysis; exergy; equations of state and other thermodynamic relations; properties of mixtures and multiphase systems; chemical reactions and equilibrium.

Course Outcomes

- Be able to use the energy equation to analyze and evaluate thermodynamic systems. Be able to creatively use the energy equation in engineering applications.
- Be able to use the exergy equation to analyze and evaluate thermodynamic systems. Be able to creatively use the exergy equation in engineering applications.
- Understand how thermodynamic properties are found and be able to apply equations of state to determine properties.
- Understand the principles for determining equilibrium and apply those principles in gas phase and two-phase two component systems.
- Understand and be aware of principles of statistical thermodynamics.

ME EN 522 : Combustion. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: CHEM 105 & ME EN 340 & ME EN 422; or CH EN 373 & CH EN 376

DESCRIPTION: Introduction to first- and second-law ideal gas combustion systems along with elementary models of homogeneous and heterogeneous premixed and/or diffusion flames.

Course Outcomes

- Be able to perform thermodynamic evaluations of combustion processes including heat release, heat of formation, temperature, and equilibrium calculations.
- Understand reaction mechanisms and apply calculations involving chemical kinetic reactions.
- Evaluate simple combustion systems using conservation of mass, energy, and heat transfer.
- Understand the physical phenomena of various flame types and how they can be applied to commercially relevant systems.

ME EN 523 : (Me En-CE En) Aircraft Structures. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: CE EN 304 & CE EN 321; or ME EN 250 & ME EN 372

DESCRIPTION: Requirements, objectives, loads, materials, and tools for design of airframe structures; static behavior of thin-wall structures; durability and damage tolerance; certification and testing. Airframe component team design project.

Course Outcomes

- Students will understand and be able to apply industry philosophies and critical criteria that drive the design and govern the certification of aircraft structures.
- Students will be able to analyze the in-plane (compression, shear, stability) and out-of-plane (bending, torsion, transverse shear) behavior (stresses, deflections, margins of safety) of structural elements (beams, columns, thin plates, open and closed sections, etc.) prevalent in aircraft.
- Students will understand important issues required for certification of aircraft structures (regulations, loads, fatigue, damage tolerance).

ME EN 534 : Dynamics of Mechanical Systems. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 335

DESCRIPTION: Hamiltonian and Lagrangian dynamics, generalized coordinates, linear and angular momentum, Euler angles, rigid-body motions, and gyroscopic effects. Theory taught with applications integrated.

Course Outcomes

- Describe two- and three-dimensional kinematics of particles and rigid bodies.
- Derive equations of motion of particles and systems of particles using Newton's laws.
- Derive equations of motion of particles and rigid bodies using the method of Lagrange.
- Derive equations of motion of rigid bodies using Newton-Euler methods.
- Develop numerical solutions of equations of motion to simulate the motion of particles and rigid bodies.

ME EN 535 : Mechanical Vibrations. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 335; or equivalent.

DESCRIPTION: Introduction to energy methods for system modeling, eigenvalues and mode shapes, frequency response, and spectral characterization of vibrations.

Course Outcomes

- Students will gain an increased ability to analyze and model free and forced single and multi-degree-of-freedom systems.
- Students will gain an increased ability to apply vibration theory to the design of structures, engineering systems, and devices.
- Students will gain experience in analysis and modeling of continuous systems.

ME EN 537 : Advanced Mechanisms, Robotics. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 437; or equivalent.

DESCRIPTION: Kinematics and dynamics of advanced mechanisms, such as robots, with computer simulation of mechanism motion.

Course Outcomes

- Students will learn most common robot applications, terminology, and limitations.
- Students will be exposed to and be able to exercise basic robot design and motion concepts, both mathematically and in practical labs, such as homogeneous transformation used in forward and inverse kinematics, and robot trajectory generation.
- Students will learn how to use a teach pendant and how to program a robot.

- Students will differentiate between joint space and Cartesian space and the mathematical methods used to move from one space to the other.
- Students will compare the kinematics of emerging parallel mechanisms to those of more conventional serial mechanisms.
- Students will apply robot simulation to preliminary design of robot-centered work-cells.

ME EN 538 : Compliant Mechanisms. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 372; Me En 475 or concurrent enrollment; or instructor's consent.

DESCRIPTION: Design and analysis of compliant mechanisms and compliant structures. Large-deflection analysis/force displacement relationships; mechanisms synthesis.

Course Outcomes

- Understand the fundamentals of compliant mechanisms, including flexibility vs. strength and displacement loads vs. force loads.
- Analyze the large, nonlinear deflections of flexible members.
- Analyze, predict and prevent failure of compliant mechanisms.
- Analyze the force-displacement relationships for compliant mechanisms.
- Design compliant mechanisms for specified tasks.

ME EN 540 : Intermediate Heat and Mass Transfer. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 340; or equivalent.

DESCRIPTION: Analytical approaches to conduction, convection, and radiation heat transfer. Introduction to mass transfer.

Course Outcomes

- Each student can develop engineering models of multi-dimensional steady and multi-dimensional transient conduction heat transfer problems.
- Each student can develop engineering models of convection heat transfer problems using analytical approaches based on boundary layer theory when possible or based on empirical Nusselt number correlations when analytical solutions are not possible.
- Each student can develop engineering models of radiation surface exchange problems for both gray and spectrally selective surfaces.
- Each student can develop engineering models of mass transfer by analogy with heat transfer.
- Each student can implement advanced engineering mathematical methods to obtain solutions to models of conduction, convection and radiation heat transfer problems and to mass transfer problems.

ME EN 541 : Computational Fluid Dynamics and Heat Transfer. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 312 & ME EN 340; or CH EN 374 & CH EN 376; or instructor's consent.

DESCRIPTION: Heat transfer analysis by numerical methods. Finite difference and finite element methods, stability, and error analysis.

Course Outcomes

- Understand the fundamental concepts and techniques used in the numerical analysis of fluid flow and heat transfer.
- Apply computational verification and validation practices for fluid flow and heat transfer codes.
- Solve 1D diffusion and convection-diffusion fluid flow and heat transfer problems using finite difference and control volume methods.
- Understand concepts of control volume methods for pressure-velocity coupling.
- Have a necessary foundation for setting up and analyzing fluid flow and heat transfer problems using commercial codes.
- Understand the basic concept of the turbulence closure problem and how it leads to turbulence models.

ME EN 550 : (Me En-EC En) Microelectromechanical Systems (MEMS). (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: EC EN 450; or ME EN 372; or equivalent.

DESCRIPTION: Design, fabrication, and applications of MEMS. Mechanical properties governing their design and reliability and the processing technologies used to fabricate them.

Course Outcomes

- 1. Use mechanics principles to analyze the mechanical performance of microsystems.
- 2. Be familiar with the tools and processes used in micromaching of microelectromechanical systems (MEMS).
- 3. Use principles of physics to analyze and design MEMS, including sensors and actuators.

ME EN 552 : Neuromechanics of Movement. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 335; or instructor's consent.

DESCRIPTION: Biomechanics and neural control of human movement. Dynamics of neuromusculoskeletal system; human-machine interaction; movement disorders adn assistive/rehabilitative technology; current research techniques.

Course Outcomes

There are no course outcomes available

ME EN 555 : Introduction to Biomechanics. (3:3:0.25)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 312 & ME EN 372 & MATH 303; or ME EN 312 & ME EN 372 & MATH 334; or equivalent.

RECOMMENDED: Me En-CE En 506.

DESCRIPTION: Mechanics of biological systems. A continuum mechanics-based approach to the structure, function, mechanical response, and active remodeling of hard and soft tissues of the body.

Course Outcomes

- Describe the structure, function, mechanical properties, and active remodeling of hard and soft tissues.
- Describe muscle structure, muscle force sharing, passive and active muscle response.
- Compute skeletal dynamics and joint reaction forces during human locomotion.
- Apply finite deformation analysis to compute soft tissue strains based on marker motion.
- Utilize mechanical engineering principles to evaluate the mechanics of physiologic systems in the human body.
- Develop an approach for resolving ethical dilemmas related to biomedical engineering.

ME EN 558 : Metallurgy. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

PREREQUISITE: ME EN 250; or instructor's consent.

DESCRIPTION: Fundamental principles of physical metallurgy and their application to design.

Course Outcomes

- Describe common material characterization techniques and their strengths and limitations.
- Describe the interactions of point and line defects and their effects on mechanical properties.
- Be able to draw, describe and use phase diagrams associated with commonly used engineering materials.
- Describe/model the evolution of microstructure under non-steady state conditions.
- Model non-steady state diffusion in solid materials and predict the difference as a function of time, temperature and species.
- Describe the thermodynamics and prevalence of both homogeneous and heterogeneous nucleation.
- Describe the effect of nucleation and growth kinetics on isothermal transformations.
- Describe the theory behind the different hardening mechanisms of solid materials.

ME EN 561 : (Me En-Phscs) Fundamentals of Acoustics. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: PHSCS 318; or equivalent; Phscs 461 or concurrent enrollment.

RECOMMENDED: Phscs 318, 321; or equivalents.

DESCRIPTION: Vibrating systems, elastic media, mechanical energy, and radiation. Sound generation, transmission, reflection, and reception.

Course Outcomes

- Conceptualize and solve problems in fundamental areas of vibroacoustics, including: strings, rods, membranes, plane and spherical waves, reflection and transmission phenomena, radiation of sources, coupling between sources, waveguides, enclosures, and Helmholtz resonators, physics of human hearing, and nonlinear acoustics.
- Acquire and analyze acoustical data for physical understanding.

ME EN 562 : (Me En-Phscs 660) Acoustic Systems. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: PHSCS 561; or instructor's consent.

DESCRIPTION: Analyzing and modeling electro-mechano-acoustic systems. Transducers, calibration, and acoustical measurements. Sound sources, arrays, coupling, radiation, and directivity. Duct acoustics and acoustic filters.

Course Outcomes

- Model and analyze electro-mechano-acoustic systems using various theoretical, numerical, and experimental tools.
- Work independently and collaborate with others on problems involving system modeling and analysis, acoustical measurements, analogous circuits, source radiation, source coupling, arrays, the Kirchhoff-Helmholtz integral theorem, self and mutual radiation impedance, transducers, duct acoustics, electro-mechano-acoustic filters, and energy-based acoustics.
- Develop skills and proficiencies in all of these areas and become aware of key resources for further study.
- Become more effective researchers and designers for future work in academics or industry.

ME EN 570 : (Me En-CE En) Computer-Aided Engineering Software Development. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 373; or C programming.

DESCRIPTION: Programming methods for development of engineering software. Data structures, architecture, libraries, and graphical user interfaces, with applications to CAD systems.

Course Outcomes

- Ability to develop complex algorithms.
- Ability to convert algorithms into a commonly used computer language.
- Ability to create interactive scientific visualizations of complex data.
- Ability to create graphical user interfaces that facilitate ease of use.

ME EN 574 : Product Development Automation. (3:3:0)

PREREQUISITE: ME EN 476; Me En 475; or equivalents.

DESCRIPTION: Design automation, network modeling of design systems, mass customization, agent-based methods, transnational design systems. Aerospace, automotive, and consumer product applications.

Course Outcomes

- Understand the theory and methods for managing all of the engineering data, IP, product knowledge, etc. used to conceive, model, analyze, produce, maintain, and retire or recycle engineered products.

- Understand how to customize commercial PLM tools to either address deficiencies in their current offerings or to incorporate company-proprietary PLM methods and procedures.
- Learn the process of engineering data mining and engineering process improvement through variant product lifecycle analysis.

ME EN 575 : (Me En-CE En) Optimization Techniques in Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: MATH 302; or MATH 313; C, C++, or similar computer language.

DESCRIPTION: Application of computer optimization techniques to constrained engineering design. Theory and application of unconstrained and constrained nonlinear algorithms. Genetic algorithms. Robust design methods.

Course Outcomes

- Define and use optimization terminology and concepts, including concepts of analysis space and design space.
- Apply optimization methods to engineering problems, including developing a model, defining an optimization problem, applying optimization methods, exploring the solution and interpreting results.
- Understand and apply unconstrained optimization theory for continuous problems, including the necessary and sufficient conditions and steepest descent, Newton's method, conjugate gradient and quasi-Newton methods. Understand basic theorems of quasi-Newton methods.
- Understand and apply discrete optimization algorithms, including branch and bound, exhaustive search and simulated annealing.
- Develop and apply Genetic algorithms.
- Understand and apply constrained optimization theory for continuous problems, including the Kuhn-Tucker conditions and generalized reduced gradient and sequential quadratic programming methods.
- Apply optimization techniques to determine a robust design.
- Have some familiarity with optimization software.

ME EN 576 : Product Design. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ME EN 475; or instructor's consent.

DESCRIPTION: Emerging design methodology and design strategies for complex systems, including decomposition methods and sensitivity analysis. Advanced CAD/CAE/CAM technologies applied to design.

Course Outcomes

- Developing and executing a suitable product development process that meets the specific needs of a product's design or the needs of a specific design environment.

ME EN 578 : CAD/Cam Applications. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: ME EN 373; Advanced FORTRAN, C, or C++.

DESCRIPTION: Principles and practices involved in parametric surface and solid modeling, associativity, NC tool path generation, etc. Construction of complete CAD models for design, analysis, and manufacture.

Course Outcomes

- Proficiency in Visual Basic/C/C programming applied to engineering problems.
- Master programmatic wireframe, surface and solid modeling techniques through the use of commercial CAD API toolkits, e.g. CATIA or NX.
- Learn and demonstrate programmatic creation and manipulation of analysis models via CAE API toolkits, e.g. HyperMesh, Nastran, ANSYS, Gambit, Fluent, ADAMS, etc
- Use and program Isight to optimize programmatic CAD/CAE applications.
- Understand database structures and how to programmatically create, access, control, etc. the data.
- Develop a proof-of-concept for an industry or research sponsored application.
- Work in collaboration with fellow teammates to accomplish both the learning of the CAx tools and the executing of the industrial project.

ME EN 579 : Global Product Development. (3:3:0)

OFFERED: Study Abroad only.

PREREQUISITE: ME EN 476; Me En 475 or equivalents; senior or graduate status.

DESCRIPTION: Preparing students to be leaders in globally-influenced product development organizations. Includes visits to U.S. and overseas companies and universities.

Course Outcomes

- Understand issues associated with a global product development including developing product needs in unfamiliar cultures, managing distributed design teams and manufacturing at remote and/or distributed sites. Appreciate first-hand how global companies approach these issues.
- Understand design strategies in a global environment.
- Appreciate the challenges in managing product development across different countries, cultures and languages, and how companies apply appropriate tools and processes to address these challenges.
- Understand why outsourcing is such a big deal with companies.
- Understand how globalization affects us.
- Understand the design and manufacturing capabilities of other countries and how companies leverage these capabilities (work with, deal with, manage) in a cross cultural team environment.
- Appreciate the integrated nature of business, engineering, law and other disciplines in a global economy.

ME EN 584 : Manufacturing Process Machine Design. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: ME EN 372; or equivalent.

DESCRIPTION: Applying machine design principles to manufacturing process machines and tooling; integrating machine elements; precision machine design. Designing and analyzing the effects of loading, combined stresses, and deflections on

machine process capability. Sensors applied to process machines.

Course Outcomes
- Independently learn about a process to make recommendations for changes in the design of a process machine in order to improve the machine's performance capabilities.
- Make recommendations for use of specialized components for the design and development of manufacturing equipment based on sound analysis and good engineering judgment.
- Identify cause and effect relationships between manufacturing process parameters and the machine capabilities that perform these manufacturing processes.
- Recommend the selection of manufacturing process machines to perform various manufacturing processes.
- Do individual research and learning and synergistically, as part of a team, teach what they have learned to others in a professional manner.

ME EN 585 : Manufacturing Competitiveness: Quality and Productivity. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: ME EN 282

DESCRIPTION: Production strategies to improve quality, decrease cost, and increase throughput to create market advantage; effective production management systems; applying quality improvement tools to process data; theory of constraints and lean production.

Course Outcomes
- Understand the essential elements for having a productive, profitable factory.
- Understand the metrics used to quantify the performance of a factory, and be able to assess this performance.
- Learn how important variability is in reducing quality and productivity, and find ways to minimize variability and its effects.
- Learn methods of modeling production systems in order to predict probable performance.
- Understand appropriate use of statistical techniques for identifying special cause and common cause variation in order to respond appropriately.
- Communicate the basis and justification of a production system improvement project in oral and written form.

ME EN 595R : Special Topics in Mechanical Engineering. (.5-18:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Departmental consent.

Course Outcomes
- Students will develop an understanding of a timely topic in mechanical engineering.
- Students will increase their ability to apply engineering principles through design, experimentation, analysis, or other engineering approaches.
- Students will develop technical communication writing skills through writing a report and/or presenting an oral presentation.

: Topics in Mechanical Design.

Course Outcomes

: Topics in Materials.

Course Outcomes

: Advanced Dynamics.

Course Outcomes

Admission to Degree Program

Each degree program in the School of Technology has specific enrollment requirements. Please see each program's admission requirements for specific details.

Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

Undergraduate Programs and Degrees

Minor in Information Technology
Minor in Manufacturing

Students should see the School of Technology advisor for help or information specific to the undergraduate programs of the school.

Graduate Programs and Degrees

MS in Technology

For more information see the BYU 2013–2014 Graduate Catalog.

General Information

Financial Support Opportunities

In addition to general university scholarships and student employment, the School of Technology offers scholarships, an academic internship program with industry, and a variety of departmental part-time jobs such as research assistant, new-product developer, lab assistant, paper grader, electronics technician, maintenance assistant, computer operator, etc.

Academic Internships

An industrial experience/internship in the major before graduation is required. Qualified students enroll in an academic internship, which must be approved before the actual experience. A formal report and employer evaluation are required.

Transfer Credit

When transferring into the school, students must meet with Beverly Harmon, School of Technology advisor, before registering for classes to evaluate their technical courses and to get help in planning their schedule for completing their remaining course work.

Extracurricular Activities

Students are encouraged to join student chapters of national professional organizations affiliated with their major area of study. Student interaction, leadership, and career awareness are important to engineering and technology studies. All majors are

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

Faculty

encouraged to not only become members and actively participate in these chapters but also to support field trips, guest speakers, banquets, and program activities.

Professional Program Acceptance

Students must be accepted into the professional program before they may take upper-division courses in construction management, facility and property management, and industrial design. Construction management and industrial design have additional restrictions that apply to major courses. (See the construction management and the industrial design sections of this catalog that follow.) A professional program application (available at http://sot.et.byu.edu/advisement/applications-/-forms) must be completed and submitted to 250 SNLB.

Academic Standards and Continuance

On gaining acceptance into the professional program, students must maintain a minimum university cumulative grade point average of 2.0. A professional program course may not be retaken more than once.

Student Advising

We strongly encourage students to visit with the School of Technology advisor (250 SNLB) at least every year, and preferably every semester, to ensure that they are making appropriate progress in the program and taking courses in the appropriate sequence.

Undergraduate Courses

200-Level Courses

TECH 201 : History of Creativity and Innovation in the Arts, Science, and Technology 1. (3:3:0)

WHEN TAUGHT: Fall; Spring

DESCRIPTION: Western civilization from Egyptian antiquity to Renaissance from perspective of changes in civilization enabled by technology. Creativity throughout history. How to improve personal creativity.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

TECH 202 : History of Creativity and Innovation in the Arts, Science, and Technology 2. (3:3:0)

WHEN TAUGHT: Winter; Summer

DESCRIPTION: Western civilization from Renaissance to present from perspective of changes in civilization enabled by technology. Creativity throughout history. How to improve personal creativity.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

300-Level Courses

TECH 312 : Exploration in Innovation Design Techniques. (1:1:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Through a series of hands-on experiences, students explore principles, methods, and tools of innovation and design thinking in technology and engineering.

Course Outcomes
- Gain better appreciation and understanding of innovation
- Develop an ability to generate new ideas
- Develop innovation skills to develop ideas into products and processes
- Collaborate as a team to complete a project
- Present ideas and work to the class

Graduate Courses

Construction Management

Kevin Miller, Program Coordinator
230 SNLB, (801) 422-2021

Admission to Degree Program

Admission to the construction management (CM) preprofessional program is open to all BYU students. Students may then apply for the professional program. An application to the professional program must be submitted upon completion of required prerequisite courses (Stat 121, Acc 200, Eng T 231, Math 111, and CM 105). Along with the application, the candidate should send a resumé and a letter indicating why he or she would like to major in construction management, including in it a paragraph explaining the candidate's intentions for fulfilling the required 300 hours of construction-related work. Applicants will be evaluated based on GPA, work experience, and leadership.

Program application deadlines are August 1, December 1, and April 1. Upon acceptance into the professional level, students are required to attend one spring term, and enroll in CM courses.

The Discipline

Construction management is the business of managing projects. It is a rapidly growing field that requires technical expertise and the ability to work with people, and there is increasing demand in the industry for capable graduates. Construction management offers an exciting career that requires abilities in business management, architecture, engineering, and construction technology.

Learning Outcomes

- Lead the construction process from inception to closeout.
- Construct sustainable projects that require fewer resources to build and operate during the lifecycle of the project.
- Build projects more efficiently while maintaining a safe work environment.
- Communicate with and understand the concerns of designers, owners, trade contractors, and building officials.
- The ability to use cutting-edge construction tools to effectively build and manage construction projects.
- Maintain high moral and ethical standards.
- Desire and pursue lifelong learning and service.
- Support worthwhile causes for the benefit of mankind.

Career Opportunities

The program has had nearly 100 percent placement within the construction industry. Graduates find employment in a variety of construction-industry-related positions. Typical position titles are superintendent, estimator, scheduler, field engineer, general contractor, safety engineer, project manager, procurement manager, project engineer, cost controller, project controller, site analyst, etc.

Alumni find they are qualified for employment in all types of construction. It is a broad-based program that provides the training and experience needed for several occupational opportunities.

This major is also excellent preparation for students desiring graduate study in architecture, business management, or construction law.

General Information

High School Preparation

Recommended high school courses include drafting, algebra, trigonometry, calculus, physics, and construction, along with the other courses necessary for admittance to BYU.

Prearchitecture Program

Brigham Young University does not have an architecture program, but construction management provides an excellent preparatory program for a master's degree in architecture. Consult with the School of Technology advisor concerning a prearchitecture program.

Special Notice

Students receiving C– or lower grades in required courses will be placed on department probationary status.

1. Complete the following preprofessional courses:
   a. Complete the following:

ACC 200 : Principles of Accounting. (3:3:0)

OFFERED: Independent Study also.

DESCRIPTION: Financial and managerial accounting principles. Basic accounting statements, processes, and management applications. Open to all students.

Course Outcomes

- Construct and use internal accounting tools such as cost-volume-profit analysis, budgets, product cost reports, and nonroutine decision analyses to understand how to make better business management decisions.
- Construct and interpret a balance sheet and income statement understanding its usefulness in business and investment decision making.
- Comfortably use accounting terms and concepts in business-related discussions.
- Intelligently converse about the following areas:a. The role of accounting in international businessb. The role of information systems in financial reportingc. Fraud and how to prevent fraudd. The theory and practice of income taxese. Investing in stocksf. Career planning and spiritual decision makingg. Managerial accounting as a competitive toolh. Personal budgeting and financial planning
- Write a brief, focused memo demonstrating basic understanding of background business reading material.
- Use computer-aided learning tools and online learning resources.
- Manage workload in a self-paced learning environment.

CM 105 : Introduction to Construction Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to Construction Management including BIM, estimating, scheduling, and construction calculation methods.

NOTE: Fee.

Course Outcomes

- Know basic construction math.
- Understand, navigate and apply commercial building codes.
- Understand the scope of Construction and Facilities and Property Management majors.
- Model a commercial project using Building Information Modeling.
- Read and understand construction documents (plans and specs).
- The assessments for the above course outcomes are performed through insturctor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be

cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: MATH 110 or equivalent.
DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes
- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

b. Complete the following:

MATH 111 : Trigonometry. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Math 110 or equivalent.
DESCRIPTION: Circular functions, triangle relationships, identities, inverse trig functions, trigonometric equations, vectors, complex numbers, DeMoivre's theorem.

Course Outcomes
- Students should gain familiarity and proficiency with the basic theorems of trigonometry.For more detailed information, visit the Math 111 Wiki page.

2. Be accepted into the professional program. Students admitted to the construction management professional program must attend BYU during the spring term following admittance, taking two required CM courses OR one CM & one CE En required course.

3. Students must complete 300 hours of preapproved construction-related work after acceptance into the professional program and submit a report during the CM 491R class.

4. Complete the following professional courses:

CM 155 : Construction Modeling. (3:2:3)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: CM 105
DESCRIPTION: Developing architectural plans using Building Information Modeling; floor, foundation, plot, elevations, sections, and details. Renderings and other advanced modeling techniques.
NOTE: Fee.

Course Outcomes
- Create the following drawingsSite PlansFloor PlansSupplemental Floor Plan DrawingsRoof PlansElevationsFraming Methods & PlansElevationsFraming Methods & PlansFoundation PlansWall Sections & DetailsArchitectural Rendering
- Understand and use the Commercial & Residential Design and Building Codes.
- Understand career options in Architectural Drafting-Careers.
- Understand General Construction Specifications.
- Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

CM 210 : Light Structural Systems. (3:2:4)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: CM 105

DESCRIPTION: Light structural construction using wood and metal framing systems.
NOTE: Fee.

Course Outcomes
- Understand fundamentals of structural systems.
- Understand terminology, installation procedures for steel, concrete and wood structural framing members.
- Ability to identify applicable building codes and requirements as they pertain to structural framing systems.
- Understand structural construction drawings, notes, schedules, specifications and details.
- Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

CM 217 : Concrete and Masonry Construction. (3:2:3)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Managing the quality, methods, and safety aspects of concrete and masonry construction.

Course Outcomes
- Ability to layout a building and perform the elevation calculations.
- Understand how to manage concrete and masonry operations on a project site.
- Understand the process and placement to achieve high quality.
- Understand the properties of concrete and mix design.
- Understand the properties of masonry construction.
- Understand weather considerations for concrete and masonry operations.
- Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

CM 241 : Electrical Systems in Construction. (2:2:2)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Developing a basic understanding of electrical construction and associated codes to effectively communicate and problem solve with electrical contractors and inspect their work.

Course Outcomes
- Understand electrical construction and components to effectively manage the work force, and lead coordination with other trades.
- Ability to identify electrical components.
- A basic understanding of the National Electrical Code, standards, and safety practices of the industry.
- Ability to install and understand the process of quality electrical and control systems.
- Assessment of the above stated learning outcomes will be performed through instructor analysis of exams, quizzes, assignments, student feedback, and course evaluations.

CM 302 : Structures and Strength of Materials Fundamentals. (4:4:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: PHSCS 105
DESCRIPTION: Structural mechanics and strength of materials for soils, woods, concrete, and steel applied to practical construction situations.

Course Outcomes
- Understand structural principles such that construction activities are safely performed.
- Understand general properties of materials used in structures' design and construction.
- Understand the technical terminology inherent with structural design and construction.
- Understand general loading conditions that are inherent in structures.
- Understanding failure mechanisms associated with structural beams columns and connections.

CM 311 : Quantity Takeoffs. (4:4:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: CM 210
DESCRIPTION: Compiling, organizing, and analyzing all the items that influence and contribute to total cost of construction projects emphasizing managing quality control procedures and inspection of finish work. Maximizing estimating effectiveness and efficiency through computer integration.

Course Outcomes
- Understand the estimating processes and methods of quantity take-offs.
- Become more familiar with the materials and processes of construction.
- Understand the importance of accuracy, organization, and attention to detail.
- Understand construction drawings and specifications as they pertain to quantity take-offs and specifically to construction finishes.
- Understand and recognize quality work in construction finishes.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Ability to perform and document quantity surveys and price them accurately and quickly.
- Apply computerized spreadsheet applications to estimating.

CM 320 : Mechanical Systems. (3:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: CM 210
DESCRIPTION: Basic plumbing and HVAC principles, materials; installation and application methods. Systems sizing and design, heat loss/gain calculations, and payback analysis. Managing the plumbing and HVAC trades.

Course Outcomes

- Understand codes, regulations, and management of mechanical systems.
- Understand plumbing materials.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Understand the design of sanitary, drainage, vent, and storm-water drainage
- Understand the design of Water Supply Piping
- Understand Plumbing Fixtures
- Understand Testing & Inspecting Plumbing Systems
- Understand HVAC Materials and System Design
- Understand Forced Air Heating and Cooling Systems
- Understand Control Systems

CM 335 : Construction Equipment and Soils Mechanics. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Basic soil mechanics and subsurface construction theory and practice for foundations of building and engineered facilities. Underpinning, piling, dry and wet excavating, dewatering, cofferdams, caissons, and spread and strip foundations. Lecture, field trips.

Course Outcomes

- Understand basic soil properties, behavior and testing.
- Ability to determine quantity and costs associated with earthwork construction.
- Understand the various types and uses of construction equipment.
- Ability to develop the productivity rates and costs of equipment.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Understand the history and ethics of civil construction

CM 345 : Construction Safety Management. (2:2:0)

WHEN TAUGHT: Fall

DESCRIPTION: Safety requirements and responsibilities in construction; cost and impact of accidents; accident investigation; safety inspection; hazards analysis; substance abuse; record keeping.

Course Outcomes

- Understand how to create and manage an effective safety program in a construction company.
- Ability to navigate OSHA's 1926 document.
- Ability to identify safety risks on jobsites.
- Understand experience modification rates (EMR) and worker's compensation insurance premiums.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

CM 385 : Construction Contracts and Law. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Contractual obligations defined, including agency, contract interpretation, performance and liability issues, breach and termination, judicial remedy, and arbitration as applied to the construction industry. Overview of municipal zoning ordinances and codes.

Course Outcomes

- Understand and gain respect for legal systems in the United States.
- Recognize differences between statutory and common law.
- Recognize, in advance, common legal pitfalls of the construction industry and become familiar with how to avoid them.
- Understand how local municipalities are organized and how they regulate development and construction activities through codes and ordinances.
- Become familiar with construction contracts and responsibilities of contracting parties.
- Assessment of these learning outcomes is completed by having students read selected materials, including cases and texts; by having students attend courtroom proceedings and municipal meetings; by having students complete several research papers; and by having students evaluated throughout the semester with quizzes and exams.

CM 411 : Pre-Construction Services. (4:3:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 155 & CM 210 & CM 217

DESCRIPTION: Managing preconstruction services including: Building Information Modeling (BIM), competitive bidding strategies, bid analysis, document management, site work, quantity takeoff, and cost estimation.

Course Outcomes

- Understand ethical issues in estimating
- Perform accurate quantity takeoffs from model based documentsAnalyze what objects are modeled correctlyTakeoff objects that are either modeled incorrectly or simply not modeled
- Learn how to recognized complete and incomplete scopes of workUnderstand how to organize an estimate using the MasterFormat or other organizing system
- Ability to make a decision with incomplete information
- Effectively use computer software in the estimating process
- Perform accurate quantity takeoffs. Read and understand construction drawings and specifications
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

CM 412 : Construction Scheduling and Cost Control. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 311

DESCRIPTION: Planning, scheduling, and monitoring construction projects, including development of critical path networks (CPM and PERT), Gannt bar charts, construction cost control, and reporting practices.

Course Outcomes

- Ability to schedule and control residential, commercial, industrial, manufacturing, or engineering projects.
- Understand the critical path method of scheduling.
- Ability to create check sheets; linear or line of balance schedules; bar charts; short interval schedules; critical path networks.
- Ability to identify types of float, and the use of float to manage projects.
- Ability to correlate manpower and cost loading to schedule.
- Assessment of the above stated learning outcomes will be performed through instructor analysis of exams, quizzes, assignments, student feedback, and course evaluations.
- Ability to control and accurately report project progress using progress S curves and histograms.
- Ability to use computers in scheduling construction projects.
- Understand ethical issues relating to construction scheduling.

CM 415 : Construction Project Management and Control. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Managing and controlling construction projects. Planning, startup procedures, inspections, progress measurements, field reports, change order and submittal processing, equipment management, and project closeout.

Course Outcomes

- Ability to manage planning and time on a project.
- Understand basic cost flows and project budget.
- Understand principles of effective leadership.
- Understand different project delivery methods.
- Understand project team dynamics and appraisals.
- Understand how to properly manage subcontracts and subcontractor relationships.
- Understand purchasing and buyout processes.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Understand labor relation issues.
- Ability to use computerized project management software for communication and record keeping.
- Ability to read and interpret construction documents and specifications.
- Understand ethics of project management.

CM 425 : Construction Accounting. (3:3.0:0)

WHEN TAUGHT: Fall

PREREQUISITE: ACC 200

DESCRIPTION: Cost and managerial accounting topics for construction companies, including break-even analysis, ratio analysis, capital budgeting, job cost systems, master budgets pricing and decision-making, allocating costs.

Course Outcomes

- Understand basic financial statements and double-entry accounting theory in the construction industry.
- Understand payroll management and labor burden issues in the construction industry.
- Understand managerial accounting theory, including how to interpret financial statements using ratio analysis, break-even analysis, trend analysis, etc.
- Understand internal accounting controls in construction companies
- Ability to use a computer-accounting program, understand the relationship between the different accounting modules, and generate managerial financial reports
- Understand revenue recognition options for construction companies

CM 426 : Real Estate Principles and Development. (4:4:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FIN 201 & CM 311; or BUS M 201 & CM 311

DESCRIPTION: Principles of real estate investments, emphasizing mortgage instruments and development of property from raw land to residential and commercial properties.

Course Outcomes

- Understand the principles of real estate finance and rate-of-return concepts in order to evaluate real estate investment opportunities
- Understand market research, entitlement processes and the acquisition of land and development of real estate projects. Students will also be able to analyze and evaluate the risk of real estate investments
- Understand the fundamental vocabulary, principles and concepts of modern real estate practice, including agency relationships, brokerage, forms of ownership, legal interests in real estate, title records, property management, land-use controls, fair housing issues, environmental issues, and other critical issues affecting modern real estate.
- Assessment of these learning outcomes will be completed by having students read selected materials, including professional journals and real estate texts; by having students work together in groups to solve development problems; by having students complete several writing assignments; and by having students evaluated throughout the semester with quizzes and exams.
- By completing this course, students will have fulfilled most of the pre-licensing educational requirement for a Utah State Real Estate salesperson's license.

CM 445 : Construction Company Operations and Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FIN 201 & CM 311; or BUS M 201 & CM 311

DESCRIPTION: Organizing, controlling, and directing operations of construction companies; financial management, budgeting, cash-flow analysis, purchasing and cost control, and business planning.

Course Outcomes

- Ability to manage human resources
- Understand the principles of controlling and managing risk
- Understand the different types of insurance and bonding
- Ability to prepare and interpret company management reports
- Understand different forms of business organization
- Apply the principles of accounting
- Understand customer needs and how to manage expectations
- Understand the principles of effective leadership in construction companies.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

FPM 460 : Sustainability and Regulatory Building Solutions. (3:3:2)

WHEN TAUGHT: Winter

PREREQUISITE: CM 155 & CM 311

DESCRIPTION: Regulatory occupancy codes, safety, security planning and managing and analyzing sustainable building practices.

Course Outcomes

- Understand sustainable building with a variety of national and international rating systems with a focus on the USGBC's LEED rating system.
- Understand sustainable construction delivery method and each member of the project team's individual responsibilities with a focus on the construction manager's responsibilities.
- Understand the principles of effective customer service.
- Ability to use Revit Architecture, Structure, and MEP and familiar with other BIM software including Navisworks and Sketch-up.
- Understand the economics of buildings with sustainable features using the first cost and life-cycle cost approaches.

5. Complete one of the following:

Either:

CM 416R : Capstone 1. (1:0:1)

PREREQUISITE: CE EN 113 & CM 241 & CM 311

DESCRIPTION: Preparation for competition and international capstone projects. Topics include presentation and problem solving skills, business strategy, assessment, and SWAT analysis principles.

Course Outcomes

There are no course outcomes available

CM 417R : Capstone 2 - Competition. (1:0:1)

WHEN TAUGHT: Winter

PREREQUISITE: CM 416R

DESCRIPTION: Final preparations for student competitions.

Course Outcomes

There are no course outcomes available

Or:

CM 416R : Capstone 1. (1:0:1)

PREREQUISITE: CE EN 113 & CM 241 & CM 311

DESCRIPTION: Preparation for competition and international capstone projects. Topics include presentation and problem solving skills, business strategy, assessment, and SWAT analysis principles.

Course Outcomes

There are no course outcomes available

CM 418R : Capstone 2 - International. (1:0:1)

PREREQUISITE: CM 416R

DESCRIPTION: The culmination and application of core construction management curriculum. Project teams design, analyze, manage, and construct an international project.

Course Outcomes

There are no course outcomes available

6. Complete one semester of the following:

CM 191 : New Professional Student Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Construction management lecture series.
NOTE: Required first semester for student admitted into the construction management professional program. Attendance required.

Course Outcomes
- At the conclusion of the course the student will:Understand the resources available to them on campusComputer LabsAvailable softwareComputer group resourcesUnderstand the importance of the followingParticipating in student clubsCompetitionsUnderstand the expectations of the Construction Management majorUnderstand opportunities available to them upon graduation.Post graduateCareer opportunitiesAct with IntegrityUnderstand ethical issue in school.Understand how to balance school and other demands on students time.Understand how work relates to their education.Working while attending schoolSummer employmentCreating resumes

7. Complete four registrations of the following (cannot be taken the same semester as CM 491R):

CM 291R : Undergraduate Seminar. (.5:1:0)
WHEN TAUGHT: Fall; Winter
NOTE: Required each semester for undergraduate majors who are not enrolled in 491R. School lecture series attendance required.

Course Outcomes
- Help students evaluate the skills needed and opportunities available in different disciplines of the construction industry
- Involve students in Construction Management program activities and increase camaraderie.
- Develop an understanding of the students' responsibilities to family, church and community.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

8. Complete one registration of the following during the next to last semester before graduation:

CM 491R : Senior Seminar. (.5:1:0)
WHEN TAUGHT: Fall; Winter
DESCRIPTION: Developing best employment opportunities and strategy; interviewing, sales negotiations, resume and letter writing, and salary negotiations. Report on 300 hours of construction-related work experience.
NOTE: College Lecture attendance required.

Course Outcomes
- Understand what is required for graduation.
- Write a great resume.
- Ability to interview well.
- Understand business etiquette and the written and unwritten rules in the workplace.
- Understand the offer and negotiate a contract.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Verify work experience.

9. Complete the following supporting courses:

CE EN 113 : Engineering Measurements. (3:2:3)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: MATH 111
DESCRIPTION: Measurement of horizontal and vertical distances and angles to locate engineering projects including profiles, plane and topographical mapping, site layout, and earthwork. Introduction to GIS and mapping for surveying projects.

Course Outcomes
- Make order of magnitude estimates, assess reasonableness of solutions, and report appropriate levels of numerical accuracy
- Understand basic coordinate geometry functions and how they are used in surveying to reduce field measurements to useable quantities for design and analysis
- Make accurate horizontal and vertical angle and horizontal and vertical distance measurements
- Operate a total station and make plans for their use in engineering projects
- Close a horizontal traverse by computing distances, azimuths, bearings, accuracy, latitudes and departures and their accompanying adjustments to produce accurate coordinate locations
- Operate Global Positioning System (GPS) devices for mapping purposes
- Understand the concepts between geographic and projected coordinate systems and the relationship of locally surveyed information to these global systems
- Use basic functions of a Geographic Information System (GIS) to develop appropriately scaled and referenced maps of their surveyed data
- Take measurements for and develop a topographic map
- Design and layout horizontal and vertical alignments of highways

ECON 110 : Economic Principles and Problems. (3:3:0)
OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

: Honors Economic Principles and Problems.

Course Outcomes

FIN 201 : Principles of Finance. (3:3:1.5)
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: Acc 200.
DESCRIPTION: Financial management from the viewpoint of the business manager emphasizing profitability, liquidity, and long-range financial planning.

Course Outcomes
There are no course outcomes available

PHSCS 105 : General Physics 1. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: High school algebra and trigonometry.
RECOMMENDED: Concurrent enrollment in Phscs 107.
DESCRIPTION: Applied physics course not requiring calculus. Mechanics, heat, wave motion, and sound.

Course Outcomes
There are no course outcomes available

WRTG 150 : Writing and Rhetoric. (3:3:0)
OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.
NOTE: Fulfills General Education First-Year Writing requirement.

Course Outcomes
- Use rhetoric responsibly to compose arguments in a variety of genres for specific audiences and purposes.
- Critically read texts. This includesanalyzing how a text functions in a specific situation, community, or public;analyzing the nuances of language (diction, figures of speech, tone, etc.);identifying and evaluating the elements of an argument—claims, reasons, assumptions, and ethical, emotional, and logical appeals.
- Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.
- Use style—diction, figurative language, tone, grammar, punctuation, spelling, mechanics—genre, conventions, and document design correctly and for rhetorical effect.
- Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

10. Complete one course from the following:

CM 350 : International Construction Practices. (3:3:0)
WHEN TAUGHT: Fall
PREREQUISITE: CM 105
DESCRIPTION: Interacting with international construction professional, including construction terminology, plan reading, metric measurements, estimating, scheduling, and project management practices.

Course Outcomes
- Enhance ethical construction management skills.
- Understand the importance of and be able to apply proper building codes in an international setting.
- Understand international construction methods, materials, and challenges.
- Ability to work with international structural drawings and specifications.
- Understand and implement safety principles and practices in an international setting.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

TMA 150 : Public Speaking. (3:3:0)
OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Principles and methods of public speaking; speaking experiences.

Course Outcomes
- Develop analytical listening and observation skills.
- Know how to speak publicly so your audience will really listen and understand.
- Construct and deliver effective extemporaneous public speeches.
- Manage speech anxiety and effective use nonverbal communication to inform, persuade, enlighten, and impact your audience.

Be able to produce and employ effective visual aids in your presentations.

11. Complete one course from the following:

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: First-year writing, junior or senior status.
DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.
NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

M COM 320 : Communication in Organizational Settings. (3:3:1)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: GE First-Year Writing requirement. To be taken before senior year. Not for freshmen.
DESCRIPTION: Developing written and oral communications for professional organizations, including composing and designing employment communications. Incorporates oral presentations.
NOTE: Fulfills GE Advanced Written and Oral Communication requirement.

Course Outcomes

- Compose various commonly occurring business texts, achieving effectiveness in design, organization, content, and style.
- Demonstrate knowledge of generally accepted grammar standards (from Writing & Speaking for Business).
- Give effective oral presentations with appropriate visual support, achieving effectiveness in message, media, and messenger.
- Create effective business graphics and implement effective visual-design principles.

: Honors Communication in Organizational Settings.

Course Outcomes

12. Complete department packet and exit interview.

*Hours include courses that may fulfill university core requirements.

100-Level Courses

CM 105 : Introduction to Construction Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to Construction Management including BIM, estimating, scheduling, and construction calculation methods.

NOTE: Fee.

Course Outcomes

- Know basic construction math.
- Understand, navigate and apply commercial building codes.
- Understand the scope of Construction and Facilities and Property Management majors.
- Model a commercial project using Building Information Modeling.
- Read and understand construction documents (plans and specs).
- The assessments for the above course outcomes are performed through insturctor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

CM 155 : Construction Modeling. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 105

DESCRIPTION: Developing architectural plans using Building Information Modeling; floor, foundation, plot, elevations, sections, and details. Renderings and other advanced modeling techniques.

NOTE: Fee.

Course Outcomes

- Create the following drawingsSite PlansFloor PlansSupplemental Floor Plan DrawingsRoof PlansElevationsFraming Methods & PlansElevationsFraming Methods & PlansFoundation PlansWall Sections & DetailsArchitectural Rendering
- Understand and use the Commercial & Residential Design and Building Codes.
- Understand career options in Architectural Drafting-Careers.
- Understand General Construction Specifications.
- Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

CM 191 : New Professional Student Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Construction management lecture series.

NOTE: Required first semester for student admitted into the construction management professional program. Attendance required.

Course Outcomes

- At the conclusion of the course the student will:Understand the resources available to them on campusComputer LabsAvailable softwareComputer group resourcesUnderstand the importance of the followingParticipating in student clubsCompetitionsUnderstand the expectations of the Construction Management majorUnderstand opportunities available to them upon graduation.Post graduateCareer opportunitiesAct with IntegrityUnderstand ethical issue in school.Understand how to balance school and other demands on students time.Understand how work relates to their education.Working while attending schoolSummer employmentCreating resumes

CM 199R : Academic Internship. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Department chair's and cooperative education coordinator's consent.

DESCRIPTION: Work experience evaluated by supervisor and posted on student's transcript.

Course Outcomes

- Student acquires professional experiences in construction management or construction relates on-the job work experience.
- Student demonstrates professional communication skills (report)

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

200-Level Courses

CM 210 : Light Structural Systems. (3:2:4)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: CM 105
DESCRIPTION: Light structural construction using wood and metal framing systems.
NOTE: Fee.

Course Outcomes
- Understand fundamentals of structural systems.
- Understand terminology, installation procedures for steel, concrete and wood structural framing members.
- Ability to identify applicable building codes and requirements as they pertain to structural framing systems.
- Understand structural construction drawings, notes, schedules, specifications and details.
- Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

CM 217 : Concrete and Masonry Construction. (3:2:3)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Managing the quality, methods, and safety aspects of concrete and masonry construction.

Course Outcomes
- Ability to layout a building and perform the elevation calculations.
- Understand how to manage concrete and masonry operations on a project site.
- Understand the process and placement to achieve high quality.
- Understand the properties of concrete and mix design.
- Understand the properties of masonry construction.
- Understand weather considerations for concrete and masonry operations.
- Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

CM 241 : Electrical Systems in Construction. (2:2:2)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Developing a basic understanding of electrical construction and associated codes to effectively communicate and problem solve with electrical contractors and inspect their work.

Course Outcomes
- Understand electrical construction and components to effectively manage the work force, and lead coordination with other trades.
- Ability to identify electrical components.
- A basic understanding of the National Electrical Code, standards, and safety practices of the industry.
- Ability to install and understand the process of quality electrical and control systems.
- Assessment of the above stated learning outcomes will be performed through instructor analysis of exams, quizzes, assignments, student feedback, and course evaluations.

CM 291R : Undergraduate Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter
NOTE: Required each semester for undergraduate majors who are not enrolled in 491R. School lecture series attendance required.

Course Outcomes
- Help students evaluate the skills needed and opportunities available in different disciplines of the construction industry
- Involve students in Construction Management program activities and increase camaraderie.
- Develop an understanding of the students' responsibilities to family, church and community.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

300-Level Courses

CM 302 : Structures and Strength of Materials Fundamentals. (4:4:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: PHSCS 105
DESCRIPTION: Structural mechanics and strength of materials for soils, woods, concrete, and steel applied to practical construction situations.

Course Outcomes
- Understand structural principles such that construction activities are safely performed.
- Understand general properties of materials used in structures' design and construction.
- Understand the technical terminology inherent with structural design and construction.
- Understand general loading conditions that are inherent in structures.
- Understanding failure mechanisms associated with structural beams columns and connections.

CM 311 : Quantity Takeoffs. (4:4:0)

WHEN Fall; Winter

TAUGHT:

PREREQUISITE: CM 210

DESCRIPTION: Compiling, organizing, and analyzing all the items that influence and contribute to total cost of construction projects emphasizing managing quality control procedures and inspection of finish work. Maximizing estimating effectiveness and efficiency through computer integration.

Course Outcomes

- Understand the estimating processes and methods of quantity take-offs.
- Become more familiar with the materials and processes of construction.
- Understand the importance of accuracy, organization, and attention to detail.
- Understand construction drawings and specifications as they pertain to quantity take-offs and specifically to construction finishes.
- Understand and recognize quality work in construction finishes.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Ability to perform and document quantity surveys and price them accurately and quickly.
- Apply computerized spreadsheet applications to estimating.

CM 320 : Mechanical Systems. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 210

DESCRIPTION: Basic plumbing and HVAC principles, materials; installation and application methods. Systems sizing and design, heat loss/gain calculations, and payback analysis. Managing the plumbing and HVAC trades.

Course Outcomes

- Understand codes, regulations, and management of mechanical systems.
- Understand plumbing materials.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Understand the design of sanitary, drainage, vent, and storm-water drainage
- Understand the design of Water Supply Piping
- Understand Plumbing Fixtures
- Understand Testing & Inspecting Plumbing Systems
- Understand HVAC Materials and System Design
- Understand Forced Air Heating and Cooling Systems
- Understand Control Systems

CM 335 : Construction Equipment and Soils Mechanics. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Basic soil mechanics and subsurface construction theory and practice for foundations of building and engineered facilities. Underpinning, piling, dry and wet excavating, dewatering, cofferdams, caissons, and spread and strip foundations. Lecture, field trips.

Course Outcomes

- Understand basic soil properties, behavior and testing.
- Ability to determine quantity and costs associated with earthwork construction.
- Understand the various types and uses of construction equipment.
- Ability to develop the productivity rates and costs of equipment.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Understand the history and ethics of civil construction

CM 345 : Construction Safety Management. (2:2:0)

WHEN TAUGHT: Fall

DESCRIPTION: Safety requirements and responsibilities in construction; cost and impact of accidents; accident investigation; safety inspection; hazards analysis; substance abuse; record keeping.

Course Outcomes

- Understand how to create and manage an effective safety program in a construction company.
- Ability to navigate OSHA's 1926 document.
- Ability to identify safety risks on jobsites.
- Understand experience modification rates (EMR) and worker's compensation insurance premiums.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

CM 350 : International Construction Practices. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CM 105

DESCRIPTION: Interacting with international construction professional, including construction terminology, plan reading, metric measurements, estimating, scheduling, and project management practices.

Course Outcomes

- Enhance ethical construction management skills.
- Understand the importance of and be able to apply proper building codes in an international setting.
- Understand international construction methods, materials, and challenges.
- Ability to work with international structural drawings and specifications.
- Understand and implement safety principles and practices in an international setting.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

CM 385 : Construction Contracts and Law. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Contractual obligations defined, including agency, contract interpretation, performance and liability issues, breach and termination, judicial remedy, and arbitration as applied to the construction industry. Overview of municipal zoning ordinances and codes.

Course Outcomes

- Understand and gain respect for legal systems in the United States.
- Recognize differences between statutory and common law.
- Recognize, in advance, common legal pitfalls of the construction industry and become familiar with how to avoid them.
- Understand how local municipalities are organized and how they regulate development and construction activities through codes and ordinances.
- Become familiar with construction contracts and responsibilities of contracting parties.
- Assessment of these learning outcomes is completed by having students read selected materials, including cases and texts; by having students attend courtroom proceedings and municipal meetings; by having students complete several research papers; and by having students evaluated throughout the semester with quizzes and exams.

400-Level Courses

CM 411 : Pre-Construction Services. (4:3:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 155 & CM 210 & CM 217

DESCRIPTION: Managing preconstruction services including: Building Information Modeling (BIM), competitive bidding strategies, bid analysis, document management, site work, quantity takeoff, and cost estimation.

Course Outcomes

- Understand ethical issues in estimating
- Perform accurate quantity takeoffs from model based documentsAnalyze what objects are modeled correctlyTakeoff objects that are either modeled incorrectly or simply not modeled
- Learn how to recognized complete and incomplete scopes of workUnderstand how to organize an estimate using the MasterFormat or other organizing system
- Ability to make a decision with incomplete information
- Effectively use computer software in the estimating process
- Perform accurate quantity takeoffs. Read and understand construction drawings and specifications
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

CM 412 : Construction Scheduling and Cost Control. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 311

DESCRIPTION: Planning, scheduling, and monitoring construction projects, including development of critical path networks (CPM and PERT), Gannt bar charts, construction cost control, and reporting practices.

Course Outcomes

- Ability to schedule and control residential, commercial, industrial, manufacturing, or engineering projects.
- Understand the critical path method of scheduling.
- Ability to create check sheets; linear or line of balance schedules; bar charts; short interval schedules; critical path networks.
- Ability to identify types of float, and the use of float to manage projects.
- Ability to correlate manpower and cost loading to schedule.
- Assessment of the above stated learning outcomes will be performed through instructor analysis of exams, quizzes, assignments, student feedback, and course evaluations.
- Ability to control and accurately report project progress using progress S curves and histograms.
- Ability to use computers in scheduling construction projects.
- Understand ethical issues relating to construction scheduling.

CM 415 : Construction Project Management and Control. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Managing and controlling construction projects. Planning, startup procedures, inspections, progress measurements, field reports, change order and submittal processing, equipment management, and project closeout.

Course Outcomes

- Ability to manage planning and time on a project.
- Understand basic cost flows and project budget.
- Understand principles of effective leadership.
- Understand different project delivery methods.
- Understand project team dynamics and appraisals.
- Understand how to properly manage subcontracts and subcontractor relationships.
- Understand purchasing and buyout processes.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Understand labor relation issues.
- Ability to use computerized project management software for communication and record keeping.
- Ability to read and interpret construction documents and specifications.
- Understand ethics of project management.

CM 416R : Capstone 1. (1:0:1)

PREREQUISITE: CE EN 113 & CM 241 & CM 311

DESCRIPTION: Preparation for competition and international capstone projects. Topics include presentation and problem solving skills, business strategy, assessment, and SWAT analysis principles.

Course Outcomes
There are no course outcomes available

CM 417R : Capstone 2 - Competition. (1:0:1)

WHEN TAUGHT: Winter

PREREQUISITE: CM 416R

DESCRIPTION: Final preparations for student competitions.

Course Outcomes
There are no course outcomes available

CM 418R : Capstone 2 - International. (1:0:1)

PREREQUISITE: CM 416R

DESCRIPTION: The culmination and application of core construction management curriculum. Project teams design, analyze, manage, and construct an international project.

Course Outcomes
There are no course outcomes available

CM 425 : Construction Accounting. (3:3.0:0)

WHEN TAUGHT: Fall

PREREQUISITE: ACC 200

DESCRIPTION: Cost and managerial accounting topics for construction companies, including break-even analysis, ratio analysis, capital budgeting, job cost systems, master budgets pricing and decision-making, allocating costs.

Course Outcomes
- Understand basic financial statements and double-entry accounting theory in the construction industry.
- Understand payroll management and labor burden issues in the construction industry.
- Understand managerial accounting theory, including how to interpret financial statements using ratio analysis, break-even analysis, trend analysis, etc.
- Understand internal accounting controls in construction companies
- Ability to use a computer-accounting program, understand the relationship between the different accounting modules, and generate managerial financial reports
- Understand revenue recognition options for construction companies

CM 426 : Real Estate Principles and Development. (4:4:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FIN 201 & CM 311; or BUS M 201 & CM 311

DESCRIPTION: Principles of real estate investments, emphasizing mortgage instruments and development of property from raw land to residential and commercial properties.

Course Outcomes
- Understand the principles of real estate finance and rate-of-return concepts in order to evaluate real estate investment opportunities
- Understand market research, entitlement processes and the acquisition of land and development of real estate projects. Students will also be able to analyze and evaluate the risk of real estate investments
- Understand the fundamental vocabulary, principles and concepts of modern real estate practice, including agency relationships, brokerage, forms of ownership, legal interests in real estate, title records, property management, land-use controls, fair housing issues, environmental issues, and other critical issues affecting modern real estate.
- Assessment of these learning outcomes will be completed by having students read selected materials, including professional journals and real estate texts; by having students work together in groups to solve development problems; by having students complete several writing assignments; and by having students evaluated throughout the semester with quizzes and exams.
- By completing this course, students will have fulfilled most of the pre-licensing educational requirement for a Utah State Real Estate salesperson's license.

CM 445 : Construction Company Operations and Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FIN 201 & CM 311; or BUS M 201 & CM 311

DESCRIPTION: Organizing, controlling, and directing operations of construction companies; financial management, budgeting, cash-flow analysis, purchasing and cost control, and business planning.

Course Outcomes
- Ability to manage human resources
- Understand the principles of controlling and managing risk
- Understand the different types of insurance and bonding
- Ability to prepare and interpret company management reports
- Understand different forms of business organization
- Apply the principles of accounting
- Understand customer needs and how to manage expectations
- Understand the principles of effective leadership in construction companies.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams,

classroom observations, student feedback, and course evaluations.

CM 491R : Senior Seminar. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Developing best employment opportunities and strategy; interviewing, sales negotiations, resume and letter writing, and salary negotiations. Report on 300 hours of construction-related work experience.

NOTE: College Lecture attendance required.

Course Outcomes

- Understand what is required for graduation.
- Write a great resume.
- Ability to interview well.
- Understand business etiquette and the written and unwritten rules in the workplace.
- Understand the offer and negotiate a contract.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Verify work experience.

CM 494R : Special Problems in Construction Management. (.5-3:ARR:ARR)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Instructor's consent.

Course Outcomes

- Students in the course will learn topics outside the standard curriculum that allows the student to broad their education as it relates to Construction Management.

500-Level Graduate Courses (available to advanced undergraduates)

CM 555 : Construction Company Financial Management. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: CM 425 & CM 445

DESCRIPTION: An in-depth review of management concepts and financial strategies needed to successfully grow and enhance profitability of a construction company. Topics include business entities, budgeting and cash management, finance and investments, accounting, financial statements, cost controls (variance and earned value analysis), real estate investing, taxation, break even analysis and capital budgeting.

Course Outcomes

- Understand and apply management concepts and financial strategies needed to successfully grow and enhance profitability of a construction company.

Facility and Property Management

Jeffery L. Campbell, Program Coordinator
230 SNLB, (801) 422-2021

Admission to Degree Program

Admission to the facility and property management preprofessional program is open to all BYU students, who may then apply for the professional program. After completing required prerequisite courses, candidates should send an application to the professional program, along with a letter indicating what skills they have that would make them a successful facility manager; a description of the candidate's leadership experience; and a resumé. Applicants will be evaluated based on GPA, skills, leadership, and work experience.

Program application deadlines are April 1, August 1, and December 1.

The Discipline

Facility and property management (FPM) is the development and management of all types of real estate, facilities, and properties from original design ideas through construction to the different phases of occupation, including remodeling, to the final demise of the property. FPM is a cradle-to-grave stewardship to manage the real estate to fulfill the purpose for which it is intended.

This program prepares students to be part of the administrative/supervisory team in the increasingly complex world of facilities and property management. The facilities and property manager combines leadership, financial, and technical knowledge in fourteen areas: space planning and programming; construction project management; building systems and infrastructure; operations and maintenance; energy management; sustainability and environmental responsibility; safety, security, and disaster recovery; standards; laws and regulatory compliance; leadership and administration; finance and funding; real estate; property management; event marketing and management; and process technologies.

Career Opportunities

The program has nearly 100 percent job placement within the field of facilities and property management. Employment can be found in education, government, health care, sports and entertainment, real estate brokerage and property management, and all types of general businesss.

Responsibilities encompass management of planning, funding, construction, renovation, and maintenance of buildings, grounds, and infrastructure. The program is broad based and prepares managers for all types of facilities and property management, with salaries among the upper-level of university graduates.

Further educational opportunities include advanced degrees in facility and property management, real estate, business administration, public administration, or other related fields.

Learning Outcomes

Technical skills and knowledge:

1. Space planning and programming
2. Construction project management
3. Building systems and infrastructure
4. Operations and maintenance
5. Energy management
6. Sustainability and environmental responsibility
7. Safety, security, and disaster recovery
8. Standards, laws, and regulatory compliance
9. Leadership and administration
10. Finance and funding
11. Real estate
12. Property management
13. Event marketing and management
14. Process technologies

Personal skills and knowledge:

1. Be a life-long learner
2. Be organized and manage many things at once
3. Champion environmental sustainability practices
4. Champion safety and compliance practices
5. Communicate effectively
6. Demonstrate a service-oriented attitude
7. Identify and management risk
8. Lead others
9. Manage resources and budgets well
10. Successfully operate a business unit
11. Perform cost/benefit analysis
12. Perform quality project management services
13. Practice correct ethics

Program Requirements | View MAP | View Program Outcomes

1. Complete the following preprofessional courses:

ACC 200 : Principles of Accounting. (3:3:0)

OFFERED: Independent Study also.

DESCRIPTION: Financial and managerial accounting principles. Basic accounting statements, processes, and management applications. Open to all students.

Course Outcomes

- Construct and use internal accounting tools such as cost-volume-profit analysis, budgets, product cost reports, and nonroutine decision analyses to understand how to make better business management decisions.
- Construct and interpret a balance sheet and income statement understanding its usefulness in business and investment decision making.
- Comfortably use accounting terms and concepts in business-related discussions.
- Intelligently converse about the following areas:a. The role of accounting in international businessb. The role of information systems in financial reportingc. Fraud and how to prevent fraudd. The theory and practice of income taxese. Investing in stocksf. Career planning and spiritual decision makingg. Managerial accounting as a competitive toolh. Personal budgeting and financial planning
- Write a brief, focused memo demonstrating basic understanding of background business reading material.
- Use computer-aided learning tools and online learning resources.
- Manage workload in a self-paced learning environment.

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

FPM 110 : Fundamentals of Facility and Property Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of the profession of facility and property managaement, including space regulations, finance, project management, and other current practices.

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

- Technology and Engineering Education (TEE) Courses

Faculty

Course Outcomes

- FPM 110: Fundamentals of Facility and Property Management.Description: Overview of the profession of facility and property management, including space regulations, finance, project management, and other current practices.Learning Outcomes of the course:At the conclusion of the course the student will:Understand the basic competencies of facility and property managementDemonstrate the ability to perform space planningUnderstand the 15 basic professional practices of the FPM disciplinePersonal FPM SkillsFPM Industry Competencies and CertificationsSpace Planning and ProgrammingConstruction Project ManagementBuilding Systems and InfrastructureOperations and MaintenanceEnergy ManagementSustainabilitySafety, Security and Disaster RecoveryRegulatory ComplianceLeadership and AdministrationFinance and FundingReal Estate and PropertyEvent Marketing and ManagementFPM TechnologiesDemonstrate the practical applications of basic FPM competencies.Assessment of the above learning outcomes is performed through instructor analysis of homework, labs, exams, classroom observations, student feedback, and course evaluations.

STAT 121 : Principles of Statistics. (3:3:1)

OFFERED: Independent Study also; Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: MATH 110 or equivalent.
DESCRIPTION: Stemplots, boxplots, histograms, scatterplots; central tendency, variability; confidence intervals and hypothesis testing involving one and two means and proportions; contingency tables, simple linear regression.

Course Outcomes

- Differentiate between observational studies and experiments
- Identify three sampling designs: simple random sample, stratified, and multi-stage
- Identify three designs of experiments: completely randomized, randomized block and matched-pairs
- Interpret and make appropriate conclusions from plots of data
- Calculate and interpret measures of center and spread
- Determine potential association between two quantitative and two categorical variables
- Communicate using technical language about probability and variation
- Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem
- Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference
- Determine the appropriate statistical procedure to use for a given research problem or data set

: Honors Principles of Statistics.

Course Outcomes

2. Be accepted into the professional program.
3. Complete 2 hours of the following:

FPM 199R : Technical Internship. (1-2:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Acceptance into the facilities and property management professional program or coordinator's consent.
DESCRIPTION: Cooperative education and related technical on-the-job work experience.

Course Outcomes

- Learning Outcomes of the course: At the conclusion of the course the student will:complete related technical on-the-job work experienceunderstand the basics of solving real-life technological issues in the specific field(s) of workAssessment of the above learning outcomes is performed through student and instructor/experience provider assessment of internship objectives and outcomes.

4. Complete six registrations of the following:

FPM 291R : Special Topics in Facility and Property Management. (.5:1:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Topics presented by professionals relating to the facility and property management discipline.

Course Outcomes

- FPM 291R Special Topics in Facility and Property ManagementDescription: Topics presented by professionals relating to the facility and property management discipline.Learning Outcomes of the course:At the conclusion of the course the student will:have a broad knowledge of specific facility and property management careers and experiencesdevelop interest in specific areas in which they will focus their future studyexposure to networking opportunities with professionals and alumniunderstand what it means to live high moral and ethical standards through the experiences of guest speakersAssessment of the above learning outcomes is performed through attendance and student self- assessment.

5. Complete the following:

BUS M 241 : Marketing Management. (3:3:0)

OFFERED: Independent Study also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Marketing's role in society and the firm, marketing opportunities, the consumer market, and management of marketing mix.

Course Outcomes

- Understand the fundamental components and tools of marketing and how each relates to creating and sustaining value for customers.

- Describe how specific firms (1) select target markets, (2) specify their marketing mix, and (3) attempt to attract and retain the right customers.
- Design a marketing plan for a new venture by applying the appropriate tools and approaches studied

CM 105 : Introduction to Construction Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to Construction Management including BIM, estimating, scheduling, and construction calculation methods.

NOTE: Fee.

Course Outcomes
- Know basic construction math.
- Understand, navigate and apply commercial building codes.
- Understand the scope of Construction and Facilities and Property Management majors.
- Model a commercial project using Building Information Modeling.
- Read and understand construction documents (plans and specs).
- The assessments for the above course outcomes are performed through insturctor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

CM 155 : Construction Modeling. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 105

DESCRIPTION: Developing architectural plans using Building Information Modeling; floor, foundation, plot, elevations, sections, and details. Renderings and other advanced modeling techniques.

NOTE: Fee.

Course Outcomes
- Create the following drawingsSite PlansFloor PlansSupplemental Floor Plan DrawingsRoof PlansElevationsFraming Methods & PlansElevationsFraming Methods & PlansFoundation PlansWall Sections & DetailsArchitectural Rendering
- Understand and use the Commercial & Residential Design and Building Codes.
- Understand career options in Architectural Drafting-Careers.
- Understand General Construction Specifications.
- Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

CM 210 : Light Structural Systems. (3:2:4)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 105

DESCRIPTION: Light structural construction using wood and metal framing systems.

NOTE: Fee.

Course Outcomes
- Understand fundamentals of structural systems.
- Understand terminology, installation procedures for steel, concrete and wood structural framing members.
- Ability to identify applicable building codes and requirements as they pertain to structural framing systems.
- Understand structural construction drawings, notes, schedules, specifications and details.
- Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

CM 241 : Electrical Systems in Construction. (2:2:2)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Developing a basic understanding of electrical construction and associated codes to effectively communicate and problem solve with electrical contractors and inspect their work.

Course Outcomes
- Understand electrical construction and components to effectively manage the work force, and lead coordination with other trades.
- Ability to identify electrical components.
- A basic understanding of the National Electrical Code, standards, and safety practices of the industry.
- Ability to install and understand the process of quality electrical and control systems.
- Assessment of the above stated learning outcomes will be performed through instructor analysis of exams, quizzes, assignments, student feedback, and course evaluations.

CM 311 : Quantity Takeoffs. (4:4:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 210

DESCRIPTION: Compiling, organizing, and analyzing all the items that influence and contribute to total cost of construction projects emphasizing managing quality control procedures and inspection of finish work. Maximizing estimating effectiveness and efficiency through computer integration.

Course Outcomes
- Understand the estimating processes and methods of quantity take-offs.
- Become more familiar with the materials and processes of construction.
- Understand the importance of accuracy, organization, and attention to detail.
- Understand construction drawings and specifications as they pertain to quantity take-offs and specifically to construction finishes.
- Understand and recognize quality work in construction finishes.

- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Ability to perform and document quantity surveys and price them accurately and quickly.
- Apply computerized spreadsheet applications to estimating.

CM 320 : Mechanical Systems. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 210

DESCRIPTION: Basic plumbing and HVAC principles, materials; installation and application methods. Systems sizing and design, heat loss/gain calculations, and payback analysis. Managing the plumbing and HVAC trades.

Course Outcomes

- Understand codes, regulations, and management of mechanical systems.
- Understand plumbing materials.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.
- Understand the design of sanitary, drainage, vent, and storm-water drainage
- Understand the design of Water Supply Piping
- Understand Plumbing Fixtures
- Understand Testing & Inspecting Plumbing Systems
- Understand HVAC Materials and System Design
- Understand Forced Air Heating and Cooling Systems
- Understand Control Systems

CM 385 : Construction Contracts and Law. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Contractual obligations defined, including agency, contract interpretation, performance and liability issues, breach and termination, judicial remedy, and arbitration as applied to the construction industry. Overview of municipal zoning ordinances and codes.

Course Outcomes

- Understand and gain respect for legal systems in the United States.
- Recognize differences between statutory and common law.
- Recognize, in advance, common legal pitfalls of the construction industry and become familiar with how to avoid them.
- Understand how local municipalities are organized and how they regulate development and construction activities through codes and ordinances.
- Become familiar with construction contracts and responsibilities of contracting parties.
- Assessment of these learning outcomes is completed by having students read selected materials, including cases and texts; by having students attend courtroom proceedings and municipal meetings; by having students complete several research papers; and by having students evaluated throughout the semester with quizzes and exams.

CM 412 : Construction Scheduling and Cost Control. (3:2:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: CM 311

DESCRIPTION: Planning, scheduling, and monitoring construction projects, including development of critical path networks (CPM and PERT), Gannt bar charts, construction cost control, and reporting practices.

Course Outcomes

- Ability to schedule and control residential, commercial, industrial, manufacturing, or engineering projects.
- Understand the critical path method of scheduling.
- Ability to create check sheets; linear or line of balance schedules; bar charts; short interval schedules; critical path networks.
- Ability to identify types of float, and the use of float to manage projects.
- Ability to correlate manpower and cost loading to schedule.
- Assessment of the above stated learning outcomes will be performed through instructor analysis of exams, quizzes, assignments, student feedback, and course evaluations.
- Ability to control and accurately report project progress using progress S curves and histograms.
- Ability to use computers in scheduling construction projects.
- Understand ethical issues relating to construction scheduling.

CM 415 : Construction Project Management and Control. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Managing and controlling construction projects. Planning, startup procedures, inspections, progress measurements, field reports, change order and submittal processing, equipment management, and project closeout.

Course Outcomes

- Ability to manage planning and time on a project.
- Understand basic cost flows and project budget.
- Understand principles of effective leadership.
- Understand different project delivery methods.
- Understand project team dynamics and appraisals.
- Understand how to properly manage subcontracts and subcontractor relationships.
- Understand purchasing and buyout processes.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

- Understand labor relation issues.
- Ability to use computerized project management software for communication and record keeping.
- Ability to read and interpret construction documents and specifications.
- Understand ethics of project management.

CM 426 : Real Estate Principles and Development. (4:4:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FIN 201 & CM 311; or BUS M 201 & CM 311

DESCRIPTION: Principles of real estate investments, emphasizing mortgage instruments and development of property from raw land to residential and commercial properties.

Course Outcomes

- Understand the principles of real estate finance and rate-of-return concepts in order to evaluate real estate investment opportunities
- Understand market research, entitlement processes and the acquisition of land and development of real estate projects. Students will also be able to analyze and evaluate the risk of real estate investments
- Understand the fundamental vocabulary, principles and concepts of modern real estate practice, including agency relationships, brokerage, forms of ownership, legal interests in real estate, title records, property management, land-use controls, fair housing issues, environmental issues, and other critical issues affecting modern real estate.
- Assessment of these learning outcomes will be completed by having students read selected materials, including professional journals and real estate texts; by having students work together in groups to solve development problems; by having students complete several writing assignments; and by having students evaluated throughout the semester with quizzes and exams.
- By completing this course, students will have fulfilled most of the pre-licensing educational requirement for a Utah State Real Estate salesperson's license.

CM 445 : Construction Company Operations and Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: FIN 201 & CM 311; or BUS M 201 & CM 311

DESCRIPTION: Organizing, controlling, and directing operations of construction companies; financial management, budgeting, cash-flow analysis, purchasing and cost control, and business planning.

Course Outcomes

- Ability to manage human resources
- Understand the principles of controlling and managing risk
- Understand the different types of insurance and bonding
- Ability to prepare and interpret company management reports
- Understand different forms of business organization
- Apply the principles of accounting
- Understand customer needs and how to manage expectations
- Understand the principles of effective leadership in construction companies.
- Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

FIN 201 : Principles of Finance. (3:3:1.5)

WHEN TAUGHT: Fall; Winter; Spring; Summer

RECOMMENDED: Acc 200.

DESCRIPTION: Financial management from the viewpoint of the business manager emphasizing profitability, liquidity, and long-range financial planning.

Course Outcomes

There are no course outcomes available

FPM 200 : Healthcare Facilities Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: FPM 110; Acceptance into the FPM professional program.

DESCRIPTION: Hospital facility engineering management focusing on Joint-Commission compliance including infection control, planning, design and construction, life safety, emergency management, and environment of care.

Course Outcomes

There are no course outcomes available

FPM 330 : Advanced Mechanical, Electrical, and Plumbing Systems. (3:3:2)

WHEN TAUGHT: Fall

PREREQUISITE: CM 241 & CM 320

DESCRIPTION: Understanding and managing large MEP systems; utility infrastructure planning and development, performing system assessments; performing energy, sustainability, and retro-commissioning cost-benefit analysis; understanding system outputs, metering, and costs; code compliance and problem solving.

Course Outcomes

- Understand the uniqueness of managing large MEP systems
- Be able to identify components and functions of large MEP systems
- Be able to describe MEP system outputs, metering and costs
- Perform large MEP retro-commissioning cost-benefit analysis
- Describe the best energy and sustainability practices for MEP systems

- Be able to plan and develop utility infrastructure
- Be able to perform condition system assessments
- Be able to solve MEP problems at the management level
- Understand code compliance

FPM 340 : Operations and Maintenance. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: FPM 330

DESCRIPTION: Acquisition, operation, maintenance, and disposal of building systems, structures, permanent interiors, furniture, and equipment; grounds and other exterior elements.

Course Outcomes

- FPM 340 Operations and MaintenanceDescription:Acquisition, operation, maintenance, and disposal of building systems, structures, permanent interiors, furniture, and equipment; grounds and other exterior elements.Learning Outcomes of the course:At the conclusion of the course the student will:Gain a comprehension of:energy managementmaintaining building interior a exterior structures and systemsmaintaining groundsfacility management of communication systemsestablishing and implementing standards, practices, policies and procedurescustodial services, waste management and recycling.Apply and analyze knowledge in:maintenance managementcost controldiagnostics, performance and needs assessmentAssessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

FPM 420 : Commercial Real Estate Management. (3:3:0)

PREREQUISITE: FPM 110 & CM 426; Acceptance into the professional program.

DESCRIPTION: Fundamentals of commercial real estate investment, understanding market influences, contracts and property portfolio management.

Course Outcomes

- FPM 420 Commercial Real Estate ManagementDescription: Fundamentals of commercial real estate investment, understanding market influences, contracts and property portfolio management.Learning Outcomes of the course:At the conclusion of the course the student will:Obtain a knowledge of:tenancy cyclesphases of real estatetypes of real estate managementfinancial approaches in commercial real estatesuccessful real estate development projectsproperty management essentialseffective investment principleslease typesdue diligence studiesvaluing propertyAnalyze residential and commercial developmentsKnowledge of current introduction information on the commercial real estate management professionKnow the role of a manager to create value for the property owner(s)Assessment of the above learning outcomes is performed through instructor analysis of homework, labs, exams, classroom observations, property visits and tours, student feedback, and course evaluations.

FPM 460 : Sustainability and Regulatory Building Solutions. (3:3:2)

WHEN TAUGHT: Winter

PREREQUISITE: CM 155 & CM 311

DESCRIPTION: Regulatory occupancy codes, safety, security planning and managing and analyzing sustainable building practices.

Course Outcomes

- Understand sustainable building with a variety of national and international rating systems with a focus on the USGBC's LEED rating system.
- Understand sustainable construction delivery method and each member of the project team's individual responsibilities with a focus on the construction manager's responsibilities.
- Understand the principles of effective customer service.
- Ability to use Revit Architecture, Structure, and MEP and familiar with other BIM software including Navisworks and Sketch-up.
- Understand the economics of buildings with sustainable features using the first cost and life-cycle cost approaches.

ORG B 320 : Organizational Effectiveness. (3:Arr:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Theories and concepts for creating effective organizations, e.g., individual, group, and organizational processes and human resource functions, including selection, compensation, and performance management.

NOTE: Taught online.

Course Outcomes

There are no course outcomes available

ORG B 327 : Human Resource Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Functions of human resource management: employee selection, wage and salary administration, training and development, employee relations, and human resource planning.

Course Outcomes

- Discuss the purpose, roles, frameworks, and activities of HRM within various types of organizations.
- Explain important strategies and methods of effective recruitment, selection, and retention.
- Discuss the primary purposes, criteria, approaches, advantages and disadvantages, issues, and evaluation of performance management.

PWS 103 : Residential Landscape Design. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Design and composition as applied to development of residential grounds.

Course Outcomes

- Design residential landscapes that are both funtional and beautiful
- Make better decisions when purchasing plants and landscape construction materials
- Discuss issues and challenges dealing with landscape planning and maintenance.
- Enjoy nature more
- Explain professional opportunities related to landscape design.

6. Complete 3 hours of the following:

FPM 399R : Capstone Internship. (1.5-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: FPM 110; Acceptance into the facilities and property management professional program; instructor's consent.

DESCRIPTION: Cooperative education and related facility and property management on-the-job work experience. Project report required for IFMA Facility Management Professional (FMP) designation.

Course Outcomes

- FPM 399R Capstone InternshipDescription: Cooperative education and related facility and property management on-the-job work experience. Project report required for IFMA Facility Management Professional (FMP) designation.Learning Outcomes of the course:At the conclusion of the course the student will:experience cooperative education and related facility and property management on-the-job work experience.complete a project report required for IFMA Facility Management Professional (FMP) designation.Assessment of the above learning outcomes is performed through weekly reports, a final paper, and student and instructor/experience provider assessment of internship objectives and outcomes.

7. Complete department packet and exit interview.

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

FPM 110 : Fundamentals of Facility and Property Management. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview of the profession of facility and property managaement, including space regulations, finance, project management, and other current practices.

Course Outcomes

- FPM 110: Fundamentals of Facility and Property Management.Description: Overview of the profession of facility and property management, including space regulations, finance, project management, and other current practices.Learning Outcomes of the course:At the conclusion of the course the student will:Understand the basic competencies of facility and property managementDemonstrate the ability to perform space planningUnderstand the 15 basic professional practices of the FPM disciplinePersonal FPM SkillsFPM Industry Competencies and CertificationsSpace Planning and ProgrammingConstruction Project ManagementBuilding Systems and InfrastructureOperations and MaintenanceEnergy ManagementSustainabilitySafety, Security and Disaster RecoveryRegulatory ComplianceLeadership and AdministrationFinance and FundingReal Estate and PropertyEvent Marketing and ManagementFPM TechnologiesDemonstrate the practical applications of basic FPM competencies.Assessment of the above learning outcomes is performed through instructor analysis of homework, labs, exams, classroom observations, student feedback, and course evaluations.

FPM 199R : Technical Internship. (1-2:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Acceptance into the facilities and property management professional program or coordinator's consent.

DESCRIPTION: Cooperative education and related technical on-the-job work experience.

Course Outcomes

- Learning Outcomes of the course: At the conclusion of the course the student will:complete related technical on-the-job work experienceunderstand the basics of solving real-life technological issues in the specific field(s) of workAssessment of the above learning outcomes is performed through student and instructor/experience provider assessment of internship objectives and outcomes.

200-Level Courses

FPM 200 : Healthcare Facilities Engineering. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: FPM 110; Acceptance into the FPM professional program.

DESCRIPTION: Hospital facility engineering management focusing on Joint-Commission compliance including infection control, planning, design and construction, life safety, emergency management, and environment of care.

Course Outcomes

There are no course outcomes available

FPM 291R : Special Topics in Facility and Property Management. (.5:1:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Topics presented by professionals relating to the facility and property management discipline.

Course Outcomes

- FPM 291R Special Topics in Facility and Property ManagementDescription: Topics presented by professionals relating to the facility and property management discipline.Learning Outcomes of the course:At the conclusion of the course the student will:have a broad knowledge of specific facility and property management careers and experiencesdevelop interest in specific areas in which they will focus their future studyexposure to networking opportunities with professionals and alumniunderstand what it means to live high moral and ethical standards through the experiences of guest speakersAssessment of the above learning outcomes is performed through attendance and student self- assessment.

300-Level Courses

FPM 330 : Advanced Mechanical, Electrical, and Plumbing Systems. (3:3:2)

WHEN TAUGHT: Fall

PREREQUISITE: CM 241 & CM 320

DESCRIPTION: Understanding and managing large MEP systems; utility infrastructure planning and development, performing system assessments; performing energy, sustainability, and retro-commissioning cost-benefit analysis; understanding system outputs, metering, and costs; code compliance and problem solving.

Course Outcomes

- Understand the uniqueness of managing large MEP systems
- Be able to identify components and functions of large MEP systems
- Be able to describe MEP system outputs, metering and costs
- Perform large MEP retro-commissioning cost-benefit analysis
- Describe the best energy and sustainability practices for MEP systems
- Be able to plan and develop utility infrastructure
- Be able to perform condition system assessments
- Be able to solve MEP problems at the management level
- Understand code compliance

FPM 340 : Operations and Maintenance. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: FPM 330

DESCRIPTION: Acquisition, operation, maintenance, and disposal of building systems, structures, permanent interiors, furniture, and equipment; grounds and other exterior elements.

Course Outcomes

- FPM 340 Operations and MaintenanceDescription:Acquisition, operation, maintenance, and disposal of building systems, structures, permanent interiors, furniture, and equipment; grounds and other exterior elements.Learning Outcomes of the course:At the conclusion of the course the student will:Gain a comprehension of:energy managementmaintaining building interior a exterior structures and systemsmaintaining groundsfacility management of communication systemsestablishing and implementing standards, practices, policies and procedurescustodial services, waste management and recycling.Apply and analyze knowledge in:maintenance managementcost controldiagnostics, performance and needs assessmentAssessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

FPM 399R : Capstone Internship. (1.5-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: FPM 110; Acceptance into the facilities and property management professional program; instructor's consent.

DESCRIPTION: Cooperative education and related facility and property management on-the-job work experience. Project report required for IFMA Facility Management Professional (FMP) designation.

Course Outcomes

- FPM 399R Capstone InternshipDescription: Cooperative education and related facility and property management on-the-job work experience. Project report required for IFMA Facility Management Professional (FMP) designation.Learning Outcomes of the course:At the conclusion of the course the student will:experience cooperative education and related facility and property management on-the-job work experience.complete a project report required for IFMA Facility Management Professional (FMP) designation.Assessment of the above learning outcomes is performed through weekly reports, a final paper, and student and instructor/experience provider assessment of internship objectives and outcomes.

400-Level Courses

FPM 420 : Commercial Real Estate Management. (3:3:0)

PREREQUISITE: FPM 110 & CM 426; Acceptance into the professional program.

DESCRIPTION: Fundamentals of commercial real estate investment, understanding market influences, contracts and property portfolio management.

Course Outcomes

- FPM 420 Commercial Real Estate ManagementDescription: Fundamentals of commercial real estate investment, understanding market influences, contracts and property portfolio management.Learning Outcomes of the course:At the conclusion of the course the student will:Obtain a knowledge of:tenancy cyclesphases of real estatetypes of real estate managementfinancial approaches in commercial real estatesuccessful real estate development projectsproperty management essentialseffective investment principleslease typesdue diligence studiesvaluing propertyAnalyze residential and commercial developmentsKnowledge of current introduction information on the commercial real estate management professionKnow the role of a manager to create value for the property owner(s)Assessment of the above learning outcomes is performed through instructor analysis of homework, labs, exams, classroom observations, property visits and tours, student feedback, and course evaluations.

FPM 460 : Sustainability and Regulatory Building Solutions. (3:3:2)

WHEN TAUGHT: Winter

PREREQUISITE: CM 155 & CM 311

DESCRIPTION: Regulatory occupancy codes, safety, security planning and managing and analyzing sustainable building practices.

Course Outcomes

- Understand sustainable building with a variety of national and international rating systems with a focus on the USGBC's LEED rating system.

- Understand sustainable construction delivery method and each member of the project team's individual responsibilities with a focus on the construction manager's responsibilities.
- Understand the principles of effective customer service.
- Ability to use Revit Architecture, Structure, and MEP and familiar with other BIM software including Navisworks and Sketch-up.
- Understand the economics of buildings with sustainable features using the first cost and life-cycle cost approaches.

FPM 494R : Special Topics in Facility and Property Management. (1-3:ARR:ARR)

PREREQUISITE: Acceptance into the facilities and property management professional program; instructor's consent.

Course Outcomes

- This course is taught occasionally as needed to highlight a special topic as needed to enhance learning in the program. The learning outcomes are identified when each special topics course is designed. The special topics fall into one of the 11 general learning outcome areas of the program.

Industrial Design

Paul T. Skaggs, Program Coordinator
265 CTB, (801) 422-6300

Admission to Degree Program

Admission to the foundation level in the industrial design program is gained through an application process. Special enrollment limitations for degree programs will be applied. Please see the School of Technology advisor (250 SNLB) for specific details.

After completion of the foundation level courses as a pre-industrial design major, students may apply for BFA (bachelor of fine arts) candidacy and entrance to the industrial design professional program.

The Discipline

Industrial design is a blend of art and technology. It focuses on making industrially produced objects that make a specific and appropriate human connection through aesthetics, satisfying needs, and providing meaning. Industrial design requires skills in problem finding and defining, creativity, aesthetics, and idea visualization and communication. Industrial design requires knowledge of human culture and values, product development processes and players, and an understanding of how things work and are made.

Career Opportunities

Industrial designers specialize in areas such as consumer products, sports and medical equipment, toys, exhibits, furniture, consumer electronics, user experience and design research.

Learning Outcomes

After completing the industrial design curriculum, graduates should be able to:

- Articulate, apply and critique the application of aesthetic principles
- Understand and apply principles of structured creativity/innovation
- Understand how to evaluate creative ideas
- Understand the basics of how things work and how things are made
- Understand human needs as they relate to products and services
- Communicate ideas both visually and verbally
- Apply basic business practices as they relate to industrial design
- Discuss the basics of design history and identify contemporary issues in industrial design
- Sythesize and apply learning outcomes in the context of a diverse range of design problems

The industrial design program also participates in the interdisciplinary animation degree with the Visual Arts and the Theatre and Media Arts departments. For more information about this degree and its requirements, please see the Visual Arts section of this catalog.

General Information

Pre-Major Enrollment

Students applying for the pre-industrial design program must be accepted to Brigham Young University before being considered for the major.

The four pre-industrial design foundation courses must be taken concurrently in either fall or winter semester. Enrollment in these courses is limited. In order to enroll, students must apply and be accepted.

Applications for the pre-industrial design foundation courses must be returned by August 1. Individuals will be notified one week after the deadline and will be informed which semester (fall or winter) they may enroll in foundation courses.

Application forms are available from the School of Technology Advisement website. Go to http://sot.et.byu.edu/advisement, then click on Applications and Forms.

Note: Acceptance to the pre-industrial design program cannot be deferred. Individuals who are accepted must register for the foundation courses for their assigned semester. Failure to do so will require reapplication to the pre-industrial design program for the year the student plans to attend.

Professional Degree Program Enrollment

Admittance into the professional level of the industrial design program is based on three criteria: overall grade point average for the foundation courses, a panel review of a student portfolio, and a student professionalism score. A portfolio is a collection of work based on foundation courses and weighted higher than grade point average and professionalism score.

Portfolios and professional level applications are to be submitted for review by April 25th. Individuals will be notified within a week of the decision of the review committee.

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

- Technology and Engineering Education (TEE) Courses

Faculty

Students accepted into the professional level are permitted to enroll in specified courses at the next academic level. Students who have not been accepted in the program may apply again the following year. Students may only take the foundation courses one time.

Transfer Students

Transfer students applying for admission to the pre-industrial design program must follow the same requirements as students currently enrolled in BYU.

Department Probationary Status

Students can be placed on probationary status for the following:

1. Inadequate academic performance. For example, receiving a D or E grade in major courses.
2. Unprofessional attitude and lack of commitment.
3. BYU Honor Code violations.

This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center or the School of Technology advisor (250 SNLB) for information regarding requirements for admission to this major.

Program Requirements | View MAP | View Program Outcomes

1. Meet application criteria for admission into the pre-Industrial Design program.
2. Complete all 100-level foundation courses.
3. Complete a portfolio and application for admission into the Professional program.
4. Complete the following preprofessional requirements:

ENG T 231 : Foundations of Global Leadership. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes

- Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.
- Able to demonstrate familiarity with the code of ethics that corresponds to their profession.
- Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.
- Able to understand and use a model to describe their own personality type and/or preferences.
- Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.
- Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.
- Able to describe a team development process.
- Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.
- Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project
- Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization
- Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.
- Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

INDES 130 : Visual Literacy. (1.5:3:3)

PREREQUISITE: InDes 131, 132, 133 concurrent in the same semester.

DESCRIPTION: Understand basic principles of design aesthetics and their application to two and three dimensional compositions. Develop a design vocabulary used to present, critique, and defend aesthetics.

Course Outcomes

- Students should:Understand basic design vocabulary of principles and elements of designUnderstand both 2D and 3D aesthetic principles as they relate to industrial designUnderstand basic visual presentation skills
- Students should be able to:Apply principles of design to create aesthetic 2D and 3D CompositionsApply basic software skills in Adobe Illustrator and PhotoshopDiscuss and critique both 2D and 3D compositions using design terminalogy

INDES 131 : Structured Creativity. (1.5:3:3)

PREREQUISITE: InDes 130, 132, 133 concurrent in the same semester.

DESCRIPTION: Basics of how to evaluate, and applying principles of structured creativity to develop new and useful ideas. Understanding of verbal and visual presentations as a tool for communicating new ideas.

Course Outcomes

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

- Technology and Engineering Education (TEE) Courses

Faculty

- Students should:Be able to apply creative thinking methods and toolsApply evaluation tools to determine the value of their ideasApply principles to create unique and useful product, service, or system solutions.Understand principles of presenting compelling and persuasive ideas to others.
- Students should:Understand what is meant by structured creativity.Understand the principles for judging/evaluating creative ideas.Understand the role of Structured Creativity in industrial design.

INDES 132 : Form and Surface Development. (1.5:3:3)

PREREQUISITE: InDes 130, 131, and 133 concurrent in the same semester.

DESCRIPTION: Fundamentals of articulating, exploring, and critiquing the application of aesthetic principles related to geometric and organic form. Opportunities to present, critique, and defend aesthetics.

Course Outcomes

- Students should:Understand aesthetic principles as they relate to geometric and organic formsAnalyze formal qualities and articulate formal languages
- Students should be able to:Generate both rough and finished geometric and organic formsRecognize abstract three-dimensional elements in design context

INDES 133 : Visualization Methods. (1.5:3:3)

PREREQUISITE: InDes 130, 131, 132 concurrent in the same semester.

DESCRIPTION: Introduction of rapid visualization sketching techniques as a tool to develop, evaluate, and communicate ideas.

Course Outcomes

- Students should:Understand sketching as a skill for thinking about and communicating ideas.Understand their own level of sketching ability and work to improve their ability to sketch.Understand and apply basic sketch presentation techniques.
- Students should be able to:Present ideas clearly and pursuasively using sketching as a tool.

5. Complete the following:

INDES 210 : Intermediate Computer Applications. (3:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: Industrial design core.

DESCRIPTION: Computer software programs relative to design disciplines.

Course Outcomes

- Students should:Understand and apply principles of good design intent to develop robust modeled geometry.Understand both solid and surface modeling principles and how of effectively apply them.
- Students should be able to:Use Solidworks and Photoview 360 effectively to develop and communicate ideas.Apply solid modeling to develop 3D parts with: Machining and rapid prototyping.

INDES 214R : Tools, Materials, and Processes for Industrial Design. (2:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: Industrial design core.

DESCRIPTION: Manufacturing tools, processes, and materials commonly used in product design.

Course Outcomes

- Students should:Be able to recognize manufacturing processes used to create products.Be able to recognize basic materials used in products.Understand limitations and advantages of manufacturing processes.Have a basic knowledge of material properties.

INDES 230 : Industrial Design Studio 1. (4:4:2)

WHEN TAUGHT: Fall

PREREQUISITE: Industrial design core.

DESCRIPTION: Industrial design research, analysis, and problem-solving methods.

Course Outcomes

- Student should be able to:Integrate effectively form and function into design solutionsApply design methods and tools to design problemsWork as a team and as an individual
- Students should:Understand how to work effectively toward a design solution using appropriate methods and tools.Understand the interaction between form and function

INDES 231 : Presentation Methods for Industrial Design 1. (2:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: Industrial design core.

DESCRIPTION: Product presentation methods emphasizing perspective, value, scale, accuracy, and color.

Course Outcomes

- Student should:Have an increased appreciation regarding the importance of presentation skills.Understand how to visually represent product materials, colors, and finishes.Understand how to compose a persuasive presentation
- Student will be able to:Apply basic rendering skills including lighting effects, materials, colors, surface finish to rendering and sketches.Explore the difference between analog and digital based rendering techniques
- Benchmarking and critique – looking at the work of others and judging your own work effectively.

INDES 232 : Industrial Design Studio 2. (4:4:2)

WHEN Winter

TAUGHT:
PREREQUISITE: INDES 230 & INDES 231
DESCRIPTION: Continuation of InDes 230, emphasizing human factors and ergonomics, restrictions and possibilities of materials and manufacturing, and coherent presentation of problems, processes and ideas.

Course Outcomes
- Student should be able to:Demonstrate skills learned in other classes and how they apply in a studio-based product development process.Demonstrate professional attitude towards deadlines and presentationsSolidify a personal, broadened definition of Industrial Design in the minds of the students.
- Student should:Have deeper experiences in structured creativity in the context of product development.Demonstrate in their own personal design process the characteristics of: Flexibility, Fluency, Originality, Definition.Accept the idea of constraints as a means to be creative. These constraints can include - Human Factors, Manufacturing Processes, Corporate Brand, Price, etc.

INDES 233 : Presentation Methods for Industrial Design 2. (2:2:2)
WHEN TAUGHT: Winter
PREREQUISITE: INDES 231
DESCRIPTION: Continuation of InDes 231.

Course Outcomes
- Student will:Understand how to represent complex topics simply, clearly, and concisely in a compelling manner using principles of information organization and effective presentation.Understand digital tools for the development of presentations
- Student will be able to:Produce effective renderings using vector and raster based computer packages.Effectively combine the principles of perspective construction; orthographic projection; lighting theory based on observation and applied in new ways.Develop more complex simulated materials based on the principles of: local color, lighting, surface finish, pattern, texture, and opacity.Adjust, manipulate, combine, and retouch images using Raster based computer packages.Produce complex presentations for industrial design using both vector and raster based packages in combination.

INDES 340 : Graphics Studies for Industrial Design 1. (3:3:3)
WHEN TAUGHT: Fall
PREREQUISITE: BFA acceptance.
DESCRIPTION: Introduction to graphic skills such as corporate identity, packaging design, logo design, and web/interface design elements.

Course Outcomes
- Students should:Understand and apply basic graphic design philosophies, processes, and techniques.Understand basic typography, mechanical production and preparation of finished “comps”Apply principles of graphic design in developing their own collateral.

INDES 388 : Professional Practices of the Designer. (2:2:0)
WHEN TAUGHT: Fall
PREREQUISITE: Admittance to professional program.
DESCRIPTION: Business aspects of the design profession.

Course Outcomes
- Students should:Understand the tools needed for a job search; portfolio and its iterations, resume, and cover letters.Understand and apply principles of networking, contacting, interviewing and negotiating with potential employers.Understand and apply principles of an effecive and compelling portfolio presentation.Understand patents, proposals, contracts, and design briefs.Recognize unethical situations that can arise and how to deal with them.
- Students should be able to:Create and demonstrate effective job hunting skills and materials

TECH 312 : Exploration in Innovation Design Techniques. (1:1:0)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Through a series of hands-on experiences, students explore principles, methods, and tools of innovation and design thinking in technology and engineering.

Course Outcomes
- Gain better appreciation and understanding of innovation
- Develop an ability to generate new ideas
- Develop innovation skills to develop ideas into products and processes
- Collaborate as a team to complete a project
- Present ideas and work to the class

TEE 200 : Processes and Prototyping with Wood. (3:2:4)
WHEN TAUGHT: Fall; Winter Even Yrs.; Spring Odd Yrs.
DESCRIPTION: Processes for and prototyping with wood and wood-based composites.
NOTE: Fee.

Course Outcomes
- Visualization of how components are joined and how to communicate this through drawings and specifications.Properties of wood as a material and how these properties impact design of projects using wood and wood products.Subtractive processes in prototype construction: sawing, shaping, milling, turning, routing, etc.Additive processes in prototype construction: joining, laminating, fastening, etc.Identification, care, and use of hand tools including tools for measuring, layout, sawing, planing,

scraping, shaping, clamping, drilling, driving, and sharpening.Set-up and accurate and safe use of woodworking machinery including the jointer, surface planer, table saw, panel saw radial arm saw, power miter saw, bandsaw, thickness sander, mortiser, boring machine, lathe, and drill press.The use of electric, pneumatic, and cordless power hand tools including routers, drills, and sanders.Methods of clamping, gluing, and assembly, sanding, and finishing.Practical problem solving in working with industrial materials, tools, and machines.The importance of caring, hard work, planning, initiative, and patience, in making a project that is well designed, includes quality workmanship, and is nicely finished. Concepts and methods of teaching safe use of woodworking equipment.Basic machine and hand tool maintenance.

6. Complete a minimum of one hour from the following:

INDES 399R : Professional Internship. (1-3:0:0)

PREREQUISITE: School's and faculty advisor's consent.

DESCRIPTION: Work experience in professional design studio evaluated by supervisor.

Course Outcomes

- Student acquires professional experiences in Industrial Design.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

7. Complete the following:

INDES 330R : Industrial Design Studio 3. (4:4:2)

WHEN TAUGHT: Fall

PREREQUISITE: Industrial Design core.

DESCRIPTION: Designer responsibilities, structured and unstructured procedures in problem solving, client relationships, functional relationships, and mechanisms and materials.

Course Outcomes

There are no course outcomes available

Note: Must complete two registrations of InDes 330R.

INDES 430R : Industrial Design Studio 4. (4:4:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: INDES 330R

DESCRIPTION: Systems design problems from initial research and analysis to final presentation of working drawings and models, with concern for ergonomics, anthropometries, marketing, user and buyer, production, function, and structure.

Course Outcomes

There are no course outcomes available

8. Complete 6 hours from the following:

INDES 497R : BFA Final Project. (3:ARR:ARR)

PREREQUISITE: BFA advisor's consent.

DESCRIPTION: Advanced individual project with minimum guidance, showing high degree of competence within chosen major.

Course Outcomes

- Ability to work on an advance individual project with minimum guidance that focuses skills and knowledge learned on a single complex visualization.
- Students will define a area of interest
- Students should:Write a cogent design project proposalWork with judicious guidance on self-directed projectInvestigate chosen problem using design methodsDemonstrate elevated competence in: design skills, grasp of theory, design methodology

And complete one course from the following:

INDES 399R : Professional Internship. (1-3:0:0)

PREREQUISITE: School's and faculty advisor's consent.

DESCRIPTION: Work experience in professional design studio evaluated by supervisor.

Course Outcomes

- Student acquires professional experiences in Industrial Design.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

(3 hours required)

INDES 497R : BFA Final Project. (3:ARR:ARR)

PREREQUISITE: BFA advisor's consent.

DESCRIPTION: Advanced individual project with minimum guidance, showing high degree of competence within chosen major.

Course Outcomes

- Ability to work on an advance individual project with minimum guidance that focuses skills

and knowledge learned on a single complex visualization.
- Students will define a area of interest
- Students should:Write a cogent design project proposalWork with judicious guidance on self-directed projectInvestigate chosen problem using design methodsDemonstrate elevated competence in: design skills, grasp of theory, design methodology

(with program approval)

MFG 479 : Innovation and Entrepreneurship. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Develop ideas into a business model. Learn product development. Entrepreneurial concepts and practices. Strategic planning and global competitiveness.

Course Outcomes
- Participate effectively on an entrepreneurial founding team
- Evaluate business ideas, opportunities, and plans
- Plan a new business financially
- Understand and apply entrepreneurial terminology to the entrepreneurial and investment ecosystems
- Formulate strategies to overcome common start-up business challenges
- Prepare effectively a written business plan
- Make an effective oral business plan presentation

Note: Me En 475, 476 can be substituted for this requirement.

9. Complete the following art history requirement:

INDES 339 : History of Products. (3:3:0)

PREREQUISITE: Industrial design core.

DESCRIPTION: Overview of artifacts and products; how they have influenced society from prehistory to present day.

Course Outcomes
- Students should:Understand and recognize design styles, movements, thoughts and practice over the last 150 years.Know and understand significant historical and contemporary designers and their design work
- Student will be able to:Be able to engage in meaningful discussions about designApply design languages

10. Complete 9 hours of art history from the following:
    a. Complete one course from the following:

ARTHC 201 : World Civilization to 1500. (3:3:0)

DESCRIPTION: Survey of Western civilization emphasizing the visual arts from ancient Greece to the Gothic period.

Course Outcomes
- Students will be able to discuss--verbally and in writing--the style, cultural context, and meaning of key works of art.
- Students will become familiar with the periods and cultures of Western art from Prehistory through Medieval Europe.
- Students will develop connoisseurship, the ability to identify the stylistic influences of a work of art or architecture.

IHUM 201 : Western Humanities 1: Antiquity to Renaissance. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Western civilization from Greek antiquity to Renaissance from perspective of traditional humanistic values reflected in its arts and ideas. Examines fundamental questions about human experience, formative events in history, and value of important literary and artistic texts.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

TECH 201 : History of Creativity and Innovation in the Arts, Science, and Technology 1. (3:3:0)

WHEN TAUGHT: Fall; Spring

DESCRIPTION: Western civilization from Egyptian antiquity to Renaissance from perspective of changes in civilization enabled by technology. Creativity throughout history. How to improve personal creativity.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

    b. Complete one course from the following:

ARTHC 202 : World Civilization Since 1500. (3:3:0)

DESCRIPTION: Survey of Western civilization emphasizing the visual arts from the Renaissance to the twentieth century.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
- Students will survey the terrain of western (primarily European) culture from the beginnings of the Renaissance to the present. A particular emphasis will be placed upon the visual arts as objects that are influenced by cultural values and conventions, and as forces which generate or determine future cultural practice.
- Students will become familiar with a broad array of the literary, philosophical, religious and aesthetic traditions that have informed the modern world.
- Students will aquire a big-picture knowledge of intellectual periods and movements that will inform their future encounters with literature, art, architecture and all other manifestations of creative expression.

IHUM 202 : Western Humanities 2: Renaissance to the Present. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Western civilization from Renaissance to present from perspective of traditional humanistic values reflected in its arts and ideas. Examines fundamental questions about human experience, formative events in history, and value of important literary and artistic texts.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

TECH 202 : History of Creativity and Innovation in the Arts, Science, and Technology 2. (3:3:0)

WHEN TAUGHT: Winter; Summer

DESCRIPTION: Western civilization from Renaissance to present from perspective of changes in civilization enabled by technology. Creativity throughout history. How to improve personal creativity.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

Course Outcomes
There are no course outcomes available

c. Complete one course from the following:

ARTHC 350 : Modern Art. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ARTHC 202

DESCRIPTION: Modern European art and theory, 1900--1945.

Course Outcomes
- Students will acquire a solid foundation in the historical context of the art and architecture of Western and Eastern Europe from ca. 1900 until the end of World War II. Students will be able to articulate the characteristics of the styles, processes, and ideologies and philiosophies of key artists and movements, including Fauvism, German Expressionism, Cubism and other modernist movements in France, Italy, Britain, Russia, the Netherlands, Germany, Switzerland, and East Europe. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. They will be able to trace the trajectory of future influence of key works of art from this period.
- Students will develop art historical research skills by conducting advanced research focused on a single work of art within the Modern period. Students will apply methodological approaches acquired in ArtHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

ARTHC 355 : Contemporary Art. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: ARTHC 202

DESCRIPTION: Critical evaluation of trends in art since 1945.

Course Outcomes
- Students will become conversant with the criticism of Clement Greenberg, the response of the Minimalists, Pop artists and others, and the role of criticism up to the twenty-first century.
- @font-face { font-family: "Cambria Math";}@font-face { font-family: "Hoefler Text";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 0.0001pt 0.5in; font-size: 12pt; font-family: "Times New Roman"; }.MsoChpDefault { font-size: 10pt; }div.WordSection1 { page: WordSection1; }Students will acquire a solid foundation in the historical context of the art world from 1945 to the present. Students will be able to articulate the characteristics of the styles, processes, and ideologies and philiosophies of key artists and movements, in Europe and America with particular emphasis on the New York School.
- Students will demonstrate sophisticated research skills in an original paper addressing an artist who has come to prominence in the last twenty years.

ARTHC 365 : American Architecture. (3:3:0)

PREREQUISITE: ARTHC 202

DESCRIPTION: Major figures, monuments, and movements in American architecture from colonial period through "Gilded Age."

Course Outcomes

- Students will acquire a more detailed knowledge of a particular monument and/or architect and/or architectural theory of the period, through the research and writing of a term paper.
- Students will become familiar with the contributions of individual architects of the period.
- Students will acquire a basic understanding of the development of American architecture from the seventeenth century to the mid-nineteenth century.
- @font-face { font-family: "Times";}@font-face { font-family: "ï¼ï¼³ æ æ ";}@font-face { font-family: "Cambria Math";}@font-face { font-family: "Cambria";}p.MsoNormal, li.MsoNormal, div.MsoNormal { margin: 0in 0in 0.0001pt; font-size: 12pt; font-family: Cambria; }.MsoChpDefault { font-size: 10pt; font-family: Cambria; }.MsoPapDefault { margin-bottom: 10pt; }div.WordSection1 { page: WordSection1; }Students will improve research, writing and analytical skills in architectural history.

ARTHC 367 : Modern Architecture. (3:3:0)

PREREQUISITE: ARTHC 202

DESCRIPTION: Critical review of roots and evolution of modern architecture.

Course Outcomes

- Students will acquire a solid foundation in the historical context of world architecture from 1851 to the present. Students will be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key architects and movements.
- Students will develop art historical research skills by conducting advanced research focused on a specific building or complex. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best architectural history publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported by the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

SFL 329 : History of Interior Design and Architecture 2. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Furniture, interior design, and architecture from Industrial Revolution to present.

Course Outcomes

- Students will identify the popular types of housing styles of 1900-2011. Students will explain how each style was influenced by political and economic factors
- Students will identify the architects that had an impact on the various periods of architecture.
- Students will analyze how the various styles of architecture were influenced by society and culture.

11. Complete 4 credit hours as approved by program administrator.

12. Complete one course from the following:

ENGL 316 : Technical Communication. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.

NOTE: Carries GE Advanced Written and Oral Communication credit.

Course Outcomes

- Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.
- Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.
- Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.
- Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.
- Write in a correct, clear, and graceful prose style.
- Effectively evaluate and comment on the writing of others to facilitate revision.
- Analyze rhetorical aspects of audience, purpose, and context to communicate technical information effectively in written, oral, and visual media.
- Recognize structures or genres typically used in science and engineering, understand the processes that produce them, and the organizational and stylistic conventions characteristic of them, and apply this knowledge to their own writing tasks.

M COM 320 : Communication in Organizational Settings. (3:3:1)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: GE First-Year Writing requirement. To be taken before senior year. Not for freshmen.

DESCRIPTION: Developing written and oral communications for professional organizations, including composing and designing employment communications. Incorporates oral presentations.

NOTE: Fulfills GE Advanced Written and Oral Communication requirement.

Course Outcomes

- Compose various commonly occurring business texts, achieving effectiveness in design, organization, content, and style.

- Demonstrate knowledge of generally accepted grammar standards (from Writing & Speaking for Business).
- Give effective oral presentations with appropriate visual support, achieving effectiveness in message, media, and messenger.
- Create effective business graphics and implement effective visual-design principles.

: Honors Communication in Organizational Settings.

Course Outcomes

13. Complete department packet and exit interview.

*Hours include courses that may fulfill university core requirements.

Undergraduate Courses

100-Level Courses

INDES 130 : Visual Literacy. (1.5:3:3)

PREREQUISITE: InDes 131, 132, 133 concurrent in the same semester.

DESCRIPTION: Understand basic principles of design aesthetics and their application to two and three dimensional compositions. Develop a design vocabulary used to present, critique, and defend aesthetics.

Course Outcomes

- Students should:Understand basic design vocabulary of principles and elements of designUnderstand both 2D and 3D aesthetic principles as they relate to industrial designUnderstand basic visual presentation skills
- Students should be able to:Apply principles of design to create aesthetic 2D and 3D CompositionsApply basic software skills in Adobe Illustrator and PhotoshopDiscuss and critique both 2D and 3D compositions using design terminalogy

INDES 131 : Structured Creativity. (1.5:3:3)

PREREQUISITE: InDes 130, 132, 133 concurrent in the same semester.

DESCRIPTION: Basics of how to evaluate, and applying principles of structured creativity to develop new and useful ideas. Understanding of verbal and visual presentations as a tool for communicating new ideas.

Course Outcomes

- Students should:Be able to apply creative thinking methods and toolsApply evaluation tools to determine the value of their ideasApply principles to create unique and useful product, service, or system solutions.Understand principles of presenting compelling and persuasive ideas to others.
- Students should:Understand what is meant by structured creativity.Understand the principles for judging/evaluating creative ideas.Understand the role of Structured Creativity in industrial design.

INDES 132 : Form and Surface Development. (1.5:3:3)

PREREQUISITE: InDes 130, 131, and 133 concurrent in the same semester.

DESCRIPTION: Fundamentals of articulating, exploring, and critiquing the application of aesthetic principles related to geometric and organic form. Opportunities to present, critique, and defend aesthetics.

Course Outcomes

- Students should:Understand aesthetic principles as they relate to geometric and organic formsAnalyze formal qualities and articulate formal languages
- Students should be able to:Generate both rough and finished geometric and organic formsRecognize abstract three-dimensional elements in design context

INDES 133 : Visualization Methods. (1.5:3:3)

PREREQUISITE: InDes 130, 131, 132 concurrent in the same semester.

DESCRIPTION: Introduction of rapid visualization sketching techniques as a tool to develop, evaluate, and communicate ideas.

Course Outcomes

- Students should:Understand sketching as a skill for thinking about and communicating ideas.Understand their own level of sketching ability and work to improve their ability to sketch.Understand and apply basic sketch presentation techniques.
- Students should be able to:Present ideas clearly and pursuasively using sketching as a tool.

200-Level Courses

INDES 210 : Intermediate Computer Applications. (3:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: Industrial design core.

DESCRIPTION: Computer software programs relative to design disciplines.

Course Outcomes

- Students should:Understand and apply principles of good design intent to develop robust modeled geometry.Understand both solid and surface modeling principles and how of effectively apply them.

Course Information

- Manufacturing Engineering Technology (Mfg) Courses

Technology and Engineering Education

Majors

- BS in Technology and Engineering Education

Course Information

- Technology and Engineering Education (TEE) Courses

Faculty

Students should be able to:Use Solidworks and Photoview 360 effectively to develop and communicate ideas.Apply solid modeling to develop 3D parts with: Machining and rapid prototyping.

INDES 214R : Tools, Materials, and Processes for Industrial Design. (2:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: Industrial design core.

DESCRIPTION: Manufacturing tools, processes, and materials commonly used in product design.

Course Outcomes

- Students should:Be able to recognize manufacturing processes used to create products.Be able to recognize basic materials used in products.Understand limitations and advantages of manufacturing processes.Have a basic knowledge of material properties.

INDES 230 : Industrial Design Studio 1. (4:4:2)

WHEN TAUGHT: Fall

PREREQUISITE: Industrial design core.

DESCRIPTION: Industrial design research, analysis, and problem-solving methods.

Course Outcomes

- Student should be able to:Integrate effectively form and function into design solutionsApply design methods and tools to design problemsWork as a team and as an individual
- Students should:Understand how to work effectively toward a design solution using appropriate methods and tools.Understand the interaction between form and function

INDES 231 : Presentation Methods for Industrial Design 1. (2:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: Industrial design core.

DESCRIPTION: Product presentation methods emphasizing perspective, value, scale, accuracy, and color.

Course Outcomes

- Student should:Have an increased appreciation regarding the importance of presentation skills.Understand how to visually represent product materials, colors, and finishes.Understand how to compose a persuasive presentation
- Student will be able to:Apply basic rendering skills including lighting effects, materials, colors, surface finish to rendering and sketches.Explore the difference between analog and digital based rendering techniques
- Benchmarking and critique – looking at the work of others and judging your own work effectively.

INDES 232 : Industrial Design Studio 2. (4:4:2)

WHEN TAUGHT: Winter

PREREQUISITE: INDES 230 & INDES 231

DESCRIPTION: Continuation of InDes 230, emphasizing human factors and ergonomics, restrictions and possibilities of materials and manufacturing, and coherent presentation of problems, processes and ideas.

Course Outcomes

- Student should be able to:Demonstrate skills learned in other classes and how they apply in a studio-based product development process.Demonstrate professional attitude towards deadlines and presentationsSolidify a personal, broadened definition of Industrial Design in the minds of the students.
- Student should:Have deeper experiences in structured creativity in the context of product development.Demonstrate in their own personal design process the characteristics of: Flexibility, Fluency, Originality, Definition.Accept the idea of constraints as a means to be creative. These constraints can include - Human Factors, Manufacturing Processes, Corporate Brand, Price, etc.

INDES 233 : Presentation Methods for Industrial Design 2. (2:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: INDES 231

DESCRIPTION: Continuation of InDes 231.

Course Outcomes

- Student will:Understand how to represent complex topics simply, clearly, and concisely in a compelling manner using principles of information organization and effective presentation.Understand digital tools for the development of presentations
- Student will be able to:Produce effective renderings using vector and raster based computer packages.Effectively combine the principles of perspective construction; orthographic projection; lighting theory based on observation and applied in new ways.Develop more complex simulated materials based on the principles of: local color, lighting, surface finish, pattern, texture, and opacity.Adjust, manipulate, combine, and retouch images using Raster based computer packages.Produce complex presentations for industrial design using both vector and raster based packages in combination.

300-Level Courses

INDES 330R : Industrial Design Studio 3. (4:4:2)

WHEN TAUGHT: Fall

PREREQUISITE: Industrial Design core.

DESCRIPTION: Designer responsibilities, structured and unstructured procedures in problem solving, client relationships, functional relationships, and mechanisms and materials.

Course Outcomes
There are no course outcomes available

INDES 331R : Presentation Methods for Industrial Design 3. (2:2:2)

PREREQUISITE: Acceptance into the BFA program or instructor's consent.

DESCRIPTION: Sketching and rendering techniques focused on surface materials and finishes.

Course Outcomes
There are no course outcomes available

INDES 338 : ID Field Trip Seminar. (.5:Arr:Arr)

WHEN TAUGHT: Winter

PREREQUISITE: Junior level or above in Industrial Design Professional Program.

DESCRIPTION: Field trip to introduce students to professional designers, corporate and consulting design firms.

Course Outcomes
There are no course outcomes available

INDES 339 : History of Products. (3:3:0)

PREREQUISITE: Industrial design core.

DESCRIPTION: Overview of artifacts and products; how they have influenced society from prehistory to present day.

Course Outcomes
- Students should:Understand and recognize design styles, movements, thoughts and practice over the last 150 years.Know and understand significant historical and contemporary designers and their design work
- Student will be able to:Be able to engage in meaningful discussions about designApply design languages

INDES 340 : Graphics Studies for Industrial Design 1. (3:3:3)

WHEN TAUGHT: Fall

PREREQUISITE: BFA acceptance.

DESCRIPTION: Introduction to graphic skills such as corporate identity, packaging design, logo design, and web/interface design elements.

Course Outcomes
- Students should:Understand and apply basic graphic design philosophies, processes, and techniques.Understand basic typography, mechanical production and preparation of finished “comps”Apply principles of graphic design in developing their own collateral.

INDES 352 : Computer Graphics Studio 2. (3:3:3)

WHEN TAUGHT: Winter

PREREQUISITE: INDES 350

DESCRIPTION: Designing interdisciplinary group projects: workflow, team dynamics, and processes of production pipelines.

Course Outcomes
There are no course outcomes available

INDES 388 : Professional Practices of the Designer. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: Admittance to professional program.

DESCRIPTION: Business aspects of the design profession.

Course Outcomes
- Students should:Understand the tools needed for a job search; portfolio and its iterations, resume, and cover letters.Understand and apply principles of networking, contacting, interviewing and negotiating with potential employers.Understand and apply principles of an effecive and compelling portfolio presentation.Understand patents, proposals, contracts, and design briefs.Recognize unethical situations that can arise and how to deal with them.
- Students should be able to:Create and demonstrate effective job hunting skills and materials

INDES 399R : Professional Internship. (1-3:0:0)

PREREQUISITE: School's and faculty advisor's consent.

DESCRIPTION: Work experience in professional design studio evaluated by supervisor.

Course Outcomes
- Student acquires professional experiences in Industrial Design.
- Student demonstrates professional communication skills (report).
- Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

400-Level Courses

INDES 430R : Industrial Design Studio 4. (4:4:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: INDES 330R

DESCRIPTION: Systems design problems from initial research and analysis to final presentation of working drawings and models, with concern for ergonomics, anthropometries, marketing, user and buyer, production, function, and structure.

Course Outcomes
There are no course outcomes available

INDES 455R : Shader Programming. (2:2:2)

WHEN TAUGHT: Fall

DESCRIPTION: Advanced rendering and shading techniques for attaining desired visual effects. Using shading languages for realizing both photorealistic and non-photorealistic imaging.

Course Outcomes
There are no course outcomes available

INDES 475R : Transportation Design. (3:3:3)

PREREQUISITE: Major status; instructor's consent.

DESCRIPTION: Exploration in the aesthetics, human factors, marketing requirements, and presentation aspects unique to transportation design, emphasizing working with outside project sponsors.

Course Outcomes
There are no course outcomes available

INDES 494R : Special Problems in Design. (.5-3:ARR:ARR)

PREREQUISITE: Instructor's consent.

DESCRIPTION: Individual study in area of special interest.

Course Outcomes
There are no course outcomes available

INDES 497R : BFA Final Project. (3:ARR:ARR)

PREREQUISITE: BFA advisor's consent.

DESCRIPTION: Advanced individual project with minimum guidance, showing high degree of competence within chosen major.

Course Outcomes
- Ability to work on an advance individual project with minimum guidance that focuses skills and knowledge learned on a single complex visualization.
- Students will define a area of interest
- Students should:Write a cogent design project proposalWork with judicious guidance on self-directed projectInvestigate chosen problem using design methodsDemonstrate elevated competence in: design skills, grasp of theory, design methodology

INDES 499R : Directed Studies. (.5-6:ARR:ARR)

Course Outcomes

Admission to Degree Program

Admission to the information technology program is open to all BYU students.

Learning Outcomes

- An understanding of computer system components with depth and experience in their integration.
- Creative and analytical thinking skills that provide a basis for technological problem solving.
- The ability to integrate systems for the purpose of facilitating communications with each other.
- The ability to lead and to communicate effectively, both orally and in writing.
- The skills and attitudes of life-long learning.
- The ability to apply knowledge, manage projects, and work effectively in diverse teams.
- An understanding of the application of new and developing technologies with sensitivity for global, societal, organizational, and personal usage issues, compliant with the moral standards of the gospel of Jesus Christ.

The Discipline

Information technology (IT), the technical discipline that solves problems using computing resources, will be taught through a combination of strong theoretical course work and practical application to ensure that all three aspects of the technological educational triumvirate (knowing, thinking, doing) are included. IT professionals from this discipline are competent to design computing systems with due consideration of the performance and compatibility aspects of hardware, software, and digital communication and networking. They can visualize, structure, and implement complex technical solutions.

Professionals in this discipline are also proficient in understanding user needs and communicating technical issues to the organizations and people affected by the computer system. They are "anxiously engaged" in lifelong learning to understand and wisely use new technologies as they become available. Broadly educated at the university level, these professionals have acquired balance in their lives and depth of understanding in technology and its relevance in the broader world context. Because of the influence and leadership roles we expect graduates to have, our students will be encouraged to develop high moral and ethical standards as well as being conversant with and compliant with professional performance standards.

Career Opportunities

Career opportunities are plentiful and rewarding in both large and small companies in technical fields. Graduates will find careers in computer networking, testing, embedded intelligence, digital communications, computer system development, and integration.

General Information

Technical Electives

Six upper-division credit hours of information technology technical courses are required. Selected from courses in the major, these electives must be approved by an advisor prior to taking them.

Students are also strongly advised to strengthen their degree by using additional credit hours to fulfill a minor or gain greater depth in a focused area of the discipline. Some suggested areas are electronic systems, computer science, industrial design, manufacturing, or business leadership. Students are required to indicate their area of study when they apply to the professional program.

High School Background

Recommended high school courses include computer programming, electronics, mathematics, and science courses.

Transfer Students

This degree is designed to have some similarity to computer science and electrical and computer engineering courses in the first few semesters. Students can transfer from these programs in two-year colleges or from other four-year programs.

Special Notice
